Two sociologists and a lawyer examine here the attitudes of both survivors and attorney on various problems surrounding inheritance—from will-making through estate settlement. Within a legal frame of reference, this book is a study of what happens within a family at death—and why. The authors use the "inheritance unit" as the basis for looking at the functions of inheritance in intergenerational family continuity and the general patterns of family relationship.

Introduction to the Legal System: Theory, Overview, Business Applications

"The U.S. Branch and Criminal Jury Court of the Court of General Sessions occupy key positions in the criminal court system of the District of Columbia. Nearly 90 percent of all adult defendants charged with felonies or serious misdemeanors enter the judicial system through the U.S. Branch, and a large proportion of these cases are ultimately disposed of either there or in the Jury Court. In the past these courts have received relatively little public attention, and no detailed analysis of their operations, problems, and needs has been made. This study is an initial attempt to fill that gap. It is not an analysis of the entire system, but deals only with those aspects which touch the work of the two branches under study"--Page 1.

Urban Government

In *Suburbs under Siege* Charles Haar argues passionately that all people--rich or poor, black or white--have a constitutional right to live in the suburbs and that a socially responsible judiciary should vigorously uphold that right. For various reasons, American courts have generally failed to question local zoning regulations that trap the urban poor in the squalor of inner cities, away from decent housing and jobs in the suburbs. No U.S. Supreme Court case, for instance, has confronted exclusionary zoning rules, as *Brown v. Board of Education* once attacked school segregation. Instead, judges at all levels have most often reinforced the residential segregation that may well destroy American society. In this provocative book on the landmark Mount Laurel cases, Haar shows how the N.J. state judiciary broke out of this pattern of judicial behavior. These courageous, innovative judges attracted nationwide attention by challenging the forces of affluence that ruled the suburbs (and the legislature) of their state. Furthermore, they based their reasoning on the N.J. state constitution in order to protect their rulings from invalidation by the U.S. Supreme Court. In the early 1970s, when the cases began, the plaintiffs, Ethel Lawrence and her daughter Thomasene, were barely making ends meet in the Philadelphia suburb of Mount Laurel, a town where their African-American ancestors had lived for seven generations. The Lawrences' dream was to live in a Mount Laurel garden apartment planned by a grassroots reform group as affordable housing: in their way stood a typical minimum acreage zoning ordinance. The eventual court victory of the Lawrences and their young public interest attorneys inspired other N.J. suits and a process of remediation that continues to this day, as judges, experts (special masters), the state legislature, and other citizens work to carry out the Mount Laurel principles. Haar's book is a bold attack on conventional doctrines of the separation of powers limitations on the judicial branch and a plea that judges across the country assume their proper responsibilities for fair housing before it is too late.
