Microeconomic Analysis

Born in Poland in 1878, educator, physician, and legendary child advocate Janusz Korczak believed that simply understanding children is the key to being able to take care of them. It's a basic premise too often overlooked. This collection of one hundred quotations and passages from Korczak's writings provides valuable advice on how to take care of, respect, and love every child. In an inviting gift-book format, this is a heartfelt and helpful reminder of who we were as children and who we might become as parents.

Microeconomics

Leading scholars examine political, legal, social, and market institutions through a microeconomic lens. The narrative of development economics is now infused with discussions of institutions. Economists debate whether institutions—or other factors

altogether (geography, culture, or religion)—are central to development. In this volume, leading scholars in development economics view institutions from a microeconomic perspective, offering both theoretical overviews and empirical analyses spanning three continents. After substantial introductory chapters by Pranab Bardhan and Marcel Fafchamps, two scholars who have published important work on this topic, each of the remaining chapters examines a particular set of institutions in a unique setting. These chapters treat the effects of Angola's violent conflict on that country's development; institutional accountability in Uganda; the effect of Indonesia's ethnic diversity on the distribution of public goods; the impact of trade liberalization on India's investment climate; extended family networks in Mexico; and a microeconomic perspective on land rights in Ethiopia. The chapters demonstrate the remarkable heterogeneity of institutions—policy change is mediated through local market institutions, government institutions, and families—as well as the empirical and methodological ingenuity of current research into this crucial topic. Contributors Manuela Angelucci, Oriana Bandiera, Pranab Bardhan, Timothy Besley, Martina Björkman, Robin Burgess, Giacomo De Giorgi, Stefan Dercon, Marcel Fafchamps, Rajshri Jayaraman, Pramila Krishnan, Eliana La Ferrara, Gilat Levy, Marcos A. They argue that if managers seriously want to develop effective strategies for competing in the new economy, they must understand the fundamental economics of information technology. Whether information takes the form of software code or recorded music, is published in a book or magazine, or even posted on a website, managers must know how to evaluate the consequences of pricing, protecting, and planning new versions of information products, services, and systems. The first book to distill the economics of information and networks into practical business strategies, *Information Rules* is a guide to the winning moves that can help business leaders navigate successfully through the tough decisions of the information economy.
