Improvising Medicine

HIV/AIDS Nursing

Abstract: Objective: To analyze the context of nursing assistance regarding the person with HIV/Aids. Method: The use of Hinds, Chaves and Cypress's context perspective, which highlights the four interfaced layers: immediate, specific, general, and meta-context. Results: The process of taking care of a person with HIV/Aids is an area of nursing that comprises a set of actions that are little appreciated in the hospital context, prioritizing technical actions. In such a context, nursing will only be able to reach full autonomy when caretaking is eventually regarded as a privileged sphere of the health sector. Conclusion: It is important to emphasize that despite the advancements reached in nursing assistance, there are still a lot of challenges to face and a lot of difficulties to overcome. Still it is safe to say that caretaking is undoubtedly the main characteristic of nursing

The Psychiatry of AIDS

With the widespread use of highly active anti-retroviral treatment (HAART), HIV has become a chronic, rather than a fatal, disease. But for their treatment to succeed,

patients require uninterrupted care from a health care provider and uninterrupted access to anti-HIV medications. The IOM identifies federal, state, and private health insurance policies that inhibit HIV-positive individuals from initiating or continuing their care.

Managing the Older Adult Patient with HIV

This volume examines the complex medical, social, ethical, financial, and scientific problems arising from the AIDS epidemic and offers dozens of public policy and research recommendations for an appropriate national response to this dread disease.

What Nurses Know HIV/AIDS

For the author of this book, disease is not an "enemy" that strikes a "victim." Rather, health and disease comprise a unitary whole of individual and environment. Health as Expanding Consciousness is an inspiration to those seeking a full experience of personal health.

HIV Screening and Access to Care

This comprehensive full-color student workbook contains worksheets for each chapter of Lippincott's Textbook for Nursing Assistants, Second Edition. The worksheets are fully integrated with the text and offer exercises, questions, and learning activities for students.

AIDS and Behavior

"This is an excellent reference for those caring for clients with HIV/AIDS. I strongly recommend this book." --Doody's HIV/AIDS is no longer a certain death sentence. Patients fighting the chronic symptoms of HIV/AIDS are now living longer, fuller lives due to recent scientific and pharmaceutical breakthroughs. As a result, the new generation of caregivers must keep pace with cutting-edge, evidence-based practices to better serve patients who may live with HIV/AIDS for several decades. This updated edition is a vital resource for nurses and other health care professionals providing care to HIV-positive persons in the 21st century. The contributors present essential information on the medical assessment and management of symptoms, the prevention of infection, ethical and legal dimensions of care, and much more. With a greater emphasis on the international dimensions of the HIV pandemic and the treatment of minority populations, this book serves as an essential guide for nurses and health care practitioners serving patients with HIV/AIDS. Key topics include: HIV screening, testing, and counseling HIV/AIDS nursing case management within the global community HIV and gay,

lesbian, bisexual, and transgender persons Children and HIV prevention and management HIV in corrections facilities and the care of incarcerated patients Sex workers and the transmission of HIV

Confronting AIDS

The U.S. government supports programs to combat global HIV/AIDS through an initiative that is known as the President's Emergency Plan for AIDS Relief (PEPFAR). This initiative was originally authorized in the U.S. Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003 and focused on an emergency response to the HIV/AIDS pandemic to deliver lifesaving care and treatment in low- and middle-income countries (LMICs) with the highest burdens of disease. It was subsequently reauthorized in the Tom Lantos and Henry J. Hyde U.S. Global Leadership Against HIV/AIDS, Tuberculosis, and Malaria Reauthorization Act of 2008 (the Lantos-Hyde Act). Evaluation of PEPFAR makes recommendations for improving the U.S. government's bilateral programs as part of the U.S. response to global HIV/AIDS. The overall aim of this evaluation is a forward-looking approach to track and anticipate the evolution of the U.S. response to global HIV to be positioned to inform the ability of the U.S. government to address key issues under consideration at the time of the report release.

