The Role of Translators in Children's Literature

Effective communication is a critical skill that influences your professional success, the stability of your family life, and your personal happiness. Your ability to communicate effectively is seriously hampered if you can't assert yourself constructively. If you've ever felt paralyzed by an imposing individual or strongly argued opposing point of view, you know that a lack of assertiveness can leave you feeling marginalized and powerless. The Assertiveness Workbook contains effective, cognitive behavioral techniques to help you become more assertive. Learn how to set and maintain personal boundaries without becoming inaccessible.

There are approximately 502 million radios in America. For this savvy, far-reaching diary, celebrated journalist and author Sarah Vowell turned hers on and listened--closely, critically, creatively--for an entire year. As a series of impressions and reflections regarding contemporary American culture, and as an extended meditation on both our media and our society, Radio On is a keenly focused book that is as insightful as it is refreshing.

CIRCUITS. Readers learn the basics of electric circuits with common design practices and simulations as the book presents clear step-by-step examples, practical exercises, and problems. Each chapter includes several examples and problems related to circuit design, with answers for odd-numbered questions so learners can further prepare themselves with self-guided study and practice. ELECTRIC CIRCUITS covers everything from DC circuits and AC circuits to Laplace transformed circuits. MATLAB scripts for certain examples give readers an alternate method to solve circuit problems, check answers, and reduce laborious derivations and calculations. This edition also provides PSpice and Simulink examples to demonstrate electric circuit simulations. Derek Rafferty's brother-in-law, Dean, has been sent to prison. He is mid-forties, respectable, married for twenty-five years with three grown-up kids and never before been in trouble with the law. As an ex-copper, Rafferty needs to find out how this has happened. Whilst visiting his sister during Dean's absence he comes across some evidence that all is not as it has appeared. He decides to carry out his own investigation and, not wanting to rely on the traditional justice system with which he has lost faith, proceeds to act as prosecutor, jury and judge.

Something Rising

Sanora Babb's long-hidden novel *Whose Names Are Unknown* tells of the High Plains farmers who fled drought and dust storms during the Great Depression. Written with empathy for the farmers' plight, this powerful narrative is based upon the author's firsthand experience. Babb submitted the manuscript for this book to Random House for consideration in 1939. Editor Bennett Cerf planned to publish this "exceptionally fine" novel but when John Steinbeck's *The Grapes of Wrath* swept the nation, Cerf explained that the market could not support two books on the subject.

Loyalty and Disloyalty

Palace of the Peacock, the first of Wilson Harris's many novels, was published in 1960, just one year after his arrival in Britain from Guyana. In a richly metaphorical style, the book sets out the themes Wilson continues to develop in his writing to this day: the ability of the imaginative consciousness to create worlds where disparate cultures and traditions are fused. Donne, an ambitious skipper, leads a multiracial crew up an unnamed river in the rainforest. He is searching for the indigenous people of the forest to exploit as cheap labour on his plantation. But the journey is beset with obstacles, and as the crew progress and their relationships

develop, it takes on a more spiritual significance, culminating with the crew and the forest folk finding sanctuary and resolution in the visionary Palace of the Peacock.

A manual for understanding the anatomical and emotional components of posture in order to heal chronic pain • Contains self-help exercises and ergonomics information to help correct unhealthy movement patterns • Teaches how to adopt suitable posture in the modern sedentary world Many people cause their own back and body pain through their everyday bad postural and movement habits. Many sense that their poor posture is probably the root of the problem, but they are unable to change long-standing habits. In *The New Rules of Posture*, Mary Bond approaches postural changes from the inside out. She explains that healthy posture comes from a new sense we can learn to feel, not by training our muscles into an ideal shape. Drawing from 35 years of helping people improve their bodies, she shows how habitual movement patterns and emotional factors lead to unhealthy posture. She contends that posture is the physical action we take to orient ourselves in relation to situations, emotions, and people; in order to improve our posture, we need to examine both our physical postural traits and the self-expression that underlies the way we sit, stand, and move. The way we walk, she says, is our body's signature. Bond identifies the key anatomical features that

