Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

This comprehensive, practical guide explores how contemporary furniture is used within interior design to define a space, create division and enclosure, and alter or redefine circulation. Initial chapters illustrate the different contexts in which furniture is used, from the office and domestic interiors to retail and exhibition space; look at types of furniture, whether off-the-shelf or bespoke; and explore the new vogue for recycling and vintage. Later chapters examine both traditional materials such as wood and the more unusual such as stone and glass, while also explaining new methods of manufacture - such as Computer Numerical Controlled and Selected Laser Sintering. The final chapter looks at how a design is developed, the site surveyed, prototypes made and specifications and schedules drawn up. Furniture for Interior Design is a detailed, highly illustrated guide to specifying and placing existing manufactured furniture, but also shows the reader how to design, detail, and commission batch-produced furniture or one-off, site-specific pieces.

Traumatic Brain Injury (TBI) can lead to loss of skills and to mental cognitive behavioural deficits. Paraplegia after Spinal Cord Injury (SCI) means a life-long sentence of paralysis, sensory loss, dependence and in both, TBI and SCI, waiting for a miracle therapy. Recent advances in functional neurosurgery, neuroprosthesis, robotic devices and cell transplantation have opened up a new era. New drugs and reconstructive surgical concepts are on the horizon. Social reintegration is based on holistic rehabilitation. Psychological treatment can alleviate and strengthen affected life. This book reflects important aspects of physiology and new trans-disciplinary approaches for acute treatment and rehabilitation in neurotraumatology by reviewing evidence based concepts as they were discussed among bio and gene-technologists, physicians, neuropsychologists and other therapists at the joint international congress in Brescia 2004.
