The Complete Yachtmaster has been a bestseller since first publication and has established itself as the standard reference for Yachtmaster students as well as skippers of all levels of experience. In this fully revised and up-to-date 9th edition, Tom Cunliffe brings together all the essentials of modern cruising in one volume. He presents an analysis of a good skipper, the theory and practice of sailing and sail trim, the art of seamanship, accurate navigation including chart plotters and PCs, understanding meteorology, heavy weather preparation, understanding yacht stability and coping with emergencies. The Complete Yachtmaster builds knowledge as it builds sailing confidence, guiding examination candidates as authoritatively and reassuringly through the RYA syllabus as a sea pilot bringing a ship safely to harbour. Required reading for all skippers and budding skippers, both on board or in the classroom. 'A gem, distilled from decades of experience' Yachting Monthly 'Cunliffe's competence and authority radiate from the pages thoroughly recommended' Little Ship Club 'There are all too few authors who not only know their subject but can write well about it. Tom Cunliffe is one' Cruising

Small firms in Chicago employ more than 1.6 million individuals—nearly 50 percent of the private work force, according to a

new study released this fall by the Small Business Administration. The survey, which defines small firms as those employing less than 500 people, also shows that these businesses generate 47 percent of the area's total receipts of \$278 billion dollars. However, SBA statistics also reveal that, on average, of the small businesses starting today, 53 percent will not be in business four years from now. Of these closings, it's estimated that 15 percent will close due to business failures. Chicago businessman Jay Goltz understands what it takes for a small business to succeed. During the past twenty years he has owned and operated Artists' Frame Service in Chicago. Goltz started the business in 1978, and today it's the largest, custom retail picture framing facility in the world. Now, Goltz shares some his secrets of success.

This book presents a comprehensive state-of-the-art approach to digital health technologies and practices within the broad confines of healthcare practices. It provides a canvas to discuss emerging digital health solutions, propelled by the ubiquitous availability of miniaturized, personalized devices and affordable, easy to use wearable sensors, and innovative technologies like 3D printing, virtual and augmented reality and driverless robots and vehicles including drones. One of the most significant promises the digital health solutions hold is to keep us healthier for longer, even with limited resources, while truly scaling the delivery of healthcare. Digital Health: Scaling Healthcare to the World addresses the emerging trends and enabling technologies contributing to technological advances in healthcare practice in the 21st Century. These areas

include generic topics such as mobile health and telemedicine, as well as specific concepts such as social media for health, wearables and quantified-self trends. Also covered are the psychological models leveraged in design of solutions to persuade us to follow some recommended actions, then the design and educational facets of the proposed innovations, as well as ethics, privacy, security, and liability aspects influencing its acceptance. Furthermore, sections on economic aspects of the proposed innovations are included, analyzing the potential business models and entrepreneurship opportunities in the domain.

Many people today are looking for a simpler, less hectic lifestyle. Are you one of those people? I know I am. Instead of running on the consumer nation treadmill like most people, I decided to take action and go in a different direction--which is where my off-the-grid project began. Knowing that other people are searching for the same thing, I decided to document my adventure for their benefit. In *Going Off the Grid: The How-To Book of Simple Living and Happiness*, I provide a step-by-step guide for how to find your private piece of land and build a self-sustaining home. I recently built my own off-the-grid home in northeast Washington State, so this advice comes from first-hand experience. When building any home, things are not as easy as they appear on those DIY television shows. But with a little knowledge about how this process works in the real world, I believe anyone can achieve their dream of living a more quiet and peaceful life. The hardest part is taking the first step, and this book is the right place to start for any person interested in an off-the-grid adventure.

