Creatures of the Outer Edge

Like a bird-watching guideà only for monsters Monsters represent the dark side of humanity—the primal, animal impulses that reside in every single one of us. They have preyed upon our imaginations and our fears since the dawn of civilization. North America is home to a wide array of fearsome beasts, including hairy monsters, flying monsters, lake monsters, and other unexplained phenomena. Monster Spotter's Guide geographically catalogs more than one hundred legendary monsters reported to inhabit the continent. From the mythical Sasquatch of the Pacific Northwest to the vicious Mexican goatsucker known as El Chupacabra, you'll read about the legends and major sightings of the most widely feared creatures

The author of the controversial bestseller *Brain Trust* brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps science could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Colm Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its haunting mysteries. With

investigative reporter George Knapp -- the only journalist allowed to witness and document the team's work -- Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, Hunt for the Skinwalker is a clarion call to expand our vision far beyond what we know.

The Mothman Prophecies

On the night of November 15, 1996, two adventurous young couples drove into the TNT area north of Point Pleasant, WV. What they saw in the countryside that night has evolved into one of the great mysteries of all time: just who--or what--was the Mothman? This book will answer many questions regarding just what those couples saw outside the abandoned North Power Plant that night. Culled from a variety of sources, the materials presented inside are not conjecture--the authors are careful not to cross the line between fact and fiction--leaving any decisions regarding the truth behind the Mothman legend solely up to the reader. The text features eyewitness accounts, newspaper clippings, and previously unpublished information. It is sure to be of interest to readers as a tie-in with the January 2002 release of Sony Pictures' "The Mothman Prophecies" starring Richard Gere.

Monster Spotter's Guide to North America

The ultimate quest for the world's most mysterious creatures The Loch Ness Monster, Bigfoot, the Abominable Snowman -- these are the names of the elusive beasts that have caught the eye and captured the imaginations of people around the world for centuries. Recently, tales of these "monsters" have been corroborated by an increase in sightings, and out of these legends a new science has been born: cryptozoology -- the study of hidden animals. *Cryptozoology A to Z*, the first encyclopedia of its kind, contains nearly two hundred entries, including cryptids (the name given to these unusual beasts), new animal finds, and the explorers and scientists who search for them. Loren Coleman, one of the world's leading cryptozoologists, teams up with Jerome Clark, editor and author of several encyclopedias, to provide these definitive descriptions and many never-before-published drawings and photographs from eyewitnesses' detailed accounts. Full of insights into the methods of these scientists, exciting tales of discovery, and the history and evolution of this field, *Cryptozoology A to Z* is the most complete reference ever of the newest zoological science.

The Romance of Natural History

Inhumanoids are creatures or entities that have some type of human characteristic but are not human at all. Even though they sometimes appear as 'less than human, ' they are quite beyond the normal sense of the word and possess a troubling array of supernatural powers to prove the point. Some are true 'bi-forms;' curious anthropomorphic mixtures of human and animals, while others manifest themselves in guises that one might pass by on the street and never give a second glance. From the smallest fairy to the tallest giant and every form in between, these inhumanoid beings, in all their myriad forms, have been with us since the beginnings of recorded history and beyond. Every culture knows the inhumanoids quite well. Since the dawn of time man has encountered such creatures, which simply cannot be explained away using conventional zoological science. In fact, all that we 'know' of mainstream biology, zoology and anthropology scream in unison that creatures like 'The Spottsville Monster' cannot possibly exist at all. Yet people see these beings, and a host of others of the same bizarre ilk, much more frequently than many would suspect. In researching this book I was struck by the sheer number of alleged inhumanoid encounters reported to have taken place; thousands upon thousands. As a consequence of the sheer magnitude of such data, this work merely attempts to scratch the surface of that very old, long list

Abominable Snowmen

VIOLENCE BEGETS VIOLENCE BEGETS VIOLENCE A disturbed student shoots up his classroom -- and suddenly a wave of mass murder is sweeping through our nation's schools. A young child is taken from her home -- and for months afterward child abductions are frantically reported on an almost daily basis. A surfer is attacked by a shark -- and the public spends an entire summer fearing an onslaught of the deadly underwater predators. Why do the terrible events we see in the media always seem to lead to more of the same? Noted author and cultural behaviorist Loren Coleman explores how the media's over-saturated coverage of murders, suicides, and deadly tragedies makes an impact on our society. This is The Copycat Effect -- the phenomenon through which violent events spawn violence of the same type. From recognizing the emerging patterns of the Copycat Effect, to how we can deal with and counteract its consequences as individuals and as a culture, Loren Coleman has uncovered a tragic flaw of the information age -- a flaw which must be corrected before the next ripples of violence spread.

This true story of Texas millionaire Tom Slick's quest for the Abominable Snowman and other cryptids—creatures unknown to science—reveals a life made for the movies. Fascinating stories of Slick's early brushes with adventure such as his stepfather's abduction by George “Machine Gun” Kelly in 1933 and his creation of a research facility near Loch Ness are followed by his later expeditions into Nepal and the Pacific Northwest in search of the yeti and its counterpart, the Sasquatch. The story of Slick's amazing, fanatic, and driven search for the stuff of legends takes readers on a whirlwind journey from the dense temperate rainforests of Washington State to the icy peaks of the Himalayas—and shows that sometimes cryptids leave the halls of the imagination and are found and captured, as proved by the giant panda and the Komodo dragon, leaving readers to wonder what more there is to be discovered.

