Chicanas/os are part of the youngest, largest, and fastest growing racial/ethnic 'minority' population in the United States, yet at every schooling level, they suffer the lowest educational outcomes of any racial/ethnic group. Using a 'counterstorytelling' methodology, Tara Yosso debunks racialized myths that blame the victims for these unequal educational outcomes and redirects our focus toward historical patterns of institutional neglect. She artfully interweaves empirical data and theoretical arguments with engaging narratives that expose and analyse racism as it functions to limit access and opportunity for Chicana/o students. By humanising the need to transform our educational system, Yosso offers an accessible tool for teaching and learning about the problems and possibilities present along the Chicano/a educational pipeline.

The Oxford Handbook of State and Local Government is an historic undertaking. It contains a wide range of essays that define the important questions in the field, evaluate where we are in answering them, and set the direction and terms of discourse for future work. The Handbook will have a substantial influence in defining the field for years to come. The chapters critically assess both the key works of state and local politics literature and the ways in which the sub-field has developed. It covers the main areas of study in subnational politics by exploring the central contributions to the comparative study of institutions, behavior, and policy in the American context. Each chapter outlines an agenda for future research.

## **The American Courts**

Critical Race Theory (CRT) is virtually unheard of in European scholarship, especially among legal scholars. *Law, Lawyers and Race: Critical Race Theory from the United States to Europe* endeavours to fill this gap by providing an overview of the definition and consequences of CRT developed in American scholarship and describing its transplantation and application in the continental European context. The CRT approach adopted in this book illustrates the reasons why the relationship between race and law in European civil law jurisdictions is far from anodyne. Law plays a critical role in the construction, subordination and discrimination against racial minorities in Europe, making it comparable, albeit in slightly different ways, to the American experience of racial discrimination. Anti-Semitism, Islamophobia, anti-Roma and anti-Black racism constitute a fundamental factor, often tacitly accepted, in the relationship between law and race in Europe. Consequently, the broadly shared anti-race and anti-racist position is problematic because it acts to the detriment of victims of racism while privileging the White, Christian, male majority. This book is an original exploration of the relationship between law and race. As such it crosses the disciplinary divide, furthering both legal scholarship and research in Race and Ethnicity Studies.

## **Politics in the American States**

Courtrooms are often lively places, and what occurs in them has a profound impact on the functioning of our democracy. *The American Courts – A Procedural Approach* offers readers a thorough understanding of the United States court system by exploring the procedural aspects of the law. The rules of both criminal and civil procedure, how they are applied, and their influence on decision-making in the courts are thoroughly examined. This text is ideal for undergraduate and introductory graduate criminal justice, legal studies, and government programs.

## **A Critical Examination of Certain Questions Involved in Recent Decisions of the Supreme Court of California**

This text proposes corrective action to improve the institutional care of African American children and their families, calling attention to the specific needs of this population and the historical, social, and political factors that have shaped its experience within the child welfare system. The authors critique policy and research and suggest culturally targeted program and policy responses for more positive outcomes.

## **The American Monthly Magazine and Critical Review**

In 1925 Adolfo 'Babe' Romo, a Mexican American rancher in Tempe, Arizona, filed suit against his school district on behalf of his four young children, who were forced to attend a markedly low-quality segregated school, and won. But *Romo v. Laird* was just the beginning. Some sources rank Mexican Americans as one of the most poorly educated ethnic groups in the United States. *Chicano Students and the Courts* is a comprehensive look at this community's long-standing legal struggle for better schools and educational equality. Through the lens of critical race theory, Valencia details why and how Mexican American parents and their children have been forced to resort to legal action. *Chicano Students and the Courts* engages the many areas that have spurred Mexican Americans to legal battle, including school segregation, financing, special education, bilingual education, school closures, undocumented students, higher education financing, and high-stakes testing, ultimately situating these legal efforts in the broader scope of the Mexican American community's overall struggle for the right to an equal education. Extensively researched, and written by an author with firsthand experience in the courtroom as an expert witness in Mexican American education cases, this volume is the first to provide an in-depth understanding of the intersection of litigation and education vis-à-vis Mexican Americans.

### **Attitude of American Courts in Labor Cases**

No longer content with accepting whiteness as the norm, critical scholars have turned their attention to whiteness itself. In "Critical White Studies: Looking Behind the Mirror," numerous thinkers, including Toni Morrison, Eric Foner, Peggy McIntosh, Andrew Hacker, Ruth Frankenberg, John Howard Griffin, David Roediger, Kathleen Heal Cleaver, Noel Ignatiev, Cherrie Moraga, and Reginald Horsman, attack such questions as: \*How was whiteness invented, and why? \*How has the category whiteness changed over time? \*Why did some immigrant groups, such as the Irish and Jews, start out as nonwhite and later became white? \*Can some individual people be both white and nonwhite at different times, and what does it mean to pass for white? \*At what point does pride in being white cross the line into white power or white supremacy? \*What can whites concerned over racial inequity or white privilege do about it? Science and pseudoscience are presented side by side to demonstrate how our views on whiteness often reflect preconception, not fact. For example, most scientists hold that race is not a valid scientific category -- genetic differences between races are insignificant compared to those within them. Yet, the one drop rule, whereby those with any nonwhite heritage are classified as nonwhite, persists even today. As the bell curve controversy shows, race concepts die hard, especially when power and prestige lie behind them. A sweeping portrait of the emerging field of whiteness studies, "Critical White Studies" presents, for the first time, the best work from sociology, law, history, cultural studies, and literature. Delgado and Stefancic expressly offer critical white studies as the next step in critical race theory. In focusing on whiteness, not only do they ask nonwhites to investigate more closely for what it means for others to be white, but also they invite whites to examine themselves more searchingly and to look behind the mirror.

