Cram101 Textbook Outlines to Accompany Nursing Diagnoses in Psychiatric Nursing: Care Plans and Psychotropic Medications, Edition, Mary C. Townsend, 7th Edition

Psychiatric Nursing Diagnoses

Here's the 5th Edition of the resource you'll turn to again and again to select the appropriate diagnosis and to plan, individualize, and document care for more than 850 diseases and disorders. A new, streamlined design makes reference easier than ever. Only in the Nursing Diagnosis Manual will you find for each diagnosis...defining characteristics presented subjectively and objectively - sample clinical applications to ensure you have selected the appropriate diagnoses - prioritized action/interventions with rationales - a documentation section, and much more!

Psychiatric Nursing Clinical Guide

New DSM-5 content! Whether it's an entire course on psychiatric nursing or integrating these principles into an existing course, this is the text that's concise, engaging, and informative. It offers an evidence-based, holistic approach to mental health nursing—in a streamlined format that explores nursing diagnoses for both physiological and psychological disorders. It's the psychiatric nursing text that students actually read, understand, and use.

Sparks & Taylor's Nursing Diagnosis Reference Manual

This clearly written, easy-to-use reference manual delivers the evidence-based information nursing students and practicing nurses need to make confident diagnoses and construct care plans that meet patients' healthcare needs. The perfect reference for any clinical, classroom or simulation setting, this updated edition integrates the nursing process throughout and makes it easier than ever to access the latest NANDA-I nursing diagnoses. UPDATED! 2018-2020 NANDA-I diagnosis and standards, Nursing Interventions Classification (NIC) and Nursing Outcomes Classification (NOC) labels incorporated throughout reinforce clinical confidence and quality of care. NEW! 17 new diagnoses keep students on the cutting edge of nursing practice. UPDATED! QSEN competency icons throughout reinforce important considerations for safe care. UPDATED! Alphabetical organization helps students find diagnosis information quickly and easily. Selected Nursing Diagnoses by Medical Diagnosis (Appendix I) delivers clearly written, authoritative care plans for every stage in the life cycle. Related Factors sections strengthen students' diagnostic capabilities. Quick Reference tables list diagnoses by life stages for access at a glance.

Nursing Interventions Classification (NIC) - Binder Ready

This pocket-sized reference is ideal for use in clinicals, in class and at the bedside! A condensed version of the Nursing Diagnosis Handbook, 10th Edition, Mosby's Guide to Nursing Diagnosis, 4th edition uses a quick-access format to help you diagnose and formulate care plans with confidence and ease. It includes the most recent NANDA-I approved nursing diagnoses based on more than 1,300 specific symptoms and a step-by-step guide to creating care plans featuring desired

outcomes, interventions, and patient teaching. UNIQUE! Care plans for every NANDA-I approved nursing diagnosis, including pediatric, geriatric, multicultural, home care, client/family teaching and discharge planning, and safety interventions Alphabetical thumb tabs provide quick access to specific symptoms and nursing diagnoses Pocketsize portability makes this book easy to carry and use in clinicals, in class, or at the bedside NEW! 4 Color Text NEW! Updated 2012-2014 NANDA-I-approved nursing diagnoses NEW! 16 new and 22 revised diagnoses NEW! Added content on safety, one of QSEN's six competencies

Psychiatric Mental Health Nursing, 8th Ed. +Psychiatric Nursing, 9th Ed.

Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, you can personalize the text to match your unique study needs! Select nursing interventions with the book that standardizes nursing language! Nursing Interventions Classification (NIC), 7th Edition provides a research-based clinical tool to help you choose appropriate interventions. It standardizes and defines the knowledge base for nursing practice as it communicates the nature of nursing. More than 550 nursing interventions are described - from general practice to all specialty areas. From an expert author team led by Howard Butcher, this book is an ideal tool for practicing nurses and nursing students, educators seeking to enhance nursing curricula, and nursing administrators seeking to improve patient care. It's the only comprehensive taxonomy of nursing-sensitive interventions available! More than 550 research-based nursing intervention labels are included, along with specific activities used to carry out interventions. Descriptions of each intervention include a definition, a list of activities, a publication facts line, and references. Specialty core interventions are provided for 53 specialties. NEW! 16 NEW interventions are added to this edition, including health coaching, phytotherapy, management of acute pain, and management of chronic pain. UPDATED! 95 interventions have been revised. NEW! Five label name changes are included.

Nursing Care Planning Made Incredibly Easy!

