Chess Explained is a new series of books about chess openings. They are not theoretical works in the traditional sense, but more a series of lessons from a chess expert with extensive over-the-board experience with an opening. You will gain an understanding of the opening and the middlegames to which it leads, enabling you to find the right moves and plans in your own games. It is as if you were sitting at the board with a chess coach answering

your questions about the plans for both sides, the ideas behind particular moves, and what specific knowledge you need to have. The Classical Sicilian is one of the most popular and respected systems of the Sicilian, and has been used frequently by players such as Anand, Kramnik and Shirov. Black develops his pieces more quickly than in many Sicilian systems, and intricate piece-play often results. The Classical Sicilian arises after the moves 1 e4 c5 2 Nf3 d6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 Nc6. White's most popular and critical response is the Richter-Rauzer Attack, and recent years have seen a diversification in the plans for both sides in this perennially popular line. Against White's alternatives to the Rauzer, Yermolinsky covers lines that retain the independent significance of the Classical move-order, such as 6 Bc4 Qb6 - a line in which he is a leading specialist.

Duane Litfin, former president of Wheaton College, explores how Paul's theology of preaching can inform the church's preaching today. Through a detailed study of 1 Corinthians 1-4, Litfin shows how Paul's method of proclamation differed from Greco-Roman rhetoric and how Pauline preaching can be a model for the contemporary preaching task.

Trauma theory has become a burgeoning site of research in recent decades, often demanding interdisciplinary reflections on trauma as a phenomenon that defies disciplinary ownership. While this research has always been challenged by the temporal, affective, and corporeal dimensions of trauma itself, trauma theory now faces theoretical and methodological obstacles given its growing interdisciplinarity. Trauma and Transcendence gathers scholars in philosophy, theology, psychoanalysis, and social theory to engage the limits and prospects of trauma's transcendence. This

volume draws attention to the increasing challenge of deciding whether trauma's unassimilable quality can be wielded as a defense of traumatic experience against reductionism, or whether it succumbs to a form of obscurantism. Contributors: Eric Boynton, Peter Capretto, Tina Chanter, Vincenzo Di Nicola, Ronald Eyerman, Donna Orange, Shelly Rambo, Mary-Jane Rubenstein, Hilary Jerome Scarsella, Eric Severson, Marcia Mount Shoop, Robert D. Stolorow, George Yancy.

It's socially acceptable to spend a day watching sports or sitcoms, but it's shameful and embarrassing to admit to the same about erotic media. Why is it that sex is so often deemed "inappropriate" and considered something we must keep private or even ignore? Our culture is afraid of sex. We feel the need to label what is normal and what isn't, and as a result, we live in a relational and sexually unhealthy culture. In reality, far more harm is caused by labeling sexual expression as "obscene" than by celebrating it. In *Sex Outside the Lines: Authentic Sexuality in a Sexually Dysfunctional Culture*, Chris Donaghue, PhD, explores and challenges the negative ideals that have warped society's view of sex. *Sex Outside the Lines* is not a dogmatic rule book, but a valuable guide to help you on your journey to sexual self-discovery and, most important, self-acceptance. Donaghue encourages you to not only explore your capacity for pleasure, but to be proud of it and to take a look at how you could be living. In his years of training in sex and couples

therapy, Donaghue has developed highly successful methods for freeing clients from sexual hang-ups, enabling them to let go of shame and embarrassment. The goal isn't to be "normal"—there is no such thing. Donaghue pulls apart cultural phobias with a sex-positive therapy practice, as well as a kind of sexual deprogramming that helps people see and accept that the desires they have—even if they don't align with society's expectations—are actually natural, healthy, and part of having a great sex life. *Sex Outside the Lines* addresses our diversity, challenges conventional psychiatric wisdom as classifying perfectly normal behavior as disorders, and disregards conventional advice from leading experts. It isn't advocating a "liberal" approach to modern concepts—it is seeking to redefine them altogether.

She was no less daunted when she actually met James and went to stay with him and his mother in their home in Yorkshire. For James was only thirty-seven and a very attractive man, with what seemed like a harem of equally attractive women vying for his attention—and it was not long before Domine found herself, very much against her will, joining their number. But in the face of all that competition, how could she imagine that he would ever see her as anything but a child?

Life with the Amish isn't always milking cows, shucking corn and baking apple pies. Travel alongside these eight Indiana youth/newlyweds on their two-week expedition deep in the mountains of Colorado. They encounter some very unexpected happenings that affect them profoundly. As recorded by their own pens – sometimes hilarious, sometimes hair-raising incidents – from the top of the Sears (Willis) Tower to the top of the Rockies. In their own words: Reality Strikes. Here I am in the mountains, miles from civilization Nobody knows where I am no road close by the foremost thing on my mind is my fellow campers. They don't have the slightest clue what swallowed me up! I half-awaken to some disgruntled

sounds from David's tent Sometime later we're jerked awake by the loud POP of the pistol. The night is pitch black and makes me aware that I am quite alone Occasionally, I swivel my head around to check for eyes in the dark. If a bear smelled all this blood and fresh meat he'd probably think I owed him a handout Not for the fainthearted Thinking about taking a vacation in the mountains to get away from it all? Read this group's account to give you a sneak preview of what to expect. Paul's Theology of Preaching

Emily Ashcroft and her father, Sir Harrison Ashcroft, have set out to write a definitive biography of Adolph Hitler. Before they can finalize their manuscript, however, a cryptic letter from a German dentist sends Sir Harrison off to attempt the excavation of the site of the Führerbunker, where Hitler and his wife, Eva Braun, lived out the final weeks of their life before committing suicide and being cremated in a shallow pit. The thing is – maybe they didn't. Unfortunately, before the excavation can begin, Ashcroft is run down in a hit-and-run that would seem accidental – except the driver backed up and ran him over a second time. Armed only with the dentist's letter, her notes, and the determination to finish her father's book, Emily Ashcroft makes her own journey to Berlin. She is joined by a Russian museum curator, an American

architect writing a book on Nazi and Third Reich architecture, and a Mossad agent, posing as a reporter. Together they uncover what may be the greatest hoax ever perpetrated – the faked death of the Father of the Third Reich, and the plan to bring the Nazi party back to power. Through harrowing adventures, steamy romance, impersonators, SS guards, and survivors they piece together the missing puzzle pieces of what really happened so long ago. The only question is – are they up to the challenge, and, as they begin to close in, can they survive it?

The third edition of this popular text and reference book presents the fundamental principles for understanding and applying optical fiber technology to sophisticated modern telecommunication systems. Optical-fiber-based telecommunication networks have become a major information-transmission-system, with high capacity links encircling the globe in both terrestrial and undersea installations. Numerous passive and active optical devices within these links perform complex transmission and networking functions in the optical domain, such as signal amplification, restoration, routing, and switching.

Along with the need to understand the functions of these devices comes the necessity to measure both component and network performance, and to model and stimulate the complex behavior of reliable high-capacity networks.
