Practical Guide to Data Migration with SAP S/4HANA Migration Cockpit

Practical Guide to SAP Core Data Services (CDS)

This practical book describes the key operations of ARIS Toolset - the market leading Business Process Modelling Tool. Based on his experience of using ARIS in British Telecommunications plc, the author describes practical ways of using the tool. Using screen shots and plenty of practical examples, Rob Davis shows how ARIS can be used to model business processes. Throughout the book Davis provides readers with tips and short-cuts, enabling users to start modelling quickly and effectively. He also provides insights into the ARIS concepts, and tells readers about the benefits and trade-offs of using the tool in alternative ways. Unlike other books, this practical guide tackles issues found in real projects.

The SAP Material Master - a Practical Guide

Dive into this best-selling guide on SAP Material Master! Walk through basic concepts on how to tailor

the SAP Material Master to your production environment, as well as learn detailed information on material master settings and their impact. This book provides the opportunity for readers to better understand their unique environment and how to make the SAP Material Master work for them. Veteran SAP Materials Management (MM) expert Matthew Johnson provides best practices for how to approach common scenarios, and offers cost-saving tips. Find out why planning is the most important (and often overlooked) aspect of understanding the SAP Material Master. Review how material master settings impact FI/CO and other SAP modules. This second edition incorporates feedback from first-edition readers and solution updates, along with a new section on subcontracting. By using practical examples, tips, and screenshots, the author brings readers up to speed on best practices for optimizing use of the SAP Material Master. - Fundamental SAP Material Master concepts - How settings impact other modules in SAP - Cost-effective procurement and planning techniques - Inventory and quality management best practices

A Practical Guide to SAP S/4HANA Financial Accounting

Pocket-sized for portability, this handbook offers quick access to vital information for the management of high-risk obstetric patients. An easy-to-read outline format with numerous tables shows current guidelines on evaluation, fetal monitoring, and medication. Separate chapters address isoimmunization in pregnancy, venous thromboembolism, group B

Download Ebook Sap Cs Practical Guide

streptococcal infections and prophylactic antibiotic treatment, and much more! This is an ideal resource for quick reference or exam review. Offers quick access to vital information to help initiate patient care management in acute obstetric cases Features key technologies and protocols in patient management Includes chapters on isoimmunization in pregnancy and PUBS, group B streptococcal infections and prophylactic antibiotic treatment, how to identify the probable cause of infant death and address the mother's emotional state, and much more Includes new information on current studies and technological advances throughout Features a separate chapter on Venous Thromboembolism Spanish version also available, ISBN: 84-8174-654-1

Utilize the power of SQL queries to bring Business Intelligence to your small to medium-sized business with this book and eBook.

A Practical Guide to SAP NetWeaver Business Warehouse (BW) 7.0

The Athenæum

Based on: A practical guide to SAP NetWeaver Business Warehouse (BW) 7.0 / Bharat Patel, Amol Palekar, Shreekant Shiralkar. 2010.

SAP ABAP List Viewer (ALV) - A Practical

Guide for ABAP Developers

If you work in a company that uses SAP or other non-SAP ERP systems and are looking at migrating to the latest digital core from SAP, whether the cloud or on-premise edition, then this book is for you! Explore your options for transitioning to SAP S/4HANA. Walk in detail through the phases of a data migration project using SAP Activate methodology. Identify SAP rapid data migration best practices for SAP S/4HANA with SAP Data Services. Learn about methods for migrating data to a new SAP implementation scenario, as well as the SAP Data Services architecture that deals with the process of extraction, transformation, and load (ETL) of data. Examine the steps required to execute the migration within the ETL stages and how SAP Data Services can be extended to meet additional migration needs. Take a deep dive into SAP S/4HANA migration cockpit and SAP S/4HANA migration object modeler. Walk through the steps required for migrating data from source systems to SAP S/4HANA (on-premise or cloud edition) using the preconfigured data migration objects delivered by SAP. Delve into the process of creating a migration project and generating the upload template, as well as the steps for uploading and validating the data, including error handling. Review the various migration options and tools available for migrating your legacy data to SAP S/4HANA (on-premise or cloud edition). - Data migration scenarios and tools for moving data to S/4HANA - Plan an S/4HANA data migration using SAP Activate methodology - Step-by-step guide for using S/4HANA migration cockpit and S/4HANA migration

