### **How to Live a Low-carbon Life**

Chronicling a high-profile and ambitious teacher preparation reform project that took place across 11 diverse U.S. institutions, this volume examines the strategies, program changes, accomplishments, and challenges from the Teachers for a New Era Project (TNE). TNE aimed to improve the preparation of K-12 teachers and address mounting criticisms of university-based teacher education. Funded primarily by the Carnegie Corporation of New York, TNE targeted the most persistent problems in university-based teacher preparation programs, focused on evidence-based assessment of program impact, and developed strategies for improvement. Exploring both the successes and tensions that arose from the program, this book contributes to future teacher education and program assessment endeavors, and offers lessons that can inform current policies and practices.

## **The Land Rover Story**

Mechanical Design Engineering Handbook is a straight-talking and forward-thinking reference covering the design, specification, selection, use and integration of machine elements fundamental to a wide range of engineering applications. Develop or refresh your mechanical design skills in the areas of bearings, shafts, gears, seals, belts and chains, clutches and brakes, springs, fasteners, pneumatics and hydraulics, amongst other core mechanical elements, and dip in for principles, data and calculations as needed to inform and evaluate your on-the-job decisions. Covering the full spectrum of common mechanical and machine components that act as building blocks in the design of mechanical devices, Mechanical Design Engineering Handbook also includes worked design scenarios and essential background on design methodology to help you get started with a problem and repeat selection processes with successful results time and time again. This practical handbook will make an ideal shelf reference for those working in mechanical design across a variety of industries and a valuable learning resource for advanced students undertaking engineering design modules and projects as part of broader mechanical, aerospace, automotive and manufacturing programs. Clear, concise text explains key component technology, with step-by-step procedures, fully worked design scenarios, component images and cross-sectional line drawings all incorporated for ease of understanding Provides essential data, equations and interactive ancillaries, including calculation spreadsheets, to inform decision making, design evaluation and incorporation of components into overall designs Design procedures and methods covered include references to national and international standards where appropriate

Reducing your carbon emissions in an economic down-turn can be challenging, but saving the planet doesn't have to cost you more. Tough economic times need not relegate concerns for the planet to the back burner. The author is an environmental economist trying to live a low-carbon life in London. He worked for 15 years in the UK's Office of Climate Change, the Prime Minister's Strategy Unit and the Department of the Environment. So far so good. But he has kids. A family to visit in India. A hectic job. In distilling and building on his own experience of trying to live a low carbon life, he helps us navigate the choices that confront us all - families, singletons, pensioners - when making decisions about what to eat, what to buy, how to travel and how to keep warm in the era of climate change and economic turmoil. He works out the sums and lets us know which choices will make the biggest difference, and which are false savings. His book is an irreverent but seriously rigorous reference guide to low-cost, low-carbon living for everyone - in any location - in tough times. It's brimming with up-to-date information on current and future technologies, tips and ideas for every budget on how to spend the least for the biggest carbon reduction gain and insight from the experiences of people trying to live low-carbon lives.

## **The Vampire's Kiss [Vampire Chronicles 2]**

In New York Times bestselling author Lynsay Sands' new Argeneau novel, a vampire accustomed to seducing every woman he meets finds the one determined to resist him . . . With immortal good looks and scorching charisma, Justin Bricker has yet to meet a woman he can't win over. His potential life mate should be no different. But instead of falling into his bed, Holly Bosley runs away and ends up mortally wounded. To save her, he has to turn her. And then Bricker learns the shocking truth: Holly's already married. Holly wakes up with a bump on her head, a craving for blood, and a sexy stranger who insists they belong together. She needs Bricker's help to control her new abilities, even as she tries to resist his relentless seduction. Choosing between the world she knows and the eternity he offers is impossible. But Justin is fighting for his life mate—maybe even his life—and he'll break every rule to do it . . .

## **A Clan of Novaks**

In *Spoils of Truce*, Reinoud Leenders documents the extensive corruption that accompanied the reconstruction of Lebanon after the end of a decade and a half of civil war. With the signing of the Ta'if peace accord in 1989, the rebuilding of the country's shattered physical infrastructure and the establishment of a functioning state apparatus became critical demands. Despite the urgent needs of its citizens, however, graft was rampant. Leenders describes the extent and nature of this corruption in key sectors of the Lebanese economy and government, including transportation, health care, energy, natural resources, construction, and social assistance programs. Exploring in detail how corruption implicated senior policymakers and high-ranking public servants, Leenders offers a clear-eyed perspective on state institutions in the developing world. He also addresses the overriding role of the Syrian leadership's interests in Lebanon and in particular its manipulation of the country's internal differences. His qualitative and disaggregated approach to dissecting the politics of creating and reshaping state institutions complements the more typical quantitative methods used in the study of corruption. More broadly, *Spoils of Truce* will be uncomfortable reading for those who insist that power-sharing strategies in conflict management and resolution provide some sort of panacea for divided societies hoping to recover from armed conflict.