ANAC's Core Curriculum for HIV / AIDS Nursing

In 1994, at the height of the AIDS epidemic in the United States, MK Czerwiec took her first nursing job, at Illinois Masonic Medical Center in Chicago, as part of the caregiving staff of HIV/AIDS Care Unit 371. *Taking Turns* pulls back the curtain on life in the ward. A shining example of excellence in the treatment and care of patients, Unit 371 was a community for thousands of patients and families affected by HIV and AIDS and the people who cared for them. This graphic novel combines Czerwiec's memories with the oral histories of patients, family members, and staff. It depicts life and death in the ward, the ways the unit affected and informed those who passed through it, and how many look back on their time there today.

Czerwiec joined Unit 371 at a pivotal time in the history of AIDS: deaths from the syndrome in the Midwest peaked in 1995 and then dropped drastically in the following years, with the release of antiretroviral protease inhibitors. This positive turn of events led to a decline in patient populations and, ultimately, to the closure of Unit 371. Czerwiec's restrained, inviting drawing style and carefully considered narrative examine individual, institutional, and community responses to the AIDS epidemic—as well as the role that art can play in the grieving process. Deeply personal yet made up of many voices, this history of daily life in a unique AIDS care unit is an open, honest look at suffering, grief, and hope among a community of medical professionals and patients at the heart of the epidemic.

The Pocket Guide for HIV and AIDS Nursing Care

"This is an excellent reference for those caring for clients with HIV/AIDS. I strongly recommend this book." --Doody's HIV/AIDS is no longer a certain death sentence. Patients fighting the chronic symptoms of HIV/AIDS are now living longer, fuller lives due to recent scientific and pharmaceutical breakthroughs. As a result, the new generation of caregivers must keep pace with cutting-edge, evidence-based practices to better serve patients who may live with HIV/AIDS for several decades. This updated edition is a vital resource for nurses and other health care professionals providing care to HIV-positive persons in the 21st century. The contributors present essential information on the medical assessment and management of symptoms, the prevention of infection, ethical and legal dimensions of care, and much more. Nursing

Workbook to Accompany Lippincott's Textbook for Nursing Assistants

The Association of Nurses in AIDS Care (ANAC) presents the essential information needed by every nurse working with HIV/AIDS patients in any setting. The text provides an educational framework for HIV/AIDS clinical content and serves those preparing for specialty certification in HIV/AIDS training. The text covers: A) Infection, transmission, and prevention B) Clinical management of a variety of patient types C) Symptomatic conditions and symptom management D) Special populations E) Psychosocial concerns for patients. ANAC's Core Curriculum for HIV/AIDS Nursing, Third Edition includes the following new topics: Updates to the evidence basis underlying the nursing care of persons with HIV/AIDS. New issues and challenges including the care for pediatric patients and adults with giardia, syphilis and bipolar disease. New text features including case studies and quizzes.

The Person with HIV/AIDS

This concise, clinically focused pocket guide offers a complete overview of HIV in

the older patient and reviews the latest guidelines, treatment options, clinical trials, and management of HIV within this subgroup. The easily accessible text offers infectious disease specialists and other health care professionals with an excellent quick reference tool, with full color tables and figures enhancing the text further. HIV is a chronic disease that affects the immune system, leading to AIDS. As treatments have progressed and patients with HIV are living longer a new aspect has to be taken in to consideration when treating HIV and other conditions. Comorbidities are rife within older adults with HIV, as many of the treatments for HIV cause long-term side effects, such as heart conditions and cancer. Special consideration must be taken to ensure no toxic drug-drug interactions between treatments.

HIV/AIDS Treatment and Care

HIV is spreading rapidly, and effective treatments continue to elude science. Preventive interventions are now our best defense against the epidemic--but they require a clear understanding of the behavioral and mental health aspects of HIV infection and AIDS. AIDS and Behavior provides an update of what investigators in the biobehavioral, psychological, and social sciences have discovered recently about those aspects of the disease and offers specific recommendations for research directions and priorities. This volume candidly discusses the sexual and drug-use behaviors that promote transmission of HIV and reports on the latest

efforts to monitor the epidemic in its social contexts. The committee reviews new findings on how and why risky behaviors occur and efforts to develop strategies for changing such behaviors. The volume presents findings on the disease's progression and on the psychosocial impacts of HIV and AIDS, with a view toward intervention and improved caregiving. AIDS and Behavior also evaluates the status of behavioral and prevention aspects of AIDS research at the National Institute of Mental Health, the National Institute on Drug Abuse, and the National Institute on Alcohol Abuse and Alcoholism. The volume presents background on the three institutes; their recent reorganization; their research budgets, programs, and priorities; and other important details. The committee offers specific recommendations for the institutes concerning the balance between biomedical and behavioral investigations, adequacy of administrative structures, and other research management issues. Anyone interested in the continuing quest for new knowledge on preventing HIV and AIDS will want to own this book: policymakers, researchers, research administrators, public health professionals, psychologists, AIDS advocates and service providers, faculty, and students.

