21st Century Anthropology: A Reference Handbook

Vol. 1- includes Glossary of sociological and anthropological terms.

The Oxford Handbook of Material Culture Studies

The Negro's Place in Nature

American Anthropologist

First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

Chinese Sociology and Anthropology

An Anthropology of Biomedicine

Anthropological Abstracts 6/2007

ABSTRACTS IN ANTHROPOLOGY VOLUME 7, NUMBER 1

Papers presented by the American Anthropological Association and the American Folk-Lore Society to the nineteenth International Congress of Americanists, October 1914. Topics include mythology, religion, physical anthropology, material culture etc. of North American Indians.

The Future of Visual Anthropology

Ibss: Anthropology: 1988

The Student Anthropologist's Handbook

Journal of the Walter Roth Museum of Archaeology and Anthropology

AMERICAN ANTHROPOLOGIST NEW SERIES VOLUME 38

Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an

anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.

Anthropology A305

From an eminent author in the field, The Future of Visual Anthropology develops a new approach to visual anthropology and presents a groundbreaking examination of developments within the field and the way forward for the subdiscipline in the twenty-first century. The explosion of visual media in recent years has generated a wide range of visual and digital technologies which have transformed visual research and analysis. The result is an exciting new interdisciplinary approach of great potential influence for the future of social/cultural anthropology. Sarah Pink argues that this potential can be harnessed by engaging visual anthropology with its wider contexts, including: the increasing use of visual research methods across the social sciences and humanities the growth in popularity of the visual as methodology and object of analysis within mainstream anthropology and applied anthropology the growing interest in 'anthropology of the senses' and media

anthropology the development of new visual technologies that allow anthropologists to work in new ways. This book has immense interdisciplinary potential, and is essential reading for students, researchers and practitioners of visual anthropology, media anthropology, visual cultural studies, media studies and sociology.

High School Anthropology

Using Historical Sources in Anthropology and Sociology

This volume provides a unique guide to the ideas and history of the discipline which discusses human, social and cultural life in all its diversity. Theory, ethnography and history are combined in over 200 substantial entries on topics as wide ranging as race, postmodernism, witchcraft, essentialism, magic and methodology. Authoritative entries have been commissioned from among the world's leading specialists. Alphabetically organized, the main entries contain clear, concise and provocative explanations of key anthropological themes and ideas, as well as surveys of the most important regional traditions of ethnographic research. Each entry contains cross references and a bibliographic guide to further reading. The Encyclopedia also contains a biographic appendix, with details of the lives and works of over 200 important figures in the history of anthropology and a glossary with short explanations of over 500 terms and concepts. Areas covered include: History of anthropological research, colonialism, orientalism and occidentalism, theories of culture and society * Kinship, gender and family, marriage, the body * Ritual and religion, language and linguistics, poetics, literacy, aesthetics, film, museums * Relations with other disciplines (e.g. archaeology and sociology).

Anthropology - Guide to Resource Materials

Encyclopedia of Social and Cultural Anthropology

This bibliography is now under the editorial direction and authority of the British Library of Political and Economic Science, at the London School of Economics. The editorial expertise of the world's leading social science institution will ensure that the IBSS maintains its unrivalled position as a bibliographic source. This bibliography lists the most important works in anthropology published in 1988.

Anthropology & Education Quarterly

Academic Anthropology and the Museum

Quarterly. References to journal articles, miscellaneous papers, and books, arranged under sections on archaeology, ethnology, linguistics, and physical anthropology. Cross references. Cross index.

Anthropology

Via 100 entries or 'mini-chapters,' the SAGE 21st Century Reference Series volumes on Anthropology will highlight the most important topics, issues, questions, and debates any student obtaining a degree in the field of anthropology ought to have mastered for effectiveness in the 21st century. The purpose is to provide undergraduate students with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail or density as a journal article or a research handbook chapter.

Tribal India

Written by an international team of experts, the Handbook makes accessible a full range of theoretical and applied approaches to the study of material culture, and the place of materiality in social theory, presenting current thinking about material culture from the fields of archaeology, anthropology, geography, and science and technology studies.

How Materials Matter

The field of color categorization has always been intrinsically multi- and inter-disciplinary, since its beginnings in the nineteenth century. The main contribution of this book is to foster a new level of integration among different approaches to the anthropological study of color. The editors have put great effort into bringing together research from anthropology, linguistics, psychology, semiotics, and a variety of other fields, by promoting the exploration of the different but interacting and complementary ways in which these various perspectives model the domain of color experience. By so doing, they significantly promote the emergence of a coherent field of the anthropology of color.

