Eighteen well-known policymakers and economists discuss the rising use of currency substitution in Latin America. They examine the effects of currency boards on substitute currencies and on national stabilization programs. Latin American countries including Argentina, Bolivia, Peru, and Uruguay increasingly use dollars as a substitute for domestic currency. The experts debate whether the region should encourage or resist this trend. Topics include the effects of substitution on inflation, liquidity, and exchange rates. The discussions on Argentina, Peru, and Brazil focus on the ways in which currency boards have affected stabilization in these countries. They consider whether such boards can strengthen fiscal discipline and speed economic adjustment. A currency board issues money that is converted into a foreign reserve currency at a fixed exchange rate. This independent institution takes over the central bank's role as the sole issuer of base money. It also manages the exchange rate to keep the currency stable and convertible.

Hydroinformatics addresses cross-disciplinary issues ranging from technological and sociological to more general environmental concerns, including an ethical perspective. It covers the application of information technology in the widest sense to problems of the aquatic environment. This two-volume publication contains about 250 high quality papers contributed by authors from over 50 countries. The proceedings present many exciting new findings in the emerging subjects, as well as their applications, such as: data mining, data assimilation, artificial neural networks, fuzzy logic, genetic algorithms and genetic programming, chaos theory and support vector machines, geographic information systems and virtual imaging, decision support and management systems, Internet-based technologies. This book provides an excellent reference to researchers, graduate students, practitioners, and all those interested in the field of hydroinformatics. Contents: .: Vol. I: Keynote Addresses; Numerical Methods; Hydrodynamics, Ecology and Water Quality Modelling; Experiences with Modelling Systems; Data Acquisition and Management; Geographic Information Systems and Virtual Imaging; Optimization and Evolutionary Algorithms; Vol. II: Decision Support and Management Systems; Forecasting and Data Assimilation; Artificial Neural Networks; Fuzzy Logic; Chaos Theory and Support Vector Machines; Data Mining and Knowledge Discovery; Uncertainty and Risk Analysis; Integration of Technologies and Systems; Internet-Based Technologies and Applications. Readership: Graduate students, academics, researchers and practitioners in civil engineering, artificial intelligence, optimization, and probability and statistics

This publication is a record of the AOCS World Conference and Exposition on

Oilseed Technology and Utilization, held in Budapest, Hungary. Also included in the proceedings are 61 other papers, discussion session synopses, and 22 poster presentations. This material provides the most current thinking about the problems and opportunities in this area.

This book highlights recent findings in industrial, manufacturing and mechanical engineering, and provides an overview of the state of the art in these fields, mainly in Russia and Eastern Europe. A broad range of topics and issues in modern engineering are discussed, including the dynamics of machines and working processes, friction, wear and lubrication in machines, surface transport and technological machines, manufacturing engineering of industrial facilities, materials engineering, metallurgy, control systems and their industrial applications, industrial mechatronics, automation and robotics. The book gathers selected papers presented at the 4th International Conference on Industrial Engineering (ICIE), held in Moscow, Russia in May 2018. The authors are experts in various fields of engineering, and all papers have been carefully reviewed. Given its scope, the book will be of interest to a wide readership, including mechanical and production engineers, lecturers in engineering disciplines, and engineering graduates.

This volume is derived from the conference on Training Clinical Child Psychologists held in South Carolina. The goal of the meeting was to identify, examine, and assess the major influences, directions, goals, and actions of consequence to clinical child psychology and to clinical child psychologists. Proceedings: Conference on Training Clinical Child Psychologists explores issues pertaining to the goal of training competent psychologists to work with children, youths, and families. The objectives of this volume and the conference are: *to stimulate discourse meaningful to clinical child psychologists and to the total psychological community; *to clarify major issues and alternative actions, and *to formulate and implement feasible proposals for strengthening the professional preparation of clinical child psychologists. Topics included in this volume include: roles and responsibilities of clinical child psychologists and the boundary issues; curriculum issues; models of training; credentialing and licensing; and recommendations, guidelines and conclusions drawn from the conference. Also included are the Guidelines for Training Psychologists to Work with Children Youths, and Families (Appendix E). Contributors include: June M. Tuma, Donald K. Routh, Michael C. The Conference on Biblical Inerrancy, under the sponsorship of the six Southern Baptist seminaries, met May 4-7, 1987. Scholars, pastors, and interested laypersons gathered to study and discuss inerrancy. This book is the collection of the papers presented at the conference. - Back cover.

Proceedings of the Conference on Finite Groups provides information pertinent to the fundamental aspects of finite group theory. This book presents the problem of characterizing simple groups in terms of the local structure of a group. Organized into five parts encompassing 43 chapters, this book begins with an overview of the characterization of the Chevalley groups over fields of odd order and indicates the role of this characterization in the theory of component type groups. This text then examines the structure as well as the representations of specific simple groups. Other chapters consider the general theory of representations and characters of finite groups. This book discusses as well permutation groups and the connection between group theory and geometry. The final chapter deals with finite solvable groups as well as the theory of formations. This book is a valuable resource for mathematicians, graduate students, and research workers.
