Young Gabe's is a story of heartache and jubilation. He's a child slave freed after the Civil War. He sets off to reunite himself with his mother who was sold before the war's end. "Come morning, the folks take to the road again, singing songs, telling stories, and dream-talking of the lives they're gonna live in freedom. And I follow, keeping my eyes open for my mama. Days pass into weeks, and one gray evening as Mr. Dark laid down his coat, I see a woman with a yellow scarf 'round her neck as bright as a star. I run up to grab her hand, saying, Mama?" Gabe's odyssey in search of his mother has an epic American quality, and Keith Shepherd's illustrations—inspired deeply by the narrative work of Thomas Hart Benton—fervently portray the struggle in Gabe's heroic quest. Selected as a 2012 Skipping Stones Honor Book and for the 2012 IRA Teacher's Choices Reading List. A. Alex Rider Graphic Novel 6: Ark Angel

Love, science, and politics collide in this sharp assessment of who we are now, in a generous selection of work by the award-winning poet. The terminator--the line, perpendicular to the equator, that divides night from day--is the organizing concept for this collection, which examines a world where "pert, post-apocalyptic / entertainment trades have trod the pocked / planet raw." Kenney's division of light verse from darker poems serves to remind us that what makes us laugh is often dead serious, and what's most serious can be best understood through wordplay, an ironic eye, the cleaving and joining magically effected by metaphor. With grace and candor, Richard Kenney thumbs through our troubles like a precious but scratched collection of vinyl- "the nature of emotion's analog, while languages are digital." From "Siri, Why Do I Wear a Necktie?" to the eternal springing of love ("Magnetic swipe to the blinking lock / is me to you"), Kenney reminds us that art's the best weapon to maintain our wits in very challenging times.

Sherlock Holmes: The Collection (Manor Books Publishing)

This eBook edition features exclusive bonus content, Conn Iggulden's original short story "Fig Tree." One of history's most notorious assassinations sets the stage for a riveting tale of political intrigue, epic battle, and righteous retribution in a new novel of ancient Rome from #1 New York Times bestselling author Conn Iggulden. THE BLOOD OF GODS Julius Caesar has been cut down. His blood stains the hands of a cabal of bold conspirators, led by famed general Marcus Brutus—whom Caesar once called a friend. Have these self-proclaimed liberators bravely slain a power-mad tyrant or brutally murdered the beloved Father of Rome? Hailed as heroes by a complicit Senate and granted amnesty, the killers eagerly turn toward

plotting the empire's future under their control. But Caesar's death does not rest easily with all of Rome. For two men whose bonds of friendship, family, and fidelity to the emperor are unbreakable, the shocking assassination is nothing less than treason. And those responsible must pay with their lives. Through countless battles and years of peace, Marc Antony has wielded a sword and raised a cup at Caesar's side. Now, in the wake of the cold-blooded coup, he is powerless against the political might of Brutus and his treacherous senators. Yet with no weapons other than eloquence and outrage, Antony will turn the tide of public opinion and spark a rebellion that will set the streets of Rome ablaze. At the same time, Gaius Octavian, adopted son and chosen heir of Caesar, has gained wealth and influence beyond imagining. But the soul-deep wound of his father's death will never be healed by gold or power. He will rest only with the blood of the killers on his blade. Drawn together by their common cause, Antony and Octavian marshal their forces into an avenging army on a mission to reunite all that Caesar's fall has torn asunder. Even as his cohorts flee for their lives—or fall prey to vigilantes—a defiant Brutus vows never to relinquish what his ruthless ambition has won him. As opposing legions join in mortal combat, the destiny of Rome will turn on which of their commanders is the mightiest and most cunning. Marking the author's triumphant return to the setting of his celebrated Emperor series, *The Blood of Gods* unfolds with unmatched power, electric with the high-adventure storytelling, captivating historical detail, and stirring battle scenes for which Conn Iggulden is renowned. Praise for Conn Iggulden's Empire series "Dramatic historical fiction to keep adults turning pages like enthralled kids . . . [Iggulden] is a grand storyteller. . . . A spirited, entertaining read."—USA Today "Exhilarating . . . Words like 'brilliant,' 'sumptuous' and 'enchanted' jostle to be used, but scarcely convey the way Iggulden brings the schoolbook tale to life, or the compelling depictions of battle, treachery and everyday detail in a precarious world well lost but vividly re-created."—Los Angeles Times "What Robert Graves did for Claudius, Conn Iggulden now does for the most famous Roman emperor of them all—Julius Caesar."—William Bernhardt, author of *Criminal Intent* "[Iggulden] excels at describing battle scenes both small-scale and epic."—The Seattle Times "Utterly marvelous . . . Solid research and a real knack for character development bring [Julius Caesar] to life in a truly magical, electrifying way."—The Telegram (St. John's, Newfoundland)

Gooney Bird And The Room Mother

Based on the latest missions results and supported by commissioned artwork, this book explores the possible lessons we may learn from exoplanets. As the number of known Earth-like objects grows significantly, the author explores what is known about the growing roster of "pale blue dots" far afield. Aided by an increased sensitivity of the existing observatories, recent discoveries by Keck, the Hubble Space Telescope, and Kepler are examined. These findings, once thought to be closer to the realm of science fiction, have fired the imaginations of the general public as well as scientists. All of us are mesmerized by the possibility of other Earth-like worlds out there. Author Michael Carroll asks the tough questions of what the expected gain is from identifying these Earth analogs spread across the Universe and the reasons for studying them. Potentially, they could teach us about our own climate and Solar System. Also explored are the more remote

options of communication between or even travel to these distant yet perhaps not so dissimilar worlds.

