Studies in Tape Reading

The aim of this book is to explain point-and-figure charting to European investors and traders, and to show why it is the most reliable technical tool for timing entry and exit points in stocks, indices and other securities. The book is written for all levels of trader, from the novice to the experienced. It starts by explaining the basics of point-and-figure, and by showing its advantages over other types of chart. Readers are then given step-by-step instructions on how to start a point-and-figure chart from simple price data, and how to add to it day-by-day using simple rules based on end of day highs and lows. The emphasis is on simplicity and clarity. The section on chart interpretation introduces the basic buy and sell signals, and goes on to explain the more complex signals, in each case illustrating the pattern, and the precise entry and exit points, with colour charts from FTSE stocks and indices. It also shows how trend lines are incorporated into a chart. The latest point-and-figure trading techniques are covered in depth. The authors show how to: use horizontal and vertical counts to estimate the size of price moves, use stop-orders to protect positions, use pyramiding to maximise profitable trends, and use swing trading in combination with p&f. They also show how to adapt your trading style to the amount of capital you have available and to your risk tolerance. In the later

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

sections of the book, the authors concentrate on optimisation of p&f trading and the avoidance of the most common trap - 'over-fitting' - and on analysis of the profitability of p&f trading. They demonstrate conclusively that point and figure, correctly applied, produces consistent and reliable profits across a variety of markets. In summary, Heinrich Weber & Kermit Zieg's book is the definitive guide to the theory and application of point-and-figure charting. It is especially welcome for UK and European traders, since it uses recent charts of FTSE and European securities as examples, and includes hitherto unpublished research on p&f's applicability to European securities.

Statistics in a Nutshell

Classic work describing 6 proprietary systems developed by a pioneer in technical analysis. The prima ones still used are RSI, Directional Movement, and parabolics.

Distant View of a Minaret

Already the field's most comprehensive, reliable, and objective guidebook, *Technical Analysis: The Complete Resource for Financial Market Technicians*, Second Edition has been thoroughly updated to reflect the field's latest advances. Selected by the Market Technicians Association as the official companion to its prestigious Chartered Market Technician (CMT) program, this book systematically explains the theory of technical analysis, presenting

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

academic evidence both for and against it. Using hundreds of fully updated illustrations, the authors explain the analysis of both markets and individual issues, and present complete investment systems and portfolio management plans. They present authoritative, up-to-date coverage of tested sentiment, momentum indicators, seasonal affects, flow of funds, testing systems, risk mitigation strategies, and many other topics. This edition thoroughly covers the latest advances in pattern recognition, market analysis, and systems management. The authors introduce new confidence tests; cover increasingly popular methods such as Kagi, Renko, Kase, Ichimoku, Clouds, and DeMark indicators; present innovations in exit stops, portfolio selection, and testing; and discuss the implications of behavioral bias for technical analysis. They also reassess old formulas and methods, such as intermarket relationships, identifying pitfalls that emerged during the recent market decline. For traders, researchers, and serious investors alike, this is the definitive book on technical analysis.

Chart for Profit: Point and Figure Trading

Tom Dorsey's Trading Tips shows you how to invest confidently using point and figure charting, a proven, objective plan - one that's based on the fundamental laws of supply and demand, not on superficial market trends. You'll learn: the essentials of stock selection, including a four-step checklist for starting new positions, how to evaluate technical pros and cons, and how to accurately compare your stocks to market

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

leaders. Dorsey also explores more advanced topics like short-term trading techniques, options strategies and indices - demystifying them with clear, down-to-earth explanations. This book will help traders identify risk and rewards in the market and within specific sectors. And it offers strategies to conquer potential setbacks consistently, so that you always come out ahead.

Filled with in-depth insights and expert advice, this practical guide will help you grow your assets in any market. In this reliable resource, the world's top point and figure charting expert, Tom Dorsey returns to explain how traders and investors alike can use this classic

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

technique—borne out of the irrefutable laws of supply and demand—to identify and capitalize on market trends. Describes, step-by-step, how to create, maintain, and interpret your own point and figure charts with regard to markets, sectors, and individual securities Explains how to use other indicators, including moving averages, advance-decline lines, and relative strength to augment point and figure analysis Reveals how to use this approach to track and forecast market prices and develop an overall investment strategy Skillfully explains how to use point and figure analysis to evaluate the strength of international markets and rotate exposure from country to country Today's investment arena is filled with a variety of strategies that never seem to deliver on what they promise. But there is one approach to investment analysis that has proven itself in all types of markets, and it's found right here in Point and Figure Charting, Fourth Edition.