This new pocket guide makes it easy to assess psychiatric nursing clients, formulate nursing diagnoses, and design appropriate nursing care plans! The content is clinically based and contains detailed information for use in the inpatient unit, community mental health setting, or home care setting. Following an overview of psychosocial nursing care planning, communication and counseling, and the clinical interview, individual chapters examine a full range of psychiatric syndromes.

Lippincott's Manual of Psychiatric Nursing Care Plans

A thoughtful, portable clinical companion, Varcarolis' Manual of Psychiatric Nursing Care Planning: An Interprofessional Approach, 6th Edition, provides you with the latest diagnostic information available, including the DSM-5 and patient problems, for accurate assessment and diagnosis of patients. This clinically-based guide offers quick and easy access to the latest psychiatric nursing care planning guidelines for a range of settings including the inpatient unit, home care, or community mental health setting. Designed to accompany Foundations of Psychiatric-Mental Health Nursing, the refreshed and updated edition is a perfect reference for learning to create psychiatric nursing care plans. A thoroughly revised patient centered assessment, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. The latest patient problems, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing patient problems, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. Talk-based therapies covered and referred to in a dedicated chapter on psychotherapeutic models. Promising brain stimulation therapies are addressed in a separate chapter NEW! A separate sleep disorder chapter addresses alterations present in all psychiatric disorders. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients. NEW! Updated, refreshed, and refined Manual improves overall design and reduces extraneous content to focus on essential clinical information.

Nursing Diagnoses in Psychiatric Nursing: Care Plans and Psychotropic Medications, 5th Ed Packaged with Psychiatric/Mental Health Nursing: Concepts of Care, 4th

It's really 2 books in 1! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe administration of psychotropic medications. And, the concepts can be applied to a variety of healthcare settings...from in-patient hospitalization through the outpatient clinic...to home health and private practice.

Psychiatric Nursing Care Plans - E-Book

Psychiatric Nursing

Using the latest clinical research and diagnoses, Principles and Practice of Psychiatric Nursing, 10th Edition provides a holistic, biopsychosocial approach to psychiatric nursing care. It follows the popular Stuart stress-adaptation framework and includes comprehensive coverage to simplify important nursing and medical concepts, promote quality and safety in care, and address psychobiology and psychopharmacology topics integral to today's psychiatry. New to this edition is a chapter on psychiatric care of military personnel, plus the latest on health care reform, prescription abuse, and obesity issues. Written by psychiatric nursing expert Gail W. Stuart, this market-leading text makes it easy to apply classroom theory to clinical practice. An easy-to-follow writing style makes it easy to understand both simple and complex topics. A well-rounded, collaborative approach provides coverage of all major psychiatric disorders from nursing and medical perspectives. The Stuart Stress Adaptation Model of health and wellness provides a consistent nursing-oriented framework, with clear explanations of biological, psychological, sociocultural, environmental, and legal-ethical components. An evidence-based practice approach bridges the gap between clinical research and everyday practice. Learning from a Clinical Case boxes begin disorders chapters with thought-provoking questions and end chapters with answers and feedback. Summarizing the Evidence boxes in the disorders chapters examine the research and findings that support psychiatric nursing care. A family focus and discussions of outpatient care reflect current trends in psychiatric nursing. A Patient Speaks and A Family Speaks boxes present short vignettes with the patient's and family's perspectives of the caregiving process. Competent Caring: A Clinical Exemplar of a Psychiatric Nurse boxes feature the experiences and personal insights of practicing psychiatric nurses. Medical and Nursing Diagnoses boxes and Detailed Diagnoses tables emphasize the interdisciplinary approach to patient care by presenting NANDA diagnoses relevant to specific disorders and describing the essential features of the related DSM-IV-TR diagnoses. Nursing Treatment Plan Summary tables present care plans including patient goals with nursing interventions and rationales. Patient Education Plan and Family Education Plan tables include key information that you need to share with the patient and his or her family to facilitate shorter hospital stays and more outpatient care. Therapeutic Dialogue boxes offer examples of nurse-patient interactions. Clinical examples include selected nursing diagnoses. Focus Points provide a comprehensive, point-by-point review of the important information in each chapter.

All-in-One Care Planning Resource

Nursing Diagnoses in Psychiatric Nursing

A pocket-sized clinical companion, *Manual of Psychiatric Nursing Care Planning, 4th Edition* helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany *Foundations of Mental Health Nursing*, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 *Psychiatric Mental-Health Nursing: Scope and Standards of Practice*. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.

Psychiatric Nursing Care Plans

A reference to help nursing students and practising nurses select a nursing diagnosis and write plans of care with ease and confidence. The book provides care plans for every NANDA diagnosis and provides a quick access index of appropriate

nursing diagnoses for over 1200 clinical entities.

