Thirty songs for low voice

Translation has been a crucial process in world culture over the past two millennia and more. In the English-speaking cultures many of the most important texts are translations, from Homer to Beckett, the Bible to Freud. Although recent years have seen a boom in translation studies, there has been no comprehensive yet convenient guide to this essential element of literature in English. Written by eminent scholars from many countries, the Oxford Guide to Literature in English Translation meets this need and will be essential reading for all students of English and comparative literature. It highlights the place of translation in our culture, encouraging awareness of the issues raised, making the translator more 'visible'. Concentrating on major writers and works, it covers translations out of many languages, from Greek to Korean, from Swahili to Russian. For some works (e.g. Virgil's Aeneid) which have been much translated, the discussion is historical and critical, showing how translation has evolved over the centuries and bringing out the differences between versions. Elsewhere, with less familiar literatures, the Guide examines the extent to which translation has done justice to the range of work available. The Guide is

divided into two parts. Part I contains substantial essays on theoretical questions, a pioneering outline of the history of translation into English, and discussions of the problems raised by specific types of text (e.g. poetry, oral literature). The second, much longer, part consists of entries grouped by language of origin; some are devoted to individual texts (e.g. the *Thousand and One Nights*) or writers (e.g. Ibsen, Proust), but the majority offer a critical overview of a genre (e.g. Chinese poetry, Spanish Golden Age drama) or of a national literature (e.g. Hungarian, Scottish Gaelic). There is a selective bibliography for each entry and an index of authors and translators.

Marcus Aurelius Meditations

Women Saints' Lives in Old English Prose

In this monograph the author probes the fundamental nature of the concept of agency and its importance to human language and cognition. Whereas previous studies focused on grammatical manifestations this original work addresses such issues as the strong relationship between agency and responsibility, a philosophical interpretation of the concept of agency and a variety of epistemic attitudes towards agency that strongly influence our view of the world. Different cultures and languages process and express agency differently. To illustrate the co-relation between the linguistic expressions of agency and cultural stereotypes that lurk behind individual natural

languages, the author analyses Japanese and English parallel corpora. It is shown that English tends to highlight agency in expressing actions and events, whereas Japanese largely obfuscates agency through impersonalising potential agents. Through the case studies on these languages this book sheds light on the close connection between language, thought and culture and contributes to the resurging interest in linguistic relativity.

Agency and Impersonality

Until the late eighteenth century the Arikaras were one of the largest and most influential Indian groups on the northern plains. For centuries they have lived along the Missouri River, first in present South Dakota, later in what is now North Dakota. Today they share the Fort Berthold Indian Reservation in North Dakota with the Mandans and Hidatsas. Although their postcontact history and aspects of their culture are well documented, Douglas R. Parks's monumental four-volume work *Traditional Narratives of the Arikara Indians* represents the first comprehensive attempt to describe and record their language and literary traditions. ∅ Volumes 1 and 2 present transcriptions of 156 oral narratives in Arikara and include literal interlinear English translations. Volumes 3 and 4 contain free English translations of those narratives, making available for the first time a broad, representative group of Arikara oral traditions that will be invaluable not only to anthropologists and folklorists but to everyone interested in American Indian life and literature. ∅ The narratives cover the

entire range of traditional stories found in the historical and literary tradition of the Arikara people, who classify their stories into two categories, true stories and tales. Here are myths of ancient times, legends of power bestowed, historical narratives, and narratives of mysterious incidents that affirm the existence today of supernatural power in the world, along with tales of the trickster Coyote and stories of the risque Stuwí and various other animals. In addition, there are accounts of Arikara ritualism: prayers and descriptions of how personal names are bestowed and how the Death Feast originated.

