## **Experiencing Archaeology**

### **Laboratory Manual for College Physical Science**

Today, many general-education archaeology courses are large, lecture-style class formats that present a challenge to providing students, particularly non-majors, with opportunities to learn experientially. This laboratory-style manual compiles a wide variety of uniquely designed, hands-on classroom activities to acquaint advanced high school and introductory college students to the field of archaeology. Ranging in length from five to thirty minutes, activities created by archaeologists are designed to break up traditional classroom lectures, engage students of all learning styles, and easily integrate into large classes and/or short class periods that do not easily accommodate traditional laboratory work.

## **How to Study Science**

Recombinant DNA Laboratory Manual is a laboratory manual on the fundamentals of recombinant DNA techniques such as gel electrophoresis, in vivo mutagenesis, restriction mapping, and DNA sequencing. Procedures that are useful for studying either prokaryotes or eukaryotes are discussed, and experiments are included to teach the fundamentals of recombinant DNA technology. Hands-on computer sessions are also included to teach students how to enter and manipulate sequence information. Comprised of nine chapters, this book begins with an introduction to bacterial growth parameters, how to measure bacterial cell growth, and how to plot cell growth data. The discussion then turns to the isolation and analysis of chromosomal DNA in bacteria and *Drosophila*; plasmid DNA isolation and agarose gel analysis; and introduction of DNA into cells. Subsequent chapters deal with Tn5 mutagenesis of pBR329; DNA cloning in M13; DNA sequencing; and DNA gel blotting, probe preparation, hybridization, and hybrid detection. The book concludes with an analysis of lambda phage manipulations. This manual is intended for advanced undergraduate or beginning graduate students and should also be helpful to established investigators who are changing their research focus.