An Introduction to the Social History of Nursing

HIV/AIDS has become a psychiatric epidemic. The disease causes or exacerbates such psychiatric disorders as depression, dementia, schizophrenia, and bipolar disease. At the same time, the presence of a psychiatric disorder can lead to

increased risk for HIV infection and worsen the prognosis of patients once they are infected. Dr. Glenn J. Treisman, who has been described as the "father of AIDS psychiatry," describes the relationship between psychiatric disorders and HIV/AIDS and demonstrates the ways in which effective recognition and treatment of mental disorders can increase a patient's ability to obtain better treatment, improve compliance with medical regimens, and reduce incidents of high-risk behavior. The book provides HIV/AIDS professionals with overviews of psychiatric disorders, including mood and personality disorders, mental retardation, substance abuse and addiction, and sexual disorders and dysfunction. It also provides mental health professionals with essential information on how to care for patients with HIV and those at risk for the infection. The book discusses psychopharmacology, psychotherapy and counseling, as well as adherence and compliance issues, and the relationship between psychiatric disorders and other STDs. Containing the most up-to-date information on diagnosis, prognosis, and treatment, this book draws on the authors' unrivaled experience and uses case studies to show HIV/AIDS professionals how psychiatric interventions benefit the patient, the medical team, and society as a whole. The cases are rich and engaging, and convey to the reader the intense disorder that can affect the lives of patients.

HIVAIDS Care and Counselling

Increased HIV screening may help identify more people with the disease, but there

may not be enough resources to provide them with the care they need. The Institute of Medicine's Committee on HIV Screening and Access to Care concludes that more practitioners must be trained in HIV/AIDS care and treatment and their hospitals, clinics, and health departments must receive sufficient funding to meet a growing demand for care.

The Person with HIV/AIDS

HIV/AIDS management poses many different challenges around the world, and the therapies available in the West are often not economically feasible in developing countries. This new book is the first to address the myriad of clinical difficulties faced by health practitioners worldwide in managing HIV/AIDS. Edited by the same authorities responsible for the highly respected reference "The Medical Management of AIDS," with Associate Editors that include the President of the International AIDS Society and a preeminent opinion leader in the fight against AIDS in Africa, and authored by a "who's who" of current global experts on HIV and AIDS medicine, this visionary text presents all the practical, indispensable information that clinicians everywhere need to offer their patients the best possible care. Access reliable, up-to-the-minute guidance that addresses the realities of HIV/AIDS management in your geographical region, thanks to contributions from a global cast of renowned expert clinicians and researchers. Locate the clinically actionable information you need quickly with an organization that mirrors the

current state of the AIDS epidemic and the different needs of Western vs. developing-world patients and clinicians. Diagnose AIDS manifestations confidently by comparing them to full-color clinical images. Review essential data quickly through numerous at-a-glance tables.

Nursing Care of Patients with HIV/AIDS

Written by nurses for nurses, this thoroughly revised edition of ANAC's Core Curriculum for HIV/AIDS Nursing highlights the extraordinary improvements in clinical and symptom management in HIV/AIDS over the last 10 years. Containing not only the essential information that every practitioner needs to know (such as taking a medical and social history, physical examination, symptomatic conditions and management, HIV testing, and laboratory and diagnostic evaluation), ANAC's Core Curriculum also covers specialized nursing information such as case management, ethical and legal concerns, infection control, and patient education.

HIV/AIDS Nursing Care Plans

Counseling interventions are a proven and powerful way to help individuals with HIV cope with the enormous changes in their lives wrought by the disease. Proposing an innovative conceptual model for HIV clinical work, this book

Get Free The Person With HIV/AIDS Nursing Perspectives Fourth Edition

integrates empirical research on the psychosocial aspects of HIV with extensive case material. It provides a framework for assessing clients' psychosocial concerns and implementing interventions to facilitate adjustment; reviews medical and neurocognitive aspects of HIV disease progression; explores the psychotherapeutic context of HIV clinical work; and addresses risk reduction and prevention.

