Sociological Abstracts

Are emotions becoming more conspicuous in contemporary life? Are the social sciences undergoing an 'affective turn'? This Reader gathers influential and contemporary work in the study of emotion and affective life from across the range of the social sciences. Drawing on both theoretical and empirical research, the collection offers a sense of the diversity of perspectives that have emerged over the last thirty years from a variety of intellectual traditions. Its wide span and trans-disciplinary character is designed to capture the increasing significance of the study of affect and emotion for the social sciences, and to give a sense of how this is played out in the context of specific areas of interest. The volume is divided into four main parts: universals and particulars of affect embodying affect political economies of affect affect, power and justice. Each main part comprises three sections dedicated to substantive themes, including emotions, history and civilization; emotions and culture; emotions selfhood and identity; emotions and the media; emotions and politics; emotions, space and place, with a final section dedicated to themes of compassion, hate and terror. Each of the twelve sections begins with an editorial introduction that contextualizes the readings and

highlights points of comparison across the volume. Cross-national in content, the collection provides an introduction to the key debates, concepts and modes of approach that have been developed by social scientist for the study of emotion and affective life.

Controlling the Message

Emotions, the Social Bond, and Human Reality

The largest work ever published in the social and behavioural sciences. It contains 4000 signed articles, 15 million words of text, 90,000 bibliographic references and 150 biographical entries.

The Naked Christ

Few areas have witnessed the type of growth we have seen in the affective sciences in the past decades. Across psychology, philosophy, economics, and neuroscience, there has been an explosion of interest in the topic of emotion and affect. Comprehensive, authoritative, up-to-date, and easy-to-use, the new Oxford Companion to Emotion and the Affective Sciences is an indispensable resource for

all who wish to find out about theories, concepts, methods, and research findings in this rapidly growing interdisciplinary field - one that brings together, amongst others, psychologists, neuroscientists, social scientists, philosophers, and historians. Organized by alphabetical entries, and presenting brief definitions, concise overviews, and encyclopaedic articles (all with extensive references to relevant publications), this Companion lends itself to casual browsing by non-specialists interested in the fascinating phenomena of emotions, moods, affect disorders, and personality as well as to focused search for pertinent information by students and established scholars in the field. Not only does the book provide entries on affective phenomena, but also on their neural underpinnings, their cognitive antecedents and the associated responses in physiological systems, facial, vocal, and bodily expressions, and action tendencies. Numerous entries also consider the role of emotion in society and social behavior, as well as in cognitive processes such as those critical for perception, attention, memory, judgement and decision-making. The volume has been edited by a group of internationally leading authorities in the respective disciplines consisting of two editors (David Sander and Klaus Scherer) as well as group of 11 associate editors (John T. Cacioppo, Tim Dalgleish, Robert Dantzer, Richard J. Davidson, Ronald B. de Sousa, Phoebe C. Ellsworth, Nico Frijda, George Loewenstein, Paula M. Niedenthal, Peter Salovey, and Richard A. Shweder). The members of the editorial board have commissioned and reviewed contributions from major experts on specific topics. In addition to comprehensive coverage of technical terms and fundamental issues, the volume

also highlights current debates that inform the ongoing research process. In addition, the Companion contains a wealth of material on the role of emotion in applied domains such as economic behaviour, music and arts, work and organizational behaviour, family interactions and group dynamics, religion, law and justice, and societal change. Highly accessible and wide-ranging, this book is a vital resource for scientists, students, and professionals eager to obtain a rapid, conclusive overview on central terms and topics and anyone wanting to learn more about the mechanisms underlying the emotions dominating many aspects of our lives.

Social Psychology

In his autobiography Joseph Turmel (1859-1943) has left an intensely personal account of his struggles to reconcile his Catholic faith with the results of historical-critical methods as those impacted biblical exegesis and the history of dogma. Having lost his faith in 1886, he chose to remain as a priest in the Church, even while he worked to undermine its teachings. He did so initially in writings published under his own name and, as his conclusions became increasingly radical, under a veritable team of pseudonyms. He was excommunicated in 1930. His account of his life is less a discussion and defense of his ideas than it is a moral justification of his conduct. Turmel is associated with the left wing of Roman Catholic Modernism along with Albert Houtin, Marcel Hebert, and Felix Sartiaux

Ideological Resolutions of Emotional Trials

Dennis Smith offers a fascinating survey of Elias's life and writings and traces the growth of his reputation. He also illustrates how Elias's insights can be applied to understand Western modernity and social and political change, showing why Elias is so important to sociology.

