The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Medical theory and practice of the 1700s developed rapidly, as is evidenced by the extensive collection, which includes descriptions of diseases, their conditions, and treatments. Books on science and technology, agriculture, military technology, natural philosophy, even cookbooks, are all contained here. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. The Organization of Distance

Creative nonfiction is the fastest-growing segment in the writing market. Yet, the majority of writing guides are geared toward poetry and fiction writers. Tell It Slant fills the gap. Designed for aspiring nonfiction writers, this much-needed reference provides practical guidance, writing exercises, and a detailed discussion of the range of subcategories that make up the genre, including memoir, travel writing, investigative reporting, and more.

A Medical Commentary on Fixed Air

Exchanging Lives brings poet and translator into a transforming dialogue. The act of translating the Argentinean poet Alejandra Pizarnik not only frees 'fixed and frozen signs' to migrate into another language, but brings about changes in Susan Bassnett's own writing. The collection contains four sections. The first is of translations from Pizarnik's *Arbol de Diana* (1962), that Octavio Paz wrote, 'does not contain a single false detail' and put Pizarnik among the 'finest Latin American

writers'. The second juxtaposes translations of Pizarnik with poems by Susan Bassnett. These share common concerns as women, but it is a dialogue of difference as Bassnett, fighting for personal writing space from the clamours of work and the 'mothering/wings [that] hold back my writing hand' enters the world of Pizarnik, who described herself as 'a silent woman/ who sometimes flows with language', whose work speaks always of social isolation and not belonging. The third section, 'Asia of my imaginings' is a sequence of poems by Bassnett that could not have been written without the experience of translating Pizarnik's daring, subversive work. The fourth brief section condenses the recognitions of identity and difference. Book jacket.

Medical Transitions in Twentieth-Century China

Written in Johnny Saldaña's elegant and accessible style, *Thinking Qualitatively: Methods of Mind* boldly pursues the challenge of teaching students not just how to collect and analyze data, but how to actively think about them. Each chapter presents one "method of mind" (thinking analytically, realistically, symbolically, ethically, multidisciplinary, artistically, summarily, interpretively, and narratively), together with applications, a vignette or story related to the thinking modality, points to remember, and exercises. Designed to help researchers "rise above the data," the book explores how qualitative research designs, data collection, data analyses, and write-ups can be enriched through over 60 different lenses, filters,

and angles on social life. Venturing into more evocative and multidimensional ways to examine the complex patterns of daily living, the book reveals how the researcher's mind thinks heuristically to transcend the descriptive and develop "highdeep" insights about the human condition. "This is a book for all qualitative methodologists. Not just a 'how-to' manual but an epistemological exercise in understanding qualitative methods." —Cassie F. Quigley, Clemson University "This book fills an important void in the field. The market is crowded with books on techniques and strategies for conducting qualitative research. Saldaña's volume provides a vital complement by encouraging students to develop the core analytical skills and interpretive frames they need to be truly successful in their research endeavors. He helps students flex and hone the epistemological muscles that are at the center of capable qualitative research." —John P. Bartkowski, University of Texas at San Antonio "The focus of the book is clear and consistent. The writing is superb. It deals with sophisticated ideas in a clear and highly communicative style. It weaves important and relevant scholarship in ways that help the reader grasp the key ideas. It's one of the best books I have read." —Liora Bresler, University of Illinois at Urbana-Champaign "Thinking Qualitatively invites students to think before they act and offers a rich set of options for qualitative researchers to consider." —Michael Brown, University of Wyoming "This book brings together key ways of thinking about our work as qualitative researchers. In many ways, it captures the breadth and depth of our work, while calling for us to be ever reflexive about our practices. I see this book as positively informing the

work of novice and experienced researchers. It is a much needed addition to the qualitative research community.” —Jessica Nina Lester, Indiana University