Sentiment Indicators

In the first edition of Japanese Candlestick Charting Techniques, Steve Nison revealed, for the first time to the Western world, the background and practical applications of candlestick charts. Now, these colourful exciting techniques are hot on the lips of leading analysts, traders, and brokers worldwide. Completely informative and global in its outlook, this revised edition provides in-depth explanations of how candlestick techniques can be used in all of today's markets to help improve profits and decrease market risk. This totally updated revision focuses on the

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

needs of today's traders and investors with:

- All new charts, including more intraday markets
- New candle charting techniques and refinements to earlier methods
- More focus on active trading for swaying, online, and day traders
- Brand new sections on Western techniques in combination with candles
- A greater spotlight on capital preservation

Whether you are new to technical analysis, or a seasoned pro, the rewards reaped by adding the candlestick techniques revealed in this book should be immediate and long-lasting.

Point and Figure Charting

Swing trading is a method of profiting from the stock market's short-term upswings and downswings. And since such short-term swings are an ever-present phenomenon, knowledgeable swing traders can make money all the time, whether the market is going up or down - or, even, sideways. It's no wonder then that the numbers of swing traders are growing by the day. But not many are familiar either with the Gann swing chart, which is specifically designed for swing trading, or with the best swing trading tractics. In this book, expert swing trader Marc Rivalland, reveals: What swing trading is - and how you can trade swings What Gann swing charts are, how to construct them - and how to use them for perfect market timing Which securities and indices work best for swing traders Swing trading techniques - capital needed, profit maximisation techniques, stop losses, setting profit targets, and mistakes to avoid How and when to close your trading positions and book profits How to

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

integrate swing charts with point and figure charts to further improve your chances of success How to trade the big swings, how to make money in smaller swings and when it's best to sit on the sidelines and do nothing How long term buy-and-hold investors can profit from swing trading

Trading With Charts for Absolute Returns

Chart Number One is essential to correct and accurate use of nautical charts. More than a chart, it is a book that defines the symbols, abbreviations and terms used on charts. It also provides important information about buoys, light visibility (range) and aids to navigation. Trading the Markets the Point & Figure way

Ed Ponsi's straightforward guide to understanding technical analysis *Technical Analysis and Chart Interpretations* delivers simple explanations and easy-to-understand techniques that demystify the technical analysis process. In his usual straightforward style, bestselling author Ed Ponsi guides you through the twists and turns to show you what really matters when it comes to making money. Whether you trade stocks, currencies, or commodities, you'll develop invaluable skills as you master difficult concepts and the tools of the trade. Technical analysis translates to any form of trading, and this book delivers clear, jargon-free guidance toward interpreting the various charts you'll see in the field. Technical analysis can be confusing. Volatility, cycles, Elliot waves, Fibonacci, trends—it's easy to get lost, and most of the available literature is incomprehensible to all but the experts. This book is different—it's technical analysis for the rest of us. You'll see through the language to understand the underlying concepts, and how to apply them correctly. Learn what true technical analysis entails Discover the tools that simplify accurate analysis Master the tactics and strategies used by the pros Develop a valuable trading skill that transcends markets Simply recognizing the vocabulary isn't nearly enough, and a passing acquaintance with the topic is guaranteed to do more harm than good. When technical analysis methods are used incorrectly, they are ineffective at best, and actively destructive to your bottom line at worst.

Alifa Rifaat, an Egyptian, lifts the veil on what it means to be a woman living within a traditional Muslim society.

