KEVLAR LEGIONS

PC Mag

Afghanistan

This supplement provides the definitive treatise on the drow, arguably the games most evocative evil race. Everything readers want to know about drow and their subterranean homeland can be found in this tome.

Byte

Magic Item Compendium

The Secret Teachings of All Ages is perhaps the most comprehensive and complete

esoteric encyclopedia ever written. The sheer scope and ambition of this book are stunning. In this book Manly P. Hall has successfully distilled the essence of more arcane subjects than one would think possible. This book explores the themes underlying ancient mythology, philosophy, and religion. Unrivaled in its beauty and completeness, it distills ancient and modern teachings of nearly 600 experts.

The South American Tour

“The novel that foreshadowed Donald Trump’s authoritarian appeal.”—Salon It Can’t Happen Here is the only one of Sinclair Lewis’s later novels to match the power of *Main Street*, *Babbitt*, and *Arrowsmith*. A cautionary tale about the fragility of democracy, it is an alarming, eerily timeless look at how fascism could take hold in America. Written during the Great Depression, when the country was largely oblivious to Hitler’s aggression, it juxtaposes sharp political satire with the chillingly realistic rise of a president who becomes a dictator to save the nation from welfare cheats, sex, crime, and a liberal press. Called “a message to thinking Americans” by the *Springfield Republican* when it was published in 1935, *It Can’t Happen Here* is a shockingly prescient novel that remains as fresh and contemporary as today’s news. Includes an Introduction by Michael Meyer and an Afterword by Gary Scharnhorst

Bringing the War Home

This supplement for the D & D game presents more than 500 new magic items that no adventurer should be without.

Marine Diesel Basics 1

Philosophy in Sport Made Science in Earnest

Chronicles the best and the worst of Apple Computer's remarkable story.

Hindu Pad-Padashahi

How policing became the major political issue of our time Combining firsthand accounts from activists with the research of scholars and reflections from artists, Policing the Planet traces the global spread of the broken-windows policing strategy, first established in New York City under Police Commissioner William Bratton. It's a doctrine that has vastly broadened police power the world over—to deadly effect. With contributions from #BlackLivesMatter cofounder Patrisse Cullors, Ferguson activist and Law Professor Justin Hansford, Director of New

York-based Communities United for Police Reform Joo-Hyun Kang, poet Martín Espada, and journalist Anjali Kamat, as well as articles from leading scholars Ruth Wilson Gilmore, Robin D. G. Kelley, Naomi Murakawa, Vijay Prashad, and more, *Policing the Planet* describes ongoing struggles from New York to Baltimore to Los Angeles, London, San Juan, San Salvador, and beyond. From the Trade Paperback edition.

Owners of the Map

The Diary of Heinrich Witt

In this first comprehensive comparison of left-wing violence in the United States and West Germany, Jeremy Varon focuses on America's Weather Underground and Germany's Red Army Faction to consider how and why young, middle-class radicals in prosperous democratic societies turned to armed struggle in efforts to overthrow their states. Based on a wealth of primary material, ranging from interviews to FBI reports, this book reconstructs the motivation and ideology of violent organizations active during the 1960s and 1970s. Varon conveys the intense passions of the era--the heat of moral purpose, the depth of Utopian longing, the sense of danger and despair, and the exhilaration over temporary triumphs. Varon's compelling

interpretation of the logic and limits of dissent in democratic societies provides striking insights into the role of militancy in contemporary protest movements and has wide implications for the United States' current "war on terrorism." Varon explores Weatherman and RAF's strong similarities and the reasons why radicals in different settings developed a shared set of values, languages, and strategies. Addressing the relationship of historical memory to political action, Varon demonstrates how Germany's fascist past influenced the brutal and escalating nature of the West German conflict in the 60s and 70s, as well as the reasons why left-wing violence dropped sharply in the United States during the 1970s. Bringing the War Home is a fascinating account of why violence develops within social movements, how states can respond to radical dissent and forms of terror, how the rational and irrational can combine in political movements, and finally how moral outrage and militancy can play both constructive and destructive roles in efforts at social change.

