Cold River

When Bruce's school principal told his parents he was too smart to be a logger, everything changed. Set apart from a family heritage society had deemed not 'good enough' for a smart son, Bruce's childhood was tortured by the thought of leaving a life he loved. Dutifully, he moved away, went to college and got a job in a city. Until he and his wife, fed up with their ill-suited life, shucked all social expectations and moved their family back to Libby, Montana. Expecting to settle into a hard but rewarding life in logging, Bruce's family and community were rocked by a growing antagonism towards their industry. Soon, he was thrust into the forefront of a national debate in which loggers were denigrated for destroying the environment. Dubbed the Timber Wars, the conflict raged from the late 80s through the 90s, while Bruce was front and center, working himself to exhaustion to preserve their heritage and ensure good forest management. As the logging contracts dried up, he could only watch in agony as his family's business closed and his community began to fall apart. Bruce and his fellow loggers had become

Public Enemy No. 1 and their livelihoods were being eradicated. Yet Americans continued to enjoy their wood furniture and products. Only now, timber imports were on the rise and our national forests were exploding into flames from a massive fuel overload that management and controlled logging could have mitigated. Confronting this harsh reality, he and his team faced the hardest work yet - looking in the mirror. What had they been doing wrong? What can we do to work towards real, meaningful progress?

Matt Copeland has created a coaching guide for both the teacher new to Socratic seminars and the experienced teacher seeking to optimize the benefits of this powerful strategy. Socratic Circles also shows teachers who are familiar with literature circles the many ways in which these two practices complement and extend each other. Filled with examples to help readers visualize the application of these concepts in practice, Socratic Circles includes transcripts of student dialogue and work samples of preparation and follow-up activities. The helpful appendices offer ready-to-copy handouts and examples, and suggested selections of text that connect to major literary works.

Nwcg Standards for Interagency Incident Business Management

The author of the best-selling The Unofficial Harry Potter Cookbook presents a culinary treasury of recipes inspired by C.S. Lewis' Chronicles of Narnia series, from Rich Plumb Cake and Treacle Tart to Christmas Biscuits and Turkish Delight.

The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards; Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The "NWCG Standards for Interagency Incident Business Management" assists participating agencies of the NWCG to constructively work together to provide effective execution of each agency's incident business management program by establishing procedures for: - Uniform application of regulations on the use of human resources, including classification, payroll, commissary, injury compensation, and travel. - Acquisition of necessary equipment and supplies from appropriate sources in accordance with applicable procurement regulations. -

Management and tracking of government property. - Financial coordination with the jurisdictional agency and maintenance of finance, property, procurement, and personnel records, and forms. - Use and coordination of incident business management functions as they relate to sharing of resources among federal, state, and local agencies, including the military. - Documentation and reporting of claims. - Documentation of costs and cost management practices. - Administrative processes for all-hazards incidents.

The Complete Book of Classic John Deere Tractors explores the range of iconic "green tractors" with which Illinois-based John Deere has become one of the world's most recognizable brands. Part of Motorbooks' Complete Book series, this fact-packed volume takes you through dozens of John Deere farm models, beginning with the 1892 Waterloo Boy and ending with the game-changing New Generation and Generation II lines. With selected text from The Bigger Book of John Deere by late legendary Deere historian Don Macmillan, this book details year-to-year model changes within each series and offers comprehensive specs charts compiled by Deere authority John Dietz. In addition to the Waterloo Boy, you'll witness the entire 40-plus years of two-cylinder "Johnny Poppers," from the 1924 Model D through the 830 Series models in 1960, and the styled tractors of the prewar and postwar years. Also featured heavily are the groundbreaking New Generation tractors launched to much fanfare in 1960 and their successors, the New Generation II lineup with their Sound-Gard cabs. Standard, row-crop, orchard, and even a selection of experimental models...they're all here. In addition, you'll find coverage of John Deere's rich international heritage, with tractors produced in Spain, Germany, and Australia. Illustrated with incredible color photography and period advertising, The Complete Book of Classic John Deere Tractors is an essential edition for the library of any Deere fanatic.

This document discusses the physical processes of the hydrologic cycle that are important to highway engineers. These processes include the approaches, methods and assumptions applied in design and analysis of highway drainage structures. Hydrologic methods of primary interest are frequency analysis for analyzing rainfall and ungaged data; empirical methods for peak discharge estimation; and hydrograph analysis and synthesis. The document describes the concept and several approaches for determining time of concentration. The peak discharge methods discussed include log Pearson type III, regression equations, the SCS graphical method (curve number method), and rational method. The technical discussion of each peak flow approach also includes urban development applications. The document presents common storage and channel routing techniques related to highway drainage hydrologic analyses. The document describes methods used in the planning and design of stormwater management facilities. Special topics in hydrology include discussions of arid lands hydrology, wetlands hydrology, snowmelt hydrology, and hydrologic modeling, including geographic information system approaches and applications. This edition includes new sections on wetlands hydrology and snowmelt hydrology, an expanded section on arid lands hydrology, corrections of minor errors, and inclusion of dual units.

Seminar paper from the year 2018 in the subject Business economics - Supply, Production, Logistics, grade: 1.6, , language: English, abstract: Quick Response Logistics is one of the most debated topics in logistics studies over the years because of its increasing role in reducing operational expenses. It is a supply chain management strategy that has been used by manufacturers, soft lines retailers, and general merchandise to minimize operating expenses, forced markdowns, and retail out-of-stocks all achieved by reduced response time. Most of the retailers and suppliers work together to respond quickly to the consumers needs as they are able to share point-of-sale scan data thus in a potential point to forecast the needs of their consumers now and in the future and more rapidly. Quick Response Logistics has proven advantageous in most of the industries across the globe for instance, in the apparel industries because they are able to achieve efficient consumer response. The concept of quick response logistics integrates inventory deployment, production scheduling, and demand management thus helping firms to make better use of the available information, inventory, and production resources for competitive advantage.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.