Beyond Reason

CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800+ serials publications, and also provides abstracts of books, book chapters, dissertations, and conference papers.

Handbook of the Sociology of Emotions

The articles making up this timely collection are the best exemplars of key positions in a very wide disciplinary field. Topics covered include science and art in the history of social research, positivism and antipositivism, language and the linguistic turn, realism and anti-realism, theory and theory choice, logic and

models, prediction and laws, interpretation, probability and complexity.

Emotion, Social Theory, and Social Structure

Attachment abuse can involve both physical and emotional violence between people in close relationships, which includes couples, parents and their children, and adult children and their aging parents, among others. Attachment abusers blame their victims for their own feelings of shame, inadequacy, or inability to love. Dr. Stosny's innovative and integrative approach to the treatment of attachment abuse emphasizes the importance of compassion for both the abused and the abuser. This hands-on manual provides a series of treatment modules designed to teach the perpetrators and the victims how to cope with their feelings and to end attachment abuse. This volume will be of interest to psychotherapists, group therapists, social workers, and counselors working with abusive clients and their victims.

A Case Study of Discourse Patterns in an Undergraduate Calculus Class

Everyday life is the most important dimension of society. Introducing classical and contemporary theory alongside key empirical work, this is a comprehensive

exploration of everyday life sociologies. Written by leading experts in the field, each chapter makes concepts from Existentialism to Semiotics accessible for students and scholars alike.

The International Encyclopedia of Communication: Digital imagery-Fictional media content

This book, first published in 1997, offers an approach to researching human behavior relating details of interaction to social structure.

Norbert Elias and Modern Social Theory

Collection of 1,339 original entries, spanning the scholarship, evidence, and methodology of communication research. Coverage of theories, media and communication phenomena, research methods, problems, concepts, and geographical areas in this interdisciplinary field. Editorial areas include: communication theory and philosophy, interpersonal communication, journalism, intercultural and intergroup communication, media effects, strategic communication/PR, communication and media law and policy, media systems in the world, and communication and technology.

Informality

Going beyond both traditional liberal theories of democracy and Marxist theories of civil society, leading international scholars rethink the relations between the individual and the state, community and family. They assess how social and political participation is changing in the modern world, investigate the historical roots of citizenship and its development alongside the nation state and urban society, and relate it to issues of welfare and the market. The final chapter asks whether the subordination of nation states to supranational institutions will replace state citizenship with a global conception of human rights.

Encountering the Everyday

Empathy in the Context of Philosophy

Divine Therapeia and the Sermon

The modern world is forcing us to understand emotion in order to cope with new problems such as road rage and epidemic levels of depression, as well as age-old

problems such as homicide, genocide and racial tension. At the same time, scholarly research is leading us to appreciate how emotion helps us to understand and transcend our selfish interests, to connect with others, to feel what is just and moral, and not just think it, and to construct societies and cultures that govern our joint efforts. This book draws upon scholarly research to address, explain and legitimize the role that emotion plays in everyday interaction and in many of the pressing social, moral, and cultural issues that we face today.

International Encyclopedia of the Social & Behavioral Sciences

For most of the twentieth century, modernity has been characterised by the formalisation of social relations as face to face interactions are replaced by impersonal bureaucracy and finance. As we enter the new millennium, however, it becomes increasingly clear that it is only by stepping outside these formal structures that trust and co-operation can be created and social change achieved. In a brilliant theoretical tour de force, illustrated with sustained case studies of changing societies in the former eastern Europe and of changing forms of interaction within so-called virtual communities, Barbara Misztal, argues that only the society that achieves an appropriate balance between the informality and formality of interaction will find itself in a position to move forward to further democratisation and an improved quality of life.

“Martyr to the Truth”

Psychology, focusing on processes that occur inside the individual and Sociology, focusing on social collectives and social institutions, come together in Social Psychology to explore the interface between the two fields. The core concerns of social psychology include the impact of one individual on another; the impact of a group on its individual members; the impact of individuals on the groups in which they participate; the impact of one group on another. This book is a successor to *Social Psychology: Social Perspectives and Sociological Perspectives in Social Psychology*. The current text expands on previous handbooks in social psychology by including recent developments in theory and research and comprehensive coverage of significant theoretical perspectives.

Sociology After Bosnia and Kosovo

In this new book, Lyng and Franks argue that contemporary sociology has lost its connection to human realities. Addressing the conceptual underpinnings of sociological practice, they offer ways for sociology to reclaim lost concepts of objectivity, reality, and truth. The authors deconstruct these terms in modern and postmodern contexts, yet they look beyond the usual predicaments espoused by these traditions in an effort to rebuild concepts of reality and truth more coherently

for contemporary social relations and social problems.