Point and Figure Charting

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

Little is known about the personal lives of each of these authors, but in surveying their other books and writings, a more informed picture emerges of their capabilities in their chosen field, stock and futures market analysis. From the quality and clearness of the writings in this and other of his works, it soon becomes apparent that Victor DeVilliers was not only very knowledgeable on the markets but he had the uncommon talent to put it into written words. (Most market authors are generally better traders and investors than writers.) On the other hand Owen Taylor was certainly extremely capable, being more the expert on the technical aspects of market analysis, something easily ascertainable from the Technical Analysis subjects that he presented in his own books and booklets. It is to the credit of both authors that they recognized just how valuable to investors and traders the Point and Figure method could be and that they saw fit to produce this fascinating work on a subject that in its essence is just putting small "Xs" on graph paper. But how to put them to graph paper and how to read their meanings is what can separate the trading and investing boys from the trading and investing men. Surveying all of the writings that have been published over the years, we find there have been and are a number of good, very good and excellent books on the Point and Figure methodology and its star attributes. However, every once in a while someone comes along and writes what is easily the seminal work, the finest on its particular subject. Some 65 years later we can attest to the fact that Victor DeVilliers and Owen Taylor rule the roost on their chosen subject with the

two volumes republished here, which taken together, have to be considered the ultimate - "The Bible of Point and Figure Charting."

Storytelling with Data

Praise for Commodity Strategies "I have read many books on Point & Figure charting, but this is the first in its category-on the application of the time-tested methodology of Point & Figure charting, in particular, the concept of 'relative strength,' to pick outperforming commodities as well as to achieve diversification of non-correlated assets. If you are looking for a profitable and comprehensive methodology to making money from the commodity and currency markets and ETFs, look no further-you have found it. This book has it all." -Fred Tam, MPhil, CFTe, MSTA, lecturer in technical analysis at University Malaya and Open University Malaysia "Tom Dorsey is a market wizard who continues to stimulate the investor's mind. Commodity Strategies is powerful from start to finish with charts and many interesting insights. It's a clear guide for anyone looking to expand their investment horizon." -Joseph Barrato, EVP of Investment Strategies, Arrow Funds "This book and Dorsey's commodity strategies provide a much-needed, disciplined, and risk-managed framework for when and how to incorporate commodities into a portfolio. His investment methodologies along with the evolution of ETFs into alternative asset classes like commodities and currencies are a match made in heaven." -H. Bruce Bond, President and CEO, PowerShares Capital Management

An in-depth look at the trading system that anyone can use The Logical Trader presents a highly effective, yet simple trading methodology that any trader anywhere can use to trade almost anything. The "ACD Method" developed and refined by Mark Fisher after many years of successful trading, provides price points at which to buy and sell as determined by the opening range of virtually any stock or commodity. This comprehensive guide details a widely used system that is profitably implemented by many computer and floor traders at major New York exchanges. The author's highly accessible teaching style provides readers of The Logical Trader with a full examination of the theory behind the ACD Method and the examples and real-world trading stories involving it. Mark B. Fisher (New York, NY), an independent trader, is founder of MBF Clearing Corp., the largest clearing firm on the NYMEX. Founded in 1988, MBF Clearing has grown from handling under one percent of the volume on the NYMEX to nearly twenty percent of the trades today. A 1982 summa cum laude graduate from the Wharton School of Business, University of Pennsylvania, Fisher also received his master's degree in finance and accounting from Wharton. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

by traders who have survived the market's ever changing temperament and have prospered-some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

Stan Weinstein's Secrets For Profiting in Bull and Bear Markets

Advancing Point and Figure in the 21st Century Point and Figure has been around for over 130 years and the method is just as essential for chart analysis today as it always has been. While the basic principles of the technique have remained unchanged, those working with Point and Figure must still push the boundaries of how it is used, looking to make it even more insightful and powerful. This is exactly what Jeremy du Plessis has achieved with 21st Century Point and Figure. Previously, it was thought that the lack of time on Point and Figure charts meant that time-based tools and indicators could not be used, and lack of volume meant that the importance of individual columns could not be determined. Jeremy du Plessis shows definitively that neither is the case and that with the use of lateral thinking there are also a host of other new techniques that can be added to Point and Figure charts and analysis. In this advanced practical guide, du Plessis explains: - How to use moving averages, Bollinger bands, Donchian channels and parabolic stop and reverse with Point and Figure charts. - How time-based indicators such as