Nursing Diagnoses in Psychiatric Nursing, Care Plans and Psychotropic Medications 8th

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Nursing Diagnoses 2015-17

Here's the most complete and easy-to-use resource on how to develop practical, individualized plans of care for psychiatric and mental health patients. It's really two books in one! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe prescription and administration of psychotropic medications. And, the concepts can be applied to a variety of healthcare settings...from in-patient hospitalization through the outpatient clinic...to home

health and private practice. Completely revised and updated throughout, the 9th Edition reflects all of the new knowledge and new medications in the field, including the DSM-5, all of today's new psychotropic medications, and the 2012-2014 content in the NANDA Nursing Diagnoses: Taxonomy II.

Principles and Practice of Psychiatric Nursing

Here's the most complete and easy-to-use resource on how to develop practical, individualized plans of care for psychiatric and mental health patients. It's the perfect quick reference now for clinical rotations...and later for practicing nurses. This Pocket Guide is really two books in one! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe prescription and administration of psychotropic medications. And, the concepts can be applied in a variety of healthcare settings...from in-patient hospitalization through the outpatient clinic...to home health and private practice.

Psychiatric Nursing Diagnosis Care Plans for DMS-III-R

Fully updated and revised by authors T. Heather Herdman, PhD, RN, FNI, and Shigemi Kamitsuru, PhD, RN, FNI, *Nursing Diagnoses: Definitions and Classification 2018-2020, Eleventh Edition* is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA International (NANDA-I). In this new edition of a seminal text, the authors have written all introductory chapters at an undergraduate nursing level, providing the critical information needed for nurses to understand assessment, its link to diagnosis and clinical reasoning, and the purpose and use of taxonomic structure for the nurse at the bedside. Other changes include: 18 new nursing diagnoses and 72 revised diagnoses Updates to 11 nursing diagnosis labels, ensuring they are consistent with current literature and reflect a human response Modifications to the vast majority of the nursing diagnosis definitions, including especially Risk Diagnoses Standardization of diagnostic indicator terms (defining characteristics, related factors, risk factors, associated conditions, and at-risk populations) to further aid clarity for readers and clinicians Coding of all diagnostic indicator terms for those using electronic versions of the terminology Web-based resources include chapter and reference lists for new diagnoses Rigorously updated and revised, *Nursing Diagnoses: Definitions and Classification 2018-2020, Eleventh Edition* is a must-have resource for all nursing students, professional nurses, nurse educators, nurse informaticists, and nurse administrators.

Prentice Hall Nursing Diagnosis Handbook with NIC Interventions and NOC Outcomes

"The challenge that nurses face today is one of identifying specific nursing diagnoses for those people assigned to their care and of incorporating these diagnoses into a plan of care. This handbook is intended to help in this effort in two ways: by providing a quick reference to each diagnostic category in terms of its definition, etiological and contributing factors, and defining characteristics; and by identifying possible nursing diagnoses that could be associated with the major medical diagnoses."--Introduction.

Nursing Care Plans

An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott's Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions--with rationale--to address particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.

NANDA International Nursing Diagnoses

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and

rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Nursing Diagnosis Handbook

The fourth edition of this practical reference presents 48 consistent, comprehensive care plans to assist students and practitioners in providing effective psychiatric nursing care in a variety of settings. It covers a wide range of disorders, their psychopathology, and appropriate nursing interventions.

Mosby's Guide to Nursing Diagnosis

Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. The 2015–2017 edition of the classic and internationally recognised text has been rigorously updated and revised, and now provides more linguistically congruent diagnoses as a result of the Diagnostic Development Committee's attentiveness to understanding the translation of the diagnostic label, definition, defining characteristics, related factors, and risk factors. Each of the 235 diagnoses presented are supported by definitions as well as defining characteristics and related factors, or risk factors. Each new and revised diagnosis is based on the latest global evidence, and approved by expert nurse diagnosticians, researchers, and educators. New to this edition: 26 brand new nursing diagnoses and 13 revised diagnoses Updates, changes, and revision to the vast majority of the nursing diagnosis definitions, in particular the Health Promotion and Risk Diagnoses A standardization of diagnostic indicator terms (defining characteristics, related factors, and risk factors) to further aid clarity for readers and clinicians All introductory chapters are written at an undergraduate nursing level, and provide critical information needed for nurses to understand assessment, its link to diagnosis, and the purpose and use of taxonomic structure for the nurse at the bedside A new chapter, focusing on Frequently Asked Questions, representing the most common questions received through the NANDA-I website, and at global conferences Five nursing diagnoses have been re-slotted within the NANDA-I taxonomy, following a review of the current taxonomic structure Coding of all diagnostic indicator terms is now available for those using electronic versions of the

terminology Companion website featuring references from the book, video presentations, teaching tips, and links to taxonomy history and diagnosis submission/review process description www.wiley.com/go/nursingdiagnoses

