### **Aircraft Propulsion**

This best-selling introduction to the techniques and applications of management science is designed to make the subject

easy to understand, interesting, and accessible for readers with limited mathematical background or skills. The book focuses on management science not only as a collection of techniques and processes, but as a philosophy and method for approaching problems in a logical manner. KEY TOPICS: Following a "begin-from-the-basics" approach for all topics, this book provides comprehensive coverage and flexible organization but does not assume an understanding of the mathematical underpinnings of any topic on the part of the reader. Each short, easy-to-read chapter centers around simple, straightforward examples that demonstrate the fundamentals of the techniques and provide specific solution steps that can be applied to other situations. Demonstrates how management science techniques can improve efficiency and save money. It also interweaves computer usage throughout every chapter. The sixth edition of Introduction to Management Science has been revised to reflect the most up-to-date practices and techniques. It now includes a revised discussion on the modeling process and new discussions the Analytical Hierarchy Procedure (AHP) and Multiple Regression. It also includes Excel Spreadsheet Solutions, including Excel QM, Crystal Ball software, and TreePlan software. An essential reference book for every professional manager.

### **Multinational Finance**

Managerial economics, meaning the application of economic methods in the managerial decision-making process, is a fundamental part of any business or management course. This textbook covers all the main aspects of managerial economics: the theory of the firm; demand theory and estimation; production and cost theory and estimation; market structure and pricing; game theory; investment analysis and government policy. It includes numerous and extensive case studies, as well as review questions and problem-solving sections at the end of each chapter. Nick Wilkinson adopts a user-friendly problem-solving approach which takes the reader in gradual steps from simple problems through increasingly difficult material to complex case studies, providing an understanding of how the relevant principles can be applied to real-life situations involving managerial decision-making. This book will be invaluable to business and economics students at both undergraduate and graduate levels who have a basic training in calculus and quantitative methods.

alike. For any international economics course, Salvatore's 3rd edition takes the students' understanding of economics well beyond the classroom and across the globe.

### **Principles of Economics**

The pioneer who gate-crashed his way to the top Subhash Chandra, the promoter of Essel/ Zee Group, is an unlikely mogul. Hailing from a small town in Haryana, where his family ran grain mills, Chandra has been a perennial outsider, repeatedly aiming high and breaking into businesses where he was considered an interloper. Starting work as a teen to pay off family debts, Chandra had to rely on bluff, gumption and sheer hard toil to turn things around. A little bit of luck and political patronage saw him make a fortune in rice exports to the erstwhile USSR. Always a risk-taker, Chandra then had the vision of getting into broadcasting early, even as established media players failed to see its potential. His Zee TV, India's first private Indian TV channel, changed the rules of the game and tickled the fancy of a public starved of entertainment. Several gutsy initiatives followed, though not all of them were successful. Chandra's attempts to launch satellite telephony and a cricket league came a cropper. But the man continues to reinvent himself; he is now also focusing on infrastructure and smart cities. This is an unusually candid memoir of a truly desi self-made businessman who came to Delhi at age twenty with seventeen rupees in his pocket. Today, he has a net worth of \$6.3 billion and annual group revenues of about \$3 billion.

### **Managerial Economics**

Managerial economics is the application of economic theory and quantitative methods (mathematics and statistics) to the managerial decision-making process. This book will appeal to students with limited prior training in economics and quantitative methods. It assumes that students will have had mathematics training at least through pre-calculus and that they have had a course in elementary statistics. It also expects students to have had an undergraduate course in intermediate microeconomics. The book includes these features: \* An Online Instructor's Manual \* An Online Study Guide \* A problem-solving approach to the study of managerial economics that combines the features of a standard managerial economics textbook with those of a separate study guide. \* A method for helping business students develop the analytical

skills necessary for success in the study of managerial economics, finance, and management. \* A more extensive review of mathematical techniques than most comparable textbooks. \* A separate chapter on game theory, including: \* Noncooperative, simultaneous-move, one-shot games \* Cooperative, simultaneous-move, infinitely-repeated games (including collusions, cheating rules, and determinants of collusive agreements) \* Cooperative, simultaneous-move, finitely-repeated games \* Focal-point equilibria \* Multistage games \* Bargaining with and without symmetric and asymmetric impatience \* A chapter on the time value of money and capital budgeting \* The accentuation of risk, uncertainty, and the economics of information throughout Book Hooks: \* Practice oriented, avoiding complex theoretical explanations with cumbersome notation \* Problems are included in each section and are made integral to learning and understanding subjects \* Math review uses economic relationships instead of general notation \* Excellent balance among motivation, theory, and examples \* Clear exposition Key Features: Emphasizes utility and applicability, not innovation Chapters conclude with: \* chapter review \* key terms and concepts \* chapter questions \* chapter exercises \* selected readings
