Completely updated, and now in full color, this practical reference is a comprehensive guide to the anesthetic and perioperative management of patients during all procedures performed by general and subspecialist surgeons. The book explains each procedure from both the surgeon's and the anesthesiologist's perspective, presents details on anesthetic technique, and guides the anesthesiologist and surgeon through the decisions that must be made before, during, and after surgery. Emphasis is on factors that impact the anesthesiologist, including patient positioning, duration of surgery, and complications. The Fourth Edition covers almost 40 new surgical procedures, with an increased focus on laparoscopic and endovascular procedures. A companion Website will offer the fully searchable text and an image bank.

Moody's International Manual

Irwin & Rippe's Manual of Intensive Care Medicine has established itself as an invaluable reference for students, interns, residents, fellows, nurse practitioners and physician assistants, nurses, and respiratory care practitioners working in the critical care medicine environment. Known for its reader-friendly outline format and compact portable size, this handy manual builds upon its tradition of excellence in its Sixth Edition. Available both in print and electronic formats, the Sixth Edition parallels the text, Irwin & Rippe's Intensive Care Medicine, Seventh Edition, and features fully updated and revised content with a focus on patient safety.

- Fully revised content addresses recent developments, including the larger role for ultrasound, in critical care medicine.
- Annotated references are provided at the close of each chapter to guide the interested reader through key articles in the relevant literature.
- Video clips have been added where appropriate to reinforce key points and findings.
- Logical organization begins with an extensive section on Procedures and Techniques, followed by 15 sections covering organ system problems as well as palliative care, legal and ethical issues, and transplantation.
- Thorough coverage of pharmacology, poisonings, and overdoses presented in a tabular format.
- New section editors share a wealth of experience and expertise targeted to broaden readers' skills.