Global HIV/AIDS Medicine

Offering practical solutions to the problems associated with nursing care for HIV and AIDS patients, this resource is written by two highly experienced nurses from the context of both the healthcare and home environments. Designed as an easily accessible, quick-reference guide, topics include HIV and pregnancy, pediatric management, dealing with infections, and the principles of anti-retroviral therapy. Additional chapters include counseling and living positively with HIV and AIDS. The most recent research is presented and the interactive approach makes the task of putting theory into practice achievable.

Taking Turns

An examination of the AIDS crisis exposes the federal government for its inaction, health authorities for their greed, and scientists for their desire for prestige in the

face of the AIDS pandemic.

On My Own Country

Scientific Basis of Healthcare

" What Nurses Know HIV/AIDS provides up-to-date, reliable and practical health information for people living with HIV and their significant others. In easy-to-understand everyday language the authors give information to help individuals with HIV navigate the healthcare system, covering everything from receiving an initial HIV test to becoming an engaged member of their healthcare team, knowledgeable and actively involved in their healthcare decisions. The authors include vignettes based on their real-life experiences that speak to the individual with AIDS. However, they approach HIV in a holistic manner and write not for the individual with HIV, but also their friends, family, and community. What Nurses Know Series: Nurses hold a critical role in modern health care that goes beyond their day-to-day duties. They share more information with patients than any other provider group, and are alongside patients twenty-four hours a day, seven days a week offering understanding of complex health issues, holistic approaches to ailments, and advice for the patient that extends to the family. Nurses themselves

are a powerful tool in the healing process. The What Nurses Know series will give down-to-earth information, address consumers as equal partners in their care and explain clearly what a reader needs to know and wants to know to understand their condition and move forward with their lives. "

Comfort in Caring

Proper nutrition is essential to individuals with HIV/AIDS. Yet, it is often difficult to maintain an adequate diet due to a variety of conditions associated with the disease and/or medications used to alleviate symptoms. *Eating Positive: A Nutrition Guide and Recipe Book for People with HIV/AIDS* solves this problem with easy-to-follow, enticing recipes that fit a variety of common diet restrictions and specific health needs of individuals with HIV/AIDS. You can use this practical nutrition guide and recipe book to customize diet plans for your patients or for yourself (with a doctor's approval) that provide proper nutrition and satisfy the tastebuds. Chapters in *Eating Positive* are organized by diet type. Each chapter describes the diet type, its benefits and specific restrictions, and actual recipes. Each recipe is accompanied by its respective nutritional values, such as calories, fat, protein, carbohydrates, and percent of daily recommended allowance. An alphabetical index consisting of specific conditions, complications, diet titles, and food stuffs provides ease of use and quick reference. Here is just a sample of some of the many diet types, their benefits, and tasty recipes that are included: Full Liquid

Diet: good for people with mouth pain and difficulty chewing as it is easy on the digestive system; recipes include: Orange Cow, Easy Egg Drop Soup, Cherry Dessert, Cottage Cheese Jello Salad, Tropical Frozen Delight, more Fiber Restricted Diet: slows bowel movement and decreases inflammation of the tissues making it a great ally in fighting diarrhea and bowel discomfort; recipes include: Sauteed Cocktail Tomatoes, Bacon Wrapped Chicken Breasts, Vegetarian Stuffed Peppers, Ham Rolls with Eggplant Filling, more Bland Diet: for those who should avoid caffeine, alcohol, spices; recipes include: Raspberry Float, Pasta Salad, Easy Tortellini Soup, One-Eyed Egyptians, Noodle Pudding, Watercress Soup, Sour Cream Coffee Cake, German Potato Dumplings, more High Protein High Calorie Diet: increased calories and nutritional content build up energy resources and assist in improving and maintaining the immune system, stopping and possibly reversing tissue wasting and weight loss and assisting in wound healing; recipes include: Garlic Pasta, Beef and Rice Creole, Spinach Cheese Pie, Tournedos of Beef with Shallot Sauce, Banana Nut Bread, Butterscotch Pie, Pineapple Coconut Cake, many more These diets are not prescriptions but rather guides for creating and consuming a practical diet to suit individual needs. You'll find that Eating Positive puts individuals with HIV/AIDS on the road to a more pleasing, fulfilling, and healthy diet.

