NOC and NIC Linkages to NANDA-I and Clinical Conditions - E-Book

"The challenge that nurses face today is one of identifying specific nursing diagnoses for those people assigned to their care and of incorporating these diagnoses into a plan of care. This handbook is intended to help in this effort in two ways: by providing a quick reference to each diagnostic category in terms of its definition, etiological and contributing factors, and defining characteristics; and by identifying possible nursing diagnoses that could be associated with the major medical diagnoses."--Introduction.

Manual of Nursing Diagnosis

The digitization of healthcare has become almost ubiquitous in recent years, spreading from healthcare organizations into the homes and personal appliances of practically every citizen. Thanks to the collective efforts of health professionals, patients and care providers as well as systems developers and researchers, the entire population of Europe is able to participate in and enjoy the benefits of digitized health information. This book presents the proceedings of the 26th Medical Informatics in Europe Conference (MIE2015), held in Madrid, Spain, in May 2015. The conference brings together participants who share their latest achievements in biomedical and health Informatics, including the role of the user in

digital healthcare, and provides a forum for discussion of the inherent challenges to design and adequately deploy ICT tools, the assessment of health IT interventions, the training of users and the exploitation of available information and knowledge to further the continuous and ubiquitous availability and interoperability of medical information systems. Contributions address methodologies and applications, success stories and lessons learned as well as an overview of on-going projects and directions for the future. The book will be of interest to all those involved in the development, delivery and consumption of health and care information.

Dutch Posters, 1997-2017

Fully updated and revised by authors T. Heather Herdman, PhD, RN, FNI, and Shigemi Kamitsuru, PhD, RN, FNI, *Nursing Diagnoses: Definitions and Classification 2018-2020, Eleventh Edition* is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA International (NANDA-I). In this new edition of a seminal text, the authors have written all introductory chapters at an undergraduate nursing level, providing the critical information needed for nurses to understand assessment, its link to diagnosis and clinical reasoning, and the purpose and use of taxonomic structure for the nurse at the bedside. Other changes include: 18 new nursing diagnoses and 72 revised diagnoses Updates to 11 nursing diagnosis labels, ensuring they are consistent with current literature and reflect a human response Modifications to the vast majority of the nursing diagnosis definitions, including especially Risk Diagnoses Standardization of diagnostic indicator terms (defining characteristics, related factors, risk factors, associated conditions, and at-risk populations) to further aid clarity for readers and clinicians Coding of all diagnostic indicator terms for those using electronic versions of the terminology Web-based resources include chapter and reference lists for new diagnoses Rigorously updated and revised, *Nursing Diagnoses: Definitions and Classification 2018-2020, Eleventh Edition* is a must-have resource for all nursing students, professional nurses, nurse educators, nurse informaticists, and nurse administrators.

Critical Thinking to Achieve Positive Health Outcomes

Oncologie is het standaardwerk voor alle oncologieverpleegkundigen, en verpleegkundigen werkzaam in de oncologie. De combinatie van algemene oncologische, diagnostische, medische, psychosociale en allesomvattende zorgaspecten maakt dit boek uitermate geschikt voor de dagelijkse praktijk van verpleegkundigen en andere hulpverleners die betrokken zijn bij mensen met kanker en hun naasten. De oncologische zorg is de laatste decennia steeds complexer geworden. Dit heeft effect op de behandelingstrajecten voor patiënten en voor de noodzaak van een goede algemene kennis en brede kijk op dit specialisme door de hulpverleners. Niet alleen op het gebied van behandeling, begeleiding en zorg, maar ook wat betreft preventie, screening, revalidatie en reïntegratie, waarbij leeftijd, cultuur en spiritualiteit niet kunnen worden vergeten. Patiënten hebben recht op de beste, op evidence gebaseerde behandeling en zorg en indien deze niet

