There are some people who've done little. There are some people who've done a lot. There are others who've done more than that. Then there was Colin Seeley. He'd done more than pretty much everyone. Colin passed away just after his 84th birthday. He packed so much into his life, which began on January 2, 1936, when he was born in Kent, the only child of Percy and Hilda. By 20 Colin was running his own business, soon after he was racing, and just two years into his career, was a podium finisher at the IoM TT. Aged 30, he was a motorcycle manufacturer, then going on to all manner of other disciplines, including running car racing Formula One teams. Post that, he was a successful ace team manager and mentor to young riders, before going on to work for auctioneers Bonhams becoming one of the company's foremost and most trusted consultants. During recent years, Colin had been a popular figure at classic events far and wide, often demonstrating period machines, eyes twinkling and lips smiling, enduringly positive, endearingly modest, and always full of enthusiasm. He pretty much did it all.

By 250 AD, Christianity had spread throughout India and China. Known as the Shining Religion or the Luminous Teaching, it drew adherents from Buddhism and Hinduism who were seeking a faith that taught the possibility of achieving a society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
