Carlson, provides a concrete, practical roadmap for the implementation of experiments and controlled observation using human participants. Ideal for those with little or no practical experience in research methodology, the text covers both conceptual and practical issues that are critical to implementing an experiment. The book is organized to follow a standard process in experiment-based research, covering such issues as potential ethical problems, risks to validity, experimental setup, running a study, and concluding a study.

No branch of European law has been as subject to expansion and change as competition law. Between the enormous forces of globalisation, technology, and EU enlargement, the Commission and national competition authorities have been compelled to keep rethinking their practices and procedures and issuing new regulations. Now, in the wake of its highly acclaimed predecessors, the new Third Edition of European Competition Law offers the practitioner everything required to act in accordance with the latest developments in the field. Along with the thorough guide to continuing practice that its readers have come to expect, European Competition Law in its Third Edition fully covers such areas as the following: the Commission's new assessment of distribution practices and vertical restraints, in particular the block exemptions granted by Regulations 2790/1999 and 1400/2002; procedure before national competition authorities and national courts for enforcement of European rules under Regulation 1/2003; the new Merger Control Regulation in force as of 1 May 2004; the new Transfer of Technology Regulation; and, the increased fines for hard-core cartel practices or abuse of dominant market position. The Third Edition is remarkable in that it actually previews the substantive and procedural rules that will be coming into effect during 2004 and subsequent years. And, like prior editions, the work has no peer in its coverage of past administrative practice and the case

law of the Court of Justice. All in all, European Competition Law, Third Edition, will be of immeasurable value to practitioners who need to keep informed about how EC competition laws are applied, so they can continue to render practical, meaningful advice to firms whose agreements, transactions and conduct in the marketplace are governed by competition rules.

The Oxford Guide to Middle High German is the most

comprehensive self-contained treatment of Middle High German available in English. It covers the language, literature, history, and culture of German in the period from 1050 to 1350 and is designed for entry-level readers, advanced study, teaching, and reference. The book includes a large sample of texts, not only from Classical works such as Erec, the Nibelungenlied, Parzival, and Tristan, but also from mystical writing, chronicles, and legal documents; the selection represents all major dialects and the full time span of the period. The volume begins with an introduction that defines Middle High German linguistically, geographically, and chronologically. Chapter 2 then provides a detailed exploration of the grammar, covering sounds and spelling, inflectional morphology, syntax, and lexis. Each section in this chapter begins with a summary of the main points, followed by detailed paragraphs for in-depth study and reference. Chapter 3 deals with versification, discussing metre, rhyme, lines of verse in context, and verse forms, and includes practical tips for scansion. Chapter 4 offers an account of the political and social structures of Medieval Germany and a survey of the principal types of texts that originated in the period. The final chapter of the book comprises over forty texts, each placed in context and provided with explanatory footnotes; the first two texts, to be taken together with the introductory grammar sections, are aimed at newcomers. A glossary provides full coverage of the vocabulary appearing in the texts and throughout the book.
