Three Times Carlin

A perfectly gift-able, perfectly cynical, slipcased omnibus of George Carlin's trademark irreverence -- including bonus never-before-published material For four decades, George Carlin has been one of America's favorite comics, known as much for his willingness to take on taboo subjects as for his absurdist wordplay. As an author, he has proved equally popular: With combined sales of more than two million copies, Carlin's three books of razor-sharp and hilarious observations have topped bestseller lists nationwide. Now, just in time for the holidays, Hyperion proudly collects all three volumes -- When Will Jesus Bring the Pork Chops, Napalm and Silly Putty, and Brain Droppings - into one hilarious omnibus, a slipcased edition that also includes new material.

South Africa's water governance hydraulic mission (1912-2008) in a WEF-Nexus context

Eschewing the hyperbole of many current management books Patrick Dawson uses the views and experiences of people from the shop floor to the upper reaches of executive management to further our understanding of complex organizational change processes.

Southern Africa environment outlook

Environmental Physics Third Edition - Sustainable Energy and Climate Change Egbert Boeker & Rienk van Grondelle, VU University Amsterdam, Netherlands Environmental Physics, Third Edition serves as an introduction to physics in the context of societal problems such as energy supply, pollution, climate change and finite resources of fossil fuels and uranium. The emphasis of this text is on physics, i.e. the concepts and principles that help in understanding the ways to produce energy efficiently or to mitigate climate change. Extra attention is given to photosynthesis due to its importance in the field of renewable energy. This thoroughly revised and updated third edition focuses on the utilization of sustainable energy and mitigating climate change. The text explains the physical mechanisms behind climate change and discusses the physics of renewable energy options. Nuclear power is treated in a separate chapter because of its social and political importance. In the final chapter political and social aspects of 'renewable energy and climate change' are reviewed. A distinguishing feature of the text is the discussion of spectroscopy and spectroscopic methods, again from basic concepts, as a crucial means to quantitatively analyze and monitor the condition of the environment, the factors determining climate change and all aspects of energy conversion. This textbook will be invaluable to students in physics and related subjects such as physical chemistry and geophysics. It assumes a basic knowledge in physics and mathematics, and all equations are derived from first principles and explained in a physical way. Supplementary material including sections from earlier editions of this book, a description of environmental experiments for a student's labs and computer codes to expand some of the books' content are available from www.few.vu.nl/environmentalphysics

Construction Safety and Waste Management

This monograph presents an analysis of construction safety problems and on-site safety measures from an economist's point of view. The book includes examples from both emerging countries, e.g. China and India, and developed countries, e.g. Australia and Hong Kong. Moreover, the author covers an analysis on construction safety knowledge sharing by means of updatable mobile technology such as apps in Androids and iOS platform mobile devices. The target audience comprises primarily researchers and experts in the field but the book may also be beneficial for graduate students.

Canadian Who's Who

None Is Too Many

The Martyrdom of Madeline

Eating and its Disorders features contributions by international experts in the field of eating disorders which represent an overview of the most current knowledge relating to the assessment, treatment, and future research directions of the study of eating-related disorders. Presents the newest models and theories for use in the treatment of patients with eating disorders. Written specifically to fulfill the needs of clinical psychologists and therapists. Includes coverage of important service related issues for working with people with eating disorders. Features chapters from a global group of authors which highlight differing methods and perspectives that can be incorporated into clinical practice.

Understanding Organizational Change

Who's who in the West

The mid-twentieth century saw the birth of popular occultism in Europe and the New World, including an interest in witchcraft. Chief among these was Wicca, a recension of ceremonial magic and nature worship advanced by Gerald Gardner and Alex Sanders, now widely regarded as a religion. However, lesser-known streams of the witch-current thrived in the shadows, having older historical roots, and linked to a body of practice - witch-bottles, knotted cord spells, curses, exorcisms, sexual magic, and charms ranging from the conjuration of angels to protection for livestock and hearth. This is Traditional Witchcraft, whose origin in part lies with the sorcery of the cunning-folk of Britain and Colonial America. Eschewing the popular occult limelight, its perpetuation as a mystery-cult continues as a largely closed group of initiates. Now revised and expanded, the second edition of CHILDREN OF CAIN is the definitive history of Traditional Witchcraft and its key operatives in Britain and the United States, and is based on over forty years of research and private collaboration with practitioners of this mysterious form of folk magic.