voorhanden is, op de beste practice-based medische en verpleegkundige zorg. Dit vraagt om deskundige hulpverleners die kennis en vaardigheden bezitten om hun vak goed uit te oefenen en die verantwoordelijkheid nemen deze kennis en vaardigheden uit te breiden en up-to-date te houden. Dit boek beoogt een brede basis te leggen voor al deze gedreven hulpverleners, waarbij de patiënt en zijn naaste(n) niet alleen centraal staan, maar ook kunnen rekenen op de best mogelijke behandeling en zorg. Naast hoofdstukken waarmee (meer) kennis kan worden verworven ten aanzien van de algemene en specifiek medische en verpleegkundige diagnostiek, behandeling en zorg van veel voorkomende maligniteiten kent het boek ook hoofdstukken rondom thema's als organisatie van de oncologische zorg, palliatieve zorg en leeftijdsspecifieke zorg, culturele aspecten van de zorg en interactieve vaardigheden. Deze hoofdstukken zijn niet tumorgebonden en doen recht aan belangrijke aspecten in de oncologische zorgverlening.

The Roy Adaptation Model

The Care of Wounds addresses all aspects of holistic wound management. The fourth edition of this successful clinical text continues to reflect current research and evidence based practice, while incorporating the considerable developments which have occurred in wound care practice since the publication of the previous edition. This book includes chapters on the physiology of wound healing, general principals of wound management, wound management products, and the management of patients with both acute and chronic wounds. Superbly illustrated with full colour illustrations throughout, The Care of Wounds is of value to all nurses and healthcare professionals working in the field of tissue viability and wound healing.

Nursing Care Plans

This book is the product of the First National Conference on Classification of Nursing Diagnoses, an attempt on the part of 100 nurses to initiate the process of preparing an organized, logical, comprehensive system for classifying those health problems or health states diagnosed by nurses and treated by means of nursing interventions. It is the conviction of the conference participants that without such a system, nurses will continue to experience difficulty in educating beginning practitioners, designing and performing research, and communicating nursing care within the nursing profession or across the health system. If nursing is to survive the current turmoil in healthcare delivery, it must do all of these effectively -- and soon. - Introduction.

NOC and NIC Linkages to NANDA-I and Clinical Conditions

NURSING DIAGNOSIS encourages readers to develop critical thinking skills applicable to diagnostic reasoning and judgment

in clinical practice. This valuable reference helps the reader understand nursing diagnoses and their development and use in care delivery. Spanish version also available, ISBN: 84-8174-157-4

Women's Health in Primary Care

Organized to meet the needs of both beginner and expert diagnosticians. This text contains all major Diagnoses listed by the North American Nursing Diagnosis Association (NANDA). These are standard diagnoses that are meant to create a standard plan of care for patients with any range of ailments. Sample admission assessment guides are included for the family, community, and individual (adults, infants, young children, and critical care clients). Also included are sections on how diagnoses can be used to guide questions and observations beyond the basic assessment and how to use diagnostic categories in other clinical activities.

Animal-assisted Interventions for Individuals with Autism

The Wiley Blackwell Handbook of Humanism presents an edited collection of essays that explore the nature of Humanism as an approach to life, and a philosophical analysis of the key humanist propositions from naturalism and science to morality and meaning. Represents the first book of its kind to look at Humanism not just in terms of its theoretical underpinnings, but also its consequences and its diverse manifestations. Features contributions from international and emerging scholars, plus renowned figures such as Stephen Law, Charles Freeman and Jeaneane Fowler. Presents Humanism as a positive alternative to theism. Brings together the world's leading Humanist academics in one reference work.

NANDA International Nursing Diagnoses

It is not the presence of microorganisms, but their interaction with patients that determines their influence on wound healing. Documenting this critical but often ignored aspect of the treatment process, *Microbiology of Wounds* discusses the microbiology and biology of human wounds in relation to infection and non-healing. Gain the Necessary Scientific and Clinical Knowledge Pertaining to Chronic and Acute Wounds. The practice of wound healing is dynamic, infinitely complex, nonlinear, and prodigiously individualized to the patient. When one considers the myriad host variables that contribute to the disease state, understanding the intricacies of chronic wounds becomes even more difficult. This book presents the necessary scientific and clinical data pertaining to chronic and acute wounds, and discusses inflammation, epithelialization, granulation tissue, and tissue remodeling. It details techniques for treating chronic and acute wounds and covers the mode of action and efficacy of anti-infectives used in treating wounds. *Microbiology of Wounds* answers the call for a definitive reference on chronic and acute wounds.