object modeler - Evaluate S/4HANA migration tools

Enhancing Supplier Relationship Management Using SAP SRM

Core Data Services (CDS) is SAP's method of defining persistent data models in the database layer. CDS is a key piece of the SAP HANA landscape, speeding up data retrieval by pushing database processing to the database engine. This books provides a practical introduction to the SQL-based functionality and methods. Learn how to use SAP HANA Studio to utilize perspectives to create objects in the SAP HANA database, including the SAP HANA development perspective. Use syntax to create non-CDS database artifacts via SAP HANA Studio development perspective using SAP HANA XS Classic. Explore CDS artifacts, how to use SAP HANA XS to define an artifact, and dive into a detailed example of how to create objects using a CDS concept. Learn how to create CDS objects using SAP HANA web-based development workbench, SAP Web IDE for SAP HANA, and SAP HANA Studio ABAP Workbench. Explore two methods to extract data from CDS views using ABAP. - Get an introduction to CDS and SAP HANA Studio - Create CDS views and code new structures in ABAP - Use templates, associations, and annotations - Explore select clauses and aggregate functions

Mastering SQL Queries for SAP Business One

This comprehensive guide uses a case-study

approach to teach consultants how to deliver fast and successful SAP SRM implementations. The book is based on SAP SRM 2007 and SAP SRM 5.0, but is also compatible with version 4.0. Explore the problems faced by consultants during an implementation from the perspective of the transitioning roles assumed over the course of the project. Beginning with your role as a business consultant in the blueprint phase, the book progresses through to your role as a techno-functional expert during the realization stage. This approach helps you anticipate challenges and gives you the tools to handle them. Going beyond the standard SAP SRM scenarios, this book gives you practical tips for enabling complex customer requirements by leveraging SAP NetWeaver and SAP Business Suite applications. You can also use this reference as a troubleshooting guide to quickly resolve potentially costly implementation challenges. If you need practical direction for your SAP SRM implementation, then this book is ideal for you.

Practical Guide to Auditing SAP Systems

Mechanic's and Student's Guide in the Designing and Construction of General Gearing as Eccentrics, Screws, Toothed Wheels, Etc

Configuring SAP ERP Sales and Distribution

SAP R/3 Plant Maintenance offers a clear introduction to this small but sophisticated component and provides a highly practical guide to implementing PM. Beginning with an examination of the key business processes underlying PM functionality, the book goes on to cover all the crucial aspects of maintenance planning and execution in R/3. Particular attention is given to integrating plant maintenance with a company's natural process flow.

Practical Guide to IDoc Development for SAP

This highly practical handbook is an exhaustive treatment of eddy covariance measurement that will be of keen interest to scientists who are not necessarily specialists in micrometeorology. The chapters cover measuring fluxes using eddy covariance technique, from the tower installation and system dimensioning to data collection, correction and analysis. With a state-of-the-art perspective, the authors examine the latest techniques and address the most up-to-date methods for data processing and quality control. The chapters provide answers to data treatment problems including data filtering, footprint analysis, data gap filling, uncertainty evaluation, and flux separation, among others. The authors cover the application of measurement techniques in different ecosystems such as forest, crops, grassland, wetland, lakes and rivers, and urban areas, highlighting peculiarities, specific practices and methods to be considered. The book also covers what to do when you have all your data, summarizing the objectives of

a database as well as using case studies of the CarboEurope and FLUXNET databases to demonstrate the way they should be maintained and managed. Policies for data use, exchange and publication are also discussed and proposed. This one compendium is a valuable source of information on eddy covariance measurement that allows readers to make rational and relevant choices in positioning, dimensioning, installing and maintaining an eddy covariance site; collecting, treating, correcting and analyzing eddy covariance data; and scaling up eddy flux measurements to annual scale and evaluating their uncertainty.

