Trade Is Not a Four-Letter Word

"I don't love this job anymore, but should I stay for the pension?" This gut-wrenching question is common for many people working in pensionable careers. But how much is your pension worth? And, is staying worth it? Since 2017, Grampus Maximus has researched and written about this critical decision point, which he calls The Golden Albatross. Having served 20 years in the U.S. Military, he too struggled with the same questions, and now he helps others learn from his mistakes. If your job offers a pension, then this book is a must-read. Easily learn how to calculate your pension's objective value and weigh it against the subjective benefits of leaving for more fulfilling work. When done, you will agree, it was worth it.

Since its birth as a motorcycle company in 1949, Honda has steadily grown into one of the world's largest automakers and engine manufacturers, as well as one of the most beloved, most profitable, and most consistently innovative multinational corporations. What drives the company that keeps creating and improving award-winning and bestselling models like the Civic, Accord, Odyssey, CR-V, and Pilot? According to Jeffrey Rothfeder, what truly distinguishes Honda from its competitors, especially archrival Toyota, is a deep commitment to a set of unorthodox management tenets. The Honda Way, as insiders call it, is notable for decentralization over corporate control, simplicity over complexity, experimentation over Six Sigma-driven efficiency, and unyielding cynicism toward the status quo and whatever is assumed to be the truth. Those are just a few of the ideas that the company's colorful founder Soichiro Honda embedded in the DNA of his start-up sixty-five years ago. As the first journalist allowed behind Honda's infamously private doors, Rothfeder interviewed dozens of executives,

engineers, and frontline employees about Honda's management practices and global strategy. He shows how the company developed and maintained its unmatched culture of innovation, resilience, and flexibility--and how it exported that culture to other countries that are strikingly different from Japan, establishing locally controlled operations in each region where it lays down roots.

For most of its lifespan, the Honda Odyssey has been a favored pick among minivans. Although the vehicle had a rather humble debut, it quickly hit its stride once Honda came out with the second-generation model, which featured a spacious cabin and an innovative third-row seat that folds into the floor. Now in its fourth generation, the Odyssey is one of the top minivans currently available. The Honda Odyssey has made a strong showing, usually earning top honors in every minivan comparison test we've held. There are other minivans that rival the Odyssey's family-friendly features, but the Honda combines those attributes with confident driving dynamics and a long-standing record of reliability, making it an all-around family favorite. Quantitative Corporate Finance

“Competition is the bane of the free enterprise system.” —Anonymous business mogul What people on the front lines—making, marketing, and selling products and services—really want is to be alone in the marketplace, to have a space that they own for a long enough period of time so they can make some real money. In this short, powerful book, Milind Lele shows you how. Conventional wisdom attributes winning to having the best products at the lowest prices, a great brand, superior management, and the lowest overhead. All are obviously of great importance, but in actuality anyone can achieve them. Dr. Lele shows that winning comes from focusing on these monopoly rules: • What patch of open market space does

this business own—or could it own? • Is the space really open or is it wishful thinking? • Are there enough customers whose needs are not being met and are they willing to spend money to have those needs met? • How long will this space remain open and why? • What do you have to do to capture it and wall it off? • When will the party end and what do we do next? For example, for many coffee lovers there is no one but Starbucks. The moment people found out what coffee could, and should, taste like it was as if a giant lightbulb went off inside their heads—and Starbucks had a monopoly. The best monopoly opportunities are situational, often soft and intangible. They're segments, not the mass market, and often in the customer's mind. For the customer there is no one but you, since what you provide can't be easily copied, duplicated, or ripped off. Monopoly Rules couldn't come at a better time, as an almost perfect storm seems to be hitting every business. Customers are changing and the homogenous mass market has gone the way of the nickel soda. Now the game is winning market segments. In this world, Monopoly Rules provides a new way to think and take action and stay ahead of the game. Also available as an eBook

Trade myths, busted and debunked, with the help of six surprising everyday goods—the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the blockbuster HBO series Game of Thrones Trade allows us to sell what we produce at home and purchase what we don't. It lowers prices and gives us greater variety and innovation. Yet understanding our place in the global trade network is rarely so simple, and today's workers are wary of being taken advantage of. Trade has become an easy excuse for struggling economies, a scapegoat for our failures to adapt to a changing world, and—for many Americans on both the right and the left—nothing short of a four-letter word. But as Fred P. Hochberg reminds us, trade is easier to understand than we commonly think. In *Trade Is Not a Four-Letter Word*, you'll learn how NAFTA became a populist punching bag on both sides of the aisle. You'll learn how Americans can avoid the grim specter of the \$10 banana. And you'll finally discover the truth about whether or not, as President Trump once famously tweeted, "trade wars are good and easy to win." (Spoiler alert—they aren't.) Hochberg unravels the mysteries of trade by pulling back the curtain on six everyday products, each with a surprising story to tell: the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the smash hit HBO series Game of Thrones. Behind these six examples are stories that help explain not only how trade has shaped our lives so far but also how we can use trade to build a better future for our own families, for America, and for the world. There is no going back. *Trade Is Not a Four-Letter Word* is the antidote to today's acronym-laden trade jargon pitched to voters with simple promises that rarely play out so one-dimensionally. It's time to read between the lines. Packed with colorful examples and highly digestible explanations, *Trade Is Not a Four-Letter Word* entertains as it dispels popular misconceptions and arms readers with a thorough grasp of the basics of trade.