More than 100 unique recipes for decadent desserts and healthy baked goods from the kitchen of Renée Kohlman, named one of the Canada's top food bloggers by the National Post. On a cold January morning, Renée Kohlman followed the advice of her sister and friends and started the foodblog, [Sweetsugarbean.com](http://Sweetsugarbean.com). A year later, she was named one of the National Post's top Canadian food bloggers. And now, in her debut cookbook, Kohlman shares more than 100 of her favorite baking recipes--including more than 60 brand-new recipes that have never been posted to the blog--along with a pinch of encouragement and a smidge of humor. Readers of *Sweetsugarbean* know that Kohlman's first love is baking, so it will come as no surprise that *All the Sweet Things* is chock-full of delectable dessert recipes for muffins, cookies, cakes, pies, custards, pastries, truffles, and ice cream. She'll show you how to reinvent last night's dessert for this morning's breakfast, inspire you to make your very first pie (and to pick the fruits yourself), and convince you that the best gifts are baked goods. With wit and warmth, she acknowledges that baking can be intimidating, but has ensured that each recipe--whether you're a beginner baker or a seasoned pro--is doable, and delicious. With a list of pantry essentials and useful tools and equipment, a photograph to accompany every recipe, healthful variations for gluten free bakers, and a number of essays

written in Kohlman's signature signature style, this gorgeous new cookbook will pull you into the kitchen to bake, then back to the couch to curl up and read.

Apologetics is for everyone. The Bible is clear that all believers are called to defend their faith. However, if apologetics is the formal process that we have come to expect, this sounds like an impossible task. But what if apologetics could be part of natural, normal conversation—both from the pulpit and in everyday life? Aimed at preparing you to clearly and confidently defend your faith, Expository Apologetics sets forth an approach to apologetics that is rooted in Scripture and eminently accessible. Filled with real-world examples and practical advice, this book will equip you with the tools you need to think biblically and converse persuasively—offering unbelievers “a reason for the hope that is in you.”

Attending the company Christmas party should have been a joyous occasion, but for Etienne LeRuelle it was just one more time when men vied for his attention because he was pretty when they had no intention of keeping him. When the head of Vaile Industries Security makes his intentions known, Etienne has to decide whether the man is serious or not, because he isn't sure he could survive the heartache if Louis just wants a one-night stand. Louis Redgrave knew Etienne was his rajaaka the moment he laid eyes on the beautiful man. Fighting off a room full of drunken vampires to get to Etienne is child's play compared to trying to convince the man he wants to keep him forever. If they can survive the misunderstandings between them and the never ending attacks by rogue vampires, they just might have a chance at a life they both only dreamed of.

### **Ri Ism Fund of Vibrations**

An area of forest the size of England is cut down in the tropics each year. Forestry is responsible for a fifth of global carbon emissions - more than the entire world transport sector. Urgent action to tackle the loss of global forests needs to be a central part of any new international agreement on climate change. Climate Change: Financing Global Forests is an independent report commissioned by the UK Prime Minister to address this vitally important issue. It assesses the impact of global forest loss on climate change and explores the future role of forests in the international climate change framework, with particular emphasis on the role of international finance. It also looks at the economic and policy drivers of deforestation and describes the incentives required to ensure more sustainable production of agriculture and timber in order to meet global demand while reducing carbon emissions. The report draws on a wide range of international expertise and will have significant national, EU and international interest and influence. It includes new modelling and analysis of the global economic impact of continued deforestation and provides a comprehensive assessment of the opportunity and capacity-building costs of addressing the problem. It shows that the benefits of halving deforestation could amount to \$3.7 trillion over the long term. However, if the international community does not act, the global economic cost of climate change caused by deforestation could amount to \$12 trillion. In this comprehensive and detailed report, Johan Eliasch makes a clear and forceful case for forests to be included in international carbon trading mechanisms. He calls for the international community to support forest nations to halve deforestation by 2020 and to make the global forest sector carbon neutral by 2030.

This report has been prepared by the London Environmental Economics Centre (LEEC). LEEC is a joint venture, established in 1988, by the International Institute for Environment and Development (IIED) and the department of Economics of University College London (UCL). Popularly known as The Pearce Report, this book is a report prepared for the Department of the Environment. It demonstrates the ways in which elements in our environment at present under threat from many forms of pollution can be costed. The book goes on to show ways in which governments are able, as a consequence of this analysis, to construct systems of taxation which would both reduce pollution by making it too costly and generate revenue for cleaning up much of the damage. The book ends with a series of skeleton programmes for progress.
