### **The Complete Idiot's Guide to Motorcycles, 5th Edition**

Designed as Kawasaki's response to the ground-breaking Honda CB750 of 1969, the Kawasaki 900 Super 4 Model Z1, affectionately referred to by many as the 'Z1000', appeared in 1972. It took the motorcycling world by storm and has a strong claim to be the world's first true ultimate superbike. Thirty years on, the (K)Z1000 Z1-R has emerged as one of Kawasaki's most desirable and sought after collectables from the 1970s. This book will help the reader appreciate the ever-evolving Japanese motorcycle styling and the introduction of various technologies as standard equipment, and just how sensational and unique these motorbikes really were.

### **The Twilight of Liberty**

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the

landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

The unemployment rate is 10 percent. Taxes consume a huge portion of the working people's paychecks. Corruption dominates every level of the Government. The highest levels seek to turn control of the country over to the United Nations through the creation of a National Police force of the power-hungry Homeland Security, and it strips basic rights from the populace. David, an automotive

technician, is a family man whose life seems to get worse by the day when he is placed in prison for a crime he did not commit. James is a Petty Officer on the aircraft carrier USS Jefferson. He longs for his childhood home in Alaska when times were more laidback and peaceful. His life becomes complicated when he discovers a spy aboard the ship. Benjamin, a divorced man with grown children, has been stockpiling supplies in an underground bunker in his home in Alaska. He senses something momentous is on the horizon but knows not what. The situation in the United States worsens beyond imagination, chaos ensues, and the three men race against time to find safety for themselves and their families in a world gone mad.

This book presents a much-needed review of commercial closures for bottles and

jars used in America prior to World War II. Archaeological attention to commercial closures has been rather limited. This is surprising given that data derived from bottles and jars pertain to a wide range of studies, including chronological control, trade, site functions, and methods of manufacture. Closures are an integral part of these studies, becoming particularly important after a spectacular variety of metal and glass caps in the late nineteenth and early twentieth centuries. This volume provides a comprehensive review, including detailed closure definitions, as well as glass finishes;-discusses the history of the development and impact of the hermetic seal in commercial closures;-will appeal to students, professionals, and collectors studying this common historic artifact class.