Consultant's Guide to SAP SRM

In this book, noted expert Andrew Okungbowa explains SAP Asset Accounting (FI-AA) in SAP-ERP, including its associated business benefits, and guides you through the considerable complexities of SAP-ERP configuration. Using FI-AA for fixed asset management enables you to manage assets in multinational companies across a broad range of industries and produce reports to meet various needs in line with legal requirements. Configuring SAP-ERP can be a daunting exercise, however, and there are few resources that address these issues. Asset Accounting Configuration in SAP ERP fills that resource gap by covering the major aspects of SAP FI-AA for anyone with SAP experience and the basic accounting knowledge and bookkeeping skills necessary to apply configuration. It provides configuration explanations in the simplest forms

possible and provides step-by-step guidance with illustrations and practical examples. What You'll Learn

- In-depth coverage of FI-AA syllabus
- How to configure FI-AA accounting in SAP
- How to integrate FI-AA accounting with other SAP modules
- How to explain the functionalities of SAP FI-AA Knowledge gained from real-world practical examples and case studies

Who This Book Is For The key target audience for this book includes SAP consultants, developers, accountants, support organizations and beginners. It is also a resourceful learning manual for universities and institutions whose curricula covers SAP-ERP Asset Accounting.

SAP NetWeaver BW 7.3

This book is intended to provide a comprehensive and practical understanding of SAP NetWeaver BW 7.0, utilizing a real-world, scenario-based approach to detail the core, fundamental components and features. You'll learn about the primary features and functions of SAP NetWeaver BW 7.0, including architecture, data modeling, data extraction, data staging, and more. Then, delve into the specifics of data modeling with SAP NetWeaver BW. Coverage includes InfoObjects, working with master data, InfoCubes, MultiProviders, and Infosets. The authors take an in-depth look at data sources in SAP NetWeaver BW 7.0, extracting data from flat files, working with generic extractors, and extracting data from SAP NetWeaver BW. Plus, find out what's important regarding data transformation and staging. Topics covered include data transfer process, real-

time data acquisition, typical staging architectures, etc. Finally, you'll explore an overview of administration and monitoring topics within SAP NetWeaver BW 7.0, including process chains, data upload monitoring, the BW administration cockpit, and working with aggregates.

SAP Authorization System

Sap List Viewer (Alv)

The challenges facing BW projects can be cultural, political, technical, or fiscal in nature. This book helps you navigate past a wide range of potential pitfalls to ensure a largely problem-free BW implementation or upgrade. Learn about common BW mistakes, find out how to avoid them, and understand how successful BW projects can be executed. In addition, you'll benefit from sample documents that can be used in your project, including review checklists, communications documents, and landscape and architecture documents. The SAP NetWeaver BW Project Lifecycle Gain a practical understanding of what's involved in a typical SAP NetWeaver BW implementation, with an emphasis on the pitfalls and how to avoid them. Defining an Implementation Strategy Know the important questions to answer before starting any SAP NetWeaver BW project to ensure your project is planned, organized, and implemented as efficiently as possible. Preparing for Go-Live and the Go-Live Process Learn about the cut-over tasks associated with go-live and how proper

planning can minimize stress and provide resources and escalation in the event of issues. After SAP NetWeaver BW Go-Live Discover the typical project responsibilities after go-live and the challenges faced in this phase of the project lifecycle. Enhance Quality: The Six Sigma Way Get an introduction to a few basic Six Sigma methodologies that can be used to enhance data quality.

