Brough Superior

George Brough started building motorcycles shortly after the First World War. The machines were named Brough Superior both to distinguish them from his father's Brough machines and to denote the highest levels of performance and quality of manufacture. Throughout the 1920s and 1930s, the name Brough Superior was synonymous with the very best in motorcycle design. The machines gained fame in the hands of riders such as Bert le Vack, Eric Fernihough, Noel Pope and, of course, T. E. Lawrence 'Lawrence of Arabia'. This book documents the full story of Brough and Brough Superior from the early years of the twentieth century through to the end of production in the Second World War, and post-war attempts at revival.

The Douglas Motorcycle

This is the story of the Japanese motorcycle industry which started from scratch after World War II and grew to make most of the motorcycles in existence today. It is told in a decade-by-decade narrative treatment commencing in the early 1950s and running through to the 1990s.

The Iron Redskin

A traditional manuscript paper for Japanese writing is called Genkouyoushi. Compared to others, this notebook may be used with any type of writing instrument (pencil, pen or ink brush) with or without a shitajiki (under-sheet) and each template square allows for correct spacing of characters to fit one kanji, hiragana or katakana. It is a very perfect tool to learn writing in Japanese and it is especially useful to students for practice or formal assignments. Each page of this notebook is printed with vertical columns of squares, with each square designed to accommodate a single Japanese character or punctuation mark.

Miss Ruffles Inherits Everything

The building of a vintage Indian Chief motorcycle is more than the restoration of a bike—it's the resurrection of a dream. Rebuilding the Indian chronicles one man's journey through the fearful expanse of midlife in a quest for peace, parts, and a happy second fatherhood. Fred Haefele was a writer who couldn't get his book published, an arborist whose precarious livelihood might just kill him, and an expectant father for the first time in over twenty years. He was in a rut, until he purchased a box of parts not so euphemistically referred to as a "basket case" and tackled the restoration of an Indian Chief motorcycle. With limited mechanical skills, one foot in the money pit, and a colorful cast of local experts, Haefele takes us down the rocky road of restoration to the headlong, heart-thrilling rush of open highway on his gleaming midnight-blue Millennium Flyer.

In a world where it is becoming increasingly difficult to maintain a dominance in any sporting discipline, Fogarty has won the World Superbike Championship no fewer than four times including back-to-back wins. Carl has come a long way since the early 1980s when he used to travel to circuits as far away as Finland in a clapped-out old horsebox. But those early days were also wild and enjoyable times. Tales of hell-raising abound: staggering home at five in the morning before the Isle of Man TT was clearly not the best preparation for one of the most dangerous races in the world. This autobiography tells his tale of a working class Lancashire boy made good in one of the most dangerous and glamorous of sports.

One of our most eminent Lincoln scholars, winner of a Lincoln Prize for his Lincoln at Cooper Union, examines the four months between Lincoln's election and inauguration, when the president-elect made the most important decision of his coming presidency -- there would be no compromise on slavery or secession of the slaveholding states, even at the cost of civil war. Abraham Lincoln first demonstrated his determination and leadership in the Great Secession Winter -- the four months between his election in November 1860 and his inauguration in March 1861 -- when he rejected compromises urged on him by Republicans and Democrats, Northerners and Southerners, that might have preserved the Union a little longer but would have enshrined slavery for generations. Though Lincoln has

been criticized by many historians for failing to appreciate the severity of the secession crisis that greeted his victory, Harold Holzer shows that the president-elect waged a shrewd and complex campaign to prevent the expansion of slavery while vainly trying to limit secession to a few Deep South states. During this most dangerous White House transition in American history, the country had two presidents: one powerless (the president-elect, possessing no constitutional authority), the other paralyzed (the incumbent who refused to act). Through limited, brilliantly timed and crafted public statements, determined private letters, tough political pressure, and personal persuasion, Lincoln guaranteed the integrity of the American political process of majority rule, sounded the death knell of slavery, and transformed not only his own image but that of the presidency, even while making inevitable the war that would be necessary to make these achievements permanent. Lincoln President-Elect is the first book to concentrate on Lincoln's public stance and private agony during these months and on the momentous consequences when he first demonstrated his determination and leadership. Holzer recasts Lincoln from an isolated prairie politician yet to establish his greatness, to a skillful shaper of men and opinion and an immovable friend of freedom at a decisive moment when allegiance to the founding credo "all men are created equal" might well have been sacrificed.

