IBM Sametime 8.5.2 Administration Guide

A practical hands-on user guide and eBook with time saving tips and comprehensive instructions for using Lotus Notes effectively and efficiently.

IBM Lotus Domino: Classic Web Application Development Techniques

eloper's Guide" provides a comprehensive supplement to the Lotus documentation. This book is the ultimate guide for Lotus Notes 4.0 to 4.5 application development, the dominant groupware product on the market used by over 4.5 million users.

Just Enough Governance for Notes

The first complete, practical guide to XPages development - direct from members of the XPages development team at IBM Lotus Martin Donnelly, Mark Wallace, and Tony McGuckin have written the definitive programmer's guide to utilizing this breakthrough technology. Packed with tips, tricks, and best practices from IBM's own XPages developers, Mastering XPages brings together all the information developers need to become experts - whether you're experienced with Notes/Domino development or not. The authors start from the very beginning, helping developers steadily build your expertise through practical code examples and clear, complete explanations. Readers will work through scores of real-world XPages examples, learning cutting-edge XPages and XSP language skills and gaining deep insight into the entire development process. Drawing on their own experience working directly with XPages users and customers, the authors

illuminate both the technology and how it can be applied to solving real business problems. Martin Donnelly previously led a software startup that developed and distributed small business accounting software. Donnelly holds a Commerce degree from University College Cork and an M.S. in Computer Science from Boston University. Mark Wallace has worked at IBM for 15 years on many projects as a technical architect and application developer. Tony McGuckin participates in the Lotus OneUI Web Application and iWidget Adoption Workgroup. He holds a bachelor's degree in Software Engineering from the University of Ulster.

In this IBM Redbook, we describe how to develop applications with IBM Lotus Domino Designer 6. With Domino Designer, you are able to create applications hosted by a Domino server. These applications can be used by different clients, such as Notes clients, Web browsers or mobile devices. We introduce, and show in detail, how you can use all the design elements of Domino Designer, such as forms, pages, views, agents, outlines, resources and framesets. Readers who are familiar with developing applications using Release 5 of Lotus Domino may want to start at Chapter 12, which introduces the new features in Domino 6.0, and continue

from there. In the chapters toward the end of the book, we discuss the different programming languages, @functions, LotusScript, JavaScript, and Java, that can be used in Domino. We detail how to manipulate rich text objects by programming, as well as XML, in Domino. This redbook was written for technical specialists, developers and programmers, customers, IBM Business Partners, and the IBM and Lotus community who need technical understanding of how to develop applications using IBM Lotus Domino Designer 6.0.
