Major Problems in American History

### **Peacebuilding and Civil Society in Bosnia-Herzegovina**

### **The Federal Civil Service System and the Problem of Bureaucracy**

This book is the outcome of a conference on common security and civil society in Africa. The contributions seek to go beyond the "war of images" to imagine a different and more secure future. They are concerned with five different themes: economic and social change; prevention of violent conflicts; the causes of conflict; political security, and the international politics of development partnership.

## Civil Affairs

"Sustainability and the Civil Commons" moves beyond rural roots to build a comprehensive understanding of sustainability that combines global reach with local focus.

## American Civil-Military Relations: New Issues, Enduring Problems

As a documentary history, this volume illustrates the evolution of civil affairs policy and practice in the Mediterranean and European Theaters of Operations during World War II. It deals with U.S. Army and Anglo-American planning and operations in the sphere of relations with civilians in certain liberated and conquered countries in Europe during the war, prior to the invasion of Germany. Although the Army had not considered civil affairs preparation essential prior to World War II, during the war it created the Civil Affairs Division at the War Department level to coordinate all civil affairs planning and training. For the first time, extensive recruiting and training programs were organized, and G-5 (civil affairs and military government) staff sections were added at the theater army, corps, and division levels. Not only did soldiers become the administrators of civilian life for the Army's immediate needs, they also became the executors, and sometimes the proposers, of national and international political policy. This broader role was the result of the inability of the Allies to agree on specific political aims until after active hostilities were over, if then. In this policy void, U.S. and British military authorities were often responsible for the gradual transition to a postwar national and international order with only general guidelines from higher authorities. The materials presented in Part I, concerned with the preparatory and organizational stage, suggest that the President's decision to entrust the civil affairs responsibility to the Army was because civilian authorities were unready to undertake the mission. Documents in Part II show the difficulties of fitting civilian institutions into the context of battle and a military framework, thus indicating additional rationale for leaving military authorities in exclusive control. Part III reveals that, despite this experience, Allied authorities planning for the liberated countries of northwest Europe still proposed to delegate civil affairs to indigenous civilian authorities, insofar as was possible. Operations are dealt with in Part IV, which show that conditions during and immediately following hostilities made it necessary for the Allies to render these authorities substantial assistance in the area of civil affairs. The compilation of documents appear to make it clear that the issue of military-versus-civilian administration was far less important than the issue of military values versus civil-political values, and it was in the latter area that the most serious difficulties arose. KEY TOPICS: 1. Arguments over civilian or military control of civil affairs (Ch. I) 2. Civilian civil affairs activities in French North Africa and gradual military involvement (Ch. II) 3. Creation of a military organization to undertake civil affairs activities (Chs. III-VI) 4. Military government/civil affairs operations in Italy (Chs. VII-XXI) 5. Planning for civil affairs operations in Europe (Chs. XXII-XXIV) 6. Military government/civil affairs operations in western Europe (Chs. XXV-XXXII)

## **Major Problems in the Civil War and Reconstruction: Documents and Essays**

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

## **U.S. Civil-military Relations**

### **Sundry Civil Appropriation Bill, 1922**

This book arises from a meeting held at Wiston House, Sussex, UK, in September 1987. The meeting brought together academic, governmental and industrial experts from eight countries to discuss the increasingly important subject of the relations between civil and defence technologies. It was primarily funded under the Advanced Research Workshops Programme of NATO's Scientific Affairs Division, and was the first science policy workshop funded by the Programme. Additional financial support came from the Leverhulme Trust. The choice of topic, of speakers and, finally, of papers to be published was entirely ours. The conclusions reached were our own and those of the participants. They were not in any way guided by NATO; nor do they represent NATO policy. We speak for all the participants in offering our thanks to the NATO Scientific Affairs Division, especially Secretary General Durand and Dr. Craig Sinclair, for their generosity and encouragement. Without them this book would not exist. We thank the Leverhulme Trust for enabling assistance to be provided to the Workshop Directors, in the form of Iain Bate, who himself played a major part in the success of the meeting. The staff of Wiston House must also be thanked for providing an admirable environment for the meeting. For secretarial support prior to the meeting we thank Gill Miller and Lesley Price. Finally, we offer special thanks to Mrs. Yvonne Aspinall for converting all the papers, in whatever state they were presented, into camera-ready copy with such professionalism and good humour.