The Collected Writings of Michael Snow

The thrilling sequel to S.J. Kincaid's New York Times bestselling novel, *The Diabolic*, which TeenVogue.com called "the perfect kind of high-pressure adventure." It's a new day in the Empire. Tyrus has ascended to the throne with Nemesis by his side and now they can find a new way forward—one where they don't have to hide or scheme or kill. One where creatures like Nemesis will be given worth and recognition, where science and information can be shared with everyone and not just the elite. But having power isn't the same thing as keeping it, and change isn't always welcome. The ruling class, the Grandiloquy, has held control over planets and systems for centuries—and they are plotting to stop this teenage Emperor and Nemesis, who is considered nothing more than a creature and certainly not worthy of being Empress. Nemesis will protect Tyrus at any cost. He is the love of her life, and they are partners in this new beginning. But she cannot protect him by being the killing machine she once was. She will have to prove the humanity that she's found inside herself to the whole Empire—or she and Tyrus may lose more than just the throne. But if proving her humanity means that she and Tyrus must do inhuman things, is the fight worth the cost of winning it?

Witch for a Week

For lovers of thrilling adventure and grand history, the bestselling co-author of the #1 New York Times bestseller *The Dangerous Book for Boys* has written a magnificent novel with a hero for the ages: the legendary, visionary conqueror Kublai Khan. A succession of ruthless men have seized power in the wake of Genghis Khan's death—all descendants of the great leader, but none with his indomitable character. One grandson, Guyuk, strains the loyalties of the tribes to the breaking point, and another, Mongke, brutally eliminates the opposition and dispatches his younger brothers Kublai and Hulegu to far-flung territories. Hulegu displays his barbarity with the savage destruction of Baghdad and his clash with the Khan's age-old enemies, the cult of assassins. But it is Kublai—refined and scholarly, always considered too thoughtful to take power—who will devise new ways of warfare and conquest as he builds the dream city of Xanadu and pursues the ultimate prize: the ancient empire of Sung China. His gifts will serve him well when an epic civil war breaks out among brothers, the outcome of which will literally change the world. BONUS: This edition includes an excerpt from Conn Iggulden's *The Blood of Gods*. "Conqueror is as real as military fiction gets. Conn Iggulden's story of one of history's most ferocious and brilliant warriors is full of lessons for our warfighters today."—Gunnery Sergeant Jack Coughlin, USMC (ret.), New York Times bestselling author of *Shooter* and *Kill Zone: A Sniper Novel* "A rollicking, dangerous and often very gory gallop through the largest land empire the world has ever known."—Sunday Express (U.K.) "A thrilling journey, rippingly told . . . Iggulden's most satisfying to date."—The Daily Telegraph (U.K.)

An insightful look at how to succeed by going against the crowd Collectively, people think and act in ways that are different from how they think and act as individuals. Understanding these differences, says William (Bill) Bonner-a longtime maverick observer of the financial world and the vagaries of the investing public-is vital to preserving your wealth and personal

dignity. From the witch-hunts of the early modern world to the war on terror, from dot-com mania to the real estate bubble, people have always been caught up in frauds, conceits, and wild guesses-often with devastating results. In *Mobs, Messiahs, and Markets*, Bonner and coauthor Lila Rajiva show groupthink at work in an improbable array of instances throughout history and reveal why swimming against the current pays. Shares the deeper secrets of investing and pushes you to question what this means for your financial well-being Explains why people so often abandon good sense and good behavior to "follow the crowd" Offers concrete advice on how you can avoid the "public spectacle" of modern finance The authors' cautionary tale of bubble economies reveals how the gush of credit let loose by Alan Greenspan has wreaked havoc on our lives-but their thoughtful and always entertaining approach also offers some sound investing principles for avoiding the pitfalls of the public spectacle, thinking for yourself, and protecting your money, your sanity, and your soul.

The Promised Neverland, Vol. 4

Writing, for Michael Snow, is as much a form of "art-making" as the broad range of visual art activities for which he is renowned, including the "Walking Woman" series and the film *Wavelength*. Conversely, many of the texts included in this anthology are as significant visually as they are at the level of content — they are meant to be looked at as well as read. Situated somewhere between a repository of contemporary thought by one of our leading Canadian artists and a history book as it brings to light some important moments in the cultural life of Canada since the 1950s, these texts tell their own story, marking the passage of time, ideas and attitudes. The works included here, ranging from essays and interviews and record album cover notes to filmscripts and speeches (which, in Snow's hands, often fall into the category of performance art), are not only "built for browsing," they offer insights into both the professional and the private Snow. Together, they expand the context of Snow's work and show the evolution of a great Canadian artist, beginning with his early attempts at defining art, to his emergence and recognition on the international art scene. This book is one of four books that are part of the Michael Snow Project. Initiated by the Art Gallery of Ontario and The Power Plant Gallery, the project also includes four exhibitions of his visual art and music.