Social Discredit

Smart Energy Grid Engineering provides in-depth detail on the various important engineering challenges of smart energy grid design and operation by focusing on advanced methods and practices for designing different components and their integration within the grid. Governments around the world are investing heavily in smart energy grids to ensure optimum energy use and supply, enable better planning for outage responses and recovery, and facilitate the integration of heterogeneous technologies such as renewable energy systems, electrical vehicle networks, and smart homes around the grid. By looking at case studies and best practices that illustrate how to implement smart energy grid infrastructures and

analyze the technical details involved in tackling emerging challenges, this valuable reference considers the important engineering aspects of design and implementation, energy generation, utilization and energy conservation, intelligent control and monitoring data analysis security, and asset integrity. Includes detailed support to integrate systems for smart grid infrastructures Features global case studies outlining design components and their integration within the grid Provides examples and best practices from industry that will assist in the migration to smart grids

Shoeshine Girl

This volume offers annotated texts with biographical and historical introductions of four previously unpublished travel journals from the period 1775-1874. The first is an account of a Spanish expedition sent from Mexico to explore the north-west coast of America in 1775, the second an account from a surveying operation in the Straits of Magellan in 1827. The third item is the diary of a voyage of 1828-31 to make observations in the South Atlantic to determine the shape of the Earth and to ascertain the longitudes of a number of ports. The final text is the remarkable record, by the freed African slave, Jacob Wainwright, of how he brought David Livingstone's body back down to the coast of Africa.

All the Bright Company of Heaven

Since the first implementation by Electricité de France on the Goulours dam (France) in 2006, the Piano Key Weir has become a more and more applied solution to increase the discharge capacity of existing spillways. In parallel, several new large dam projects have been built with such a flood control structure, usually in combination with gates. Today, more than 25 Piano Key Weirs are in operation or under construction all over the world. More than 15 years of research and development have enabled detailed investigations of the hydraulic and structural behaviour of the Piano Key Weir complex structure and have provided more and more accurate design equations. Following the proceedings of the first two workshops held in Liege (Belgium - 2011) and Paris (France - 2013), Labyrinth and Piano Key Weirs III collects the contributions presented by people with varied background, from researchers to practitioners, at the 3rd International Workshop on Labyrinth and Piano Key Weirs - PKW 2017 (22-24 February 2017, Qui Nhon, Vietnam). The papers, reviewed and accepted by an International Scientific Committee, summarize the current state-of-the-art on Piano Key Weirs from a theoretical to a practical point of view, and present most of the main projects in operation or under construction. Labyrinth and Piano Key Weirs III is thus a reference for students, practitioners and researchers interested in Dams Engineering.

The American Conflict

By examining Social Credit's anti-Semitic propaganda and the reaction of the Canadian Jewish Congress, Stingel details

their mutual antagonism and explores why Congress was unable to stop Social Credit's blatant defamation. She argues that Congress's ineffective response was part of a broader problem in which passivity and a belief in "quiet diplomacy" undermined many of its efforts to combat intolerance. Stingel shows that both Social Credit and Congress changed considerably in the post-war period, as Social Credit abandoned its anti-Semitic trappings and Congress gradually adopted an assertive and pugnacious public relations philosophy that made it a champion of human rights in Canada. Social Discredit offers a fresh perspective on both the Social Credit movement and the Canadian Jewish Congress, substantively revising Social Credit historiography and providing a valuable addition to Canadian Jewish studies.