Dead Sea Scrolls. Hebrew, Aramaic, and Greek Texts with English Translations

Italian Literature before 1900 in English Translation provides the most complete record possible of texts from the early periods that have been translated into English, and published between 1929 and 2008. It lists works from all genres and subjects, and includes translations wherever they have appeared across the globe. In this annotated bibliography, Robin Healey covers over 5,200 distinct editions of pre-1900 Italian writings. Most entries are accompanied by useful notes providing information on authors, works, translators, and how the translations were received. Among the works by over 1,500 authors represented in this volume are hundreds of editions by Italy's most translated authors – Dante Alighieri, Machiavelli, and Boccaccio – and other hundreds which represent the author's only English translation. A significant number of entries describe works originally published in Latin. Together with Healey's Twentieth-Century Italian Literature in English Translation, this volume makes comprehensive information on translations accessible for schools, libraries, and those interested in comparative literature.

Metaphor and Intercultural Communication examines in detail the dynamics of metaphor in interlingual contact, translation and globalization processes. Its case-studies, which combine methods of cognitive metaphor theory with those of corpus-based and discourse-oriented research, cover contact linguistic and cultural contacts between Chinese, English

including Translational English and Aboriginal English, Greek, Kabyle, Romanian, Russian, Serbian, and Spanish. Part I introduces readers to practical and methodological problems of the intercultural transfer of metaphor through empirical (corpus-based and experimental) studies of translators' experiences and strategies in dealing with figurative language in a variety of contexts. Part II explores the universality-relativity dimension of cross- and intercultural metaphor on the basis of empirical data from various European and non-European cultures. Part III investigates the socio-economic and political consequences of figurative language use through case studies of communication between aboriginal and mainstream cultures, in the media, in political discourse and gender-related discourses. Special attention is paid to cases of miscommunication and of deliberate re- and counter-conceptualisation of clichés from one culture into another. The results open new perspectives on some of the basic assumptions of the 'classic' cognitive paradigm, e.g. regarding metaphor understanding, linguistic relativity and concept-construction.

The intuition that translations are somehow different from texts that are not translations has been around for many years, but most of the common linguistic frameworks are not comprehensive enough to account for the wealth and complexity of linguistic phenomena that make a translation a special kind of text. The present book provides a novel methodology for investigating the specific linguistic properties of translations. As this methodology is both corpus-based and driven by a functional theory of language, it is powerful enough to account for the multi-dimensional nature of cross-linguistic variation in translations and cross-lingually comparable texts.

Twentieth-Century Poetic Translation

The Dead Sea Scrolls represent the remains of an ancient Jewish library which antedates 68 C.E. Mohr (Paul Siebeck) and Westminster/John Knox Press will present an introduction, critical text, and literal English translations of all Dead Sea Scrolls which are not copies of books in the Hebrew Bible. Medieval and Renaissance Treatises on the Arts of Painting

Twentieth Century Poetic Translation analyses translations of Italian and English poetry and their roles in shaping national identities by merging historical, cultural and theoretical perspectives. Focusing on specific case studies within the Italian, English and North American literary communities, spanning from 'authoritative' translations of poets by poets to the role of dialect poetry and anthologies of poetry, the book looks at the role of translation in the development of poetic languages and in the construction of poetic canons. It brings together leading scholars in the history of the Italian language, literary historians and translators, specialists in theory of translation and history of publishing to explore the cultural dynamics between poetic traditions in Italian and English in the twentieth century.

Ourika

Cross-Linguistic Variation in System and Text

John Fowles presents a remarkable translation of a nineteenth-century work that provided the seed for his acclaimed novel *The French Lieutenant's Woman* and that will astonish and haunt modern readers. Based on a true story, *Claire de Duras's Ourika* relates the experiences of a Senegalese girl who is rescued from slavery and raised by an aristocratic French

family during the time of the French Revolution. Brought up in a household of learning and privilege, she is unaware of her difference until she overhears a conversation that suddenly makes her conscious of her race--and of the prejudice it arouses. From this point on, Ourika lives her life not as a French woman but as a black woman who feels "cut off from the entire human race." As the Reign of Terror threatens her and her adoptive family, Ourika struggles with her unusual position as an educated African woman in eighteenth-century Europe. A best-seller in the 1820s, Ourika captured the attention of Duras's peers, including Stendhal, and became the subject of four contemporary plays. The work represents a number of firsts: the first novel set in Europe to have a black heroine; the first French literary work narrated by a black female protagonist; and, as Fowles points out in the foreword to his translation, "the first serious attempt by a white novelist to enter a black mind."