Practical Guide to SAP Business Partner Functions and Integration with SAP S/4HANA

With the conversion from SAP ERP to SAP S/4HANA, the concept of classic customers and vendors is a thing of the past. SAP Business Partner is now the leading object for processing master data information for customers and vendors. Transactions such as FD01/FK01, FD02/FK02 and XK01/XK02 are automatically redirected to the leading transaction BP. In this practical guide, learn step by step how to work with SAP Business Partner, including primary customization settings, and the creation of an SAP business partner with single and grouped roles. Specialized topics such as search help, field attributes, and authorizations are also covered. A comparison of greenfield and brownfield approaches is an essential aspect of this book. For readers who want, or need, to migrate their current data, guidance is provided on business partner conversion types. This guide pays special attention to master data synchronization via the CVI Cockpit, including the assignment of number ranges and intervals. - The SAP

Business Partner concept - SAP Business Partner integration in SAP ERP and SAP S/4HANA - SAP Business Partner synchronization and Customer-Vendor Integration (CVI) - Overview of customization settings and master data maintenance

SAP List Viewer (ALV) - A Practical Guide for ABAP Developers

This book is geared towards ABAP developers and offers detailed information on how to use SAP List Viewer (ALV) to display business data with an interface that lets users rearrange, sort, total, and download data. Obtain comprehensive information on how to write a basic ALV program. Walk through a detailed training scenario and get tips on how to adapt the scenario for your company. Readers will master two ALV types: control framework and function modules. Identify when to use object-oriented techniques and when it may make more sense to quickly adjust existing ALV programs. By using practical examples, tips, and screenshots, the author brings ABAP developers up to speed on SAP ALV. - Learn how to write a basic SAP ALV program - Walk through the object-oriented control framework and function modules - Get tips on adding sorting and grouping features - Dive into how to add editable fields, events, and layout variants

Business Process Modelling with ARIS

Efficient eReporting with SAP EC®

Case method teaching immerses students in realistic business situations--which include incomplete information, time constraints, and conflicting goals. The class discussion inherent in case teaching is well known for stimulating the development of students' critical thinking skills, yet instructors often need guidance on managing that class discussion to maximize learning. Teaching with Cases focuses on practical advice for instructors that can be easily implemented. It covers how to plan a course, how to teach it, and how to evaluate it. The book is organized by the three elements required for a great case-based course: 1) advance planning by the instructor, including implementation of a student contract; 2) how to make leading a vibrant case discussion easier and more systematic; and 3) planning for student evaluation after the course is complete. Teaching with Cases is ideal for anyone interested in case teaching, whether basing an entire course on cases, using cases as a supplement, or simply using discussion facilitation techniques. To learn more about the book, and to see resources available, visit teachingwithcases.hbsp.harvard.edu.

SAP R/3 Plant Maintenance

For years, IDocs have been used as interfaces for internal and cross-enterprise communication. But does the SAP standard meet the demands and requirements for your business? With this book, learn how you can change standard IDocs and even develop your own IDocs for special customer information. With expert knowledge and hands-on

advice, this complete reference help you hit the ground running. Interfaces from A to Z Explore the procedures for adapting and developing IDocs using a complete, practice-oriented approach. Standard and Special Knowledge Get an in-depth look at standard technologies that apply to all IDoc types (such as filtering and reduction), but also specific features such as the workflow connection. Expert Advice for Practical Use Discover important functions for daily use, such as the testing or serialization of IDocs. SAP NetWeaver Process Integration Master the use of IDocs within SAP NetWeaver PI with an entire chapter dedicated to the topic. Everything at a Glance Learn about all of the aspects of IDoc development at a glance -- accompanied by real world tips and tricks as well as numerous coding examples and screenshots.

Practical Workflow for SAP

Familiar with some aspects of managing Workflow, but not with others? This title lets you pick the sections or chapters that are most relevant to you; focus on the provided conceptual explanations, technical instructions, or both. It includes topics such as configuration, administration and troubleshooting, design, and enhancement.