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

overbought/oversold, RSI, directional movement and MACD can be used with Point and Figure charts. - How column volume can be used to assess a column's strength and how volume at box level can be used to assess support and resistance areas. - How traditional accumulation distribution lines, such as on-balance volume and volume-price trend, can be used to enhance the reading of the chart. - How the analysis of relative strength and spreads can be enhanced using these new techniques. - Two new Point and Figure based market breadth indicators. Finally, he introduces a new Point and Figure based oscillator that can also be used on time-based charts. All topics are illustrated with numerous high-quality, full colour charts and observations from years of trading experience. The techniques described here open up a whole world of new and advanced analysis tools. You will see that there is more to Point and Figure than you ever imagined, and that it is more flexible than has ever been realised before. If you employ Point and Figure analysis, ensure you don't miss out on these powerful new techniques - be sure to bring your analysis into the 21st century.

The Forex Chartist Companion

The proactive approach to the stock market - don't be a victim - there is something you can do about it. Swing trading is an approach to the stock market which is concerned less with value (a moveable feast as many have found out), and more with exploiting short-term upswings and downswings in share prices and market indices. Although the ranks of swing traders swell daily, not many traders know that there is a type of chart, a swing chart, which is designed specifically for swing trading. In this ground-breaking book, Marc Rivalland, author of 'The Trader' column in Investors Chronicle, shows how swing charts can be used to perfect market timing. Moreover, Marc reveals his hitherto secret modifications to Gann swing charts which make them even more effective for stock market traders. W. D. Gann said "a study of swings in active stocks will convince a man that he can make far greater profits in swings than in any other way of trading." With this book, you get Gann

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

and more. In addition, Marc uses his two decades of experience with point & figure charts to bring to readers an up-to-date and thoroughly modern evaluation of the best point & figure signals to use when trading individual equities. Point & figure is enjoying an enormous resurgence. Readers of this book will discover new insights into this proven and popular 100+ year old method of charting share prices. Marc reveals his proprietary method of integrating swing charts and point & figure charts to further increase the chances of success. There is a chapter on the vital RSI indicator and a chapter devoted solely to those more passively inclined - long-term buy-and-hold investors. In every case, the best trading tactics are discussed. Each technique is critically examined. The advantages are highlighted but t

A Visual Guide to Stata Graphics, Second Edition

Control charts are widely used in industry to monitor processes that are far from Zero-Defect (ZD), and their use in a near Zero-Defect manufacturing environment poses many problems. This book presents techniques of using control charts for high-quality processes, and some recent findings and applications of statistical control chart techniques for ZD processes are presented. A powerful technique based on counting of the cumulative conforming (CCC) items between two nonconforming ones is discussed in detail. Extensions of the CCC chart are described, as well as applications of cumulative sum

Online Library Point And Figure Charting The Essential Application For Forecasting And Tracking Market Prices

and exponentially weighted moving average techniques to CCC-related data, multivariate methods, economic design of control chart procedures, and modeling and analysis of trended but regularly adjusted processes. Many examples, charts, and procedures, are presented throughout the book, and references are provided for those interested in exploring the details. A number of questions and issues are posed for further investigations. Researchers and students may find many ideas in this book useful in their academic work, as a foundation is laid for the exploration of many further theoretical and practical issues.

want to know what his NYSE Bullish Percent Indicators is "saying." - Lawrence G. McMillan, President, McMillan Analysis Corp., www.optionstrategist.com

"Tom Dorsey has done it again he has taken his 30-plus years of unending devotion, talents, and insights in technical analysis and applied them to Exchange Traded Funds. He begins with the history of ETFs, explains how different they are from mutual funds, and then applies his expertise in Point and Figure charting to help traders and investors time their purchases and sales." - Ralph J. Acampora, CMT, Director of Technical research, Knight Capital

"Reading Tom Dorsey's Point & Figure Charting is the like procuring a road map before you begin a journey. It's a comprehensive look at how to succeed in the markets. This book is not only essential but easy to follow for everyone." - Paulo Pinto, CEO, Dif Broker

"Point and Figure Charting has become a valuable part of my daily trading routine. As an investment professional, it makes perfect sense to use Tom's methods in conjunction with fundamental analysis." - Damion Carufe, Investment Professional
