Science and Invention

This superb collection of classic Victorian literature
features the most notable works of Charles Dickens,
including Oliver Twist (1839), A Christmas Carol
(1843), A Tale of Two Cities (1859), and Great
Expectations (1861). Considered the greatest novelist
of the Victorian era, Dickens was especially known for
his unusual characters, incisive social commentary,
and carefully constructed plots. Over the last two
centuries, his popular fiction has continued to inspire
adaptations in nearly artistic genre, and now it is
available--complete and unabridged--in this gorgeous
slipcase edition. The stylish clothbound hardcover
also features a ribbon marker, historical timeline, and
comprehensive introduction, enlightening the reader
on the author's life and works.

Holt California Physical Science

Physics II For Dummies

A classroom textbook covering the physical sciences

discusses such topics as matter, the atom, motion and forces, and the universe.

Magnetic Storm

A plain-English guide to advanced physics Does just thinking about the laws of motion make your head spin? Does studying electricity short your circuits? Physics II For Dummies walks you through the essentials and gives you easy-to-understand and digestible guidance on this often intimidating course. Thanks to this book, you don?t have to be Einstein to understand physics. As you learn about mechanical waves and sound, forces and fields, electric potential and electric energy, and much more, you?ll appreciate the For Dummies law: The easier we make it, the faster you?ll understand it! An extension of the successful Physics I For Dummies Covers topics in a straightforward and effective manner Explains concepts and terms in a fast and easy-to-understand way Whether you?re currently enrolled in an undergraduate-level Physics II course or just want a refresher on the fundamentals of advanced physics, this no-nonsense guide makes this fascinating topic accessible to everyone.

First published in 1984, Magnetic Storm followed in the groundbreaking footsteps of the million-selling Views (1975). Once again employing a large format and lavish production to showcase the unique art and design of Roger Dean, this iconic book was a retrospective of the astonishing breadth of work accomplished since the publication of its predecessor. Through Views and Magnetic Storm, Roger Dean established a devoted readership, while Dragon's Dream (2008) demonstrates how his visionary work has continued to illuminate an age of digital animation, computer games, and virtual worlds. Embracing designs for record sleeves, rock stages, movie projects, architecture, games consoles, landscapes, and books, Magnetic Storm features everything from innovative aircraft livery to the Yes logo. This new edition streamlines the original format and retains the combination of concept sketches and the finished works. Featuring revised design and typography, a new foreword, and a newly finished painting that Roger supplied especially for the front cover of this edition, Magnetic Storm showcases and celebrates the art that defined an era.

Five Novels

Many readers know Victorian England through the writings of Charles Dickens. Not only did Dickens put a face to the era through his memorable characters, he also captured the spirit of his age in entertaining

fiction spun from its social concerns and historical events. This literary omnibus brings together five of Dickens's best-known novels: Oliver Twist, A Christmas Carol, David Copperfield, Great Expectations and A Tale of Two Cities. Prolific, energetic and committed to social change, no other novelist of the time did as much as Charles Dickens to rally his readers to action and no other writer at any time has created such an extraordinary collection of well-loved novels. This exquisitely designed Leatherbound edition has distinctive gilt edging and an attractive silk-ribbon bookmark; it will make an artful addition to any home library.

Stalking the Black Swan

Kenneth A. Posner spent close to two decades as a Wall Street analyst, tracking the so-called "specialty finance" sector, which included controversial companies such as Countrywide, Fannie Mae, Freddie Mac, CIT, and MasterCard many of which were caught in the subprime mortgage and capital markets crisis of 2007. While extreme volatility is nothing new in finance, the recent downturn caught many off guard, indicating that the traditional approach to decision making had let them down. Introducing a new framework for handling and evaluating extreme risk, Posner draws on years of experience to show how decision makers can best cope with the "Black Swans" of our time. Posner's shrewd assessment combines the classic fundamental research approach of Benjamin Graham and David Dodd with more recent developments in cognitive science, computational

theory, and quantitative finance. He outlines a probabilistic approach to decision making that involves forecasting across a range of scenarios, and he explains how to balance confidence, react accurately to fast-breaking information, overcome information overload, zero in on the critical issues, penetrate the information asymmetry shielding corporate executives, and integrate the power of human intuition with sophisticated analytics. Emphasizing the computational resources we already have at our disposal our computers and our minds Posner offers a new track to decision making for analysts, investors, traders, corporate executives, risk managers, regulators, policymakers, journalists, and anyone who faces a world of extreme volatility.