Making the Voyageur World

' [a] good, old-fashioned gossip with completely fascinating friends -- and I mean that as a compliment.' - The Court Jeweller '[A] book to be savored; a marvelous work of evocation, narrative and research! Witty, pungent, irreverent and totally absorbing.' -The Esoteric Curiosa 'If there is a moral from this entertaining book, it is simply don't get married. Just take a cheque.' - We Are Cult 'Oh dear, ' said Evelyn Waugh of his society friends, 'these great ladies.' In this book of pen portraits the reader is introduced to obscure ladies who were society stars in their day. From the Churchills to the Mitfords, British and European Royals, to international playboys and film stars, these ladies knew everyone. And everyone knew them, for better or worse. Margaret, Duchess of Argyll: Famous for her naughty polaroids, and whose divorce from her Duke saw 88 men named as her lovers. Mariga Guinness: A bewitching German princess with a harrowing childhood, who fought to preserve Irish buildings and became an icon in the process. Sylvia Ashley: A girl from the wrong side of the tracks who married two lords, two Hollywood stars, and a Russian prince. Joan Wyndham: A bohemian aristocrat who shunned a debutante existence to live a life of debauchery in Chelsea. Enid Lindeman: An Australian wine heiress who married four rich and titled men, and buried them all. Venetia Montagu: A society girl who moved at the centre of H.H. Asquith's wartime government. Irene Curzon: A 'poor little rich girl' who dared to break the rules. Jean Massereene: A dazzling viscountess whose association with Sir Edward Carson almost ruined her reputation. A true eccentric, fashion icon, and champion of the spiritualist movement.

Labyrinth and Piano Key Weirs III

Through a detailed analysis of their unique occupational culture, Making the Voyageur World reexamines the French Canadian workers who dominated the fur trade industry and became iconic images of North American lore.

Environmental Physics

Is Canada really "a peaceable kingdom" with "an unmilitary people"? Desmond Morton says no. This is a country that has been shaped, divided, and transformed by war - there is no greater influence in Canadian history, recent or remote. Through the Cold War, the Gulf War, and after, Canadians had to make difficult decisions about defence and foreign policy, and these events have shaped the country, developing our industries, changing the role of women, realigning our political factions, and changing Canada's status in the world.

Bookhounds of London

An Ennie- and Golden Geek-award-winning supplement for Trail of Cthulhu. These cycles of experience, of course, all stem from that worm-riddled book. I remember when I found it in a dimly lighted place near the black, oily river where the mists always swirl. The Book. Forbidden Tomes. Bookhounds of London is a brand new campaign setting for Trail of Cthulhu, packed with period detail, where the Investigators seek out books about horror and strangeness and become, seemingly inevitably, drawn into the horror themselves. It provides in-depth material on London in the 1930s, carefully slanted towards Mythos investigators. An Ancient City. Bookhounds London is a city of cinemas, electric lights, global power and the height of fashion. Its about the horrors the cancers that lurk in the capital, in the very beating heart of human civilization. A Templar altar might well crouch, mostly forgotten, in the dreary Hackney Marshes, but altars to false gods tower over the metaphorical swamps of Fleet Street and Whitehall. And as for lost, prehuman ruins whos to say what lies under London, if you dig deep enough? Terrible Choices. The PCs arent stalwart G-men or tweedy scholars exploring forbidden frontiers. Instead, they acquire maps (and maybe guidebooks) to those forbidden frontiers from fusty libraries and prestigious auction houses. They are Book-Hounds, looking for profit in mouldy vellum and leather bindings, balancing their own books by finding first editions for Satanists and would-be sorcerers. They may not quite know what they traffic in, or they may know rather better than their clientele, but needs must when the bills come in. This volume includes: 32 authentic full-colour maps with unique new street index of London in the 1930s, and plans of major buildings. A Mythos take on London in the 1930s, packed with contacts, locations and rumours. New abilities such as Document Analysis, Auction and Forgery, as well as new oc

The Voyages of Jacques Cartier

This third edition of the SME Mining Engineering Handbook reaffirms its international reputation as "the handbook of choice" for today's practicing mining engineer. It distills the body of knowledge that characterizes mining engineering as a disciplinary field and has subsequently helped to inspire and inform generations of mining professionals. Virtually all of the information is original content, representing the latest information from more than 250 internationally recognized mining industry experts. Within the handbook's 115 thought-provoking chapters are current topics relevant to today's mining

professional: Analyzing how the mining and minerals industry will develop over the medium and long term--why such changes are inevitable, what this will mean in terms of challenges, and how they could be managed Explaining the mechanics associated with the multifaceted world of mine and mineral economics, from the decisions associated with how best to finance a single piece of high-value equipment to the long-term cash-flow issues associated with mine planning at a mature operation Describing the recent and ongoing technical initiatives and engineering developments in relation to robotics, automation, acid rock drainage, block caving optimization, or process dewatering methods Examining in detail the methods and equipment available to achieve efficient, predictable, and safe rock breaking, whether employing a tunnel boring machine for development work, mineral extraction using a mobile miner, or cast blasting at a surface coal operation Identifying the salient points that dictate which is the safest, most efficient, and most versatile extraction method to employ, as well as describing in detail how each alternative is engineered Discussing the impacts that social and environmental issues have on mining from the pre-exploration phase to end-of-mine issues and beyond, and how to manage these two increasingly important factors to the benefit of both the mining companies and other stakeholders