Twenty Thousand Leagues Under the Sea

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which

feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Secretaries of War and Secretaries of the Army

First published in 2003, *Terrorist Recognition Handbook: A Practitioner's Manual for Predicting and Identifying Terrorist Activities* remains one of the only books available to provide detailed information on terrorist methodology revealing terrorist motivation, organizational structure, planning, financing, and operational tactics to carry out attacks.

The Marine Electrical and Electronics Bible

On March 5th, 2007, a car bomb was exploded on al-Mutanabbi Street in Baghdad—the historic center of Baghdad bookselling—wounding more than 100 people and killing more than 30. This anthology begins with a historical introduction to al-Mutanabbi Street and includes the writing of Iraqis as well as a wide swath of international poets and writers who were outraged by this attack. Exploring the question *Where does al-Mutanabbi Street start?*, the book looks at both communities and nations, seeking to show the commonality between a small

street in Baghdad and other individual cultural centers and explain why this attack was an attack on us all. Chapters examine al-Mutanabbi Street as a place for the free exchange of ideas, a place that has long offered its sanctuary to the complete spectrum of Iraqi voices, and a place where the roots of democracy took hold many hundreds of years ago.

Drow of the Underdark

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

Plain and Ornamental Forging

The sixteen essays in this volume reflect a wide range of research concerning methods for metals conservation, particularly in respect to ancient and historic objects. The variety of issues discussed includes considerations in the cleaning of ancient bronze vessels; the processes involved in bronze casting, finishing, patination, and corrosion; studies of manufacturing techniques of gold objects in ancient African and medieval European metalworking; techniques of mercury

gilding in the 18th century; an investigation of patina in the classification of bronze surfaces from land and lake environments; an examination of bronze objects from the Benin Kingdom, Nigeria; the history of restoration of the Marcus Aurelius monument in Rome; the corrosion of iron in architecture; and applications of radiographic tomography to the study of metal objects.

The East India Vade-Mecum

Introduces the basic principles of geography as they apply to the Hawaiian Islands, and provides maps and information about Hawaiian geology, ecology, people, and economy.

Introduction to Business

Kevlar Legions: The Transformation of the U.S. Army, 1989-2005, argues that from 1989 through 2005 the United States Army attempted, and largely achieved, a centrally directed and institutionally driven transformation relevant to ground warfare that exploited Information Age technology, adapted to post-Cold War strategic circumstances, and integrated into parallel Department of Defense efforts. The process not only modernized equipment, it also substantially altered doctrine, organization, training, administrative and logistical practices, and the

service culture. The resultant digitized expeditionary Army was as different from the late Cold War Army as the late Cold War Army was from that of the early Cold War or from the mobilization-based Armies of World Wars I and II. Kevlar Legions further contends that the digitized expeditionary Army has withstood the test of combat, performing superbly with respect to deployment and high-end conventional combat and capably with respect to low-intensity conflict.

Social England Under the Regency

The diary of Heinrich Witt (1799-1892) is the most extensive private diary written in Latin America known to us today. Written in English by a German migrant who lived in Lima, it is a unique source for the history of Peru, and for international trade and migration.

Policing the Planet

“Titanic meets Tom Clancy technology” in this national-best-selling account of the SS Central America’s wreckage and discovery (People). September 1875. With nearly six hundred passengers returning from the California Gold Rush, the side-wheel steamer SS Central America encountered a violent storm and sank two hundred miles off the Carolina coast. More than four hundred lives and twenty-one

