A Zebra in Lion Country

Shares ways of spotting the trends that move markets and explains how to choose investments

Research Handbook on Shareholder Power

Leadership and Organizational Change

This book brings together examples of leading thinking and international practice in the rapidly developing area of environmental management accounting .(EMA) The authors include academics and practitioners from industry and the subjects covered range from individual company experiences with implementing EMA to national experiences regarding the adoption and diffusion of EMA practices.

Women on Boards

A thorough, in-depth treatment of strategic leadership that highlights knowledge creation and practical insight. The authors have been at the forefront of research and writing in this field; this book represents a compilation and creative extension

of their own and others research on top executives. This brief one-color text is appropriate for MBA strategy courses or as a supplement to various upper-division managerial texts. Strategic Leadership is part of the Wests Strategic Management Series edited by Michael A. Hitt, R. Duane Ireland, and Robert E. Hoskisson, authors of Strategic Management: Competitiveness and Globalization, 2nd.

The Roaring 2000'S

Organizational Change: Themes and Issues presents a critical approach to organizational change, viewing change as a series of critical reflections rather than a series of recipes or models.

AI Approaches to the Complexity of Legal Systems

Sharpen critical math and thinking skills with the Brainy Book of Time and Money! With challenging practice pages, entertaining puzzles and games, and engaging word problems, each page helps young learners hone math proficiency while building on basic skills. The Brainy Book series provides fun, engaging activities for young learners. The series is dedicated to helping children practice and perfect important basic learning skills. These colorful books sharpen concentration skills while supporting classroom learning. Each colorful page offers ample space for

children to complete exercises. These books provide an entertaining way to hone critical skills while having fun at the same time!

Food, Energy, and Society, Third Edition

Environmental Management Accounting (EMA) is increasingly recognised as a distinguished tool of environmental management. It helps to integrate a company's environmental and business interests, whereby enhancing corporate eco-efficiency in terms of reducing environmental costs or making one's product more competitive. This book gives a comprehensive coverage of the state of the art. It presents a number of EMA frameworks that companies can take as a basis for implementing their own specific EMA structures. Besides discussing environmental accounting issues within conventional management accounting, it gives a detailed picture of materials flow (cost) accounting as an alternative way of looking at the ecology-economy relationships at the corporate level. A fascinating case study shows how a large company (Siemens) applies materials flow accounting and what benefits it entails.

Maize Production in Java

Can developing countries meet the food requirements of their growing populations

without jeopardizing a natural resource base that is already under great stress? Can increases in food production achieved in the past two decades be sustained in the next two decades? Can developing countries achieve freedom from hunger and malnutrition

Organizational Change: Themes and Issues

The Long Boom

This book examines the huge scope of mathematical areas explored and developed by Leonhard Euler.

Developing Educational Leadership

Human Resource Development Research Handbook

Social pain is the experience of pain as a result of interpersonal rejection or loss, such as rejection from a social group, bullying, or the loss of a loved one. Research now shows that social pain results from the activation of certain components in

physical pain systems. Although social, clinical, health, and developmental psychologists have each explored aspects of social pain, recent work from the neurosciences provides a coherent, unifying framework for integrative research. This edited volume provides the first comprehensive, multidisciplinary exploration of social pain. Part I examines the subject from a neuroscience perspective, outlining the evolutionary basis of social pain and tracing the genetic, neurological, and physiological underpinnings of the phenomenon. Part II explores the implications of social pain for functioning in interpersonal relationships; contributions examine the influence of painkillers on social emotions, the ability to relive past social hurts, and the relation of social pain to experiences of intimacy. Part III examines social pain from a biopsychosocial perspective in its consideration of the health implications of social pain, outlining the role of stress in social pain and the potential long-term health consequences of bullying. The book concludes with an integrative review of these diverse perspectives.