Clubbing

"In Social commitments in a depersonalized world, Edward Lawler, Shane Thye, and Jeongkoo Yoon examine interpersonal and group ties and propose a new theory of social commitments, showing that multiple interactions, group activities and, particularly, emotional attachment, are essential for creating and sustaining alignments between individuals and groups."--Résumé de l'éditeur.

Social Psychology Quarterly

The cross of Christ is undeniably central to the Christian faith. But, how can the cruelty and brutality of a two-thousand-year-old Roman cross touch base with a hedonistic world that has been so desensitized towards violence? Within the postmodern setting of a body-obsessed culture, Christianity urgently requires an innovative and stimulating way of understanding the cross and its atoning significance. At the heart of this book is the Naked Christ--an emblem through which the author draws on the rich resources of the Christian tradition in its portrayal of the cross. He explores how the metaphors of nakedness and clothing can encapsulate aspects of atonement and enable them to be understood within a

variety of contemporary contexts. The Naked Christ is a useful resource for anyone seeking fresh ways to express what the cross of Christ means to contemporary culture.

Discourse

Integrating continental and Anglo-American traditions, the author exposes empathy as the foundation of the being-with-one-another of human beings. The interpretation of empathy is applied to story telling, literature, and self psychology, rescuing empathy from the margins and revealing its role in the understanding of the other and human community.

Emotions and Violence

This book presents three social action models - rational, normative and emotional. It proposes the emotional model of social action and shows the many ways in which social structures, formal organizations and social movements are pervaded by emotions. The core of the book contains three empirical case studies focused on the question of how emotions, interests and symbolic worlds account for conformism and defiance. Its last part assesses the current state of the theory of social movements and the sociology of emotions. It suggests how their agendas

could be expanded.

Sociology and the Real World

Choice Outstanding Academic Title of 2016 From the presidential race to the battle for the office of New York City mayor, American political candidates' approach to new media strategy is increasingly what makes or breaks their campaign. Targeted outreach on Facebook and Twitter, placement of a well-timed viral ad, and the ability to roll with the memes, flame wars, and downvotes that might spring from ordinary citizens' engagement with the issues—these skills are heralded as crucial for anyone hoping to get their views heard in a chaotic election cycle. But just how effective are the kinds of media strategies that American politicians employ? And what effect, if any, do citizen-created political media have on the tide of public opinion? In *Controlling the Message*, Farrar-Myers and Vaughn curate a series of case studies that use real-time original research from the 2012 election season to explore how politicians and ordinary citizens use and consume new media during political campaigns. Broken down into sections that examine new media strategy from the highest echelons of campaign management all the way down to passive citizen engagement with campaign issues in places like online comment forums, the book ultimately reveals that political messaging in today's diverse new media landscape is a fragile, unpredictable, and sometimes futile process. The result is a collection that both interprets important historical data from a watershed

campaign season and also explains myriad approaches to political campaign media scholarship—an ideal volume for students, scholars, and political analysts alike.

Philosophical Foundations of Social Research Methods: Social reality and social context of social research

Clubbing explores the cultures and spaces of clubbing. Divided into three sections: Beginnings, The Night Out and Reflections, Clubbing includes first-hand accounts of clubbing experiences, framing these accounts within the relevant research and a review of clubbing in late-1990s Britain. Malbon particularly focuses on: the codes of social interaction among clubbers issues of gender and sexuality the effects of music the role of ecstasy clubbing as a playful act and personal interpretations of clubbing experiences.

Biopsychosocial Dynamics of Money in Relation to Power, Reason, Emotion, and Psychological Depression

Includes theoretical and empirical papers on topics in social psychology including sociometry. Publishes works by both sociologists and psychologists.

Emotions

Since the 1970s, the study of emotions moved to the forefront of sociological analysis. This book brings the reader up to date on the theory and research that have proliferated in the analysis of human emotions. The first section of the book addresses the classification, the neurological underpinnings, and the effect of gender on emotions. The second reviews sociological theories of emotion. Section three covers theory and research on specific emotions: love, envy, empathy, anger, grief, etc. The final section shows how the study of emotions adds new insight into other subfields of sociology: the workplace, health, and more.