tons of gold were lost. It was a tragedy lost in legend for more than a century—until a brilliant young engineer named Tommy Thompson set out to find the wreck. Driven by scientific curiosity and resentful of the term “treasure hunt,” Thompson searched the deep-ocean floor using historical accounts, cutting-edge sonar technology, and an underwater robot of his own design. Navigating greedy investors, impatient crewmembers, and a competing salvage team, Thompson finally located the wreck in 1989 and sailed into Norfolk with her recovered treasure: gold coins, bars, nuggets, and dust, plus steamer trunks filled with period clothes, newspapers, books, and journals. A great American adventure story, *Ship of Gold in the Deep Blue Sea* is also a fascinating account of the science, technology, and engineering that opened Earth’s final frontier, providing “white-knuckle reading, as exciting as anything . . . in *The Perfect Storm*” (Los Angeles Times Book Review). “A complex, bittersweet history of two centuries of American entrepreneurship, linked by the mad quest for gold.” —Entertainment Weekly “A ripping true tale of danger and discovery at sea.” —The Washington Post “What a yarn! . . . If you sign on for the cruise, go in knowing that you’re going to miss meals and a lot of sleep.” —Newsweek

Homeland

CMH Publication 70-30. Edited by Frank N. Schubert and TheresaL. Kraus.
Discusses the United States Army's role in the Persian Gulf War from August 1990

to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

Ancient & Historic Metals

The Secret Teachings of All Ages

The Sailor's Word-book

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Arthur Young's Travels in France

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Al-Mutanabbi Street Starts Here

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.

Apple Confidential 2.0

Facts and Figures Relating to Vancouver Island and British Columbia

On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? Owners of the Map provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai

capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of the Map* advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.

The Disappearing Spoon

One of four books about her travels, *The South American Tour* detailed Annie Smith Peck's adventures mountaineering in South America. One of the only female adventurers of her time, Peck famously planted a "Women's Vote" banner on the peak of Mt. Coropuna in Peru.

Student Atlas of Hawaii

Foreword: The Center Of Military History first published *Secretaries of War and Secretaries of the Army: Portraits & biographical sketches* in 1981 during the bicentennial of the American Revolution and the US Constitution. The book

reflected two major themes of the Army's commemoration: the role of the soldier-statesmen of the revolution in the creation of our government and the constitutional principle of civilian control of the military. This updated printing continues to recognize those twin legacies. The first Secretaries of War were prominent members of the soldier-statesmen generation, and they and their successors have embodied the Founding Fathers' intent to ensure civilian leadership in military affairs. Secretaries of War and Secretaries of the Army is relevant to students and scholars in such diverse fields as military history, political science, American studies, and art and portraiture. We trust that this new edition will continue to be useful as background for the nomination of Army secretaries, as a handbook for the congressional armed services committees, and as a reference book throughout the Army. It has been a valuable source of information for libraries, and we hope that its distinctive perspective on the history of the Army will interest a new generation of the American public as well.

Terrorist Recognition Handbook

In Cory Doctorow's wildly successful *Little Brother*, young Marcus Yallow was arbitrarily detained and brutalized by the government in the wake of a terrorist attack on San Francisco—an experience that led him to become a leader of the whole movement of technologically clued-in teenagers, fighting back against the tyrannical security state. A few years later, California's economy collapses, but

Marcus's hacktivist past lands him a job as webmaster for a crusading politician who promises reform. Soon his former nemesis Masha emerges from the political underground to gift him with a thumbdrive containing a Wikileaks-style cable-dump of hard evidence of corporate and governmental perfidy. It's incendiary stuff—and if Masha goes missing, Marcus is supposed to release it to the world. Then Marcus sees Masha being kidnapped by the same government agents who detained and tortured Marcus years earlier. Marcus can leak the archive Masha gave him—but he can't admit to being the leaker, because that will cost his employer the election. He's surrounded by friends who remember what he did a few years ago and regard him as a hacker hero. He can't even attend a demonstration without being dragged onstage and handed a mike. He's not at all sure that just dumping the archive onto the Internet, before he's gone through its millions of words, is the right thing to do. Meanwhile, people are beginning to shadow him, people who look like they're used to inflicting pain until they get the answers they want. Fast-moving, passionate, and as current as next week, *Homeland* is every bit the equal of *Little Brother*—a paean to activism, to courage, to the drive to make the world a better place. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Whirlwind War