Foundations of Human Resource Development

Much of the history of corporate law has concerned itself not with shareholder power, but rather with its absence. Recent shifts in capital market structure require a reassessment of the role and power of shareholders. These original, specially commiss

Shifting Gears: Thriving in the New Economy cracked into national bestseller status when it was published last year. Nuala Beck's bang-on ability to shatter old economic statistics and indicators and replace them with eye-opening facts and insights into where our economic future really lies gave all Canadians a positive, practical strategy for career and business growth. Now with a new, updated introduction reflecting today's economic picture, combined with Nuala Beck's continuing high profile as one of North America's leading business and economic consultants, Shifting Gears is set to become a powerhouse seller in trade paper. "it's well-written and it bristles with provocative insights. Most indicators point to a rise in Beck's stock". Quill & Quire

Introduction to Research in Education

The Handbook of Conflict Resolution

Strategic Giving

A classic in the field, *INTRODUCTION TO RESEARCH METHODS IN EDUCATION*, 8th Edition, helps students master the basic competencies necessary to understand and evaluate the research of others, and shows them how to plan and conduct original research. The text's strengths include a clear writing style, comprehensive topic coverage, well-chosen and effective examples that clarify complex concepts, and strong end-of-chapter exercises that expose students to intriguing research problems. This edition builds on the text's strengths of teaching students to become more competent consumers and producers of research. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Strategic Leadership

This optimistic text examines and predicts the 40-year period from 1980-2020 as the key years of a remarkable economic transformation.

Social Pain

Since the publication of Herbert Spencer's *Principles of Sociology* in 1875, the use of social structure as a defining concept has produced a large body of creative speculations, insights, and intuitions about social life. However, writers in this

tradition do not always provide the sorts of formal definitions and propositions that are the building blocks of modern social research. In its broad-ranging examination of the kind of data that form the basis for the systematic study of social structure, *Research Methods in Social Network Analysis* marks a significant methodological advance in network studies. As used in this volume, social structure refers to a bundle of intuitive natural language ideas and concepts about patterning in social relationships among people. In contrast, social networks is used to refer to a collection of precise analytic and methodological concepts and procedures that facilitate the collection of data and the systematic study of such patterning. Accordingly, the book's five sections are arranged to address analytical problems in a series of logically ordered stages or processes. The major contributors define the fundamental modes by which social structural phenomena are to be represented; how boundaries to a social structure are set; how the relations of a network are measured in terms of structure and content; the ways in which the relational structure of a network affects system actors; and how actors within a social network are clustered into cliques or groups. The chapters in the last section build on solutions to problems proposed in the previous sections. This highly unified approach to research design combined with a representative diversity of viewpoints makes *Research Methods in Social Network Analysis* a state-of-the-art volume.

Food Security and Environmental Quality in the Developing

World

In his bestselling book, *The Great Boom Ahead*, published in 1993, Harry Dent, one of the world's most prescient economic prognosticators, stood practically alone in forecasting a new age of prosperity emerging in the 1990s and extending into the new century. Dent foresaw a booming stock market, falling mortgage rates, and the resurgence of America as the premier global economic superpower. All of his predictions have come to fruition. Now, in *The Roaring 2000s*, Dent focuses his visionary eye on the full spectrum of changes that will follow in the wake of the burgeoning turn-of-the-century economy. According to Dent, how and where we work and live is about to change more drastically than at any time in our history due to the convergence of the mainstreaming of the Internet and other technologies and the peak spending years of the aging baby boomers. This will result in nothing less than the greatest boom in history and an unprecedented opportunity for investors and entrepreneurs, great buys in real estate, and a wealth of high-quality lifestyle choices for the savvy people who anticipate these changes. We will see such rapid and exciting change as we have not seen since the dizzying pace of the productivity revolution unleashed by the assembly line in the Roaring Twenties. Dent not only offers detailed investment strategies aimed at exploiting the coming boom for the next fifteen years but he also explains future trends in the job market, technology, demographics, and real estate. He foresees the next great population migration and explores the radically different business

and organizational structures that will be the offspring of the Information Age. At the crux of these changes is the fundamental shift to a new network model wherein front-line human "browsers" focus on intimately understanding the needs of a unique segment of customers and coordinate the products or expertise of specialized back-line human "servers" to customize solutions. With new research tools applied to the trends that have developed within the last few years, *The Roaring 2000s* reveals concrete predictions and in-depth insights into the next decade, including: A Dow that continues to soar and will eventually reach at least 21,500, and possibly 35,000, by the year 2008. The importance of "gazelles," small-to medium-sized, high-growth companies, which today are creating most of the jobs in this country. The rapid future economic development in countries in the Far East, South America, and Eastern Europe, and select areas of Africa, and what that means for investment, employment, and business growth opportunities now. *The Roaring 2000s* also describes the lifestyle changes these developments will inspire, including: The New American Dream -- why changing technologies could mean a return to small-town living and which nine types of boomtowns will offer the highest quality of life in the decades ahead. Investment strategies that will help readers get the most out of a rapidly changing world. It is essential, Dent explains, to understand the magnitude and nature of the forces changing our economy and lifestyles in order to take advantage of the invaluable, emerging opportunities for significantly improving one's quality of life. *The Roaring 2000s* is a necessary guidebook to the not-so-distant future.

