machine that cranked out one must-have product after another. Led by its own visionary genius founder, Edwin Land, Polaroid grew from a 1937 garage start-up into a billion-dollar pop-culture phenomenon. Instant tells the remarkable tale of Land's one-of-a-kind invention—from Polaroid's first instant camera to hit the market in 1948, to its meteoric rise in popularity and adoption by artists such as Ansel Adams, Andy Warhol, and Chuck Close, to the company's dramatic decline into bankruptcy in the late '90s and its unlikely resurrection in the digital age. Instant is both an inspiring tale of American ingenuity and a cautionary business tale about the perils of companies that lose their creative edge.

### **Script Supervising and Film Continuity**

As the tumultuous decade of the 1960s ended, a number of very traditional, very conservative, highly prestigious colleges and universities in the United States and the United Kingdom decided to go coed, seemingly all at once, in a remarkably brief span of time. Coeducation met with fierce resistance. As one alumnus put it in a letter to his alma mater, "Keep the damned women out." Focusing on the complexities of institutional decision making, this book tells the story of this momentous era in higher education—revealing how coeducation was achieved not by organized efforts of women activists, but through strategic decisions made by powerful men. In America, Ivy League schools like Harvard, Yale, Princeton, and Dartmouth began to admit women; in Britain, several of the men's colleges at

Cambridge and Oxford did the same. What prompted such fundamental change? How was coeducation accomplished in the face of such strong opposition? How well was it implemented? Nancy Weiss Malkiel explains that elite institutions embarked on coeducation not as a moral imperative but as a self-interested means of maintaining a first-rate applicant pool. She explores the challenges of planning for the academic and non-academic lives of newly admitted women, and shows how, with the exception of Mary Ingraham Bunting at Radcliffe, every decision maker leading the charge for coeducation was male. Drawing on unprecedented archival research, "Keep the Damned Women Out" is a breathtaking work of scholarship that is certain to be the definitive book on the subject.

### **The Camera Does the Rest**

This is the first volume in English to examine in detail one of the most remarkable collaborations between a writer and filmmaker in European cinema. Focusing on the four films Wim Wenders and Peter Handke made between 1969 and 1987 (3 American LPs, *The Goalkeeper*, *OCOs Fear of the Penalty*, *Wrong Move*, and *Wings of Desire*), it explores the productive tension between adaptation and collaboration and demonstrates the different ways in which text- and image-makers can recompose film's constituent media (literature, still and moving images, music, drama). The study reveals that this partnership had significant aesthetic and conceptual repercussions for both artists, resulting in a series of single-authored works which manifest the same kinds of intertextuality and disjunctive intermediality that are the hallmark of the collaborations themselves. These

include Wenders' films Alice in the Cities, Handke's films The Chronicle of On-Going Events and The Left-Handed Woman, and his novels Short Letter, Long Farewell and A Moment of True Feeling. While the Wenders-Handke partnership is unique, it contributes to a broader understanding of cinematic adaptation and different models of intermedial collaboration. In this book Yousuf Karsh, whose great photographic portraits have revealed so vividly the outstanding personalities of our time, writes about his own life and work. It is the story of an Armenian immigrant boy who rose to be the world's finest portrait photographer, whose pictures, reproduced in newspapers, magazines, and books, and shown in museums, art galleries and exhibitions, have been admired by hundreds of thousands of people all over the world. Of his early years in Armenia, Karsh gives a brief but compelling account, writing without bitterness but not sparing the reader the impact on his youthful mind of the brutalities, massacres,

and atrocities of that time. The dramatic impression made on him by his first experiences as a young citizen of Sherbrooke, Quebec. His several years of study in Boston with the famous photographer, Garo, show the gradual development of his ideas and skills in portraiture. In 1932, Karsh opened his own studio in Ottawa, capital city of Canada, and there he met Solange Gauthier, the volatile, charming, and practical Frenchwoman whom he married. Together they established his world-wide reputation. Karsh takes the reader with him to his sittings, and shows how he seeks to bring out the essence of the personalities he is portraying. The reader accompanies Karsh and Madam Karsh as they travel to Washington, New York, Hollywood, across Canada and to the Arctic, and on their European tours, photographing and interviewing statesmen, tycoons, artists, actors, musicians, popes, presidents, and kings. At Karsh's side, the reader hears Churchill's lion roar, the wit of Bernard Shaw, the bark of John L. Lewis, the profound accents of Einstein. He observes the grave serenity of Sibelius, and hears the noble 'cello of Casals. He shares in the problems and disappointments of securing adequate reproduction of the portraits in book form, and in the artist's gratification when *Portraits of Greatness*, printed by the finest gravure for the University of Toronto Press, appeared in 1959 and the magnificent volume became an immediate best-seller. Yousuf's profession has led him into the high places of the world, and this book is enriched by his twenty years of observation of the celebrities he has encountered. These are the experiences of a distinguished artist, a gifted raconteur, and a delightful human being.