Manual of Psychiatric Nursing Care Planning - E-Book

For all undergraduate- and graduate-level courses across the Nursing curriculum, especially clinical courses. This easy-to-use guide gives students instant access to information needed to write thorough, individualized care plans based on the most recent NANDA-approved nursing diagnoses. Nursing Interventions Classifications (NIC) and Nursing Outcome Classifications (NOC) are incorporated throughout. The guide presents diagnoses associated with medical, surgical, psychiatric, perinatal, and pediatric patient populations. Each Plan of Care includes: definition of nursing diagnosis, defining characteristics, related factors, suggestions for use, suggested alternative diagnoses, expected outcomes and evaluation criteria, NIC/NOC taxonomy, and suggested nursing actions.

Clinical Companion for Foundations of Psychiatric Mental Health Nursing

Learn how to create nursing care plans, effectively document care, and succeed in the course with Nursing Care Plans: Transitional Patient and Family Centered Care, Sixth Edition. Easy-to-understand and packed with practical tools to prepare you for clinical practice, this proven book focuses on the nursing plans that are most important, ensuring that you learn what you need to know and that you can find the information you need easily, without being distracted by irrelevant information.

Varc Carolis' Manual of Psychiatric Nursing Care Planning

The new edition of Nursing Care Planning Made Incredibly Easy is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

Nursing Diagnoses in Psychiatric Nursing

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing

effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Manual of Psychiatric Nursing Care Planning

This edition contains 189 care plans covering the most common nursing diagnoses and clinical problems in medical-surgical nursing. It includes four new disorders care plans, SARS, lyme disease, west Nile virus, and obstructive sleep apnea.

Handbook of Nursing Diagnosis

Essentials of Psychiatric Mental Health Nursing

This new edition combines Townsend's Pocket Guide and selected drug classifications with the associated drug data from Townsend's Drug Guide into one accessible reference. -- Discusses seven major psychotropic drug classifications that cover antianxiety agents, antidepressants, antimanic agents, antipsychotics, antiparkinsonian drugs, sedative hypnotics, and central nervous system stimulants -- Five chapters added that cover HIV disease, homelessness, psychiatric home nursing care, forensic nursing, and complementary therapies -- Each chapter covers a specific group of DSM IV disorders including: definition, predisposing factors, and symptomatology -- Each nursing diagnosis includes the definition, etiologies, defining characteristics, goals/objectives, interventions with selected rationales, and desired patient outcomes/discharge criteria -- Each drug class includes general pharmacologic data, representative drugs from a given drug class, nursing diagnoses, and nursing implications

Nursing Diagnosis Manual

Nursing Care Plans

Manual of Psychiatric Nursing Care Plans

A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 5th Edition supplies you with the latest diagnostic information available, including the DSM-5, for accurate assessment and diagnosis of patients. It offers quick and easy access to plans of care for a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth Varcarolis, provides a clinically-based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. The latest diagnoses, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. A focus on clinical information furnishes you with information on providing patient care in a range of settings. Assessment Guides, including tables, charts, and questionnaires facilitate patient diagnosis and care. A chapter on Major Psychotropic Interventions and Patient and Family Teaching, in addition to the content found in each disorder chapter, helps you better understand the uses and workings of the psychotropic agents. Coverage of major disorders exposes you to a wide range of disorders within psychiatric nursing. NEW! The most recent

information in the field, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. NEW! 2007 ANA Psychiatric Mental-Health Nursing Scope and Standards of Practice familiarize you with the current guidelines for the practice of psychiatric nursing. NEW! Updated 2012-2014NANDA-I Nursing Diagnoses present information on the latest nursing diagnoses related to psychiatric nursing. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients.

Psychiatric Nursing

For 130 psychiatric nursing diagnoses, nurses find definition, assessment criteria, defining characteristics, associated medical diagnoses, patient outcomes, interventions with rationales, documentation, and evaluation criteria. Also included is a section on geriatric mental health. All care plans are organized alphabetically within life-cycle sections. A psychiatric diagnosis cross-reference allows nurses to find appropriate care plans with ease. Contents include an overview of the nursing process, adult psychiatric care, child and adolescent plans of care, geriatric plans of care, psychiatric disorders and their nursing diagnoses, psychotropic drugs, NANDA Taxonomy I revised, selected references, index.