SAP ABAP List Viewer

SAP environments are internally integrated with, and through, cloud and hybrid cloud solutions. This interconnection, both within and external to the firewall, creates a level of vulnerability that, if

exploited, could compromise a company's intellectual property, employee and supplier information, and trade secrets. This book breaks down the application of cybersecurity, as it applies to SAP, into actionable items that can be communicated and implemented into existing security frameworks. You will understand why cybersecurity applies to SAP, how it integrates with cybersecurity Initiatives within an organization, and how to implement a security framework within SAP. This expertly written guide provides a targeted cybersecurity education for SAP managers, architects, and security practitioners. The author explores the technical aspects of implementing cybersecurity policies and procedures using existing tools and available SAP modules. Readers will gain a solid understanding of what a cybersecurity program does, what security frameworks are used for, how to assess and understand risk, and how to apply mitigating controls. By using practical examples, tips, and screenshots, this book covers: - Cyber risk in the SAP landscape - How to harden security - Cybersecurity risk management programs in SA - Risk mitigation for threats

Efficient SAP NetWeaver BW Implementation and Upgrade Guide

This book is geared towards ABAP developers and offers detailed information on how to use SAP List Viewer (ALV) to display business data with an interface that lets users rearrange, sort, total, and download data. Obtain comprehensive information on how to write a basic ALV program. Walk through a

detailed training scenario and get tips on how to adapt the scenario for your company. Readers will master two ALV types: control framework and function modules. Identify when to use object-oriented techniques and when it may make more sense to quickly adjust existing ALV programs. By using practical examples, tips, and screenshots, the author brings ABAP developers up to speed on SAP ALV. - Learn how to write a basic SAP ALV program - Walk through the object-oriented control framework and function modules - Get tips on adding sorting and grouping features - Dive into how to add editable fields, events, and layout variants

Broadband Packet Switching Technologies

The Expert, Practical Guide to Succeeding with SOA in the Enterprise In Executing SOA, four experienced SOA implementers share realistic, proven, “from-the-trenches” guidance for successfully delivering on even the largest and most complex SOA initiative. This book follows up where the authors’ best-selling Service-Oriented Architecture Compass left off, showing how to overcome key obstacles to successful SOA implementation and identifying best practices for all facets of execution—technical, organizational, and human. Among the issues it addresses: introducing a services discipline that supports collaboration and information process sharing; integrating services with preexisting technology assets and strategies; choosing the right roles for new tools; shifting culture, governance, and architecture; and bringing greater

agility to the entire organizational lifecycle, not just isolated projects. Executing SOA is an indispensable resource for every enterprise architect, technical manager, and IT leader tasked with driving value from SOA in complex environments. Coverage includes · Implementing SOA governance that reflects the organization's strategic and business focus · Running SOA projects successfully: practical guidelines and proven methodologies around service modeling and design · Leveraging reusable assets: making the most of your SOA repository · Enabling the architect to choose the correct tools and products containing the features required to execute on the SOA method for service design and implementation · Defining information services to get the right information to the right people at the right time · Integrating SOA with Web 2.0 and other innovative products and solutions · Providing highly usable human interfaces in SOA environments

Asset Accounting Configuration in SAP ERP

The effective design of high-speed, reliable switching systems is essential for moving the huge volumes of traffic and multimedia over modern communications networks. This book explains all the main packet-switching architectures, including all theoretical and practical topics relevant to the design and management of high-speed networks. Delivering the most systematic coverage available of the subject, the authors interweave fundamental concepts with real-world applications and include engineering case

studies from wireless and fiber-optic communications. Market: Hardware and Software Engineers in the telecommunication industry, System Engineers, and Technicians.

Teaching with Cases

This completely updated and expanded new edition is a detailed and practical guide to the essentials of SAP SRM 5.0 and 7.0, including a functionality overview, new product enhancements, and best practices for optimizing your business processes. Throughout the book, you'll find tips and tricks, practical examples, expert analysis of the changes in SAP SRM 7.0, and information on how SRM integrates with core SAP ERP components. This is the one resource you need to get the most out of SAP SRM.

Supplier Relationship Management Overview Discover how supplier relationship management can provide tangible benefits and enhanced visibility for your business.

Implementation Strategies and Methodologies Learn about the capabilities in SAP SRM, and implementation strategies to enhance your existing supply chain.

SAP SRM Integration Master the integration of SAP SRM with core SAP software, including Materials Management, SAP ERP Financials, and SAP ERP Human Capital Management.