impact alignment, particularly in light of our modern sedentary lives, and proposes six zones that help create postural changes: the pelvic floor, the breathing muscles, the abdomen, the hands, the feet, and the head. She offers self-help exercises that enable healthy function in each zone as well as information on basic ergonomics and case histories to inspire us to think about our own habitual movements. This book is a resource for Pilates, yoga, and dance instructors as well as healthcare professionals in educating people about postural self-care so they can relieve chronic pain and enjoy all life activities with greater ease.

Chemistry Teacher's Guide

This book offers a historical analysis of key classical translated works for children, such as writings by Hans Christian Andersen and Grimms' tales. Translations dominate the earliest history of texts written for children in English, and stories translated from other languages have continued to shape its course to the present day. Lathey traces the role of the translator and the impact of translations on the history of English-language children's literature from the ninth century onwards. Discussions of popular texts in each era reveal fluctuations in the reception of translated children's texts, as well as instances of cultural mediation by translators and editors. Abridgement, adaptation, and alteration by translators have often been viewed in a negative light, yet a closer examination of historical translators' prefaces reveals a far more varied picture than that of faceless conduits or wilful

censors. From William Caxton's dedication of his translated History of Jason to young Prince Edward in 1477 ('to thentent/he may begynne to lerne read Englissh'), to Edgar Taylor's justification of the first translation into English of Grimms' tales as a means of promoting children's imaginations in an age of reason, translators have recorded in prefaces and other writings their didactic, religious, aesthetic, financial, and even political purposes for translating children's texts.

Essentials of UK Politics

Once upon a time, a dark evil crept into my kingdom, stealing my loved ones and the happy life I knew. The world turned against me, and I swore to become stronger, to keep myself safe. Once upon a time, there was a handsome prince, hair dark as ebony, skin as pure as the freshly driven snow, and I became the only

one who stood between him and death. Once upon a time, our stories intertwined, and now, healing my heart may be the only way to save us all from the evil that threatens to destroy what little we have left.

Shadows on Snow

Synthesizing a vast body of scholarly work, Henry Patterson offers a compelling narrative of contemporary Ireland as a place poised between the divisiveness of deep-seated conflict and the modernizing - but perhaps no less divisive - pull of ever-greater material prosperity. Although the two states of Ireland have strikingly divergent histories, Patterson shows more clearly than any previous historian how interdependent those histories - and the mirroring ideologies that have fuelled them - have been. With its fresh and unpredictable readings of key events and developments on the island since the outbreak of the second world war, Ireland Since 1939 is an authoritative and gripping account from one of the most distinguished Irish historians at work today.

Drag King Dreams

The purpose of this study was to identify factors of leadership and governance in Ethiopian private higher education institutions (HEIs) that result in a poor or decaying quality of education in those institutions. The study was initiated at a time when higher education in the country was under scrutiny and especially private HEIs were being held to account by the public and the government. The study explored how key governance or leadership factors in private HEIs may contribute to a poor or declining quality of education and the extent to which leaders of private HEIs agree that appropriate governance can reverse poor or declining quality in the country's HEIs. The research employed a qualitative case study methodology to obtain data from private HEI leaders whose institutional head offices were in the city of Addis Ababa. It used document review, field notes, and observation to enable triangulation of the findings with other publicly available information. Results indicated that leaders of private HEIs are continuously challenged to balance government requirements and stakeholder demands in an environment where underfunding, a scarcity of qualified instructors, poor infrastructure, marginally or less-qualified students, and a disparate regulatory environment are facts of life. Based on these results, recommendations for leaders,

policy makers, and regulators of HEIs include ensuring availability and proper utilization of qualified instructors, adequate infrastructure, an autonomous quality assurance unit in each HEI, and more equitable regulation and enforcement of provisions across the higher education sector. Instituting these measures will help to ensure that all Ethiopian HEIs meet the country's needs for a citizenry capable of 21st-century economic development. Keywords: Educational governance, quality education, relevance, private and public educational institutions, quality factors, leadership role, quality assurance, challenges to quality education

Five Thousand Years of Sustainability?

