Frank Bergon's astonishing portrayals of people in California's San Joaquin Valley reveal a country where the culture of a vanishing West lives on in many twenty-first-century Westerners, despite the radical technological transformations around them. All are immigrants, migrants, their children, or their grandchildren whose lives intertwine with the author's, including several races and ethnicities: Chicanos, Mexicans, African Americans, Italians, Asians, Native Americans, Scots-Irish descendants of Steinbeck's Okies, and Basques of the author's own heritage. Bergon presents a powerful array of rural and small-town Westerners who often see themselves as part of a region and a way of life most Americans aren't aware of or don't understand, their voices unheard, their stories untold. In these essays, Westerners from the diverse heritage of the San Joaquin Valley include California's legendary Fred Franzia, the maker of the world's best-selling Charles Shaw wines dubbed "Two-Buck Chuck," and Darrell Winfield, a Dust Bowl migrant and lifelong working cowboy who for more than thirty years reigned as the iconic Marlboro Man. Their voices help us understand the complexities of today's rural West, where Old West values intersect with New West realities. This is the West (and America today)—a region in conflict with itself.

Handsaw Essentials

Once you master the use of handsaws, you'll be awed by the simple power of this humble tool. If you can see and follow a line - any line - you can cut the line. There's no need for crazy setups or jigs; just grab the right saw and start cutting - any angle, any shape. Complex joinery becomes no more than a series of lines to cut on your stock. Yet many woodworkers - both beginners and professionals - are intimidated by handsaws. Handsaw Essentials - compiled from more than a decade's worth of blog entries and magazine articles - will change that. Christopher Schwarz and the editors and contributors to Popular Woodworking help you choose the right saw for your budget and project, use it successfully and keep it cutting like new.

The Nile River was crucial to the growth of Egyptian civilization. Maps help illustrate the contrast between river and desert, and engaging text explains how geography influenced Egypt's settlement and migration patterns and even its religion. This book addresses people's relationship to their environment, a key social-studies concept.

Stewart's Clinical Removable Partial Prosthodontics

From January to July 1942, more than seventy-five ships sank to North Carolina's "Graveyard of the Atlantic" off the coast of the Outer Banks. German U-boats sank ships in some of the most harrowing sea fighting close to America's shore. Germany's Operation Drumbeat, led by Admiral Karl Donitz, brought fear to the local communities. A Standard oil tanker sank just sixty miles from Cape Hatteras. The U-85 was the first U-boat sunk by American surface forces, and local divers later discovered a rare Enigma machine aboard. Author Jim Bunch traces the destructive history of world war on the shores of the Outer Banks.

Volkswagen Fox Service Manual

"Bucket of Blood" is what a coal town was called when bloodshed occurred to establish a worker's union. During the 1927-1928 strike in the western Pennsylvania coalfields, Russellton became known as such a place. In an effort to break the strike, special Coal and Iron Police were brought into the area to evict the mine families from their company houses. These men imposed unconstitutional restrictions to harass the people and keep out relief workers and organizers. It was a time of brutal beatings, rape, and murder. Without union representation, the workers were constantly exploited. Because the company used many weapons to keep them enslaved, the miners' families were forced to live in abject poverty. The miner had only one weapon, the strike. *Bucket of Blood: The Ragman's War* chronicles the deprivations and indignities suffered by the families in the Russellton camps during the strike. Author R.S. Sukle explores the glimmers of hope appearing through relief efforts by the sons of a local farmer who become union activists. Ragman, a mine mechanic, walks out with the other men. Against his intentions, he is drawn into the struggle by his brothers, and the abuse that is heaped on his family by the Coal and Iron Police. The killing of a state Coal and Iron Policeman in Russellton is a local legend. The killer was never identified. This story has been passed down in certain families, each with their own version. Each claims the killer as a relative. *Bucket of Blood* is one of those stories.

Two-Buck Chuck & The Marlboro Man

In this stunning follow-up to his best-selling book, *The Five Temptations of a CEO*, Patrick Lencioni offers up another leadership fable that's every bit as compelling and illuminating as its predecessor. This time, Lencioni's focus is on a leader's crucial role in building a healthy organization--an often overlooked but essential element of business life that is the linchpin of sustained success. Readers are treated to a story of corporate intrigue as the frustrated head of one consulting firm faces a leadership challenge so great that it threatens to topple his company, his career, and everything he holds true about leadership itself. In the story's telling, Lencioni helps his readers understand the disarming simplicity and power of creating organizational health, and reveals four key disciplines that they can follow to achieve it.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

John Deere 80 Tractor Parts Manual

This book is targeted at first level supervisors who want to become the best supervisor that their company has ever seen. It is based upon the author's 30 years of management experience.