Ideal for removing large amounts of liquids from wells, Electrical Submersible Pumps (ESP) are perhaps the most versatile and profitable pieces of equipment in a petroleum company's arsenal. However, if not properly maintained and operated, they could quickly become an expensive nightmare. The first book devoted to the design, operation, maintenance, and care, Electrical Submersible Pumps Manual delivers the tools and applicable knowledge needed to optimize ESP performance while maximizing of run life and the optimization of production. The perfect companion for new engineers who need to develop and apply their skills more efficiently or experienced engineers who wish further develop their knowledge of best practice techniques, this manual covers basic electrical engineering, hydraulics and systems analysis before addressing pump components such as centrifugal pumps, motors, seals, separators, and cables. In addition, the author includes comprehensive sections on analysis and optimization, monitoring and trouble-shooting, and installation design and installation under special conditions. * Apply the best operating practices to optimise production * Track and troubleshoot problems such as gas, solids and corrosion * Prevent expensive failures such as cable burn and impeller cavitation * Design and analyze a system using up-to-date computer programs * Establish ESP analysis monitoring methods and strategies * Ensure optimum operator-vendor relationship for mutual benefits

In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat's primary systems,

including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

Bibliography of Nautical Books

Wisconsin entrepreneur Ole Evinrude will inspire children in this addition to the Badger Biographies series for young readers, where the story of Ole's invention, from drawing board to factory floor, is told in a reader-friendly format that includes historic images, a glossary of terms, and sidebars explaining how an outboard motor works. Ole Evinrude was born in Norway in 1877 and immigrated to the United States when he was five years old. The Evinrude family settled in Wisconsin and began farming, but it was clear from a very young age that Ole would not follow the family tradition. Ole Evinrude was meant to work with boats. Building an outboard motor was not easy, though - Ole suffered numerous mechanical and financial setbacks along the way. After years of hard work and persistence, the Evinrude motor company was founded and Ole's outboard motors were an instant hit around the world. Ole continued to improve the design of his motor and attracted other entrepreneurs to the area, making Wisconsin the center of the outboard motor industry for decades.

Electrical Submersible Pumps Manual

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.

The Complete Yachtmaster

This book surveys state-of-the-art research on and developments in lithium-ion batteries for hybrid and electric vehicles. It summarizes their features in terms of performance, cost, service life, management, charging facilities, and safety. Vehicle electrification is now commonly accepted as a means of reducing fossil-fuels consumption and air pollution. At present, every electric vehicle on the road is powered by a lithium-ion battery. Currently, batteries based on lithium-ion technology are ranked first in terms of performance, reliability and safety. Though other systems, e.g., metal-air, lithium-sulphur, solid state, and aluminium-ion, are now being investigated, the lithium-ion system is likely to dominate for at least the next decade - which is why several manufacturers, e.g., Toyota, Nissan and Tesla, are chiefly focusing on this technology. Providing comprehensive information on lithium-ion batteries, the book includes contributions by the world's leading experts on Li-ion batteries and vehicles.

Pobalscoil Chloich Cheannfhaola (P.C.C.) is a community school located in the Gaeltacht area of Falcarragh in the beautiful

North West of Co. Donegal. Every year, 2nd-year students who participate in the Junior Certificate Schools Programme (JCSP), have the opportunity to get involved in the JCSP Make a Book exhibition. Students create a book based on a subject that is of interest to them and then display it alongside books created by students from schools all over the North West of Ireland. This wonderful showcase represents many hours of work by the students and their teachers and is a chance for students to exhibit their many skills and talents. Over the last few years, our school has been very fortunate to be able to collaborate with Pobal le Chéile, a local community development group in Falcarragh. This collaboration has been a very positive experience for the students and staff at P.C.C. and has served to help build links in the community. It has also given our JCSP students the opportunity to work with some of their greatly talented staff and learn so much through workshops, visits and talks. This year, Rang Eoin chose to create a digital book based around a tree planting project they undertook. The idea for this project came about through a donation of trees to the school and community from "Trees on the Land" which is a charity and not-for-profit project from the Green Economy Foundation in collaboration with The Woodland Trust in Northern Ireland. As a JCSP librarian, it is always a proud moment when students see their finished book for the first time and can celebrate the fact that they are authors, no mean feat at the age just of 14 or 15 years old. Sarah Ball, JCSP Librarian