In her first two books, Haven Kimmel claimed her spot on the literary scene—surprising readers with her memoir, *A Girl Named Zippy*, and winning an outpouring of critical acclaim for her first novel, *The Solace of Leaving Early*. Now, in her second novel, she brings to the page a heroine's tireless quest for truth, love, justice, and the perfect game of 9-ball. Cassie Claiborne's world is riddled with problems beyond her control: her hard-living, pool-shooting father has another wife; her stoic, long-suffering mother is incapable of moving herself mentally away from the kitchen window; her sister Belle is a tempest of fragility and brilliance; her closest friends, Puck and Emmy, are adolescent harbingers of their own doomed futures. Frustrated by her inability to care deeply enough for so many troubled souls, Cassie finds in the local pool hall an oasis of green felt where she can master objects and restrain her emotions. As Cassie grows from a quietly complex girl into a headstrong young woman, she takes on the thankless role of family provider by working odd jobs and hustling pool. All the while, she keeps her eye on the ultimate prize: wringing suitable justice out of past wrongs and freeing herself from the inertia that is her life. In this ultimately uplifting story, Haven Kimmel reaches deep into the hamstrung souls of her fictional corner of Indiana. Remarkable for its tough tenderness, *Something Rising* (Light and Swift) is an astonishing work of pure heartbreak.

The New Rules of Posture

Updated and improved, this revised edition of Michel Barsoum's classic text *Fundamentals of Ceramics* presents readers with an exceptionally clear and comprehensive introduction to ceramic science. Barsoum offers introductory coverage of ceramics, their structures, and properties, with a distinct emphasis on solid state physics and chemistry. Key equations are derived from first principles to ensure a thorough understanding of the concepts involved. The book divides naturally into two parts. Chapters 1 to 9 consider bonding in ceramics and their resultant physical structures, and the electrical, thermal, and other properties that are dependent on bonding type. The second part (Chapters 11 to 16) deals with those factors that are determined by microstructure, such as fracture and fatigue, and thermal, dielectric, magnetic, and optical properties. Linking the two sections is Chapter 10, which describes sintering, grain growth, and the development of microstructure. *Fundamentals of Ceramics* is ideally suited to senior undergraduate and graduate students of materials science and engineering and related subjects.

Palace of the Peacock

This book focuses on higher education in Ethiopia, analysing persisting inequalities and policy responses against the backdrop of the extensive expansion and reform

Read Book Nimei Moe Ethiopia

that the system has experienced in recent years. Drawing on empirical data generated through interviews, policy reviews and focus-group discussions, it explicates factors of structural inequality ranging from neoliberal policy orientations to repressive gender culture and geo-political peripherality. In a departure from conventional studies that consider policy a response to social problems, the book takes a critical perspective to show the constitutive role of policy, and explains how the representation of the problem of social inequality undermines equity policy outcomes in Ethiopian higher education. Not only does the book problematise the framing of the problem of inequality in the system, it also outlines strategies for designing transformative equity instruments. In explaining structural factors of inequality and equity provisions, the book productively combines sociological concepts with historical accounts and political economy insights. Given the increased economic optimism associated with higher education in sub-Saharan Africa and the neoliberal ideals underpinning much of the restructuring of the system in the region, this is a timely and important contribution that sheds light on the social justice implications and consequences of such changes. It offers fresh accounts of largely neglected qualitative cases of inequality, making it a valuable read for students and researchers in the areas of Ethiopian education policy studies, international and comparative education, and international development.
