I got this email about a new release coming out. But it said nothing more than "Dillard was releasing something new, and did I want to be part of it?" I knew of Mike Dillard from his days in Magnetic Sponsoring. This is where he "almost single-handedly revolutionized the Network Marketing industry" - simply by introducing them to Attraction Marketing, and the Self-Liquidating Offer ("Funded Proposal") After that, he'd gone on to build something called the Elevation Group which I hadn't paid much attention to, since it was beyond my price range. Then I got another email saying how to login to the affiliate members area - and once I got in, I started reviewing his descriptions about what was being offered The reason I'm finally publishing this - is so you can learn from someone who's been there, drunk the Kool-Aid, and survived.

Penguin Specials are designed to fill a gap. Written to be read over a long commute or a short journey, they are original and exclusively in digital form. This is Toby Young's guide to setting up a Free school. In September 2011, one of the most radical and controversial education reforms in the UK became a reality when twenty-four Free Schools - funded by the tax-payer but shaped and run by parents, teachers and charities, independently of Local Authority control - opened their gates to children across the country. They are the centrepiece of the Coalition government's argument for a 'Big Society' and have provided a key battleground between political combatants on all sides. The crusade on their behalf in the face

of fierce opposition has been led by the outspoken journalist Toby Young, whose West London Free School was one of the first. In this witty, pithy essay, Young explains step-by-step how he gathered support and saw his vision through, from securing premises, teachers and students to fighting off opponents at every turn. At once an argument and a how-to guide, this timely Penguin Special is the essential manifesto for the Free Schools movement and a must-read for supporters and detractors alike.

### **Weber's Big Book of Grilling**

Synopsis: Web sites are an essential tool that every business must have in today's economy. Only 15 years ago, you could count the number of Web sites in the world with five or six digits; today there are between 15 and 30 billion active Web sites and millions more being added every day. Creating a Web site can be a great way to market a new product, promote your business plan, promote yourself, or simply share a few details about your life with the world. The cost of creating a Web site has risen right alongside the number of Web sites created though and many people are nervous about being able to utilize this revolutionary medium without breaking the bank. This book has been created for just such people, outlining for you in perfect detail everything you need to know to create a traffic attracting Web site, while spending little or no money at all. There are countless resources available, and when you put them all together, they provide a complete toolkit that can make anyone a top notch Web site in no time flat. You will learn how to buy a domain name and host your Web site for less than \$15, with no additional fees charged to your account. You will learn how to use open source software like Wordpress, Joomla, and Mambo to create a platform on which you can build anything you want. You will learn how blogging has made Web site creation easier than ever and how sites like Squidoo, Facebook, and MySpace allow you more

freedom to build traffic and draw more attention to what you are advertising at any given time. You will learn how to use common software to edit and tweak your Web sites and how to read the basic code that all Web sites are created in. In addition, an entire chapter is devoted to teaching you how to promote your Web site and draw traffic to it, without spending a dime in the process. You will learn why information is the most valuable asset on the market and how you can become an expert in a niche of your choosing, making money to cover any fees associated with your Web site. With the added resource of hours of interviews with web professionals you will learn which free resources not to use and which ones to outright avoid, as well as how to find and install open source modules and tools to enhance the look and feel of your site. You will learn where you can find copyright-free images to use on your Web sites and how to get free copy that will draw traffic and entertain your visitors. You will learn how to keep a free Web site from falling into the traps the major search engines set to stop spam and ultimately how to leverage new friends, business contacts, and interactions out of your Web site. If you are now, or have ever, considered starting your own Web site before, this book will map the way for you.