7 Steps to Get Off Sugar and Carbohydrates

The New York Times bestselling author of *Better* and *Complications* reveals the surprising power of the ordinary checklist. We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to

investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

The Dead and the Gone

Join millions of other self-healers and be part of a worldwide self-healing movement. Slap and stretch to rejuvenate your health. Simple, spontaneous, free, and very effective! Sounds unbelievable? This is what *Heal Yourself Naturally Now* is all about. We all saw the purple spots on Michael Phelps' back during his swimming competition at the 2016 Olympics in Rio. As reported by CNN and Huffington Post, these purple spots are the results of a Chinese healing technique called "cupping," which keeps the athletes "injury free and speeds recovery." For centuries, based on the same principle, as stated in the oracle of Chinese Medicine, *Yellow Emperor's Inner Canon*, there exists a much more effective technique for self-healing: *PaidaLajin*. Over the last several years, *PaidaLajin* has been spread into 30-plus countries, healing millions of people from: -Chronic pain on the back, knee, neck, etc. -Immune disorders: diabetes, hypertension, tumor, insomnia, depression, arthritis, stroke sequelae, Alzheimer's, prostate issues, etc. -Acute illnesses: heart attack, stroke, stomach pain, menstrual pain, etc. -Gynecological issues: fibroids, cysts, anti-aging, weight management, etc. -Skin diseases:

Yoko Tawada's Portrait of a Tongue

This is the poetry by Nicole Brossard who has become well known as a lesbian feminist theorist and writer and as the leading figure among Quebec post-modernist writers. Her work blurs the boundaries between fiction and theory, subverting the fictions patriarchal discourse has spun about women's lives by working with the 're(her)alities' of women's lives that lie outside the codes of fiction.

The Chinese Written Character as a Medium for Poetry

Yoko Tawada's Portrait of a Tongue: An Experimental Translation by Chantal Wright is a hybrid text, innovatively combining literary criticism, experimental translation, and scholarly commentary. This work centres on a German-language prose text by Yoko Tawada entitled 'Portrait of a Tongue' ['Porträt einer Zunge', 2002]. Yoko Tawada is a native speaker of Japanese who learned German as an adult. Portrait of a Tongue is a portrait of a German woman—referred to only as P—who has lived in the United States for many years and whose German has become inflected by English. The text is the first-person narrator's declaration of love for P and for her

language, a 'thinking-out-loud' about language(s), and a self-reflexive commentary. Chantal Wright offers a critical response and a new approach to the translation process by interweaving Tawada's text and the translator's dialogue, creating a side-by-side reading experience that encourages the reader to move seamlessly between the two parts. Chantal Wright's technique models what happens when translators read and responds to calls within Translation Studies for translators to claim visibility, to practice "thick translation", and to develop their own creative voices. This experimental translation addresses a readership within the academic disciplines of Translation Studies, Germanic Studies, and related fields. - This book is published in English.

Life Work

First published in 1919 by Ezra Pound, Ernest Fenollosa's essay on the Chinese written language has become one of the most often quoted statements in the history of American poetics. As edited by Pound, it presents a powerful conception of language that continues to shape our poetic and stylistic preferences: the idea that poems consist primarily of images; the idea that the sentence form with active verb mirrors relations of natural force. But previous editions of the essay represent Pound's understanding—it is fair to say, his appropriation—of the text. Fenollosa's manuscripts, in the Beinecke Library of Yale University, allow us to see this essay in a different light, as a document of early, sustained cultural interchange between North America and East Asia. Pound's editing of the essay obscured two important features, here restored to view: Fenollosa's encounter with Tendai Buddhism and Buddhist ontology, and his concern with the dimension of sound in Chinese poetry. This book is the definitive critical edition of Fenollosa's important work. After a substantial Introduction, the text as edited by Pound is presented, together with his notes and plates. At the heart of the edition is the first full publication of the essay as Fenollosa wrote it, accompanied by the many diagrams, characters, and notes Fenollosa (and Pound) scrawled on the verso pages. Pound's deletions, insertions, and alterations to Fenollosa's sometimes ornate prose are meticulously

captured, enabling readers to follow the quasi-dialogue between Fenollosa and his posthumous editor. Earlier drafts and related talks reveal the development of Fenollosa's ideas about culture, poetry, and translation. Copious multilingual annotation is an important feature of the edition. This masterfully edited book will be an essential resource for scholars and poets and a starting point for a renewed discussion of the multiple sources of American modernist poetry.

The Children of the Old Stone House

Walter Benjamin and the Media

The Old Stone House is the site of a school for boys, twelve boarding students and twenty day students. The school was run by Mr. Faxon, who lived there with his wife and their four daughters. As the girls were "little sisters" to the whole school, they were sometimes indulged, sometimes slighted, but always lively.