The Old English Version of Bede's Ecclesiastical History of the English People: Early Eng. text soc. org. ser., 110-111

Sources of Vietnamese Tradition provides an essential guide to two thousand years of Vietnamese history and a comprehensive overview of the society and state of Vietnam. Strategic selections illuminate key figures, issues, and events while building a thematic portrait of the country's developing territory, politics, culture, and relations with neighbors. The volume showcases Vietnam's remarkable independence in the

face of Chinese and other external pressures and respects the complexity of the Vietnamese experience both past and present. The anthology begins with selections that cover more than a millennium of Chinese dominance over Vietnam (111 B.C.E.–939 C.E.) and follows with texts that illuminate four centuries of independence ensured by the Ly, Tran, and Ho dynasties (1009–1407). The earlier cultivation of Buddhism and Southeast Asian political practices by the monarchy gave way to two centuries of Confucian influence and bureaucratic governance (1407–1600), based on Chinese models, and three centuries of political competition between the north and the south, resolving in the latter's favor (1600–1885). Concluding with the colonial era and the modern age, the volume recounts the ravages of war and the creation of a united, independent Vietnam in 1975. Each chapter features readings that reveal the views, customs, outside influences on, and religious and philosophical beliefs of a rapidly changing people and culture. Descriptions of land, society, economy, and governance underscore the role of the past in the formation of contemporary Vietnam and its relationships with neighboring countries and the West.

What does it mean to read one nation's literature in another language? The considerable popularity of Russian literature in the English-speaking world rests almost entirely upon translations. In *The Translator and the Text*, Rachel May analyzes Russian literature in English translation, seeing it less as a substitute for the original works than as a subset of English literature, with its own cultural, stylistic, and narrative traditions.

The Old Norse Elucidarius

The Apocrypha and Pseudepigrapha of the Old Testament in English

This book blazes a trail in Freud research. Ilse Grubrich-Simitis, a prominent authority on Freud, examines and deciphers Freud's original manuscripts--which had remained disregarded for decades. From these she analyzes Freud's method of working and points out what the writings reveal of his psychological states, the events in his life, and the

development of his thinking over time. The book is at once a study of Freud's creativity as a scientist and writer, an important reference on the texts themselves, and a commentary on previously unexplored aspects of Freud's life and work.

Examining many hitherto unknown texts, Grubrich-Simitis provides a fresh and authentic picture of the discoverer of the unconscious at work: observing, listening to his patients, gathering the raw material for his oeuvre, fantasizing, drawing conclusions, drafting, rewriting, and correcting. She refutes the legend of the facility of Freud's production, for the notes, drafts, fair copies, and variants she identifies bear witness to the fact that almost every work actually came into being by a process of consuming hard labor. Grubrich-Simitis's analysis of Freud's manuscripts is flanked by two shorter sections on Freud's printed texts: in one she recounts the history of the editions from the beginnings in Vienna to the present day, and in the other she offers a detailed plan for a new historical-critical edition of his works.

himself and various ideas on Stoic Philosophy. The books were originally written in Ancient (Medieval) Greek by the Title (ta eis heauton) which translates to "That which is to Himself." The Purpose of which was to be used as a guidance for his personal improvement. They were written in different periods of the Emperor's life, in a very straightforward and simplified manner, since they were intended strictly for personal use. They reflect his personality, morals and inner thinking, as the text contains a lot of thoughts about spiritual freedom, inner peace, self judgement, ethical principles and other Stoic ideas about life, as well as philosophy, the general sense of "Being" and more.
