Run the Way You Were Born to Run Every runner wants a smooth, light, powerful, and resilient stride. But there isn't one ideal form all runners should try to emulate. Instead, research and experience show that people can run effectively in a wide variety of patterns with some universal elements. In lively, accessible prose, author Jonathan Beverly details his search for common ground among physical therapists, podiatrists, biomechanics researchers, and coaches, and reveals how individual runners can apply those principles and improve their performance, avoid injury,

and enhance their enjoyment on the run. With specific, illustrated exercises that show how to counteract tight muscles from excessive sitting, improve limited arm mobility from hunching over electronic devices, strengthen your feet for better balance, and improve speed by lengthening your stride, *Runner's World Your Best Stride* is an approachable guide to human movement and a practical tool for improved running performance.

Runner's World Complete Book of Beginning Running

The undisputed classic of running novels and one of the most beloved sports books ever published, *Once a Runner* tells the story of an athlete's dreams amid the turmoil of the 60s and the Vietnam war. Inspired by the author's experience as a collegiate champion, the novel follows Quenton Cassidy, a competitive runner at fictional Southeastern University whose lifelong dream is to run a four-minute mile. He is less than a second away when the turmoil of the Vietnam War era intrudes into the staid recesses of his school's athletic department. After he becomes involved in an athletes' protest, Cassidy is suspended from his track team. Under the tutelage of his friend and mentor, Bruce Denton, a graduate student and former Olympic gold medalist, Cassidy gives up his scholarship, his girlfriend, and possibly his future to withdraw to a monastic retreat in the countryside and begin training for the race of his life against the greatest miler in history. A rare insider's account of the incredibly intense lives of elite distance runners, *Once a Runner* is an inspiring, funny, and spot-on tale of one individual's quest to become a champion.

Peter Sagal, the host of NPR's *Wait Wait Don't Tell Me!* and a popular columnist for *Runner's World*, shares "commentary and reflection about running with a deeply felt personal story, this book is winning, smart, honest, and affecting. Whether you are a runner or not, it will move you" (Susan Orlean). On the verge of turning forty, Peter Sagal—brainiac Harvard grad, short bald Jew with a disposition towards heft, and a sedentary star of public radio—started running seriously. And much to his own surprise, he kept going, faster and further, running fourteen marathons and logging tens of thousands of miles on roads, sidewalks, paths, and trails all over

the United States and the world, including the 2013 Boston Marathon, where he crossed the finish line moments before the bombings. In *The Incomplete Book of Running*, Sagal reflects on the trails, tracks, and routes he's traveled, from the humorous absurdity of running charity races in his underwear—in St. Louis, in February—or attempting to “quiet his colon” on runs around his neighborhood—to the experience of running as a guide to visually impaired runners, and the triumphant post-bombing running of the Boston Marathon in 2014. With humor and humanity, Sagal also writes about the emotional experience of running, body image, the similarities between endurance sports and sadomasochism, the legacy of running as passed down from parent to child, and the odd but extraordinary bonds created between strangers and friends. The result is “a brilliant book about running...What Peter runs toward is strength, understanding, endurance, acceptance, faith, hope, and charity” (P.J. O'Rourke).

The Runner's World Big Book of Marathon and Half-Marathon Training

A leadership book by former Navy SEAL and New York Times bestselling author Mark Divine, *Staring Down the Wolf* focuses on harnessing the principles of purpose and discipline in life to achieve success. What does it take to command a team of elite individuals? It requires a commitment to seven key principles: Courage, Trust, Respect, Growth, Excellence, Resiliency, and Alignment. All of these are present in an elite team which commits to them deeply in order to forge the character worthy of uncommon success. Retired Navy SEAL Commander, entrepreneur and New York Times bestselling author Mark Divine (founder of SEALFIT, NavySeal.com, and Unbeatable Mind) reveals what makes the culture of an elite team, and how to get your own team to commit to serve at an elite level. Using principles he learned on the battlefield, training SEALs, and in his own entrepreneurial and growth company ventures, Mark knows what it is to lead elite teams, and how easily the team can fail by breaching these commitments. Elite teams challenge themselves to step up everyday to do the uncommon. Developing the principles yourself and aligning your team around these commitments will allow you to thrive in VUCA (volatility, uncertainty, complexity, ambiguity) environments, no matter your background or leadership experience. Drawing from his twenty years leading SEALs, and twenty five years of success and failure in entrepreneurship and ten years coaching corporate clients, Mark Divine shares a very unique perspective that will allow you to unlock the tremendous power of your team. “Mark Divine has a gift for creating highly effective dynamic teams. Mark interleaves key aspects of leadership, mental toughness, resiliency and cultivating higher plains of existence into a foundational concept of being an authentic ‘Leader of leaders.’ This book is indispensable for anyone looking to lead, build and foster an elite culture.” –Mike Magaraci, retired Force Master Chief of Naval Special Warfare “From his time as a Commander in the SEAL Teams to building several successful multimillion dollar businesses, Mark Divine is an authority on building elite teams and leaders capable of tapping their fullest potential.” –David Goggins, Retired Navy SEAL, author of New York Times Bestseller *Can't Hurt Me* “To grow to your fullest capacity in your life and as a leader, we need to challenge ourselves. There's no one I know who's challenged himself more than Mark Divine. He's the perfect visionary to help get you out of your comfort zone and shattering the status quo.” –Joe De Sena, Founder and CEO of Spartan

Renowned running coach Budd Coates presents Runner's World Running on Air, a revolutionary yet simple training method based on rhythmic breathing to help runners at all experience levels improve their performance, prevent injury, and experience the joy of running. Validating his method through a mix of accessible science, Eastern philosophy, and the experiences of test subjects, Coates shows readers how focusing on their breathing brings their minds and bodies into harmony and helps them run stronger, faster, and more comfortably. Rhythmic breathing increases lung volume; improves awareness and control; helps prevent injury and side stitches; improves running for those with asthma; allows runners to quickly set a pace for quality training and racing; and helps athletes manage muscle cramps. This book reviews the basics of rhythmic breathing, teaching readers how to perform it while walking and, eventually, while running. Weeklong sample schedules from different programs shows readers how to apply the rhythmic breathing scale to any workout. Coates also touches on the importance of stretching, cross-training, and core training and provides detailed training plans and schedules.

Flexibility exercises will keep them supple. And alternative endurance activities will help heal existing injuries while preventing future ones. In Runner's World Guide to Cross-Training, Matt Fitzgerald--seasoned runner, triathlete, sports and fitness journalist, and online coach to runners and triathletes--tells you everything you need to know about the very best cross-training exercises for runners, from the equipment you'll have to buy to the techniques you'll have to master. In addition to strength training and flexibility exercises, he recommends the six best non-impact cardiovascular activities for runners: pool running, elliptical training, bicycling, inline skating, swimming, and cross-country skiing. The book shows how to integrate running and cross-training, and features five complete sample programs that will train you to compete in a basic 10-K, advanced 10-K/half marathon, basic marathon, advanced marathon, and triathlon. Until now, there hasn't been a credible cross-training book designed especially for runners. With the imprimatur of Runner's World magazine-recognized everywhere as the most authoritative source of information on the sport--this excellent guide will be welcomed by runners at every level as the book to consult for advice on this vital topic.
