### **Courses - KVCC**

Murphy RA, Bobrow BJ, Spaite DW, et al. Association between prehospital cpr quality and end-tidal carbon dioxide levels in out-of-hospital cardiac arrest. Prehosp Emerg Care . 2016;20(3):369-377.

### **Guidelines for Field Triage of Injured Patients**

There will be discussion about some of the medical and legal issues that are persistent in the practice of prehospital medicine. We will also address workplace safety and provider wellness, because you cannot take care of other people unless you are learning to take care of yourself! 4 hours to complete. 8 videos (Total 57 min), 6 readings, 2 quizzes. See All. 8 videos. Become an EMT 5m. EMT

### **Paramedic - Ontario College Diploma - Full-time - Program**

In addition, CINAHL Database provides access to health care books, nursing dissertations, selected conference proceedings, standards of practice, audiovisuals and book chapters. It includes full-text journals, legal cases, clinical innovations, critical paths, research instruments and clinical trials. Additional Features: An easy-to-use interface with basic and advanced search features and

### **How to Read and Interpret End-Tidal Capnography - JEMS**

Such facilities, called "trauma centers," are classified from Level I (centers providing the highest level of trauma care) to Level IV (centers providing initial trauma care and transfer to a higher level of trauma care if necessary) depending on the scope of resources and services available. The risk for death of a severely injured person is 25% lower if the patient receives care at a Level I

### **Comprehensive Overview of Nursing and Interdisciplinary**

Prehospital Care. A common acronym used to recall the appropriate initial treatment for AMI is MONA, which corresponds with morphine, oxygen, nitroglycerin (Nitrostat, NitroMist, NTG), and aspirin. Patients with ACS symptoms who are initially being managed by EMS should also receive intravenous access. Morphine is typically dosed at 2-4 mg and

### **Performing an A-G patient assessment: a step-by-step guide**

Long-term oxygen therapy (LTOT) at home has been demonstrated to improve survival in patients with COPD and severe resting hypoxemia. Support for LTOT is based on 2 landmark trials published nearly 4 decades ago. These results form the basis for reimbursement and prescription of LTOT to this day. Recent work has demonstrated no outcome benefit of LTOT in stable COPD patients with moderate

### **Part 15: Neonatal Resuscitation | Circulation**

readings and discussions, both in the prehospital care and emergency department environments, operate with four imperatives: (1) to save lives when possible, (2) to relieve pain and

### **Bing: Prehospital Care Administration Issues Readings**

The use of high-dose epinephrine for patients with out-of-hospital cardiopulmonary arrest refractory to prehospital interventions. *Pediatr Emerg Care*. 2005; 21:227-237. Crossref Medline Google Scholar; 90. Wyckoff MH, Perlman JM, Laptook AR. Use of volume expansion during delivery room resuscitation in near-term and term infants. *Pediatrics*.

### **CINAHL Database | EBSCO**

It highlights the interaction of ethical, sociological, medical, psychological, legal, political and religious issues that surround

end-of-life decision making. The course is intended for funeral service staff as well as nurses and caregivers. Offered Spring, DL. Dates offered: Full Term (January 25, 2021 - May 11, 2021)

### **Cardiac Emergencies: Assessment, Angina, & MI | Nursing**

Bring your leadership to the dynamic field of emergency medicine. Graduates from this top-rated Paramedic Ontario College Diploma program are ready for success in the workforce . Paramedics fill a critical role in our health care system with employment opportunities in rural and urban paramedic services. This program combines applied and theoretical experiences to provide you with the

### **Prehospital Care Administration Issues Readings**

Clinical readings should be interpreted with caution. If the systolic blood pressure differs by  $\geq 10$ mmHg from the patient's baseline, the result should be reviewed with another member of the team. Although diastolic blood pressure is not part of the NEWS 2 scoring system a reading it will give a good indication of the patient's haemodynamic status. The estimation of the patient's fluid

### **Pulse oximetry - Wikipedia**

Traditionally, oxygen therapy was given to patients presenting with breathlessness and hypoxia (low oxygen levels in the tissues) in emergency situations due to a common misconception that it could reduce breathlessness (Dhruve et al, 2015). However, in recent years, there has been a debate about the benefits and risks of delivering emergency oxygen therapy to all patients presenting critically

### **Covid-19: Patients to use pulse oximetry at home to spot**

Acknowledgement that health care quality and patient safety issues are increasingly high-profile on national and international agendas. Funding . This work is being supported by the US Agency for Healthcare Research and Quality (grant/contract number HHSA290-2012-00006C). Acknowledgements. This work was carried out as part of the High 5s project set up by the World Health Organization in 2007

### **Oxygen Therapy in COPD | Respiratory Care**

In both pre-hospitalization situations and emergency care units, healthcare providers have rallied to the task with awareness, more effective methods and medications and have taken great strides forward in the care of emergent needs. However, more remains to be done in order to get this pervasive cause of death under control. Only by prompt recognition and initiation of appropriate treatment

### **EMT Foundations | Coursera**

Educational aims 1. To help readers understand the best way to use oxygen when they care for patients with medical emergencies. 2. To encourage best practice in the use of emergency oxygen therapy. 3. To raise awareness of the British Thoracic Society (BTS) guideline for emergency oxygen use. Summary Oxygen is the most commonly used drug in emergency medicine and when used judiciously in the

### **Standardization in patient safety: the WHO High 5s project**

Pulse oximetry is a noninvasive method for monitoring a person's oxygen saturation. Though its reading of peripheral oxygen saturation (SpO<sub>2</sub>) is not always identical to the more desirable reading of arterial oxygen saturation (SaO<sub>2</sub>) from arterial blood gas analysis, the two are correlated well enough that the safe, convenient, noninvasive, inexpensive pulse oximetry method is valuable for

### **(PDF) Principles of biomedical ethics - ResearchGate**

Students partner with prehospital providers at local ambulance services and clinical preceptors in various health care settings to develop skills in clinical decision-making, electrocardiography, and management of acute and chronic disease. This clinical experience focuses on the skills needed to function at the Advanced EMT level. Students completing this course will fulfill the clinical

## **Guideline for infection control in health care personnel, 1998**

Patients with covid-19 who don't need immediate hospital attention but are at high risk of developing serious symptoms are to be given pulse oximeters to use at home to reduce the risk of serious deterioration, The BMJ has learnt. NHS England is believed to have purchased around 200 000 pulse oximeters for the scheme, which clinical commissioning groups across England will be able to access.

## **Ensuring the safe use of emergency oxygen therapy in**

The key elements of prehospital care are stabilization of the airway, breathing, and circulation (the ABCs); identification of signs and symptoms of stroke; establishment or verification of the last known well time; provision of supplemental oxygen to patients with hypoxemia; checking the blood glucose level; avoidance of the administration of glucose-containing fluids (unless the patient is
