The Child Whisperer

Janet Lansbury's advice on respectful parenting is quoted and shared by millions of readers worldwide. Inspired by the pioneering parenting philosophy of her friend and mentor, Magda Gerber, Janet's influential voice encourages parents and child care professionals to perceive babies as unique, capable human beings with natural abilities to learn without being taught; to develop motor and cognitive skills; communicate; face age appropriate struggles; initiate and direct independent play for extended periods; and much more. Once we are able to view our children in this light, even the most common daily parenting experiences become stimulating opportunities to learn, discover, and to connect with our child. "Elevating Child Care" is a collection of 30 popular and widely read articles from Janet's website that focus on some of the most common infant/toddler issues: eating, sleeping, diaper changes, communication, separation, focus and attention span, creativity, boundaries, and more. Eschewing the quick-fix 'tips and tricks' of popular parenting culture, Janet's insightful philosophy lays the foundation for a closer, more fulfilling parent/child relationship, and children who grow up to be

authentic, confident, successful adults.

Harvard psychologist Richard Weissbourd argues incisively that parents—not peers, not television—are the primary shapers of their children’s moral lives. And yet, it is parents’ lack of self-awareness and confused priorities that are dangerously

undermining children's development. Through the author's own original field research, including hundreds of rich, revealing conversations with children, parents, teachers, and coaches, a surprising picture emerges. Parents' intense focus on their children's happiness is turning many children into self-involved, fragile conformists. The suddenly widespread desire of parents to be closer to their children—a heartening trend in many ways—often undercuts kids' morality. Our fixation with being great parents—and our need for our children to reflect that greatness—can actually make them feel ashamed for failing to measure up. Finally, parents' interactions with coaches and teachers—and coaches' and teachers' interactions with children—are critical arenas for nurturing, or eroding, children's moral lives. Weissbourd's ultimately compassionate message—based on compelling new research—is that the intense, crisis-filled, and profoundly joyous process of raising a child can be a powerful force for our own moral development.

Original.

The Parents We Mean to Be

"So what? All the other kids get to do it!" Few behavioral problems challenge and frustrate parents, caregivers, and teachers as does verbal rudeness in children of any age. Reinforced by the wise-cracking kids on TV and in the movies, backtalk has become all too common among today's youngsters. But there is nothing cute about this behavior. Remarks like "Yeah, right," "Big deal," and "Make me" -- form children as young as three -- get in the way of real communication between parents and kids, and can also be detrimental to a child's social and intellectual development. Now two experts in the field share their simple and specific four-step program for ending backtalk and restoring balance in relationships between parents and children, from preschoolers to teens. You'll learn how to recognize backtalk, how to choose and enact a response that will make sense to you and the backtalker, and when to disengage from the struggle and move forward. Full of advice and encouragement as well as suggestions on how to keep track of what works and what doesn't, Backtalk can be put to use immediately, before you hear another "Whatever."