Real-World Examples Throughout Find expert advice and insight provided throughout to help you understand and use SAP SRM, and learn from successful customer case studies on implementing SAP SRM.

Practical Guide to SAP Gts

From basic transactions to troubleshooting, this title helps you execute your daily Controlling tasks with fewer steps and greater ease. It shows you how to manage master data, set up planning and budgeting work, and conduct actual postings using routine CO capabilities and new technologies integrated alongside the Controlling component.

Practical Guide to SAP GTS Part 3: Bonded Warehouse, Foreign Trade Zone, and Duty Drawback

This book is geared towards ABAP developers and offers detailed information on how to use SAP List Viewer (ALV) to display business data with an interface that lets users rearrange, sort, total, and download data. Obtain comprehensive information on how to write a basic ALV program. Walk through a detailed training scenario and get tips on how to adapt the scenario for your company. Readers will master two ALV types: control framework and function modules. Identify when to use object-oriented techniques and when it may make more sense to quickly adjust existing ALV programs. By using practical examples, tips, and screenshots, the author brings ABAP developers up to speed on SAP ALV. - Learn how to write a basic SAP ALV program - Walk through the object-oriented control framework and function modules - Get tips on adding sorting and grouping features - Dive into how to add editable fields, events, and layout variants Kathi Kones has been working with SAP software since 1995. After completing her computer science degree at

Minnesota State University, Mankato, she was hired by General Mills, Inc., a global corporation that developed in-house talent and encouraged job changes within the company. She gained SAP R/2 and R/3 experience in the roles of functional analyst, ABAP developer, project manager, Finance master data migration specialist, and integration manager. She participated in four SAP implementations and worked in eight countries. Kathi has most recently worked on SAP master data management projects as a consultant for ThreeBridge Solutions, LLC, Minneapolis, Minnesota.

Eddy Covariance

E-reporting offers a comprehensive solution, integrating internal reporting and published financial statements and using state-of-the art internet technology. This book is a hands-on guide to successfully transforming corporate reporting and company financial statements into an efficient e-reporting system on the basis of the CS and EIS modules of SAP EC. It tells you how to put CS and EIS to your own creative use, shows project planning methods and provides detailed assistance in designing and implementing current business tools such as value-oriented metrics. It also deals with aspects of global roll-out and operational issues. The authors of this book have gained their extensive experience in projects such as the successful practical implementation of e-reporting as part of the world's biggest SAP EC installation.

Executing SOA

What do I need to do to successfully complete an SAP system audit? Get expert guidance on the top 12 controls that should be included in your audit activities, including accounts and authorizations, the changeability settings of tables, clients, and entire systems, change logs, and security configuration settings. Written with SAP administrators and security consultants in mind, this book expertly answers these questions and explores the techniques needed to quickly determine the high-level security status of an SAP system. Walk through a standard control framework you can use to improve and strengthen the security position of your SAP system. Get an overview of the impact of SAP HANA, mobile, and cloud on SAP audits.- Basic principles of the audit function- Common SAP system audit issues- SAP tools and functionality auditors can use, including pre-defined reports- Top 12 controls that should be included in your audit activities

Controlling with SAP - Practical Guide

This book is geared towards ABAP developers and offers detailed information on how to use SAP List Viewer (ALV) to display business data with an interface that lets users rearrange, sort, total, and download data. Obtain comprehensive information on how to write a basic ALV program. Walk through a detailed training scenario and get tips on how to adapt the scenario for your company. Readers will master two ALV types: control framework and

function modules. Identify when to use object-oriented techniques and when it may make more sense to quickly adjust existing ALV programs. By using practical examples, tips, and screenshots, the author brings ABAP developers up to speed on SAP ALV. - Learn how to write a basic SAP ALV program - Walk through the object-oriented control framework and function modules - Get tips on adding sorting and grouping features - Dive into how to add editable fields, events, and layout variants

