The movements toward cultural sensitivity and evidence-based practice are watershed developments in clinical psychology. As a population with a long history of substandard treatment from mental health systems, African Americans have especially benefitted from these improvements. But as with other racial and ethnic minorities, finding relevant test measures in most psychological domains presents clinicians with an ongoing challenge. The Guide to Psychological Assessment with African Americans aims to close the evaluation/therapy gap by giving practitioners the tools to choose appropriate instruments while respecting client individuality. Expert contributors analyze scarce and far-flung data, identify strengths and limitations of measures and norms in their use with African-American clients, and advise on avoiding biases in interpreting results. The editors advocate for a theory-based hypothesis-testing approach to assessment when empirical evidence is lacking, and offer guidelines for decision-making that is effective as well as ethnically aware. The Guide's findings, insights, and practical information cover the gamut of test and diagnostic areas, including: IQ and personality. Generalized anxiety disorder, panic, and phobias. Neuropsychological assessment, cognitive decline, and dementia. Mood disorders and suicidality. Forensic assessment, risk, and recidivism. Measures specific to children and adolescents. Plus PTSD, substance disorders, eating pathology, and more. Expertly complementing cross-cultural treatment texts, the Guide to Psychological Assessment with African Americans stands out as a trustworthy resource for treatment planning useful to clinical psychologists, neuropsychologists, and clinical social workers.

The Winner's Guide to Casino Gambling

Along with "what happens here stays here" and "Circus Circus isn't that bad," one of the biggest Las Vegas myths is that so-called insiders are the city's best sources of tips, reviews, and information. Often, however, obsessive Las Vegas visitors offer more trustworthy suggestions and accurate insights about the Las Vegas Strip and Fremont Street. An unapologetic Las Vegas outsider, author Tim Dressen shares advice, hints, and unfiltered opinions gathered as cohost of Five Hundy by Midnight, the Original Las Vegas Podcast, for more than a decade. With the same irreverent spirit as the podcast, The Outsiders' Guide to Las Vegas is packed with useful information, entertaining perspectives, and more than a few off-the-rails rants. This is the Las Vegas guide by an outsider, inspired by outsiders, and for outsiders.

When Walter Stahl was five-years-old, his mother drove away in the family's blue Volvo and never came back. Now seventeen, living in the dregs of Las Vegas, taking care of his ailing father and marking time in a dead-end job along the Strip, Walter's life so far has been defined by her absence. He doesn't remember what she looks like; he's never so much as seen a photograph but, still, he looks for her among the groups of tourists he runs into every day, allowing himself the dim hope that she might still be out there, somewhere. But when Walter meets Chrysto and Acacia, a brother and sister working as living statues at the Venetian Hotel, his world cracks wide open. With them he discovers a Las Vegas he never knew existed and, as feelings for Chrysto develop, a side of himself he never knew he had. At the same time, clues behind his mother's disappearance finally start to reveal themselves, and Walter is confronted with not only the truth about himself, but also that of his family history. Threading through this coming-of-age story are beautiful, heart-wrenching graphic illustration, which reveal the journey of Walter's mother Emily: how she left everything to chase a vision of Liberace across the country; and how Walter's father Owen went searching for her amongst the gondolas of the Venetian Hotel. In James Sie's debut novel, *Still Life Las Vegas*, the magical collides with the mundane; memory, sexual awakening and familial ties all lead to a place where everything is illuminated, and nothing is real.

During the second half of the 20th century, landmark works of the horror film genre were as much the product of enterprising regional filmmakers as of the major studios. From backwoods Utah to the Louisiana bayous to the outer boroughs of New York, independent, regional films like *Night of the Living Dead*, *Last House on the Left*, *I Spit on Your Grave*, *The Texas Chain Saw Massacre*, and *The Evil Dead* stood at the vanguard of horror cinema. This overview of regionally produced horror and science fiction films includes interviews with 13 directors and

producers who operated far from mainstream Hollywood, along with a state-by-state listing of regionally produced genre films made between 1958 and 1990. Highlighting some of the most influential horror films of the past 50 years, this work celebrates not only regional filmmaking, but also a cultural regionalism that is in danger of vanishing.

This eBook is designed to provide the reader with accurate analyses of the AML/CTF Financial and Legal Intelligence, law and practice in the nations of the world with the most current references and resources. The eBook is organized around five main themes: 1. Money Laundering Risk and Compliance; 2. The Law of Anti-Money Laundering and Compliance; 3. Criminal and Civil Forfeiture; 4. Compliance and 5. International Cooperation. Each chapter is made up of five parts. Part I, "Introduction," begins with the analysis of money laundering risks and compliance with the recommendations of the Financial Action Task Force (FATF), and then concludes with the country's rating based on the International Narcotics Control Strategy Report (INCSR) of the U.S. State Department. Part II, "Anti-Money Laundering and Combating Terrorist Financing (AML/CTF)" and Part III, "Criminal and Civil Forfeiture," evaluate the judicial and legislative structures of the country. Given the increasing global dimension of AML/CTF activities, these sections give

special attention to how a country has created statutes, decisions, policies and the judicial enforcement procedures needed to combat money laundering and terrorist financing. Part IV, "Compliance," examines the most critical processes for the prevention and detection of money laundering and terrorist financing. This section reflects on the practical elements that should be in place so that financial institutions can comply with AML/CTF requirements; these are categorized into the development and implementation of internal controls, policies and procedures. Part V, "International Cooperation," reviews the compilation of international laws and treaties between countries working together to combat money laundering and terrorist financing. As these unlawful activities can occur in any given country, it is important to identify the international participants who are cooperating to develop methods to obstruct these criminal activities.

Not For Tourists Guide to Los Angeles 2015

The intent of this book is to provide the interior design student a well-rounded knowledge of Autodesk Revit tools and techniques. These skills can then be applied to enhance professional development in both academia and industry. The overall premise of the book is to learn Revit while developing the interior of a two story law office. The reader is provided an architectural model with established columns, beams, exterior walls, minimal interior walls and roofs in which to work. This allows more emphasis to be placed on interior design rather than primary architectural elements. The chapters chronology generally follows the typical design process. Students will find this book helps them more accurately and efficiently develop their design ideas and skills. The first chapter introduces the reader to Revit, Building Information Modeling (BIM) and the basics of opening, saving and creating a new project. The second provides a quick introduction to modeling basic elements in Revit including walls, doors, windows and more. This chapter is designed to show students how powerful Revit is and hopefully make them more excited about learning it. The remainder of the book is spent developing the interior space of the law office with an established space program. A student will learn how to view and navigate within the provided 3D architectural model, managing and creating materials and develop spaces with walls, doors and windows. Once all the spaces are added to the model, several areas are explored and used as the basis to cover Revit commands and workflows. At the end of this tutorial, the reader will be able to model floor finishes, ceilings with soffits, casework, custom reception desk, restrooms, furniture and light fixtures. Additional features such as tags, schedules and photo-realistic rendering will be covered.
