## Opel Astra

'I could have done with a copy of Ad Astra in December 2015!' –Tim Peake 'A wonderful, wise and witty guide for space explorers everywhere.' – Richard Osman 'A must read both for intrepid space explorers and misty-eyed dreamers. Now, to space!' – Hannah Fry 'Few people are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.' – Adam Rutherford

Need some space? For almost all human history we've been firmly rooted to the Earth. And, sure, it's got some good things going for it: nice views, friendly inhabitants, good coffee. Air. But what if you want to get off? Whether you've got itchy feet and need a bit of a break, or you're looking for a complete change of scene, this book has all the information you'll need to leave, with FREE expert advice from the men and woman who can actually make it happen. Do I need a passport? How do I know if I have the right stuff? Can I take my dog? What spacesuit do I need? Where am I going to go? What am I going to eat? As well as being a deeply impractical guide to getting off the planet, this is an eclectic and beautifully illustrated mix-tape of space travel stories – both real and imagined. From the migrating lunar geese that flew us to the moon in the 1600's, to Elon Musk's wild plan to get humans to Mars en masse in the future; from the history of early rocket science to the Soviet tortoises that secretly won the space race. A collection for anyone who has looked up in wonder at the stars And then wondered how to get there. 'The next best thing to actually heading off into space.' – Jim Al-Khalili 'Few people

are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.’ – Adam Rutherford ‘If, like me, you dream of going into space, this is definitely the place to start the journey.’ – Dan Snow ‘A must have volume for astronauts and armchair astronauts alike.’ – Helen Sharman OBE ‘Funny, factual and beautiful.’ – Shaun Keavney ‘Read it, make notes, and be ready when the day comes.’ – Helen Czerski

### **Back to the Future: DeLorean Time Machine**

With the explosive increase in the number of mobile devices and applications, it is anticipated that wireless traffic will increase exponentially in the coming years. Moreover, future wireless networks all carry a wide variety of flows, such as video streaming, online gaming, and VoIP, which have various quality of service (QoS) requirements. Therefore, a new mechanism that can provide satisfactory performance to the complete variety of all kinds of flows, in a coherent and unified framework, is needed. In this book, we introduce a framework for real-time wireless networks. This consists of a model that jointly addresses several practical concerns for real-time wireless networks, including per-packet delay bounds, throughput requirements, and heterogeneity of wireless channels. We detail how this framework can be employed to address a wide range of problems, including admission control, packet scheduling, and utility maximization. Table of Contents: Preface / Introduction / A Study of the Base Case / Admission Control / Scheduling Policies / Utility Maximization without Rate Adaptation / Utility Maximization with Rate Adaptation / Systems with Both Real-Time Flows and Non-Real-Time Flows / Broadcasting and Network Coding / Bibliography / Authors' Biographies
