Once reserved for mystics and seers, the tarot is one of the best tools for boosting your creativity and shifting your imagination into high gear. Famous authors such as John Steinbeck and Stephen King have used the tarot deck to tap into deep wells of inspiration, and you can enliven your own writing the same way—whether you craft short stories, novels, poetry, nonfiction, or even business proposals. This book on reading tarot cards and applying them to your writing will guide you through each stage of the creative process, from fleshing out a premise to promoting a finished work. Enhance your storytelling technique through over 500 enjoyable writing prompts, exploratory games for groups and individuals, tarot journaling, and other idea-stimulating activities that call upon the archetypal imagery and multi-layered symbolism in the tarot. Infuse flair and originality into your work as you learn to:

- Interpret symbols, myths, and learn to read all seventy-eight cards in the tarot card deck
- Use classic tarot layouts and spreads to structure your story
- Brainstorm story ideas and develop dialogue and plot
- Create detailed settings, powerful scenes, and dynamic characters
- Overcome writer's

block and breathe new life into existing projects As a writer, you hold the power of creation in your hands. By exploring the tarot and incorporating it into your writing practice, you will set your creative potential soaring to new heights.

The dry forests and woodlands of Sub-Saharan Africa are major ecosystems, with a broad range of strong economic and cultural incentives for keeping them intact. However, few people are aware of their importance, compared to tropical rainforests, despite them being home to more than half of the continent's population. This unique book brings together scientific knowledge on this topic from East, West, and Southern Africa and describes the relationships between forests, woodlands, people and their livelihoods. Dry forest is defined as vegetation dominated by woody plants, primarily trees, the canopy of which covers more than 10 per cent of the ground surface, occurring in climates with a dry season of three months or more. This broad definition - wider than those used by many authors - incorporates vegetation types commonly termed woodland, shrubland, thicket, savanna, wooded grassland, as well as dry forest in its strict sense. The book provides a comparative analysis of management experiences from the different geographic regions, emphasizing the need to balance the utilization of dry forests and woodland products between current and future human needs. Further, the book explores the techniques and strategies that can be deployed to improve the management of African dry forests and woodlands for the benefit of all, but more importantly, the communities that live off these vegetation formations. Thus, the book lays a foundation for improving the management of dry forests and woodlands for the wide range of products and services they provide.

The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