Microbiology of Wounds

Compact and consistent, this book focuses on the essentials of nursing practice and theory while integrating the conceptual framework of the Model into contemporary practice. Standardized nursing NANDA diagnoses are used consistently throughout the book.

Classification of Nursing Diagnoses

A humorous handbook for witches, providing instruction in areas such as spells, superstitions, recipes, gardening, and glamour.

The Wiley Blackwell Handbook of Humanism

Based on ongoing research conducted by investigative teams at the University of Iowa, *NOC and NIC Linkages to NANDA-I and Clinical Conditions: Supporting Critical Thinking and Quality Care*, 3rd Edition is the only book on the market that provides linkages between the three standardized languages recognized by the American Nurses Organization (NOC, NIC, and all of the 2009-2010 NANDA-I approved nursing diagnoses). Its user-friendly, tabular format and real-world case studies make it the perfect tool to help you develop effective care plans for your patients. This edition features a new chapter on clinical decision making, a new chapter on the use of NNN in information systems, more concise intervention listings that identify major and suggested interventions, and approximately 20 new linkages to common, high-cost medical diagnoses. Linkages between the three standardized languages recognized by the American Nurses Organization: NANDA-I, Nursing Interventions Classification (NIC), and Nursing Outcomes Classification (NOC) help you select the most effective care plans for patients and allow institutions to track and quantify nursing care. Tabular format allows you to quickly retrieve information. Case studies with nursing care plans demonstrate the practical, real-life application of linkages. Definitions of all NANDA-I, NOC, and NIC labels provide comprehensive coverage of the standardized languages. Serves as an excellent companion to *Nursing Outcomes Classification (NOC)*, 4th Edition and *Nursing Interventions Classification (NIC)*, 5th Edition. **NEW!** Added linkages to common medical diagnoses help support clinical reasoning, improve quality, and build the evidence needed to enhance nursing care. - Includes 15-20 high-frequency, high-cost medical diagnoses that are commonly experienced by patients across the life span. - Examples include Congestive Heart Failure, Chronic Obstructive Pulmonary Disease (COPD), Total Joint Replacement, and Asthma. **NEW!** Treatment of Intervention content makes information easier to locate by listing interventions as Major Interventions and Suggested Interventions. Two **NEW** chapters discuss the use of linkages for clinical reasoning and quality improvement and the use of NNN in computerized information systems. **NEW!** Information associated with the risk for nursing diagnosis is contained on a single page for quick and easy reference.

Prentice Hall Nursing Diagnosis Handbook with NIC Interventions and NOC Outcomes

Digital Healthcare Empowering Europeans

Rev. ed. of: NANDA, NOC, and NIC linkages / editors, Marion Johnson [et al.]. 2nd ed. c2006.

The Neuman Systems Model

Nursing Diagnoses 2015-17

Most women initially discuss health-related matters with a medical practitioner in a primary care setting, whether they have specific concerns or are seeking advice and guidance. This practical and comprehensive guide will help primary care practitioners to deliver holistic women's health care to patients throughout different life stages. Contraceptive choices, infertility, pregnancy, and menopause are covered, along with specific diseases such as ovarian cysts, breast conditions, and ovarian cancer. All of the authors are GPs, consultants and nurses with experience of the requirements for healthcare delivery in the primary care setting. Each chapter is written in a practical style, including a list of key points and using cases to illustrate the application of the content. This will be invaluable reading for GPs, doctors in training roles, and nurses with an interest in women's health. It will be particularly useful for candidates preparing for the DRCOG or MRCGP examinations.

Esthetics and Biomechanics in Orthodontics - E-Book

The proceedings of the 10th International Nursing Informatics Congress (NI2009) offers a wide range of scientific knowledge to be disseminated among nurses, administrators, physicians or informaticians irrespective of whether they are clinicians, teachers, researchers or students. The variation of papers follow the advances in health information technology, although certain important topics such as ethics, education, management and clinical practice applications remain. The proceedings follows the ten themes of the conference programme: clinical workflow and human interface; consumer health informatics and personal health records; health information technology; terminology, standards and NMDS's; patient preferences and quality of care; patient safety; evidence based practice and decision support; consumer and professional education; strategies and methods for HIT training and national eHealth initiatives across the globe.

