Searching for a safe haven for her child sends a woman into the arms of the enemy and in the path of a revolt. All Iris Jenson wants is a safe place to raise her autistic six-year-old son Thomas. She thinks she's found it on Haven, an Earther colony located within the Kalquorian Empire's borders. Making a fresh start under the watchful eyes of Earth's former enemy has its challenges, but it also possesses opportunities to live free of fear, something Iris hasn't had in a long time. Love is an added surprise when Haven's governor Dramok Ospar and his clanmates Nobek Jol and Imdiko Rivek enter the young widow and child's lives. Trouble is brewing on Haven Colony, however. Insurgent Earthers want to free themselves of Kalquor's influence, and Kalquor itself is on the brink of a revolt, led by the shadowy figure known only as the Basma. Then a violent ghost from Iris' past reappears and threatens to snatch Thomas from those who love him. Ospar's clan races against time to save Haven from a bloody rebellion and an innocent child from the grasp of a monster.

Cool Things to Do

Pharmaceutical Analysis Vol. - I

This book is the first to treat the chemistry of superheavy elements, including important related nuclear aspects, as a self contained topic. It is written for those – students and novices -- who begin to work and those who are working in this

fascinating and challenging field of the heaviest and superheavy elements, for their lecturers, their advisers and for the practicing scientists in the field – chemists and physicists - as the most complete source of reference about our today's knowledge of the chemistry of transactinides and superheavy elements. However, besides a number of very detailed discussions for the experts this book shall also provide interesting and easy to read material for teachers who are interested in this subject, for those chemists and physicists who are not experts in the field and for our interested fellow scientists in adjacent fields. Special emphasis is laid on an extensive coverage of the original literature in the reference part of each of the eight chapters to facilitate further and deeper studies of specific aspects. The index for each chapter should provide help to easily find a desired topic and to use this book as a convenient source to get fast access to a desired topic. Superheavy elements – chemical elements which are much heavier than those which we know of from our daily life – are a persistent dream in human minds and the kernel of science fiction literature for about a century.

What you eat and drink can affect the way your medicines work. Use this guide to alert you to possible "food-drug interactions" and to help you learn what you can do to prevent them. In this guide, a food-drug interaction is a change in how a medicine works caused by food, caffeine, or alcohol. A food-drug interaction can: prevent a medicine from working the way it should cause a side effect from a medicine to get worse or better cause a new side effect A medicine can also change the way your body uses a food. Any of these changes can be harmful. This guide covers interactions between some common prescription and over-the counter medicines and food, caffeine, and alcohol. These interactions come from medicine labels that FDA has approved. This guide uses the generic names of medicines, never brand names.

Wrestling with the Devil

Baillie's eminently readable dramas stand at the crossroads of the Scottish Enlightenment and early Romanticism, and compellingly engage with questions of women's rights. Her exploration of the passions, first published in 1798, is here reissued with a wealth of contextual materials including "The Introductory Discourse," Baillie's own brand of feminist literary criticism. The three plays included here are "Count Basil: A Tragedy," and "The Tryal: A Comedy," which show love from opposing perspectives; and "De Monfort: A Tragedy," which explores the drama of hate. Among other appendices, the Broadview edition includes materials on the contemporary philosophical understanding of the passions, and contemporary reviews. Baillie's work is enjoying a revival of interest. She lived a long life, (1762-1851), and had a wide circle of literary friends including Maria Edgeworth and Sir Walter Scott (who termed her a "female Shakespeare"). Scottish born, she moved to England in her twenties where she then resided. Her Plays on the Passions, alternatively known as A Series of Plays in which it is Attempted to Delineate the Stronger Passions of the Mind—Each Passion being the Subject of a Tragedy and Comedy was produced in three volumes between 1798 and 1812. The first volume created quite a stir amongst the literary circles of London and Edinburgh when introduced anonymously. The speculation into the authorship concluded two years later when Baillie came forward as the writer of the collection, thereby causing a subsequent sensation since no one had considered the shy spinster a candidate in the mystery.

Research increasingly suggests that addiction has a genetic and neurobiological basis, but efforts to translate research into

effective clinical treatments and social policy needs to be informed by careful ethical analyses of the personal and social implications. Scientists and policy makers alike must consider possible unintended negative consequences of neuroscience research so that the promise of reducing the burden and incidence of addiction can be fully realized and new advances translated into clinically meaningful and effective treatments. This volume brings together leading addiction researchers and practitioners with neuroethicists and social scientists to specifically discuss the ethical, philosophical, legal and social implications of neuroscience research of addiction, as well as its translation into effective, economical and appropriate policy and treatments. Chapters explore the history of ideas about addiction, the neuroscience of drug use and addiction, prevention and treatment of addiction, the moral implications of addiction neuroscience, legal issues and human rights, research ethics, and public policy. Features outstanding and truly international scholarship, with chapters written by leading experts in neuroscience, addiction medicine, psychology and more Informs psychologists of related research in neuroscience and vice versa, giving researchers easy one-stop access to knowledge outside their area of specialty

Lex Luger, wrestling megasensation and three-time world heavyweight champion, ruled the ring for years as “The Total Package.” Whether he was making a dramatic entrance from a helicopter, defeating champ Hulk Hogan, or sculpting a near-perfect physique, Lex was on top of his game. Yet backstage, he was wrestling with addictions to sex, drugs, and alcohol—things he clung to even when his mistress died suddenly of a drug overdose and Lex went to jail. There, Lex faced the truth: he was losing the fight for his life. And still awaiting him was his most brutal opponent yet, when the wrestling champ found himself helplessly paralyzed from the neck down. In *Wrestling with the Devil*, Lex Luger reveals never-before-told stories from his career, his struggle with personal demons, and how, through unexpected faith, grace, and redemption, he overcame all odds to fight the only battle that really matters.