Eating and its Disorders

Geologists, physicists and ecologists currently promote the idea of a post-Holocene epoch – the Anthropocene. As a result of constant innovation and modernisation in the fields of engineering, natural science, management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment. Humankind has become part of the environmental dynamics, to the extent that they are literally able to change ecosystems. Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere – from the smallest pool of water to the earth’s atmosphere. Comprehensive infrastructure development in water and sanitation, the growing trend to seek additional resources in the form of groundwater, desalinated seawater, and recycled wastewater, as well as special attention being given to capturing and preserving rainwater, bear evidence of a timely response to climate change, population growth and rapid development in many water-stressed regions of the world. The purpose of the book is to provide a historical overview of the manner in which South Africa’s water resources have been governed from a time when the Union of South Africa was formed, in 1910, up to 2008, a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa, notable for increasing levels of aridity and more erratic rainfall patterns. This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country’s water governance system since the establishment in 2014 of the Department of Water and Sanitation. The focus is on the Water–Energy–Food nexus, a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water, energy and food as resources.

These Great Ladies

"Canada under British Rule 1760-1900" by John George Bourinot. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

A Treasury of Canadian Verse

Publishers' International ISBN Directory/International ISBN Agency

During the Second World War, as Canada struggled to provide its allies with food, public health officials warned that malnutrition could derail the war effort. Posters admonished Canadians to "Eat Right" because "Canada Needs You Strong" while cookbooks helped housewives become "housoldiers" through food rationing, menu substitutions, and household production. Ian Mosby explores the symbolic and material transformations that food and eating underwent as the Canadian state took unprecedented steps into the kitchens of the nation, changing the way women cooked, what their families ate, and how people thought about food. Canadians, in turn, rallied around food and nutrition to articulate new visions of citizenship for a new peacetime social order.

Physiology of Sport and Exercise Test Bank

Winner of the National Jewish Book Award (Holocaust Category) Winner of the Canadian Historical Association John A. Macdonald Prize Featured in The Literary Review of Canada 100: Canada's Most Important Books [This] is a story best summed up in the words of an anonymous senior Canadian official who, in the midst of a rambling, off-the-record discussion with journalists in 1945, was asked how many Jews would be allowed into Canada after the war ... 'None,' he said, 'is too many.' From the Preface One of the most significant studies of Canadian history ever written, None Is Too Many conclusively lays to rest the comfortable notion that Canada has always been an accepting and welcoming society. Detailing the country's refusal to offer aid, let alone sanctuary, to Jews fleeing Nazi persecution between 1933 and 1948, it is an immensely bleak and discomfiting story - and one that was largely unknown before the book's publication. Irving Abella and Harold Troper's retelling of this episode is a harrowing read not easily forgotten: its power is such that, 'a manuscript copy helped convince Ron Atkey, Minister of Employment and Immigration in Joe Clark's government, to grant

50,000 “boat people” asylum in Canada in 1979, during the Southeast Asian refugee crisis’ (Robin Roger, The Literary Review of Canada). None Is Too Many will undoubtedly continue to serve as a potent reminder of the fragility of tolerance, even in a country where it is held as one of our highest values.