Recollections of Forty Years in the House, Senate and Cabinet, Volume 2 - Scholar's Choice Edition

Chinese Poetry and Translation: Rights and Wrongs offers fifteen essays on the triptych of poetry + translation + Chinese. The collection has three parts: "The Translator's Take," "Theoretics," and "Impact." The conversation stretches from queer-feminist engagement with China's newest poetry to philosophical and

philological reflections on its oldest, and from Tang- and Song-dynasty classical poetry in Western languages to Baudelaire and Celan in Chinese. Translation is taken as an interlingual and intercultural act, and the essays foreground theoretical expositions and the practice of translation in equal but not opposite measure. Poetry has a transforming yet ever-acute relevance in Chinese culture, and this makes it a good entry point for studying Chinese-foreign encounters. Pushing past oppositions that still too often restrict discussions of translation-form versus content, elegance versus accuracy, and "the original" versus "the translated"-this volume brings a wealth of new thinking to the interrelationships between poetry, translation, and China.

Yeazell, who for this Ninth Edition is joined by his colleague Joanna Schwartz. Yeazell and Schwartz employ a pedagogical style that offers flexible organization at a manageable length. The book gives students a working knowledge of the procedural system and introduces the techniques of statutory analysis. The cases selected are factually interesting and do not involve substantive matters beyond the experience of first-year students. The problems following the cases present real-life issues. Finally, the book incorporates a number of dissenting opinions to dispel the notion that most procedural disputes present clear-cut issues.

The Checklist Manifesto

Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for our children. This discipline addresses current issues such as climate change, increasing food and fuel prices, starvation, obesity, water pollution, soil erosion, fertility loss, pest control and biodiversity depletion. Novel solutions are proposed based on integrated knowledge from agronomy, soil science, molecular biology, chemistry, toxicology, ecology, economy, philosophy and social sciences. As actual society issues are now intertwined, sustainable agriculture will bring solutions to build a safer world. This book series analyzes current agricultural issues, and proposes alternative solutions, consequently helping all scientists, decision-makers, professors, farmers and politicians wishing to build safe agriculture, energy and food systems for future generations.

Exchanging Lives

One of the most powerful forces in business today is the positive psychology movement -- overcoming self-defeating attitudes and developing our talents and positive traits. Much of the new thinking, in fact, stems directly from the concepts in Norman Vincent Peale's great classic bestseller, *The Power of Positive Thinking*, which has been translated into forty-two languages and has sold over 22 million copies. Now, after years of extensive research and field testing, working in cooperation with the Peale Center and major corporations nationwide, Scott Ventrella has adapted those concepts into a systematic program for people in business to achieve greater levels of personal and professional performance. *The Power of Positive Thinking in Business* provides a practical way for each of us to develop and actually strengthen the ten traits of a positive thinker. Inevitably, our

Where To Download New Emergency Nursing Paperbackchinese Edition

performance rises to new levels when we learn how to overcome negative attitudinal barriers such as fear, lack of self-confidence, and low self-esteem, and instead develop the traits that characterize a positive thinker: optimism, enthusiasm, belief, integrity, courage, confidence, determination, patience, calmness, and focus. The Power of Positive Thinking in Business encourages us to concentrate on objective, rational thinking instead of self-limiting beliefs and negative self-talk. The result is an increased ability to deal effectively with tough situations and difficult people, in both business environments and personal lives. Together, rational thinking and the ten traits of a positive thinker can turn defeatist behavior into productive actions that will overcome the toughest of challenges with powerful, positive results. Best of all, these practical yet powerful concepts are applicable to businesspeople at all levels, disciplines, and functions within an organization, and have been adapted to appeal to people of all faiths.

Chinese Poetry in Times of Mind, Mayhem and Money

Ancient humans were peaceful - modern violence is avoidable. That's the basic message contained in *Saharasia*, a controversial marriage of heresies over 10 years in the making. Perhaps the most ambitious and systematic scientific evaluations of human behavior and history ever undertaken, with hundreds of maps and illustrations, reviewing conditions in over 1000 cultures world-wide. *Saharasia* presents the first world geographical review of standard cross-cultural, anthropological, archaeological and historical findings, a survey of human family life and social institutions, tracing social violence back in time to specific times and places of first-origin. Starting in the 1980s, author DeMeo identified the Saharasian Desert Belt as the most violent large territory on Earth, today recognized as homeland of the modern Islamic terror brigades. If you really want to know the why of the current Islamofascist march-to-war, this book will provide answers.