In Ispite of the fact that the fwrst tss6vfer rapidly Yfecfedi'fig from us further and

further, the indefatigable exertions of a band of Maratha scholars led by Messrs 'Rajwade and others have thrown such a flood of new light on the history of the Hindu Empire Of Maharashtra that the "salient features of that great DEGREES" of movement have become far more clearly discernible to us than they were to those who were constrained for want of better means to view the history through the distorted and dim glasses of foreign scholarship aloft. "But as the monumental material, consisting of Estate records, documents, original letters and contemporary narratives that the Maratha scholars have discovered and laid under contribution, is to a very great extent confined to the Marathi language and as no attempt excepting that of Justice Ranade, has been made to rewrite, at least concisely, the history of Maharashtra in the light that these valuable researches throw on it, in a language that would place before the Non-Maratha scholars

It Can't Happen Here

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work

has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Principles of Geology

'This book provides an excellent overview of more than a decade of transformation in a forest landscape where the interests of local people, extractive industries and globally important biodiversity are in conflict. The studies assembled here teach us that plans and strategies are fine but, in the real world of the forest frontier, conservation must be based upon negotiation, social learning and an ability to muddle through.' Jeffrey Sayer, senior scientific adviser, Forest Conservation Programme IUCN - International Union for of Nature The devolution of control over the world's forests from national or state and provincial level governments to local control is an ongoing global trend that deeply affects all aspects of forest management, conservation of biodiversity, control over resources, wealth distribution and livelihoods. This powerful new book from leading experts provides an in-depth account of how trends towards increased local governance are shifting control over natural resource management from the state to local societies, and the implications of this control for social justice and the environment. The book is based on ten years of work by a team of researchers in Malinau, Indonesian

Borneo, one of the world's richest forest areas. The first part of the book sets the larger context of decentralization's impact on power struggles between the state and society. The authors then cover in detail how the devolution process has occurred in Malinau, the policy context, struggles and conflicts and how Malinau has organized itself. The third part of the book looks at the broader issues of property relations, conflict, local governance and political participation associated with decentralization in Malinau. Importantly, it draws out the salient points for other international contexts including the important determination that 'local political alliances', especially among ethnic minorities, are taking on greater prominence and creating new opportunities to influence forest policy in the world's richest forests from the ground up. This is top-level research for academics and professionals working on forestry, natural resource management, policy and resource economics worldwide. Published with CIFOR

Ship of Gold in the Deep Blue Sea

The Golden Wheel Dream-book and Fortune-teller

The catchment area of the Mekong River and its tributaries extends from China, through Burma/Myanmar, Thailand, Laos, Cambodia and to Vietnam. The water

resources of the Mekong region - from the Irrawaddy and Nu-Salween in the west, across the Chao Phraya to the Lancang-Mekong and Red River in the east- are increasingly contested. Governments, companies, and banks are driving new investments in roads, dams, diversions, irrigation schemes, navigation facilities, power plants and other emblems of conventional 'development'. Their plans and interventions should provide some benefits, but also pose multiple burdens and risks to millions of people dependent on wetlands, floodplains and aquatic resources, in particular, the wild capture fisheries of rivers and lakes. This book examines how large-scale projects are being proposed, justified, and built. How are such projects contested and how do specific governance regimes influence decision making? The book also highlights the emergence of new actors, rights and trade-off debates, and the social and environmental consequences of 'water resources development'. This book shows how diverse, and often antagonistic, ideologies and interests are contesting for legitimacy. It argues that the distribution of decision-making, political, and discursive power influences how the waterscapes of the region will ultimately look and how benefits, costs and risks will be distributed. These issues are crucial for the transformation of waterscapes and the prospects for democratizing water governance in the Mekong region. The book is part of the action-research of the M-POWER (Mekong Program on Water, Environment and Resilience) knowledge network. Published with IFAD, CGIAR Challenge Program on Water & Food, M-POWER, Project ECHL-EAU and HEINRICH BOLL STIFTUNG

The Decentralization of Forest Governance

"The Golden Wheel Dream-book and Fortune-teller" by Felix Fontaine. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.