Pillar of Sand

"Boje does not reflect trends, he is among those who set them" - Hervé Corvellec, Department of Service Management, Lund University "How can I know what I think until I see what David Boje says? What he says about storytelling will forever change what we thought we knew about stories. With remarkable control over a complex argument, Boje recovers, re-punctuates, and re-animates a world of narrative and sensemaking that we have previously taken for granted!" - Karl E. Weick, Rensis Likert Distinguished University Professor of Organizational Behavior and Psychology, Stephen M. Ross School of Business at the University of Michigan "Few people understand stories and storytelling as well as David Boje. It is a measure of Boje's success as a theorist that the word story can never reclaim the innocence and simplicity it once enjoyed. Nor, with the benefit of his work, can organizations be viewed as spaces which occasionally or incidentally spawn stories. Boje's eagerly awaited book forces us to question many of our assumptions about storytelling; it also demands that we revise several of our assumptions about what organizations are" - Yiannis Gabriel, The School of Management, Royal Holloway University of London "Our company is made up of lots of stories. We've found that 'stories' get told and retold and become the fabric of an organization. 'Policies' lay unread in the company handbook or training manual. David Boje taught me the value of stories in an organization. Stories are the 'oil' that makes the gears work. How do you get your message heard in an organization with

thousands of people? David Boje taught me the value of telling stories at Stew Leonard's!" - Stew Leonard Jr., Stew Leonard Organization "David Boje is one of the world's leading authorities on storytelling. His work has influenced a generation of organizational theorists and students. He not only provides new ways of understanding organizations but also provides fresh insights into the way in which stories function to provide meanings" - Heather Höpfl, University of Essex The idea of organizations using `storytelling' to make sense of themselves and their environment has generated a lot of excitement. Written by the leading scholar in this field, David Boje explores how narrative and storytelling is an important part of an organization's strategy, development and learning processes. With excellent examples from Nike, McDonald's and Disney, readers are shown how the theory that underpins organizational storytelling connects with storytelling in everyday organizational life. David Boje's theories and ideas in relation to the study of storytelling in organizations are highly influential and this book will be a `must have' for any student or scholar interested in the area.

Vision of 2050 Agriculture in China

Synthesizes a significant amount of data and information on roots and tubers in an effort to provide a clearer vision of their past, present, and future roles in the food systems of developing countries. How the production and use of these commodities have changed and will continue to change over time are all the more

important to understand because of the contribution they make to the diets and income-generating activities of the rural and urban poor in Asia, Africa, and Latin America. Provides a fuller understanding of the prospects of roots and tubers for food, feed, and other uses in developing countries.

Biofuels, Solar and Wind as Renewable Energy Systems

A social psychologist based at Columbia University, Lindner takes us across history and into nations worldwide to show how emotion spurs hierarchies of domination and therefore causes subjugation, human rights violations, abuse, conflict, and fighting. She spotlights results ranging from the binding and subsequent deforming of Chinese women's feet, to periods of slavery, bondage, feudalism, apartheid, and other unjust events across time. Related actions from political domination internationally, to spousal or child abuse on the homefront are addressed. Lindner looks at how widely divergent societies - from the Japan of Samurais, to the Meso America of Aztecs, up to the modern Iraq at war - are driven by hierarchies of emotionally-fueled control with rigid domination.

Education Management Information Systems (EMIS)

The petroleum age began about 150 years ago. Easily available energy has s-

ported major advances in agriculture, industry, transportation, and indeed many diverse activities valued by humans. Now world petroleum and natural gas supplies have peaked and their supplies will slowly decline over the next 40–50 years until depleted. Although small amounts of petroleum and natural gas will remain underground, it will be energetically and economically impossible to extract. In the United States, coal supplies could be available for as long as 40–50 years, depending on how rapidly coal is utilized as a replacement for petroleum and natural gas. Having been comfortable with the security provided by fossil energy, especially petroleum and natural gas, we appear to be slow to recognize the energy crisis in the U. S. and world. Serious energy conservation and research on viable renewable energy technologies are needed. Several renewable energy technologies already exist, but sound research is needed to improve their effectiveness and economics. Most of the renewable energy technologies are influenced by geographic location and face problems of intermittent energy supply and storage. Most renewable technologies require extensive land; a few researchers have even suggested that one-half of all land biomass could be harvested in order to supply the U. S. with 30% of its liquid fuel! Some optimistic investigations of renewable energy have failed to recognize that only 0. 1% of the solar energy is captured annually in the U. S.