West Virginia, 1966. For thirteen months the town of Point Pleasant is gripped by a real-life nightmare that culminates in a strategy that makes headlines around the world. Strange occurrences and sightings, including a bizarre winged apparition that becomes known as the Mothman, trouble this ordinary American community. Mysterious lights are seen moving across the sky. Domestic animals are found slaughtered and mutilated. And journalist John Keel, arriving to investigate the freakish events, soon finds himself an integral part of an eerie and unfathomable mystery. Ah, Ohio, so nice and normal. We have apple pie heroes like Hopalong Cassidy, Neil Armstrong, Thomas Edison, and Doris Day. Our state bird is the jaunty and ever popular cardinal, and our state flower is the carnation, found in the buttonholes of politicians and bridegrooms everywhere. We started America rolling by opening the country's first gas station, and we have a museum dedicated to America's music, rock and roll. Why, we're just so all-American normal, it can bring a tear to the eye. But there's something else we have a whole lot of, and that's weirdness. Yes, the Buckeye State has lots and lots of strange people and unusual sites, and they burst forth from every page of this, the biggest, most bizarre collection of Ohio stories ever assembled: *Weird Ohio*.

sounds and weird images from these nocturnal adventures. Like most people, Jeff Cole has always been intrigued by aspects of the paranormal—does the human spirit endure after the body dies, and are there such things as ghosts? Though the deeper questions are best left to priests and scholars, his investigations of well- and lesser-known historical sites indicate the existence of a truly inexplicable phenomenon. *Ghostly Encounters* chronicles Cole's journey into the world of ghost hunting, other ghost hunting groups he has met, and the team he ultimately joins. *Ghostly Encounters* also provides a first-person account of the haunted locations explored, historical background and context to these sites, and audio and video clips so the reader can experience some of the startling evidence captured during these investigations.

Curiosities of Natural History

A pioneer in the strange art and ambiguous science of zoophagy—that is, of studying animals by eating them—British natural historian FRANCIS TREVELYAN BUCKLAND (1826-1880) was a wildly popular speaker and writer of the Victorian era. In his classic four-volume *Curiosities of Natural History*, published between 1857 and 1872, he shared his love of creatures exotic and mysterious with readers who devoured his charming and erudite essays much in the same way he devoured his animal subjects. "If there is one person that I would have expected to have captured a sea serpent in the 19th century for the sole purpose of eating it, it

would be Frank Buckland," writes cryptozoologist Loren Coleman in his new introduction to Buckland's series. One of the founding grandfathers of cryptozoology, the discipline that investigates animal mysteries, Buckland was not "a wild-eyed 'true believer' in anything strange," insists Coleman, but brought, instead, "a skeptical, open-minded approach" to his work. Indeed, here, in the "second series" of *Curiosities of Natural History*, Buckland's erudition is clear in his animated discussions of, among many other things, a dish of fossil fish, a gamekeeper's museum, the gypsy mode of cooking hedgehogs, and practical uses for whale bones. This new edition, a replica of the original 1871 seventh edition, is part of *Cosimo's Loren Coleman Presents* series. LOREN COLEMAN is author of numerous books of cryptozoology, including *Bigfoot!: The True Story of Apes in America* and *Mothman and Other Curious Encounters*.

He is best remembered today for having given us a cornerstone examination of the legends of fantastic flying reptiles known as dragons. times," notes cryptozoologist Loren Coleman in his new introduction. Coleman also praises the book's use of primary source material. "If cryptozoologists are to study the Asian dragons of India, China, and Japan, it must not be done through the screen of today's New Age mentality. Scholarly, level-headed examinations of living, breathing reports of serpentine flying beasts, water-borne megafauna, and shadowy entities must be balanced with investigations of the legends and folktales of these dragons from Asian texts," such as de Visser's here. Real Monsters, Gruesome Critters, and Beasts from the Darkside

For years, scientists and researchers have studied, speculated about, and searched for an enigmatic creature that is legendary in the annals of American folklore. Now, learn the truth about BIGFOOT! In this fascinating and comprehensive look at the fact, fiction, and fable of the North American "Sasquatch," award-winning author Loren Coleman takes readers on a journey into America's biggest mystery -- could an unrecognized "ape" be living in our midst? Drawing on over forty years of

investigations, interviews, and fieldwork on these incredible beasts, Coleman explores the modern debates about these powerful, ape-like creatures, why they have remained a mystery for so long, and what we can learn about ourselves from these animals, our nearest cousins! From reports of Bigfoot's existence found in ancient Native American traditions, to the controversial Patterson-Gimlin film of a Bigfoot in the wild, to today's Internet sites that record the sightings almost as soon as they occur, Coleman uncovers the past, explains the present, and considers the future of one of the greatest unsolved mysteries in the natural world.
