Who's Who in Finance and Industry 2000-2001

Manual of Clinical Immunology

Who's who in Engineering

Scientific and Technical Aerospace Reports

British Journal of Photography

Wireless World

Moody's International Manual

This publication presents cleaning and etching solutions, their applications, and results on inorganic materials. It is a comprehensive collection of etching and cleaning solutions in a single source. Chemical formulas are presented in one of three standard formats - general, electrolytic or ionized gas formats - to insure inclusion of all necessary operational data as shown in references that accompany each numbered formula. The book describes other applications of specific solutions, including their use on other metals or metallic compounds. Physical properties, association of natural and man-made minerals, and materials are shown in relationship to crystal

structure, special processing techniques and solid state devices and assemblies fabricated. This publication also presents a number of organic materials which are widely used in handling and general processing waxes, plastics, and lacquers for example. It is useful to individuals involved in study, development, and processing of metals and metallic compounds. It is invaluable for readers from the college level to industrial R & D and full-scale device fabrication, testing and sales. Scientific disciplines, work areas and individuals with great interest include: chemistry, physics, metallurgy, geology, solid state, ceramic and glass, research libraries, individuals dealing with chemical processing of inorganic materials, societies and schools.

Biochemicals and Reagents for Life Science Research

The Big Book

International Catalogue of Scientific Literature. [1901-1914] A. Mathematics

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Mergent Moody's Industrial Manual

Statistics of Public, Society and School Libraries

Mergent Public Utility Manual

Provides lists of selling prices of items found on eBay in such categories as antiques, boats, books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games.

Scripta Medica Facultatis Medicae Universitatis Brunensis Masarykianae

Mergent International Manual

Transactions

Covering New York, American & regional stock exchanges & international companies.

Aviation Psychology Program Research Reports

Popular Photography

Passive Nondestructive Assay of Nuclear Materials

Authoritative and accurate information you need on the careers and credentials of the world's leading business executives in one handy source Who's Who in Finance and Industry lists top professionals from the United States and more than 160 other nations and territories. This expanded international focus provides current biographical information on leaders and achievers in technologically advanced economies as well as in emerging markets. To keep up with the ever-changing economic and corporate climates, new entries are added regularly to Who's Who in Finance and Industry. Among the 11,000 new entries included in the 31st edition, you'll find these noted individuals:

- Senior executives of the largest U.S. firms as measured by revenue
- Chairpersons and presidents of North America's stock exchanges
- Presidents of chambers of commerce in cities across the country
- Heads of federal departments, commissions, and boards concerned with agriculture, commerce, energy, labor, transportation, and finance
- Chairpersons, presidents, and CEOs of the largest minority-owned businesses
- Chairpersons, presidents, and CEOs of the largest Mexican and Canadian industrial firms
- Administrators and professors from the top business schools in the U.S., Mexico, and Canada

Includes a comprehensive Professional Index to make your research fast and easy.

Moody's Bank and Finance Manual

Immobilized PH Gradients

English Mechanic and World of Science

Radiation Protection Management

Sport Aviation

Immobilized pH gradients (IPG) represent the most advanced development of isoelectric focusing (IEF). Originally developed to overcome all the problems of IEF in soluble amphoteric buffers (CA) (such as pH gradient instability, complexation with CA chemicals, unreproducibility of pH gradients, protein precipitation at the pI), it turned out to be an entirely new technique, quite different in principle and operation from conventional IEF. The book is thus meant to bring the reader up to date with this fast developing field. The book is divided into six chapters containing information on: detailed treatment of all the chemistry of the Immobiline chemicals; theory of pH gradient generation (computer simulations, tables with all the possible pH recipes); all analytical aspects of IPGs, including staining techniques, blotting etc.; two-dimensional maps, with a detailed treatise of advantages and limitations; preparative aspects of IPGs, including comparison with other preparative electrophoretic techniques; some examples of applications, including genetic and forensic analysis,

blood polymorphism etc. The book is extensive and up-to-date, while also extensively covering the theory.