The Care of Wounds

Here's your "user's guide" to the new, research-based client classification system developed through Visiting Nurse Association of Omaha efforts. This handbook outlines the three system components explained fully in the Omaha System: Applications for community health nursing - the problem classification scheme, Intervention scheme, and Problem rating scale for outcomes. With the detailed, practical examples in this pocket guide, you can readily use the system for your own practice documentation, and data management. [Editeur]

Home Care Across Europe

This book uses the latest research findings to apply critical thinking processes for the development of diagnostic reasoning and the selection of patient outcomes and nursing interventions. Four chapters describe the meaning of intelligence, critical thinking, and application of critical thinking processes within nursing. The case studies and their ultimate resolution to intervention and outcome illustrate these processes by enabling repeated practice. Case studies are organized into four sections; problem diagnoses, risk diagnoses, health promotion diagnoses, and strength diagnoses. A companion website provides on-line resources.

The Omaha System

A reference to help nursing students and practising nurses select a nursing diagnosis and write plans of care with ease and confidence. The book provides care plans for every NANDA diagnosis and provides a quick access index of appropriate nursing diagnoses for over 1200 clinical entities.

Nursing Diagnoses 2012-14

#1 New York Times Bestseller In Being Mortal, bestselling author Atul Gawande tackles the hardest challenge of his profession: how medicine can not only improve life but also the process of its ending. Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and

riveting storytelling, *Being Mortal* asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end.

Comprehensive Textbook of Echocardiography (2 Volumes)

Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. The 2015–2017 edition of the classic and internationally recognised text has been rigorously updated and revised, and now provides more linguistically congruent diagnoses as a result of the Diagnostic Development Committee's attentiveness to understanding the translation of the diagnostic label, definition, defining characteristics, related factors, and risk factors. Each of the 235 diagnoses presented are supported by definitions as well as defining characteristics and related factors, or risk factors. Each new and revised diagnosis is based on the latest global evidence, and approved by expert nurse diagnosticians, researchers, and educators. New to this edition: 26 brand new nursing diagnoses and 13 revised diagnoses Updates, changes, and revision to the vast majority of the nursing diagnosis definitions, in particular the Health Promotion and Risk Diagnoses A standardization of diagnostic indicator terms (defining characteristics, related factors, and risk factors) to further aid clarity for readers and clinicians All introductory chapters are written at an undergraduate nursing level, and provide critical information needed for nurses to understand assessment, its link to diagnosis, and the purpose and use of taxonomic structure for the nurse at the bedside A new chapter, focusing on Frequently Asked Questions, representing the most common questions received through the NANDA-I website, and at global conferences Five nursing diagnoses have been re-slotted within the NANDA-I taxonomy, following a review of the current taxonomic structure Coding of all diagnostic indicator terms is now available for those using electronic versions of the terminology Companion website featuring references from the book, video presentations, teaching tips, and links to taxonomy history and diagnosis submission/review process description www.wiley.com/go/nursingdiagnoses

Being Mortal

This edition contains 189 care plans covering the most common nursing diagnoses and clinical problems in medical-surgical nursing. It includes four new disorders care plans, SARS, lyme disease, west Nile virus, and obstructive sleep apnea.

Nursing Diagnoses in Psychiatric Nursing

It's really 2 books in 1! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe administration of psychotropic medications. And, the concepts can be applied to a variety of healthcare settings...from in-patient hospitalization through the outpatient clinic...to home health and private practice.

Nursing Diagnoses, Outcomes, and Interventions

For every person over the age of 65 in today's European Union, there are four people of working age; by 2050, there will only be two. Demand for long-term care, of which home care forms a significant part, will inevitably increase in the decades to come. Despite the importance of the issue, however, up-to-date and comparative information on home care in Europe is lacking. This book attempts to fill some of that gap by examining current European policy on home care services and strategies. Home Care Across Europe probes a wide range of topics including the links between social services and health-care systems, the prevailing funding mechanisms, how service providers are paid, the impact of governmental regulation, and the complex roles played by informal caregivers. Drawing on a set of Europe-wide case studies (available in a second, online volume), the study provides comparable descriptive information on many aspects of the organization, financing and provision of home care across the continent. It is a text that will help frame the coming debate about how best to serve elderly citizens as European populations age.

