National Standards & Grade-Level Outcomes for K-12 Physical Education

"Soldiers of the Freedom Rock: Stories of Guthrie County Iowa's Combat Veterans" tells the historic tales of 26 veterans from rural, south central Iowa. The battlefield dramas span from World War II through the most current wars in Afghanistan and Iraq, including compelling stories in the air, on the ground, and at sea. Author Brick R. Imerman, a retired Navy F/A-18 Hornet squadron commander, was encouraged by local readers to write this book after penning a six-month veterans series, entitled "The Freedom Rock Series," which appeared in the local newspaper. Imerman's stories of local combat heroism were used as inspiration by nationally-renowned artist Ray "Bubba" Sorensen for his artwork on the Guthrie County Freedom Rock Veterans' Memorial, which was painted in Guthrie Center, Iowa, during the summer of 2014. "Soldiers of the Freedom Rock" intertwines the tales of combat heroism with the painting of the Freedom Rock to create a moving tribute, not only for the veterans described in the book, but for veterans and freedom lovers everywhere. Full color with over 100 historic photographs, "Soldiers of the Freedom Rock" documents one small corner of the larger mosaic of combat heroism from our nation's military. Included in the book: firsthand accounts from airmen in B-24 and B-17 bombers who braved the skies above Nazi controlled Europe, some who gave their lives, and others who were shot down, but lived to tell about it;

the story of a soldier who survived both his Sherman tank sinking off Omaha Beach on D-Day and blazing tank battles in the Ardennes, only to be killed mere weeks before war's end; a sailor's story of bravery firing from a tiny gun mount on the destroyer USS Hoel into the giant Japanese battleship Yamato before perishing beneath the waves at the historic Battle off Samar; the daring tale of a 15-year-old British girl who was nearly killed the first day Nazi bombers attacked London, who went on to serve her nation, ultimately becoming a U.S. citizen; and dozens of other riveting stories spanning through Korea, Vietnam, Iraq, and Afghanistan. Including the stories of eight officers and 18 enlisted personnel - ranking from Private to Major General - from the Navy, Marine Corps, Army, and Air Force, "Soldiers of the Freedom Rock" has a story for every veteran, male or female.

The U.S. Department of Defense accounts for over half of federal government discretionary spending and over 3% of GDP. Half of all federal employees work for the Department. The annual budget for the military not only provides for those salaries, it covers the baseline and wartime operating expenses of the force, and hundreds of billions of dollars of investment in new capabilities and technologies. Given the materiality of the defense function and amount of resources it consumes, the processes for budgeting for defense and managing the funds is important to understand. This text provides a fully integrated view of defense budgeting. It takes the position that defense budgeting is a specific instance of public budgeting, and public budgeting is a specific instance of public policy. In order to fully understand how the nation budgets for defense, it first lays a theoretical and conceptual foundation for public policy and public budgeting. That is followed by an assessment of the political and policy context for defense, including the overarching federal budget process and role of Congress in setting defense policy. Only then does the text explore the specifics of defense budgeting: how, by whom, and why the budget is crafted. Beyond the topic of budgeting – formulating, requesting, and legitimating the request for funds – the book tackles financial management topics. Included are discussions of federal appropriations law, funds management, accounting requirements, intragovernmental business transactions, and contemporary topics of defense policy such as funding overseas contingency operations in an era of deficit control legislation. This book is an appropriate reference for both students and practitioners of defense budgeting and financial management. It would also be appropriate in a general public budgeting course. Most public budgeting texts focus on state and municipal governments and there are few that address the federal system. This book fills that gap and provides a specific example of federal budgeting.

A Long Walk to Water

It's been a decade since Lynne Dorfman and Rose Cappelli wrote the first edition of Mentor Texts and helped teachers across the country make the most of high-quality children's literature in their writing instruction. In the second edition of this important book Lynne and Rose show teachers how to help students become confident, accomplished writers by using literature as their foundation. The second edition includes brand-new "Your Turn Lessons," built around the gradual release of responsibility model, offering suggestions for demonstrations and shared or guided writing. Reflection is emphasized as a necessary component to understanding why mentor authors chose certain strategies, literary devices, sentence structures, and words. Lynne and Rose offer new children's book titles in each chapter and in a carefully curated and annotated Treasure Chest. At the end of each chapter a "Think About It--Talk About It--Write About It" section invites reflection and conversation with colleagues. The book is organized around the characteristics of good writing--focus, content, organization, style, and conventions. Rose and Lynne write in a friendly and conversational style, employing numerous anecdotes to help teachers visualize the process, and offer strategies that can be immediately implemented in the classroom. This practical resource demonstrates the power of learning to read like writers.

Focused on physical literacy and measurable outcomes, empowering physical educators to help students meet the Common Core standards, and coming from a recently renamed but longstanding organization intent on shaping a standard of excellence in physical education, National Standards & Grade-Level Outcomes for K-12 Physical Education is all that and much more. Created by SHAPE America — Society of Health and Physical Educators (formerly AAHPERD) — this text unveils the new National Standards for K-12 Physical Education. The standards and text have been retooled to support students' holistic development. This is the third iteration of the National Standards for K-12 Physical Education, and this latest version features two prominent changes:

- The term physical literacy underpins the standards. It encompasses the three domains of physical education (psychomotor, cognitive, and affective) and considers not only physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation.
- Grade-level outcomes support the national physical education standards. These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the new standards and K-12 physical education curriculum development and make it easy for teachers to assess and track student progress across grades, resulting in physically literate students. In developing the grade-level outcomes, the authors focus on motor skill competency, student engagement and intrinsic motivation, instructional climate, gender differences, lifetime activity approach, and physical activity. All outcomes are written to align with the standards and with the intent of fostering lifelong physical activity.

National Standards & Grade-Level Outcomes for K-12 Physical Education presents the standards and outcomes in ways that will help preservice teachers and current practitioners plan curricula, units, lessons, and tasks. The text also

- empowers physical educators to help students meet the Common Core standards;
- allows teachers to see the new standards and the scope and sequence for outcomes for all grade levels at a glance in a colorful, easy-to-read format; and
- provides administrators, parents, and policy makers with a framework for understanding what students should know and be able to do as a result of their physical education instruction. The result is a text that teachers can confidently use in creating and enhancing high-quality programs that prepare students to be physically literate and active their whole lives.

The New York Times bestseller *A Long Walk to Water* begins as two stories, told in alternating sections, about two eleven-year-olds in Sudan, a girl in 2008 and a boy in 1985. The girl, Nya, is fetching water from a pond that is two hours' walk from her home: she makes two trips to the pond every day. The boy, Salva, becomes one of the "lost boys" of Sudan, refugees who cover the African continent on foot as they search for their families and for a safe place to stay. Enduring every hardship from loneliness to attack by armed rebels to contact with killer lions and crocodiles, Salva is a survivor, and his story goes on to intersect with Nya's in an astonishing and moving way.