Then, Now, and Beyond is a book of essays by members of the MIT Class of 1964 written on the occasion of their 55th reunion. It is about how the world has changed since they entered MIT in 1960. The essays are a blend of history and biography written by those who led, participated, or observed the unfolding events in many disciplines, not just science and engineering. The essays cover 1960 through 2019, and for some a view of what the future might hold. The late fifties

and sixties were times of significant change - social, cultural, and technological. We had the good fortune of being drawn together from many places, spending time together, and then being blasted out into the real world - to amass experiences and to evolve beliefs and views of what the world (big and small) might be like for our grandchildren. That's what this book is about. Lots of people before us have written about: the way things were, or the history of "X," of the future of "Y." What we capture in these essays is a sense of the people of our times, change as we saw it unfold and our belief as to its future impact. The essays are about hobbies, politics, culture, business, science and technology. "Then" is the late 50's early 60's. We took exams with your "slip stick" (slide rule) and often you could bring anything into an exam except another person. Telecommunications was often teletype and computer input was punched cards and paper tape. Computers were big and not very powerful - such as the IBM 709, 7090, 7094, TX-0, or PDP-1. You waited your turn for the main frame much as a supplicant to the gods. Then there was MIT Project MAC (Mathematics and Computation) which introduced timesharing. "Now" is well NOW. Computers abound - they wait on our wanting to use them and applications get written with stuff you don't need to prove you need an update and a faster machine. More power in a tiny device than existed in a room full in 1964. Wi-Fi antennas abound. The Internet has a lot of information including, old stuff about our undergraduate days, where we now live, what we do, meetings we go to, etc. etc. Would George Orwell, author of "1984," have recognized the "New privacy?" And "Beyond" is in the offing - much like what

This major business biography of Polaroid and its founder and inventor Edwin Land, covers how the company grew from the initial Polavision prototypes during World War II, to the 1980s landmark patent infringement trial against Kodak that nearly brought the company to its knees.

### **Industria**

What makes Polaroid photography stand out? Since its invention by Edwin Land in 1947, how has it crept into our common culture in the ways we witness today? Writing in the context of the two bankruptcies of Polaroid Corporation and the decline and obsolescence of its film, Peter Buse argues that Polaroid photography is distinguished by its process. The fact that, as the "New York Times" put it, the camera does the rest, encouraged distinctive practices by the camera's users, including its most famous use: as a party camera. Polaroid was often dismissed as a toy, but this book takes its status as a toy seriously, considering the way it opened up photographic play while simultaneously lowering its own cultural value. Drawing on unprecedented access to the archives of the Polaroid Corporation, Buse paints Polaroid as an intimate form, where the photographer, photograph, and photographed are in close proximity in time and space. This has profound

implications for the photographic practices Polaroid cameras permit and encourage, such as the sexual Polaroid, evidence of which the author pulls from literature, film, and pop culture, or Polaroid as a form of play, a fun technology, an ice breaker that can make things happen. Buse also tells the story of Polaroid's response as a company to developments in digital imaging and its ultimately doomed hard-copy wager in the face of them. Pushing further, he explores the continuities and discontinuities between Polaroid and digital snapshot practices, reflecting on what Polaroid can tell us about digital photography today. "

### **The Polaroid Project**

Polaroid founder Edwin Land regarded his invention as more than a technical accomplishment or a convenient medium for both professional photographers and consumers - he saw Polaroid as a means of artistic expression. At Land's behest, and starting from a collaboration with Ansel Adams in 1949, Polaroid built an artists' liaison programme in which artists and photographers would donate prints in return for materials and access to cutting-edge Polaroid technology - including the legendary 24 x 20 inch Polaroid camera. Over the next five decades, the Polaroid collections in both the United States and Europe became world-renowned for the stellar list of names whose work it contained. Following Polaroid's second bankruptcy in 2008, the collections were fragmented - the US and European collections were split and key works were sold at auction. A comprehensive view of the collection was no longer possible - until now. With an associated, internationally touring exhibition opening in June 2017, The Polaroid Project is the only book to bring together both the outstanding photography created by the artists and photographers Polaroid worked with, alongside the technical objects

The authors trace the development of one of the most well-known directors of the New German Cinema that flourished in the 1970s and early 1980s. Examining Wim Wenders' career from his early film school productions through his mature works of the 1970s, this book also analyses the most recent works, as well as the themes and preoccupations that unite his oeuvre. As the authors note, Wenders' works have been profoundly influenced by American films, especially the 'road movie' genre. His own work often features characters who are always on the move, in an attempt to capture a glimpse of their identity and place in the world. They also represent a generation of postwar Germans seeking to redeem themselves and the history of their country by turning to American popular culture, particularly its music and movies.