## **The Warren Court and American Politics**

The Supreme Court under Chief Justice Earl Warren was the most revolutionary and controversial Supreme Court in American history. But in what sense? Challenging the reigning consensus that the Warren Court, fundamentally, was protecting minorities, Lucas Powe revives the valuable tradition of looking at the Supreme Court in the wide political environment to find the Warren Court a functioning partner in Kennedy-Johnson liberalism. Thus the Court helped to impose national liberal-elite values on groups that were outliers to that tradition--the white South, rural America, and areas of Roman Catholic dominance. In a learned and lively narrative, Powe discusses over 200 significant rulings: the explosive "Brown" decision, which fundamentally challenged the Southern way of life; reapportionment (one person, one vote), which changed the political balance of American legislatures; the gradual elimination of anti-Communist domestic security programs; the reform of criminal procedures ("Mapp, Gideon, Miranda"); the ban on school-sponsored prayer; and a new law on pornography. Most of these decisions date from 1962, when those who shaped the dominant ideology of the Warren Court of storied fame gained a fifth secure liberal vote. The Justices of the majority were prominent individuals, brimming with confidence, willing to help shape a revolution and see if it would last.

### **Judicial Policy Making and the Modern State**

Depending on whom one talks to, today's criminal courts are either the savior or the demon of our social order. While everyone seems to have an answer about what needs to be done, the solutions are neither simple, nor within our current allocation of resources. Media hype and political posturing emotionally dilute the reality of what motivates crime and what constitutes effective punishment. The essays and research in this anthology give the reader a realistic view of complex problems affecting our juvenile and adult courts and, consequently, the rest of the criminal justice system. Topics include sentencing disparity, sentencing reform, and wrongful convictions. Some traditionally controversial issues are covered, such as the insanity defense and the death penalty as well as the more recent "three-strikes-and-you're-out" movement and mandatory minimums. This series will be of great utility to students, scholars, and others with interests in the literature of criminal justice and criminology.

Our American Government textbook adheres to the scope and sequence of

introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.

#### **Critical Race Theory**

In 2001, Richard Delgado and Jean Stefancic published their definitive Critical Race Theory, a compact introduction to the field that explained, in straightforward language, the origins, principal themes, leading voices, and new directions of this important movement in legal thought. Since then, critical race theory has gone on to influence numerous other fields of scholarship, and the Delgado and Stefancic primer has remained an indispensable guide for students and teachers. Delgado and Stefancic have revised the book to include material on key issues such as colorblind jurisprudence, Latino-Critical scholarship, immigration, and the rollback of affirmative action. This second edition introduces readers to important new voices in fields outside of law, including education and psychology, and offers greatly expanded issues for discussion, updated reading lists, and an extensive glossary of terms.

#### **The Edinburgh Review, Or Critical Journal: To Be Continued Quarterly**

At the same time, the text's innovative courtroom workhouse model -- which focuses on the interrelationships among the judge, prosecutor, and defense attorney -- brings the courtroom to life. AMERICA'S COURTS AND THE CRIMINAL JUSTICE SYSTEM has long been known for the way it gives students an accurate glimpse of what it is like to work within the American criminal justice system, and the Twelfth Edition is no exception. This study analyzes the experience of several OECD countries in order to identify factors that influence the role and success of

environmental management; possible causes of the discrepancy between national environmental objectives and actual performance; and implications of lessons learned and recommendations for countries that are in the process of establishing or redesigning their environmental management systems.

## **The American and English Railroad Cases**

Investigates the role of federal judges in prison reform, and policy making in general.

## **The American Court System**

Law in the Courts of Love traces the literary history and diversity of past legal systems. These 'minor jurisprudences' range from the spiritual laws of the courts of conscience to the code and judgements of love handed down by women's courts in medieval France. Professor Goodrich presents the 15th Century Courts of Love in Paris as one instance of an alternative jurisdiction drawn from the diversities of the legal and literary past. Their textual records are correspondingly mixed in genre, being in the form of poems, narratives, plays, treaties and judicial decisions. More broadly, these studies trace certain boundaries of modern law and make up one of many forms of legal knowledge which escape today's vision of a unitary law. The author believes that the unquestionable faith in a unity law and its distance from person and emotion is precisely what makes impossible the attention to the individual that justice ultimately requires. Law in the Courts of Love shows how the historical diversity of forms and procedures of law can competently form the basis for critical revisions of contemporary legal doctrine and professional practice. This book will be of interest to undergraduate and postgraduate students of law and literature, critical legal studies and legal history, or anyone wishing to specialise in feminist legal theory.
