In this brash and audacious debunking of the myths and manipulation that brought the world to oil addiction, alt fuel expert Marc J. Rauch brilliantly lays out how ethanol can change the planet for the better--and along the way helps us navigate the noise of petroleum advocates. The Ethanol Papers is a rough-and-tumble, no holds-barred crystallization of the ethanol vs. gasoline conflict. Written in plain jargon, non-scientists, non-academics, and politicians alike will find it compelling. Yet this is no "Idiots Guide to Biofuels" or "Alt Fuels for Dummies." Rather, The Ethanol Papers is the most in-depth and complete explanation of the ethanol-oil problem now available, targeted for smart people who demand facts.

Everyone you meet in an issue of Gearbox Magazine is cool. If you spotted them in a parking lot, you could walk right up to them and strike up a conversation. And chances are you might end up lifelong friends. We're not looking to get rich and forget our roots. We're trying to make a few bucks so we can spend more time helping gearheads build high performance machines & lives. This issue isn't perfect, but neither are our daily drivers. We hope you'll grab a copy and tell a couple friends about us. Thanks for checking us out. GBXM-united. Better living through busted knuckles.

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.