Walter Benjamin (1892-1940), one of the most original and perceptive thinkers of the twentieth century, offered a unique insight into the profound impact of the media on modern society. Jaeho Kang's book offers a lucid introduction to Benjamin's theory of the media and its continuing relevance today. The book

Where To Download New Emergency Nursing Paperbackchinese Edition

provides a systematic and close reading of Benjamin's critical and provocative writings on the intersection between media - from print to electronic - and modern experience, with reference to the information industry, the urban spectacle, and the aesthetic politics. Bringing Benjamin's thought into a critical constellation with contemporary media theorists such as Marshall McLuhan and Jean Baudrillard, the book helps students understand the implications of Benjamin's work for media studies today and how they can apply his distinctive ideas to contemporary media culture. Kang's book leads to a fresh appreciation of Benjamin's work and new insight into critical theoretical approaches to media. The book will be of particular interest to students and researchers not only in media and communication studies but also in cultural studies, film studies and social theory, who are seeking a readable overview of Benjamin's rich yet complex writings.

Saharasia

For over seventy years the Kremlin was the bastion of the all-powerful Soviet rulers. A great deal is known about the men who held millions of fates in their iron grip, yet little is known about the women—the wives and mistresses—who shared their lives. They took part in the Revolution and its aftermath, bore children, and suffered abuse; some were arrested and sent to Siberia, driven to suicide, or even murdered. In 1991 the KGB granted the author access to its secret files, which, together with the author's own research and interviews, provided the material for this book. Here for the first time the stark and sometimes scandalous truth about these women is revealed. Lenin's wife worked passionately for the Revolution alongside her husband, from the time of Lenin's exile until her death. His mistress was also a close friend of his wife. Stalin married Nadezhda Alliluyeva when she was only sixteen. Earlier, he had had a relationship with Nadezhda's mother, and

there is strong evidence that his wife may also have been his daughter. When she was found dead in a pool of blood, the official verdict was suicide, but many believe she was murdered. Secret Police Chief Lavrenti Beria, known as “The Butcher,” roamed the streets in Moscow in a curtain-drawn limousine, stalking young girls who would later be abducted by his agents. One was forced to marry Beria—his wife Nina Teimurazovna. Among the many other Kremlin “wives” portrayed here are: Alexandra Kollontai, feminist and supporter of “free love”; Larissa Reisner, Boris Pasternak’s muse; Olga Kameneva, Trotsky’s sister; Nina Khrushchev; Victoria Brezhnev; Galina Brezhneva; Tatyana Fillipovna Andropov, and Raisa Gorbachev—supposedly the only Soviet ruler’s wife to have married for love. Skyhorse Publishing, along with our Arcade, Good Books, Sports Publishing, and Yucca imprints, is proud to publish a broad range of biographies, autobiographies, and memoirs. Our list includes biographies on well-known historical figures like Benjamin Franklin, Nelson Mandela, and Alexander Graham Bell, as well as villains from history, such as Heinrich Himmler, John Wayne Gacy, and O. Poetry. Asian & Asian American Studies. Translated from the Chinese by Ye Chun. "For over two decades, March 26th has marked the day when college students across China hold vigils for the poet Hai Zi, reciting his poetry and sharing their own poems dedicated to him. Newspapers and magazines publish memorial articles and the latest critical essays on his work. People travel from far and near to visit his tomb in the otherwise forgotten village of Chawan. It was on this day in 1989 that Hai Zi laid his body down on a rail track near Beijing Shanhaiguan and ended his life at the age of twenty five. This volume examines important aspects of China's century-long search to provide appropriate and effective health care for its people. Four subjects—disease and healing, encounters and accommodations, institutions and professions, and people's health—organize discussions across case studies of schistosomiasis, tuberculosis, mental health, and tobacco and health. Among the book's significant conclusions are the importance of barefoot doctors in disseminating western medicine, the improvements in medical health and services during the long Sino-Japanese war, and the important role of the Chinese consumer. Intended for an audience of health practitioners, historians, and others interested in the history of medicine and health in China, the book is one of three commissioned by the China Medical Board to mark its centennial in 2014.

In *The Comforting Whirlwind*, acclaimed environmentalist and writer Bill McKibben turns to the biblical book of Job and its awesome depiction of creation to demonstrate our need to embrace a bold new paradigm for living if we hope to reverse the current trend of ecological destruction. With reference to the consequences of our poorly considered and self-centered environmental practices—global warming, ozone degradation, deforestation—McKibben combines modern science and timeless biblical wisdom to make the case that growth and economic progress are not only undesirable but deadly. If we continue to