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

For nearly 80 years, shaft-drive boxer twins have traditionally formed the backbone of the BMW motorcycle line-up. For many enthusiasts of the Bavarian marque the classic BMW twin was the R90S of 1973-76. Over the decades, successive generations of durable machines - including the R100S, fully-faired R100RS, four-cylinder K-series, high-performance R1100RS and an entire family of touring and sporting models ranging from 850 to 1200cc - would ensure the BMW boxer twins a place in the Haynes "Great Bikes" series. This book covers: historical context, racing, the wartime R75 and R69S; the "75" series which enabled BMW to compete with the high-performance Japanese machines; the R90S, the "76" and Superbike performance; the R100RS, the "77" and the touring R100RT; smaller twins, smaller potential; the R89G/S, including a Paris-Dakar version; rationalization of the boxer range, and the new twins that included four-valve heads and electronic engine management; and technical specifications from 1969 to 2003.

Rich and flamboyant Honeybelle Hensley, the most colorful character in Mule Stop, Texas, dies a suspicious death and enrages the whole town by leaving her worldly fortune to the most undeserving recipient-her dog. The incorrigible Miss Ruffles is a Texas Cattle Cur, not a cuddly lapdog, and when Honeybelle was alive, Miss Ruffles liked nothing better than digging up Honeybelle's famous rose garden after breakfast, chasing off the UPS man before lunch and terrorizing the many gentleman callers who came knocking at cocktail hour. But now Miss Ruffles is in danger, and it's up to Sunny McKillip, the unwilling dogsitter, to keep her safe. Sunny is new to Texas, and sometimes she feels as if she's fallen into an alien world. If it isn't the pistol-packing football fans and the sweet-talking, yet ruthless ladies of the garden club who confound her, it's the rowdy rodeo hounds and the

tobacco-spitting curmudgeon at Critter Control who have her buffaloed. With a killer on the loose and a cowboy lawyer keeping a suspicious eye on her every move, Sunny needs all the help she can get understanding how Texans think. There's more to Honeybelle's death than meets this Yankee's eye, and Sunny has Miss Ruffles to protect, too. It's a bucking bull ride of an adventure for Sunny, and if she's not careful she might just get killed . . . or her heart lassoed. in Nancy Martin's Miss Ruffles Inherits Everything.

Rave Till the Grave

Indian is a magic name in motorcycling. Its mention brings to mind machines with flamboyant bold striping, lithe of appearance and, seemingly even at rest, poised for flight. There were over two dozen makes of motorcycle on the market during the heyday of motorcycling in the United States. Yet in the minds of many enthusiasts, none of these quite approached the verve, style, artistic functionality of design or handling abilities of the Indian. The Iron Redskin is the story of the most loved of American motorcycles. It is a vast work that has taken many thousands of hours to compile, yet it is one of the most readable and interesting motorcycle histories ever to be published.

Whether it's a big-bore, high-end custom sportbike you're after, or a naked, bare knuckles streetfighting drag racer, this book has the goods for getting you there. In three different scenarios, the nation's top builders give blow-by-blow instructions for completely rebuilding three popular streetbikes -- from performance modifications and exhaust systems to flawless finishes and detail work. Focusing on highly customized Hayabusa drag bikes, including a slammed and lowered Suzuki GSX1300R Hayabusa, John Dantzler of the Charlotte, North Carolina, shop Two Wheel Customs outlines the suspension and engine modifications that the serious street and quarter-mile racer can make. He takes a salvaged, late-model four-cylinder street machine and transforms it into the kind of machine that both professional stunt riders and corner-carving enthusiasts favor. Next, author Mike Seate covers the details on constructing and installing popular modifications -- everything from engine crash guards and wheelie bars to motocross-style handlebars and bikini fairings -- while stunt riders and streetfighter builders from the United States and Europe weigh in with tips and advice. Last but not least, the builders at Wisconsin's Patrick's Performance and South Carolina's Coastal

Motorcycles provide a step-by-step account of the construction of two high-end custom sportbikes -- transforming a Yamaha YZF R-1 and a Suzuki GSX-R 1000 into the kind of machines that are eye-popping everywhere-on the streets or on the motorcycle show circuit.