Handbook of Nursing Diagnosis

This pocket-sized reference is ideal for use in clinicals, in class and at the bedside! A condensed version of the Nursing Diagnosis Handbook, 10th Edition, Mosby's Guide to Nursing Diagnosis, 4th edition uses a quick-access format to help you diagnose and formulate care plans with confidence and ease. It includes the most recent NANDA-I approved nursing diagnoses based on more than 1,300 specific symptoms and a step-by-step guide to creating care plans featuring desired outcomes, interventions, and patient teaching. UNIQUE! Care plans for every NANDA-I approved nursing diagnosis, including pediatric, geriatric, multicultural, home care, client/family teaching and discharge planning, and safety interventions Alphabetical thumb tabs provide quick access to specific symptoms and nursing diagnoses Pocketsize portability makes this book easy to carry and use in clinicals, in class, or at the bedside NEW! 4 Color Text NEW! Updated 2012-2014 NANDA-I-approved nursing diagnoses NEW! 16 new and 22 revised diagnoses NEW! Added content on safety, one of QSEN's six competencies

Mosby's Guide to Nursing Diagnosis

NURSING DIAGNOSES, OUTCOMES, AND INTERVENTIONS: NANDA, NOC and NIC Linkages extends the use of the Nursing Interventions Classification (NIC) and Nursing Outcomes Classification (NOC) by linking them with nursing diagnoses, using the NANDA taxonomy. This book is the first and only to provide linkages between all three recognized taxonomies based on research by the investigative teams at the University of Iowa. (Includes a FREE MERLIN website at:www.harcourthealth.com/MERLIN/Johnson/linkage/) Spanish version also available, ISBN: 84-8174-640-1

Stress and Coping in Autism

Advance your career in Canadian healthcare with a mastery of nursing research. Thoroughly updated to reflect today's changing Canadian nursing field, the fourth edition of Canadian Essentials of Nursing Research guides you to enhanced nursing practice through confident interpretation and application of the latest evidence-based nursing research.

Nursing: Health Education and Improving Patient Self-Management

Esthetics and Biomechanics in Orthodontics, 2nd Edition provides everything you need to know to successfully apply biomechanics in clinical orthodontics. This edition features new content in the areas of tooth movement, treating Class III malocclusions, skeletal anchorage, Surgery First treatment plans, and space closure. In addition to comprehensive guidance on basic biomechanic principles, this state-of-the-art reference also shows how all techniques can apply biomechanical principles to improve the force delivery, understand and prevent side effects, and achieve predictable results. Highly regarded lead author, Dr. Ravindra Nanda, is a widely known and respected educator in the field of orthodontics. Comprehensive coverage of diagnosis, treatment planning, and esthetics in tooth display provides a solid foundation in orthodontia and biomechanic problem solving. Case reports include high-quality photographs, radiographs, and illustrations to better show biomechanical principles. Radiographs and line drawings accompany clinical photographs to help illustrate the various stages of treatment. NEW! Content on the fundamentals that guide orthodontic tooth movement offers a clear understanding of how orthodontic appliances work and their role in designing treatment methodologies. NEW! Content on procedures and indications for optimal space closure helps you define priorities in treatment planning and understand all the treatment alternatives. NEW! Detailed information on biomechanics-based management of impacted canines provides treatment planning strategies and biomechanic techniques to achieve desired results without increasing treatment time. NEW! Coverage on modalities for the treatment of Class III malocclusions offers insight into new treatment protocols — such as corticotomy-assisted facemask therapy and corticotomy-assisted maxillary protraction — that are available to effectively treat these occurrences. NEW! Detailed information on the different forms of skeletal anchorage (including mini-implant technology) shows how certain challenges associated with types of tooth movement can now be overcome by applying sound biomechanical principles to skeletal anchorage. NEW! In-depth coverage of the Surgery First (SF) treatment plan offers step-by-step examples to help explain the technique of Sendai SF and its benefits.