SAP Administration

Learn how to fuse today's data science tools and techniques with your SAP enterprise resource planning (ERP) system. With this practical guide, SAP veterans Greg Foss and Paul Modderman demonstrate how to use several data analysis tools to solve interesting problems with your SAP data. Data engineers and scientists will explore ways to add SAP data to their analysis processes, while SAP business analysts will learn practical methods for answering questions about the business. By focusing on grounded explanations of both SAP processes and data science tools, this book gives data scientists and business analysts powerful methods for discovering deep data truths. You'll explore: Examples of how data analysis can help you solve several SAP challenges Natural language processing for unlocking the secrets in text Data science techniques for data clustering and segmentation Methods for detecting anomalies in your SAP data Data visualization techniques for making your data come to life

Scientific American

SAP Global Trade Services (GTS) helps companies maximize supply chain performance and reduces the overall cost and risk of global trade by ensuring regulatory compliance, accelerating trade activity, and enabling trade compliance automation. The Practical Guide to SAP GTS Part III explores how companies can increase their competitive advantage with automation, effective supply chain management, and trade preference programs, agreements, and zones to increase their profit margin. Delve in detail into foreign trade zones, bonded warehouse, and duty drawback. Walk through GTS bonded warehouse processes, including transit processes and procedures. Explore how duty costs can be reduced or eliminated using a duty drawback program. By using practical examples, tips, and screenshots, the author brings readers quickly up to speed on getting the most out of SAP GTS. - Leveraging and configuring bonded warehouse - Fundamentals of foreign trade zones - How business users can get the most out of GTS functionality - Detailed configuration and user guides for bonded warehouse and foreign trade zones

Acute Obstetrics

Monthly magazine devoted to topics of general scientific interest.

Configuring SAP ERP Financials and Controlling

SAP is the world leader in Enterprise Resource Planning (ERP) software; of the software's modules, the FI (Finance) and CO (Controlling) are by far the most popular and are widely implemented. This book has no competition—it is the only book on the market on how to configure and implement SAP's FI and CO modules to maximize functionality and features hands-on, step-by-step instructions and real-world examples that provide immediate and practical solutions. Updated for SAP's ECC 6.0, the book covers FI enterprise structure, general ledger, substitutions and validations, automatic account assignments, accounts payable and receivable, asset accounting, accrual engine, closing entries, credit management, lockbox, CO enterprise structure, profitability analysis (CO-PA), and more.

A Practical Guide to Cybersecurity in SAP

The first and only book to offer detailed explanations of SAP ERP sales and distribution As the only book to provide in-depth configuration of the Sales and Distribution (SD) module in the latest version of SAP ERP, this valuable resource presents you with step-by-step instruction, conceptual explanations, and plenty of examples. If you're an SD consultant or are in charge of managing an SAP implementation in your enterprise, you'll want this valuable resource at your side SAP is one of the leading Enterprise Resource Planning (ERP) software products on the market, with over 40,000 implementations Covers the latest version of SAP ERP-ECC 6.0 Covers common through advanced configurations, so it's helpful no matter

what your level of experience with SAP Explains the conceptual framework behind the configuration process If your company uses the SD module, keep this indispensable guide on hand.

Bazaar Exchange and Mart, and Journal of the Household

Take an in-depth look at how basic financial accounting processes work in SAP S/4HANA in this practical guide. Learn about the SAP Fiori launchpad and how to find your way around the many apps available for finance with the help of screenshots and examples. Understand the finance organizational structure and master data and discover some of the SAP Best Practices for finance such as accounts payable and receivable, credit management, asset accounting, cash and bank management, and closings. Explore different ways to enter and upload G/L journal entries and what is meant by the Universal Journal. Run through the bank postings and different options for the bank statements. Go deeper into the structure of asset accounting, including the chart of depreciation, depreciation areas, asset classes, and depreciation methods. Learn about multidimensional reporting, KPIs, and the various analytical apps supplied with SAP S/4HANA.

- Financial accounting processes in SAP S/4HANA - Finance organizational structure, key financial master data - Daily transactions using SAP Fiori apps - SAP Fiori apps for displaying and reporting financial data