Treating Attachment Abuse

Social Commitments in a Depersonalized World

Regulating Emotions

Analyzing in detail the development of sociological theory from 1830 to 1930, this text covers the most important theorists of that period-Comte, Spencer, Marx, Weber, Simmel, Durkheim, Pareto, and Mead. The scholars and schools that influenced these theorists are also closely examined. Coverage includes the origin

of the ideas of each theorist, his basic works and contributions, and the legacy of abstract models and principles that he has provided sociological theory..Written as a complementary volume to Turners well-respected book on contemporary theory, The Structure of Sociological Theory, this text provides readers with an in-depth examination of the major theorists who shaped the first hundred years of sociology.

The Emergence of Sociological Theory

This book provides a sociological account of the events in Bosnia in the 1990s, including ethnic cleansing, mass rape, and the role of political journalists. Drawing upon a diverse group of social theorists, including Merton, Weber, and Baudrillard, Sociology After Bosnia constructs a social understanding of the experiences of people in Bosnia and the response of Western leaders to these experiences. Beyond looking at the social causes of these events, Doubt sheds light on why Bosnia and Kosovo have largely been ignored by sociologists. He shows why the personal and social tragedies of people in Bosnia and Kosovo and the world's tolerance of these tragedies challenge contemporary sociological knowledge. Doubt argues that sociologists must be willing not only to recognize this challenge, but also to respond to it in order to construct meaningfully adequate accounts of war and genocide in a postmodern era. Doing so, he contends, may yield an important and needed reconsideration of the existing body of sociological

knowledge and a revision of how this knowledge is applied.

The Emotional Man and the Problem of Collective Action

Microsociology

Handbook of Social Psychology

Builds on the ideas C. Wright Mills expressed in *The Sociological Imagination* for an approach to the scientific method broad enough to open up to the full range of knowledge within the sociology discipline.

Humanity & Society

Regulating Emotions: Culture, Social Necessity, and Biological Inheritance brings together distinguished scholars from disciplines as diverse as psychology, sociology, anthropology, neuroscience, and psychotherapy to examine the science of regulating emotions. Contains 13 original articles written in an accessible style. Examines how social and cultural aspects of emotion regulation interact with

regulatory processes on the biological and psychological level Highlights the role of social and cultural requirements in the adaptive regulation of emotion Will stimulate further theorizing and research across many disciplines and will be essential reading for students, researchers, and scholars in the field

Oxford Companion to Emotion and the Affective Sciences

Therapeutic preaching is badly in need of rehabilitation. Administering mini-doses of psychological self-help from the pulpit simply will not do. Therapeutic preaching that is theocentric draws listeners more deeply into God's healing love. It involves setting up a creative conversation between divine and human therapy. In a novel and deeply insightful way, Neil Pembroke shows how metaphors and analogues drawn from psychotherapy can be employed to draw out the power in divine therapeia.

Citizenship and Social Theory

This text examines the causes of violence and destructive conflict through an exploration of human interaction in situations ranging from a psychotherapy session and marital quarrels to television game shows.

Toward a Sociological Imagination

This work integrates a broad range of interdisciplinary research to help students make connections with other subject matter they may be studying. It provides chapters that offer in-depth analyses of the psychology of religion, work and social change.

Communicating Emotion

Unique study re-evaluating the role of emotions in social interaction.

Perspectives on Social Problems

Moving beyond the traditional boundaries of sociological investigation, Thomas J. Scheff brings together the study of communication and the social psychology of emotions to explore the microworld of thoughts, feelings, and moods. Drawing on strikingly diverse and rich sources—the findings of artificial intelligence and cognitive science, and examples from literary dialogues and psychiatric interviews—Scheff provides an inventive account of the nature of social life and a theory of motivation that brilliantly accounts for the immense complexity involved in understanding even the most routine conversation. "A major contribution to

Read PDF Microsociology Discourse Emotion And Social Structure

some central debates in social theory at the present time. . . . What Thomas Scheff seeks to develop is essentially a quite novel account of the nature of social life, its relation to language and human reflexivity, in which he insists upon the importance of a theory of emotion. . . . A work of true originality and jolting impact. . . . Microsociology is of exceptional interest, which bears witness to the very creativity which it puts at the center of human social contact." —Anthony Giddens, from the Foreword "Scheff provides a rich theory that can easily generate further exploration. And he drives home the message that sociological work on interaction, social bonds, and society cannot ignore human emotionality."—Candace Clark, American Journal of Sociology "This outstanding and ground-breaking little volume contains a wealth of original ideas that bring together many insights concerning the relationship of emotion to motivation in a wide variety of social settings. It is strongly recommended to all serious students of emotion, of society, and of human nature."—Melvin R. Lansky, American Journal of Psychiatry
