Critical Reflection for Nursing and the Helping Professions

This book is a concise, readable, yet authoritative primer of basic classic thermodynamics. Many students have difficulty with thermodynamics, and find at some stage of their careers in academia or industry that they have forgotten what they learned, or never really understood these fundamental physical laws. As the title of the book suggests, the author has distilled the subject down to its essentials, using many simple and clear illustrations, instructive examples, and key equations and simple derivations to elucidate concepts. Based on many years of teaching experience at the undergraduate and graduate levels, “Essential Classical Thermodynamics” is intended to provide a positive learning experience, and to empower the reader to explore the many possibilities for applying thermodynamics in other fields of science, engineering, and even economics where energy plays a

central role. Thermodynamics is fun when you understand it!

Essential Classical Thermodynamics

The stars and their movements have always captivated the human imagination. In all cultures, people have studied the sky to learn about the complicated relationships between celestial bodies and terrestrial affairs. In all cultures, too, people have invented elaborate visual systems to document and organise their findings on the influence of the planets and stars. ASTROLOGY PICTURES provides a rich collection of the most interesting and compelling astrological imagery from a wide variety of cultural traditions. The collection comprises images and depictions of the planets, the elements and the zodiac. This book contains portraits of astrologers both real and imagined, and a sample of the visual systems devised to organise astrological knowledge, such as celestial maps and hand charts, chosen for their rarity and their visual impact. With imagery originating from Egypt, Japan and China, from both classical antiquity and the Western tradition, ASTROLOGY PICTURES truly provides an all-encompassing and accessible overview of a rich and stimulating heritage.

This guideline is an update of NICE's previous guidance on generalised anxiety disorder (GAD). It reviews the evidence for low- and high-intensity psychological interventions and drug treatments, and also gives an insight into the experience of care of people with GAD, which is a common mental health problem and often co-occurs with other anxiety and depressive disorders. RCPsych Publications is the publishing arm of the Royal College of Psychiatrists (based in London, United Kingdom), which has been promoting excellence in mental health care since 1841. Produced by the same editorial team who publish *The British Journal of Psychiatry*, they sell books for both psychiatrists and other mental health professionals; and also many written for the general public. Their popular series include the College Seminars Series, the NICE mental health guidelines and the Books Beyond Words series for people with intellectual disabilities.

In Case Studies in Counseling Older Adults Larry Golden addresses a growing trend--older adults presenting for counseling--and the techniques that may be used to help treat them. Golden has selected cases studies that highlight many common issues faced by older adults today, such as loss of a spouse, health, financial means, depression, and spirituality. The organization of the cases provides the reader with a sense of the contributors' environment, the clients' contextual issues (i.e family, economics, health), the clients' presenting problems, and the therapeutic strategies implemented. This book is a valuable resource to counselors who are seeking to enhance their expertise with innovative approaches to counseling older adults.

Generalised Anxiety Disorder in Adults

This is the essential book for any health professionals whose role incorporates low intensity CBT. It introduces readers to the principles and skills of cognitive behaviour therapy, and guides them through the entire process of working with adult patients with common mental health problems. Beginning at the initial assessment, it takes students through the implementation of interventions to the management of ending. Detailed case studies illustrate each step of patients'

recovery journeys. This new edition: is updated in line with changes in the PWP curriculum and broader IAPT policies includes new chapters on working with older adults and patients with long-term conditions adds new exercises to help readers reflect on their own practice, and builds confidence to help them become outstanding practitioners.