The Good Study Guide

More Women on Boards: An International Perspective is the seventh volume in the Women and Leadership: Research, Theory, and Practice book series. The purpose of this volume is to explore the complexity of issues related to increasing the number of women on boards of directors around the world: how these issues have been understood; how they have been more and less successfully addressed in different countries and industries; and how they are similar, and yet different, as a results of cultural and legal differences. In the Introduction and 18 chapters included in this book, 42 researchers, activists, and practitioners who were raised or work today in at least 17 countries on 6 continents seek to answer the questions: “Why have women on boards?” “Why is adding women to boards so challenging?” “What actions increase the number of women on boards?” and “What can we learn from situations where there are women board members?” In seeking to answer these questions, the authors summarize previously existing research and share the results of their own recent qualitative and quantitative research studies conducted in many different countries. Both “fix the woman” and “fix the society” challenges and solutions are explored. Stories of women who have successfully joined and, in many cases, led boards of directors are shared. It is clear to us, and we believe will be clear to those who read this book, that there is no single program that will lead to gender equality on boards; however we believe that the authors in this volume provide a rich variety of research and well supported suggestions for addressing the challenges. When local cultures are considered and multiple suggestions implemented as appropriate, we are

confident we will, together, increase the number of women on boards throughout the world.

Designing Social Systems in a Changing World

Research isn't just for academics. Human Resource professionals who incorporate it into their organizations see results. This guide demystifies the research process so HRD professionals can use it in their practices. Real-world examples show how research and theory can help solve everyday problems. 10 charts.

Emotion and Conflict

This book constitutes revised selected papers from the two International Workshops on Artificial Intelligence Approaches to the Complexity of Legal Systems, AICOL IV and AICOL V, held in 2013. The first took place as part of the 26th IVR Congress in Belo Horizonte, Brazil, during July 21-27, 2013; the second was held in Bologna as a joint special workshop of JURIX 2013 on December 11, 2013. The 19 papers presented in this volume were carefully reviewed and selected for inclusion in this book. They are organized in topical sections named: social intelligence and legal conceptual models; legal theory, normative systems and software agents; semantic Web technologies, legal ontologies and

argumentation; and crowdsourcing and online dispute resolution (ODR).

Science--the Endless Frontier

Developing your learning skills is one of the best investments you can make. We all need to be lifelong learners now. Whether you are an experienced student or just starting out this book will stimulate, guide and support you. It will make you think about yourself and how your mind learns. And it will change forever the way that you study. Topics include:- motivating yourself and managing your time- taking full advantage of your computer- reading with concentration and understanding- developing flexible note-taking strategies- getting the most from seminars and workshops- making presentations- researching online- handling numbers and charts with confidence- writing clear, well argued assignments- doing yourself justice in exams. Storytelling Organizations

Gold Medal Winner; Philanthropy, Charities, and Nonprofits; 2012 Axiom Business Book Awards Giving 2.0 is the ultimate resource for anyone navigating the seemingly infinite ways one can give. The future of philanthropy is far more than just writing a check, and Giving 2.0 shows how individuals of every age and income

level can harness the power of technology, collaboration, innovation, advocacy, and social entrepreneurship to take their giving to the next level and beyond. Major gifts may dominate headlines, but the majority of giving still comes from individual households—ordinary people with extraordinary generosity. Even in 2009, at a time of deep recession, individual giving averaged almost \$2,000 per household and drove 82% of the \$300 billion donated that same year. Based on her vast experience as a philanthropist, academic, volunteer, and social innovator, Arrillaga-Andreessen shares the most effective techniques she herself pilots and studies and a vast portfolio of lessons learned during her lifetime of giving. Featuring dozens of stories on innovative and powerful methods of how individuals give time, money, and expertise—whether volunteering and fundraising, leveraging technology and social media, starting a giving circle, fund, foundation, or advocacy group, or aspiring to create greater social impact—Giving 2.0 shows readers how they can renew, improve, and expand their giving and reach their fullest potential. A practical, entertaining, and inspiring call to action, Giving 2.0 is an indispensable tool for anyone passionate about creating change in our world.