“With humor, vulnerability, and heart, Kristen Howerton writes unflinchingly about what it means to be raising children in today’s world and how to liberate ourselves from the myth of perfect motherhood.”—Glennon Doyle, author of *Untamed* and *Love Warrior*, founder of Together Rising In Rage Against the Minivan, blogger, podcaster, and licensed marriage and family therapist Kristen Howerton lends solidarity to those who love their kids like crazy but feel like parenting is making them crazy, too. With her signature blend of vulnerability, sarcasm, and insight, Howerton shares her unexpected journey from infertility to adoption to pregnancy to divorce to dealing with the shock and awe of raising teens. This book is for • the parent who had it totally figured out before they had kids • the parent who said “I will never . . .” and now they have • the parent who needs a time-out and a nap as badly as their child does • the parent who looks like they have it all together but feels like a hot mess on the inside • the parent who looks like a hot mess on the outside, too • the parent who asks Am I good enough? Doing enough? Doing it right? What’s wrong with me? What’s wrong with these children? Are they eighteen yet? Recounting her successes, trials, mishaps, and hard-won wisdom as a parent of four kids—both white and black—Howerton tackles many of the thorny issues parents face today, like hard conversations about racism, disciplining other people’s kids, the reality of Dad Privilege, and (never) attaining that elusive work/life balance. Whether it’s about toddler tantrums or teen angst, Howerton reveals how she learned to opt out from the pressure to do it all perfectly and opt in to excelling at average. Poignant and relatable, *Rage Against the Minivan* is a permission slip to allow yourself to be a “good enough” parent, learning how to love your kids well while letting yourself off the hook.

How do some monuments become so socially powerful that people seek to destroy them? After ignoring monuments for years, why must we now commemorate public trauma, but not triumph, with a monument? To explore these and other

questions, Robert S. Nelson and Margaret Olin assembled essays from leading scholars about how monuments have functioned throughout the world and how globalization has challenged Western notions of the "monument." Examining how monuments preserve memory, these essays demonstrate how phenomena as diverse as ancient drum towers in China and ritual whale-killings in the Pacific Northwest serve to represent and negotiate time. Connecting that history to the present with an epilogue on the World Trade Center, *Monuments and Memory, Made and Unmade* is pertinent not only for art historians but for anyone interested in the turbulent history of monuments—a history that is still very much with us today. Contributors: Stephen Bann, Jonathan Bordo, Julia Bryan-Wilson, Jas Elsner, Tapati Guha-Thakurta, Robert S. Nelson, Margaret Olin, Ruth B. Monuments and Memory, Made and Unmade

The inspiring, life-changing bestseller by the author of *LEADERS EAT LAST* and *TOGETHER IS BETTER*. In 2009, Simon Sinek started a movement to help people become more inspired at work, and in turn inspire their colleagues and customers. Since then, millions have been touched by the power of his ideas, including more than 28 million who've watched his TED Talk based on *START WITH WHY* -- the third most popular TED video of all time. Sinek starts with a fundamental question: Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with *WHY*. They realized that people won't truly buy into a product, service, movement, or idea until they understand the *WHY* behind it. *START WITH WHY* shows that the leaders who've had the greatest influence in the world all think, act, and communicate the same way -- and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with *WHY*.

From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders-including Chrysler himself and Lee Iacocca-emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.

In this wide-ranging survey of ancient Greek narrative from archaic epic to classical prose, Alex Purves shows how stories unfold in space as well as in time. She traces a shift in authorial perspective, from a godlike overview to the more focused outlook of human beings caught up in a developing plot, inspired by advances in cartography, travel, and geometry. Her analysis of the temporal and spatial dimensions of ancient narrative leads to new interpretations of important texts by Homer, Herodotus, and Xenophon, among others, showing previously unnoticed connections between epic and prose. Drawing on the methods of classical philology, narrative theory, and cultural geography, Purves recovers a poetics of spatial representation that lies at the core of the Greeks' conception of their plots.

Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming-even hopeless? As Diane MacEachern argues in Big Green Purse, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world-women. MacEachern's message is simple but revolutionary. If women harness the "power of their purse" and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities-cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more-where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually "green" and those that are simply marketed as "ecofriendly." Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, Big Green Purse will become the "green shopping bible" for women everywhere who are asking, "What can I do?"
