Guide to Port Entry

DOD Contractors' Safety Manual for Ammunition, Explosives and Related Dangerous Material

Annotation Takes account of the new concept in artificial intelligence called soft computing, in which the similarities among the various methods for building intelligent information systems make them alternative choices for a particular application, yet their differences also make them potential complements to be used together in a single system. The 19 invited and 77 session papers cover neural networks, fuzzy logic systems, genetic algorithms and evolutionary programming, expert systems, machine learning, hybrid systems, and applications. No subject index. Annotation copyright by Book News, Inc., Portland, OR.

The thoroughly revised and updated fourth edition of Foodservice Manual for Health Care Institutions offers a review of the management and operation of health care foodservice departments. This edition of the book—which has become the standard in the field of institutional and health care foodservice—contains the most current data on the successful management of daily operations and includes information on a wide range of topics such as leadership, quality control, human resource management, product selection and purchasing, environmental issues, and financial management. This new edition also contains information on the practical operation of the foodservice department that has been greatly expanded and updated to help institutions better meet the needs of the customer and comply with the regulatory agencies' standards. TOPICS COVERED INCLUDE: Leadership and Management Skills Marketing and Revenue-Generating Services Quality Management and Improvement Planning and Decision Making Organization and Time Management Team Building Effective Communication Human Resource Management Management Information Systems Financial Management Environmental Issues and Sustainability Microbial, Chemical, and Physical Hazards HACCP, Food Regulations, Environmental Sanitation, and Pest Control Safety, Security, and Emergency Preparedness Menu Planning Product Selection Purchasing Receiving, Storage, and Inventory Control Food Production Food Distribution and Service Facility Design Equipment Selection and Maintenance Learning objectives, summary, key terms, and discussion questions included in each chapter help reinforce important topics and concepts. Forms, charts, checklists, formulas, policies, techniques, and references provide invaluable resources for operating in the ever-changing and challenging environment of the food-service industry.