epistemological framework and presents a balanced approach to the teaching of research methods in the "helping professions." Jeane W. Anastas begins with a discussion of the different philosophical perspectives within which social research occurs and continues with problem formulation, research design, and methodological issues influencing data collection, analysis, and dissemination. She presents both fixed (quantitative) and flexible (qualitative) methods of research, granting legitimacy, value, utility, and relevance to both styles of inquiry. Utilizing complete case studies to illustrate different methodological approaches, *Research Design for Social Work and the Human Services* integrates material on women and people of color, and draws attention to the ways racism, heterosexism, sexism, and classism affect the conceptualization and conduct of research. Anastas not only exposes these biases but actively addresses the experiences, needs, and concerns of clients of both genders and different races, ethnicities, sexual orientations, cultures, and classes.

Vols. 39-214 (1874/75-1921/22) have a section 2 containing "Other selected papers"; issued separately, 1923-35, as the institution's Selected engineering papers.

### **The Relations between Defence and Civil Technologies**

### **Major Problems in American Popular Culture**

This true story of an epic courtroom showdown, where two of the nation's largest corporations were accused of causing the deaths of children from water contamination, was a #1 national bestseller and winner of the National Book Critics Circle Award. Described as "a page-turner filled with greed, duplicity, heartache, and bare-knuckle legal brinksmanship by *The New York Times*, *A Civil Action* is the searing, compelling tale of a legal system gone awry—one in which greed and power fight an unending struggle against justice. Yet it is also the story of how one man can ultimately make a difference. Representing the bereaved parents, the unlikeliest of heroes emerges: a young, flamboyant Porsche-driving lawyer who hopes to win millions of dollars and ends up nearly losing everything, including his sanity. With an unstoppable narrative power reminiscent of Truman Capote's *In Cold Blood*, *A Civil Action* is an unforgettable reading experience that will leave the reader both shocked and enlightened. *A Civil Action* was made into a movie starring John Travolta and Robert Duvall. From the Trade Paperback edition.

### **The Civil War as a Theological Crisis**

## **Major Problems in Texas History**

This book brings a fresh, original approach to understand social action in China and Vietnam through the conceptual lens of informal environmental and health networks. It shows how citizens in non-democratic states actively create informal pathways for advocacy and the development of functioning civil societies.

## **What Do We Know about Civil Wars?**

A Book that Transformed America “Friendship is first, Friendship last. But it is equally impossible to forget our Friends, and to make them answer to our ideal.”- Civil Disobedience, Henry David Thoreau Civil Disobedience was Thoreau's first published book and continues to transform American discourse. It is unusual for its symbolism and structure, its criticism of Christian institutions, and its many-layered storytelling. This Xist Classics edition has been professionally formatted for e-readers with a linked table of contents. This eBook also contains a bonus book club leadership guide and discussion questions. We hope you'll share this book with your friends, neighbors and colleagues and can't wait to hear what you have to say about it. Xist Publishing is a digital-first publisher. Xist Publishing creates books for the touchscreen generation and is dedicated to helping everyone develop a lifetime love of reading, no matter what form it takes.

Looks at how American Indians are using the courts to settle matters relating to self-determination, cultural preservation, lost land, and basic human rights

## **Global Civil Society 2005/6**

## **Minutes of Proceedings of the Institution of Civil Engineers**

In this timely book, leading scholars guide us through what the latest research tells us about the onset, duration, outcomes, and recurrence of civil wars, as well as the ongoing consequences of conflicts in war-torn countries such as Syria, Sudan, and Rwanda.

## **The East Asian Challenge for Human Rights**

The Global Civil Society Yearbook is the standard work on all aspects of contemporary global civil society for activists, practitioners, students and academics alike.