A Laboratory Manual for Forensic Anthropology

Catalog to Manuscripts at the National Anthropological Archives, Department of

Anthropology, National Museum of Natural History, Smithsonian Institution, Washington, D.C.

Digital Anthropology

An Anthropology of Biomedicine is an exciting new introduction to biomedicine and its global implications. Focusing on the ways in which the application of biomedical technologies bring about radical changes to societies at large, cultural anthropologist Margaret Lock and her co-author physician and medical anthropologist Vinh-Kim Nguyen develop and integrate the thesis that the human body in health and illness is the elusive product of nature and culture that refuses to be pinned down. Introduces biomedicine from an anthropological perspective, exploring the entanglement of material bodies with history, environment, culture, and politics Develops and integrates an original theory: that the human body in health and illness is not an ontological given but a moveable, malleable entity Makes extensive use of historical and contemporary ethnographic materials around the globe to illustrate the importance of this methodological approach Integrates key new research data with more classical material, covering the management of epidemics, famines, fertility and birth, by military doctors from colonial times on Uses numerous case studies to illustrate concepts such as the global commodification of human bodies and body parts, modern forms of population, and the extension of biomedical technologies into domestic and intimate domains Winner of the 2010 Prose Award for Archaeology and Anthropology

Anthropology News

This Volume Includes Papers Pertaining To Ballistics, Wherein Advanced Techniques Of Comparing The Use Of Fire Arms Are Discussed. This Volume Also Presents Studies Related To Analysis Of Poisonous Material And Its Impact Homicidal Cases.

Anthropology in North America

Canadian Journal of Anthropology

Forensic-anthropology, Science, and Medicine

Urban Anthropology and Studies of Cultural Systems and World Economic Development

A Laboratory Manual for Forensic Anthropology approaches forensic anthropology as a modern and well-developed science, and includes consideration of forensic anthropology within the broader forensic science community, with extensive use of case studies and recent research, technology and challenges that are applied in field and lab contexts. This book covers all practical aspects of forensic anthropology, from field recoveries, to lab analyses, emphasizing hands-on activities. Topics include human osteology and odontology, examination methods, medicolegal significance, scene processing methods, forensic taphonomy, skeletal processing and sampling, sex estimation, ancestry estimation, age estimation, stature estimation, skeletal variation, trauma analysis, and personal identification. Although some aspects are specific to the United States, the vast majority of the material is internationally-relevant and therefore suitable for forensic anthropology courses in other countries. Provides a comprehensive lab manual that is applicable to coursework in forensic anthropology and archaeology Covers all practical aspects of forensic anthropology, from field recoveries, to lab analyses Includes discussions of human osteology and odontology, examination methods, medicolegal significance, scene processing methods, forensic taphonomy, skeletal processing and sampling, sex estimation, and more Emphasizes best practices in the field, providing an approach that is in line with today's professional forensic anthropology

Anthropology of Color

How does design and innovation shape people's lives in the Pacific? Focusing on plant materials from the region, How Materials Matter reveals ways in which a variety of people - from craftswomen and scientists to architects and politicians - work with materials to transform worlds. Recognizing the fragile and ephemeral nature of plant fibres, this work delves into how the biophysical properties of certain leaves and their aesthetic appearance are utilized to communicate information and manage different forms of relations. It breaks new ground by situating plant materials at the centre of innovation in a region.

Abstracts in Anthropology

The museum boom, with its accompanying objectification and politicization of culture, finds its counterpart in the growing interest by social scientists in material culture, much of which is to be found in museums. Not surprisingly, anthropologists in particular are turning their attention again to museums, after decades of neglect, during which fieldwork became the hallmark of modern anthropology - so much so that the "social" and the "material" parted company so radically as to produce a kind of knowledge gap between historical collections and the intellectuals who might have benefitted from working on these material representations of culture. Moreover it was forgotten that museums do not only present the "pastness" of things. A great deal of what goes on in contemporary museums is literally about planning the shape of the future: making culture materialize involves mixing things from the past, taking into account current visions, and knowing that the scenes constructed will shape the perspectives of future generations. However, the (re-)invention of museum anthropology presents a series of challenges for academic teaching and research, as well as for the work of cultural production in contemporary museums - issues that are explored in this volume.