Nursing Interventions Classification (NIC) - Binder Ready

This book describes the latest advances in health education and patients' self-management, addressing core questions such as: How can you motivate a patient to adopt a healthier lifestyle, and how can you support their self-management? Though

there is a broad consensus within the nursing profession on the importance of health promotion and the promotion of self-management, nursing professionals often struggle with the underlying theoretical and practical aspects involved, as well as the right type of intervention to use and how to evaluate the results. The book departs from international trends, which primarily underline the importance of prevention and focus on such issues as the increase in the number of people with chronic health problems and co-morbidity, the empowerment of patients, and the technological developments in the health care system. In the first chapters, it examines health at the micro-, meso- and macro-level, combined with epidemiological health indicators. The following chapters focus on prevention, health promotion and self-management, while also broadly discussing prevention. The book then turns to the development and purpose of, as well as plans for, health promotion and health education. The Intervention Mapping protocol is the starting point, addressing questions such as how to motivate a patient to other, healthier behavior. Subsequently, the field of health promotion is extended to disease prevention, patient education and self-management. On the basis of patients' needs, the book describes methods and interventions to promote self-management in detail. Self-management and chronic health problems are also highlighted, along with the patient's social network in connection with self-management and eHealth. Lastly, the book explores the relationship between nursing and health promotion, as well as disease prevention, nursing diagnoses, nursing interventions and care results. Additionally, this edition includes two trainings on 'Promoting the self-management of the patient' and on 'What is the role of the nursing professional in promoting self-management of the patient?'. This book is intended for bachelor and master courses for nursing professionals and is linked to the CanMeds competencies of health promoters and reflective evidence-based working professionals.

Polit & Beck Canadian Essentials of Nursing Research

Oncologie

For all undergraduate- and graduate-level courses across the Nursing curriculum, especially clinical courses. This easy-to-use guide gives students instant access to information needed to write thorough, individualized care plans based on the most recent NANDA-approved nursing diagnoses. Nursing Interventions Classifications (NIC) and Nursing Outcome Classifications (NOC) are incorporated throughout. The guide presents diagnoses associated with medical, surgical, psychiatric, perinatal, and pediatric patient populations. Each Plan of Care includes: definition of nursing diagnosis, defining characteristics, related factors, suggestions for use, suggested alternative diagnoses, expected outcomes and evaluation criteria, NIC/NOC taxonomy, and suggested nursing actions.

Nursing Diagnosis

Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, you can personalize the text to match your unique study needs! Select nursing interventions with the book that standardizes nursing language! Nursing Interventions Classification (NIC), 7th Edition provides a research-based clinical tool to help you choose appropriate interventions. It standardizes and defines the knowledge base for nursing practice as it communicates the nature of nursing. More than 550 nursing interventions are described - from general practice to all specialty areas. From an expert author team led by Howard Butcher, this book is an ideal tool for practicing nurses and nursing students, educators seeking to enhance nursing curricula, and nursing administrators seeking to improve patient care. It's the only comprehensive taxonomy of nursing-sensitive interventions available! More than 550 research-based nursing intervention labels are included, along with specific activities used to carry out interventions. Descriptions of each intervention include a definition, a list of activities, a publication facts line, and references. Specialty core interventions are provided for 53 specialties. NEW! 16 NEW interventions are added to this edition, including health coaching, phytotherapy, management of acute pain, and management of chronic pain. UPDATED! 95 interventions have been revised. NEW! Five label name changes are included.

Connecting Health and Humans

In deze uitgave worden alle hematologische maligniteiten besproken inclusief de nieuwe therapeutische mogelijkheden met een update van de zorg rond stamceltransplantaties. Alle belangrijke aspecten van de niet-maligne hematologie, zoals bloedarmoede, transfusiebeleid, bloedings- en stollingsziekten komen uitgebreid aan bod. Nieuw toegevoegd is het hoofdstuk over immunologie en een fraai overzicht van - in de hemalogie toegepaste - chemotherapie en immunotherapie. Het slothoofdstuk (Algemene verpleegkundige aandachtspunten) is volledig herschreven en aangepast aan de moderne inzichten in de verpleegkundige zorg op het gebied van hematologie.