## **Some Major Problems Covered by National Commission on Labour, Incorporating Papers Read at the Seminar Held on 9th & 10th March 1971**

The Pass the Civil Professional Engineering (P.E.) Exam Guide Book was developed because practice is the most essential component to passing the Civil Professional Engineering (P.E.) Exam. Training with materials similar in format, timing, language, and style will help to master the exam when it counts the most. The passthecivilPE Guide Book provides necessary information in the form of a combined practice exam and study guide that will deliver utmost confidence for the passing the Civil Professional Engineering (P.E.) Exam.

## **Handbook of Seismic Risk Analysis and Management of Civil Infrastructure Systems**

MAJOR PROBLEMS IN AMERICAN POPULAR CULTURE follows the highly successful Major Problems format. Each chapter comprises essays and documents that focus on a particular aspect of American popular culture. These essays and documents will prompt students to think about the centrality of popular culture in American life and its powerful role in forging identity, historical memory, and relationships among consumers, producers, citizens, and the state. They reinforce the idea that popular culture is the ground on which cultural and social transformations are worked. Race and class are at the center of the analysis, and these categories, along with gender and nationalism, thread through the chapters. They all argue for seeing popular audiences as active creators rather than passive receivers of popular culture. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## **Major Problems in American History**

Designed to encourage critical thinking about history, the Major Problems series introduces students to both primary sources and analytical essays on important topics in US history. This text, designed to be the primary anthology for the introductory survey course, covers the span of the Civil War. The Third Edition, with new co-author Amy Taylor, includes a new chapter on Lincoln and Davis as military leaders, reorganized home front chapters, and many new documents and essays reflecting the latest scholarship. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## **Collective Action and the Civil Rights Movement**

The Dayton Accords ended the war in Bosnia-Herzegovina in 1995. The 10th anniversary gives reason to investigate the post-war period, today's realities and future perspectives. Bosnian authors and international experts express their views on recent developments. Insiders and outsiders, working in the conflict and on its transformation, have been invited to tackle the questions: Which conflict lines mark the present society? Did peacebuilding activities address the underlying causes? What are obstacles for conflict transformation? What are the potentials and limits of international support? What does "civil society" mean in Bosnia and how is it related to statebuilding and democratisation? How can people constructively deal with the past in order to design the future in the region of former Yugoslavia? The book gives an overview on an important research focus of the Berghof Research Center, highlighting the work of its most important cooperation partners.

## **A Civil Action**

The East Asian Challenge for Human Rights shows that critical intellectuals in East Asia have begun to chart a middle ground between the extremes of the international debate on human rights, making particular headway in the areas of group rights and economic, social, and cultural (ethnic minority) rights. The chapters form a collective intellectual inquiry into the following areas: critical perspectives on the "Asian values" debate; theoretical proposals for an improved international human rights regime with greater input from East Asians; the resources within East Asian cultural traditions that can help promote human rights; and key human rights issues facing East Asia as a result of rapid economic growth in the region.

## **Civil Disobedience**

Earthquakes represent a major risk to buildings, bridges and other civil infrastructure systems, causing catastrophic loss to modern society. Handbook of seismic risk analysis and management of civil infrastructure systems reviews the state of the art in the seismic risk analysis and management of civil infrastructure systems. Part one reviews research in the quantification of uncertainties in ground motion and seismic hazard assessment. Part two discusses methodologies in seismic risk analysis and management, whilst parts three and four cover the application of seismic risk assessment to buildings, bridges, pipelines and other civil infrastructure systems. Part five also discusses methods for quantifying dependency between different infrastructure systems. The final part of the book considers ways of assessing financial and other losses from earthquake damage as well as setting insurance rates. Handbook of seismic risk analysis and management of civil infrastructure systems is an invaluable guide for professionals requiring understanding of the impact of earthquakes on buildings and lifelines, and the seismic risk assessment and management of buildings, bridges and