Labyrinth spillways are almost as old as dam engineering. In spite of the fact that they appear as a very good technical-economical compromise, only 0.1% of large dams are equipped with such weirs. The main reason for this is that traditional labyrinth weirs usually cannot be installed on top of concrete gravity dams as they require a large foundat

Super Seats Co

The life of Lady Desborough - beautiful heiress, aristocratic hostess, unfaithful wife, tragic mother, Edwardian icon. Born in 1867 and orphaned at three, Ettie Fane was brought up by a beloved grandmother and then two adoring, almost incestuous, bachelor uncles. At twenty she married Willy Grenfell, later Lord Desborough. Beautiful, rich, charming and clever, Ettie soon became a leading hostess at the two magnificent country houses she had inherited. Leading politicians, writers and artists were very much part of her circle. But there was a dark side too, as this book will reveal. Ettie could be manipulative and cruel. Her eldest son Julian, after a nervous breakdown at Oxford, rejected her world and values. Nemesis and tragedy were not far away. In 1915 Julian died of war wounds. Six weeks later her second son Billy was killed in action. Her youngest son Ivo would be killed shortly after the war. But despite intense private misery, she reacted with outward courage and self-mastery. Grief revealed the greatness of her spirit. In the 1920s and 1930s she continued to collect new types, especially gifted young men, relishing people of all ages up to her death in 1952, a redoubtable survivor from a vanished age.

Labyrinth and Piano Key Weirs

Children of Cain

Jacques Cartier's voyages of 1534, 1535, and 1541 constitute the first record of European impressions of the St Lawrence region of northeastern North America and its peoples. The Voyages are rich in details about almost every aspect of the region's environment and the people who inhabited it. As Ramsay Cook points out in his introduction, Cartier was more than an explorer; he was also Canada's first ethnographer. His accounts provide a wealth of information about the native people of the region and their relations with each other. Indirectly, he also reveals much about himself and about sixteenth-century European attitudes and beliefs. These memoirs recount not only the French experience with the Iroquois, but also the Iroquois' discovery of the French. In addition to Cartier's Voyages, a slightly amended version of H.P. Biggar's 1924 text, the volume includes a series of letters relating to Cartier and the Sieur de Roberval, who was in command of Cartier on the last voyage. Many of these letters appear for the first time in English. Ramsay Cook's introduction, 'Donnacona Discovers Europe,' rereads the documents in the light of recent scholarship as well as from contemporary perspectives in order to understand better the viewpoints of Cartier and the native people with whom he came into contact.

Law in Action

The history of the Jewish community in Canada says as much about the development of the nation as it does about the Jewish people. Spurred on by upheavals in Eastern Europe in the late nineteenth and early twentieth centuries, many Jews emigrated to the Dominion of Canada, which was then considered little more than a British satellite state. Over the ensuing decades, as the Canadian Jewish identity was forged, Canada itself underwent the transformative experience of separating itself from Britain and distinguishing itself from the United States. In this light, the Canadian Jewish identity was formulated within the parameters of the emerging Canadian national personality. *Canada's Jews* is an account of this remarkable story as told by one of the leading authors and historians on the Jewish legacy in Canada. Drawing on his previous work on the subject, Gerald Tulchinsky illuminates the struggle against anti-Semitism and the search for a livelihood amongst the Jewish community. He demonstrates that, far from being a fragment of the Old World, the Canadian Jewry grew from a tiny group of transplanted Europeans to a fully articulated, diversified, and dynamic national group that defined itself as Canadian while expressing itself in the varied political and social contexts of the Dominion. *Canada's Jews* covers the 240-year period from the beginnings of the Jewish community in the 1760s to the present day, illuminating the golden chain of Jewish tradition, religion, language, economy, and history as established and renewed in the northern lands. With important points about labour, immigration, and anti-Semitism, it is a timely book that offers sober observations about the Jewish experience and its relation to Canadian history.

A Military History of Canada

"A history of the Great Rebellion in the United States of America, 1860-'65: its causes, incidents, and results: intended to exhibit especially its moral and political phases, with the drift and progress of American opinion respecting human slavery from 1776 to the close of the war for the Union "--T.p.

Beyond the Horizon

The forgotten story of the Cook family, Crawley and the Great War.

Food Will Win the War

Who ever heard of a shoeshine girl? The last thing Sarah Ida wants to do is spend the summer with her Aunt Claudia. But when her parents send her away because of problems at home, that is exactly what she has to do. With no allowance and no fun to be had, Sarah Ida decides to look for a job. But who will hire a ten year old? Al, the shoeshine man, will! Sarah loves her job, even if it means getting knee-deep in shoe polish everyday. Then something terrible happens and it looks like the shoeshine stand will have to close forever. If Sarah Ida wants to keep it open, she'll have to learn a few lessons about growing up along the way