Implementing Environmental Management Accounting: Status and Challenges

Broken family bonds can be one of the most intense sources of conflict. This book -

which provides vital insights into the dynamics of family and other forms of violence - explores the damage caused to familial and social bonds by escalating feelings of shame during marital quarrels. Theories and research from large-scale conflict, marital dispute and communication processes are reviewed and provide a background for Retzinger's new integrative theory, which focuses on social bonds. The theory is applied to four case studies of marital quarrels in order to advance understanding of the escalation and resolution of conflict. The book includes a description of an intensive case study method for analyzing discourse and provides

Brainy Book of Time and Money

State Policies for Increasing Access to Healthy Foods

Since the publication of the first edition of *Food, Energy, and Society*, the world's natural resources have become even more diminished due to the rapid expansion of the global human population. We are faced with dwindling food supplies in certain geographic areas, increasing pressure on energy resources, and the imminent extinction of many threatened species. In light of these major issues, this third edition presents an updated and expanded analysis on the interdependency of food, energy, water, land, and biological resources. Written by internationally

renowned experts, the book includes new material on livestock production and energy use, the impacts of pesticides on the environment, and the conservation of biodiversity in agricultural, forestry, and marine systems. It also compares the energy inputs of crop production in developing and developed countries, covers the agricultural and environmental issues related to water resources, and details the threat of soil erosion to food and the environment. In addition, the book explores the very timely topics of solar energy, biomass systems, and ethanol production. Offering a startling glimpse at what our planet may become, this edition shows how to achieve the necessary balance between basic human needs and environmental resources and provides potential solutions to the host of problems we face today.

Euler

The philanthropic landscape is changing dramatically as a new generation of wealthy donors seeks to leave its mark on the public sphere. Peter Frumkin reveals in *Strategic Giving* why these donors could benefit from having a comprehensive plan to guide their giving. And with this thoughtful and timely book, he provides the much-needed framework to understand and develop this kind of philanthropic strategy. After listening for years to scores of individual and institutional funders discuss the challenges of giving wisely, Frumkin argues here that contemporary philanthropy requires a thorough rethinking of its underlying logic. Philanthropy

should be seen, he contends, as both a powerful way to meet public needs and a meaningful way to express private beliefs and commitments. He demonstrates that finding a way to simultaneously fulfill both of these functions is crucial to the survival of philanthropy and its potential to support pluralism in society. And he goes on to identify the five essential elements donors must consider when developing a philanthropic strategy—the vehicle through which giving will flow, the way impact will be achieved, the level of engagement and profile sought, the time frame for giving, and the underlying purpose of the gift. Frumkin's point is that donors must understand strategic giving as the integration of these five critical dimensions to giving. Essential reading for donors, researchers, and anyone involved with the world of philanthropy, *Strategic Giving* provides a new basis for understanding philanthropic effectiveness and a promising new way for philanthropy to achieve the legitimacy that has at times eluded it.

Roots and Tubers for the 21st Century

Research Methods in Social Network Analysis

In this book, the editors have drawn together key figures in the field of Evidence-Informed Policy and Practice (EIPP) to introduce its role in informing educational

leadership, with the aim of improving learning and teaching.

Environmental Management Accounting: Informational and Institutional Developments

Violent Emotions

The aim of this volume is to collect and present available data, both published and unpublished, on energy use in agriculture and forestry production. Energy analyses for some sciences such as ecology are not new, but their applications to agriculture started in 1973. These analyses have grown rapidly in number and complexity. This handbook is intended for agriculturalists and others concerned with energy use in crop, livestock, and forestry production.

Handbook of Energy Utilization In Agriculture

Shifting Gears

In this original text/reference, Bela H. Banathy discusses a broad range of design

approaches, models, methods, and tools, together with the theoretical and philosophical bases of social systems design. he explores the existing knowledge bases of systems design; introduces and integrates concepts from other fields that contribute to design thinking and practice; and thoroughly explains how competence in social systems design empowers people to direct their progress and create a truly participative democracy. Based on advanced learning theory and practice, the text's material is enhanced by helpful diagrams that illustrate novel concepts and problem sets that allow readers to apply these concepts.

Giving 2.0

The overriding lesson from history is that most irrigation-based civilizations fail. As we enter the third millennium, the question arises: Will ours be any different?