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

### **The Cornell Civil Engineer**

Collective Action and the Civil Rights Movement is a theoretical study of the dynamics of public-spirited collective action as well as a substantial study of the American civil rights movement and the local and national politics that surrounded it. In this major historical application of rational choice theory to a social movement, Dennis Chong reexamines the problem of organizing collective action by focusing on the social, psychological, and moral incentives of political activism that are often neglected by rational choice theorists. Using game theoretic concepts as well as dynamic models, he explores how rational individuals decide to participate in social movements and how these individual decisions translate into collective outcomes. In addition to applying formal modeling to the puzzling and important social phenomenon of collective action, he offers persuasive insights into the political and psychological dynamics that provoke and sustain public activism. This remarkably accessible study demonstrates how the civil rights movement succeeded against difficult odds by mobilizing community

resources, resisting powerful opposition, and winning concessions from the government.

### **Sustainability and the Civil Commons**

Civil Society Organizations (CSOs) can make a vital contribution to public health and health systems, but harnessing their potential is complex in a Europe where government-CSO relations vary so profoundly. This study is intended to outline some of the challenges and assist policy-makers in furthering their understanding of the part CSOs can play in tandem and alongside government. To this end it analyzes existing evidence and draws on a set of seven thematic chapters and six mini case studies. They examine experiences from Austria, Bosnia-Herzegovina, Belgium, Cyprus, Finland, Germany, Malta, the Netherlands, Poland, the Russian Federation, Slovenia, Turkey and the European Union and make use of a single assessment framework to understand the diverse contexts in which CSOs operate. The evidence shows that CSOs are ubiquitous, varied and beneficial, and the topics covered in this study reflect such diversity of aims and means: anti-tobacco advocacy, food banks, refugee health, HIV/AIDS prevention and cure, and social partnership. CSOs make a substantial contribution to public health and health systems with regards to policy development, service delivery and governance. This includes evidence provision, advocacy, mobilization, consensus building, provision of medical services and of services related to the social determinants of health, standard setting, self-regulation and fostering social partnership. However, in order to engage successfully with CSOs, governments do need to make use of adequate tools and create contexts conducive to collaboration. To guide policy-makers working with CSOs through such complications, and help avoid some potential pitfalls, the book outlines a practical framework for such collaboration. This suggests identifying key CSOs in a given area; clarifying why there should be engagement with civil society; being realistic as to what CSOs can or will achieve; and an understanding of how CSOs can be helped to deliver.

### **Civil Society and Health**

This best-selling title, designed to be either the primary anthology or textbook for the course, covers the Civil War's entire chronological span with a series of documents and essays.

### **Cases and Materials on Civil Procedure**

This is a critical analysis of the history of the American Civil Liberties Union and represents the first published account of the ACLU's record. Other works on the organization either dealt only with specific issues or have been simply journalistic accounts. Donohue provides the first systematic analysis by a social scientist. It is unquestionably the most serious work now available and is likely to remain the touchstone for any such work for many years to come.

## **Major Problems in the Civil War and Reconstruction**

### **Research Design for Social Work and the Human Services**

The call to "reinvent government"—to reform the government bureaucracy of the United States—resonates as loudly from elected officials as from the public. Examining the political and economic forces that have shaped the American civil service system from its beginnings in 1883 through today, the authors of this volume explain why, despite attempts at an overhaul, significant change in the bureaucracy remains a formidable challenge.

### **Civil Engineering and Urban Planning III**

Designed to encourage critical thinking about history, the MAJOR PROBLEMS IN AMERICAN HISTORY series introduces students to both primary sources and analytical essays on important topics in U.S. history. This collection serves as the primary anthology for the introductory survey course, covering the subject's entire chronological span. Comprehensive topical coverage includes politics, economics, labor, gender, culture, and social trends. The Third Edition features greater focus on visual and cultural sources throughout. Several chapters now include images, songs and poems to give students a better feel for the time period and events under discussion. Key pedagogical elements of the Major Problems format have been retained: 15 to 16 chapters per volume, chapter introductions, headnotes, and suggested readings. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