Nursing Diagnoses 2009-2011, Custom

A nursing diagnosis is defined as a clinical judgment about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse has accountability (NANDA-I, 2009). Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of evidence-based, professionally-led nursing care - and to more effectively meeting the need of patients. In an era of increasing electronic patient health records, standardized nursing terminologies such as NANDA-I, NIC and NOC provide a means of collecting nursing data that are systematically analysed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. Nursing Diagnoses:

Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. Each nursing diagnosis undergoes a rigorous assessment process by NANDA-I's Diagnosis Development Committee, with stringent criteria used to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis, a definition, defining characteristics, risk factors and/or related factors. Many diagnoses are further qualified by terms such as risk for, effective, ineffective, impaired, imbalanced, self-care deficit, readiness for, disturbed, decreased, etc. The 2012-2014 edition is arranged by concept according to Taxonomy II domains, i.e. Health promotion, Nutrition, Elimination and exchange, Activity/Rest, Perception/Cognition, Self-perception, Role relationships, Sexuality, Coping/ Stress tolerance, Life principles, Safety/protection, Comfort, and Growth/development. The 2012-2014 edition contains revised chapters on NANDA-I taxonomy, and slotting of diagnoses into NANDA & NNN taxonomies, diagnostic reasoning & conceptual clarity, and submission of new/revised diagnoses. New chapters are provided on the use of nursing diagnoses in education, clinical practice, electronic health records, nursing & health care administration, and research . A companion website hosts related resources. Key features 2012-2014 edition arranged by diagnostic concepts Core references and level of evidence for each diagnosis New chapters on appropriate use of nursing diagnoses in clinical practice, education, administration and electronic health record 16 new diagnoses 11 revised diagnoses Aimed at students, educators, clinicians, nurse administrators and informaticians Companion website available, including a video on assessment, clinical reasoning and diagnosis

Methodiek en systematiek voor de verpleegkundige beroepsuitoefening

This book looks at how therapies involving animals can be used to help individuals with autism to develop skills and improve quality of life. Pavlides relates the success stories of different animal-assisted interventions. She emphasizes the importance of tailoring interventions to the specific needs of the individual and monitoring progress.

Nursing Diagnosis Handbook

A nursing diagnosis is defined as a clinical judgement about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse is accountable. Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of evidence-based, professionally-led nursing care – and to more effectively meeting the need of patients and ensuring patient safety. In an era of increasing electronic patient health records standardized nursing terminologies such as NANDA, NIC and NOC provide a means of collecting nursing data that are systematically analyzed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. 'Nursing Diagnoses:

Definitions and Classification' is the definitive guide to nursing diagnoses worldwide. Each nursing diagnoses undergoes a rigorous assessment process by NANDA-I with stringent criteria to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis and a definition. Actual diagnoses include defining characteristics and related factors. Risk diagnoses include risk factors. Many diagnoses are further qualified by terms such as effective, ineffective, impaired, imbalanced, readiness for, disturbed, decreased etc. The 2009-2011 edition is arranged by concept according to Taxonomy II domains (i.e. Health promotion, Nutrition, Elimination and Exchange, Activity/Rest, Perception/Cognition, Self-Perception, Role Relationships, Sexuality, Coping/ Stress Tolerance, Life Principles, Safety/Protection, Comfort, Growth/Development). The book contains new chapters on 'Critical judgement and assessment' and 'How to identify appropriate diagnoses' and core references for all nursing diagnoses. A companion website hosts NANDA-I position statements, new PowerPoint slides, and FAQs for students. 2009-2011 edition arranged by concepts New chapters on 'Critical judgement and assessment' and 'How to identify appropriate diagnoses' Core references for new diagnoses and level of evidence for each diagnosis Companion website available

The Witch's Handbook

"Looking at autism through the lens of stress and coping changes how one sees and responds to the puzzle of autism. The diverse contributions in this edited volume enlarge our knowledge of autism, offer strategies for ameliorating stress and for coping with the challenging behavior associated with autism"--Provided by publisher.

Hematologie

Dit boek beschrijft het verpleegkundig proces. Dit probleemoplossend model ondersteunt de verpleegkundige bij het diagnosticeren van patiëntproblemen, het planmatig inzetten van interventies en het zichtbaar en meetbaar maken van het effect van deze interventies. Daarnaast gaat het boek in op de methodische aanpak in documentatie van verpleegkundige zorg en de standaarden die de verpleegkundige daarbij kan gebruiken. Ter averduidelijking bevat het boek vele voorbeelden van de toepassing van methodisch en systematisch werken in de verpleegkundige zorg.