Cognitive-Behavioral Stress Management

Evaluation of PEPFAR

Focused on Botswana's only dedicated oncology ward, Improving Medicine renders the experiences of patients, their relatives, and clinical staff during a cancer epidemic.

Culture Care Diversity and Universality

This book addresses several important aspects of HIV/AIDS care and treatment in a concise, accessible format; it is not meant to be a comprehensive reference book. Recommended references and citations are provided for the reader to be able to access in-depth information on topics that are particularly important and/or controversial. Appropriate use of antiretroviral drugs, treatment of opportunistic infections, symptom management, treatment of concurrent medical conditions, and other specific interventions to treat HIV disease and its complications are addressed. Recognizing the broader array of best practices that contribute to effective clinical outcomes among patients with a complex array of service needs, the authors also address patient evaluation, adherence, mental health, substance abuse, overall clinic management, and other factors that lead to improved patient outcomes according to the Chronic Care Model.

The Person with HIV/AIDS

The first edition of this book was first on the market to address the complete perspective of patient care for the AIDS patient. This revised edition provides an in-depth overview of the pathophysiology, transmission, spectrum of disease and medical management of HIV disease in adults and adolescents. Psychological issues are addressed as well as the scope of physical signs and symptoms of the patient. Nursing interventions are categorized based both on accepted nursing diagnoses and primary, secondary, and tertiary prevention.

HIV/AIDS and Older Adults

Living with HIV can be stressful, which can affect both your emotional and physical well-being. You may feel a loss of control over your life, socially isolated, or anxious and depressed. Studies have shown that prolonged stress can negatively impact the immune system, making it less effective in fighting illness. If you are concerned about the impact stress has on your life and on your health, this book can help you learn to relax and manage stress more effectively. This book presents a group treatment program that has been scientifically proven to reduce stress in individuals living with HIV. Written by the developers of this groundbreaking program, this workbook is based on the principles of Cognitive-Behavioral Stress

Get Free The Person With Hivaid's Nursing Perspectives Fourth Edition

Management (CBSM). You will learn a variety of relaxation techniques, all designed to help you reduce tension and stress. As you become more aware of stress and its effects, stress management skills will increase your ability to cope. This workbook comes complete with user-friendly monitoring forms and homework exercises designed to help reinforce the skills learned in group. It also includes instructions for relaxation practice that will remain useful long after you've completed the program. Used in conjunction with the group program described in the corresponding facilitator guide, this workbook will help you successfully manage stress and lead a more healthy life. TreatmentsThatWork™ represents the gold standard of behavioral healthcare interventions! · All programs have been rigorously tested in clinical trials and are backed by years of research · A prestigious scientific advisory board, led by series Editor-In-Chief David H. Barlow, reviews and evaluates each intervention to ensure that it meets the highest standard of evidence so you can be confident that you are using the most effective treatment available to date · Our books are reliable and effective and make it easy for you to provide your clients with the best care available · Our corresponding workbooks contain psychoeducational information, forms and worksheets, and homework assignments to keep clients engaged and motivated · A companion website (www.oup.com/us/ttw) offers downloadable clinical tools and helpful resources · Continuing Education (CE) Credits are now available on select titles in collaboration with PsychoEducational Resources, Inc. HIV/AIDS and the World of Work

Counseling Clients with HIV Disease

The WHO Regional Office for Europe has combined its 13 protocols on treatment of and care for people with HIV and AIDS in one volume. The protocols are the cornerstone of the strategic actions that WHO has taken as part of its contribution to achieving the goal of universal access to HIV/AIDS prevention, treatment, care and support services. The protocols were specifically developed for the entire WHO European Region. Together, they represent a comprehensive and evidence-based tool that offers health professionals clear and specific advice on diagnosing and managing a wide range of health issues related to HIV/AIDS for adults, adolescents and children, including antiretroviral treatment, the management of opportunistic infections, tuberculosis, hepatitis, injecting drug use, sexual and reproductive health, the prevention of mother-to-child HIV transmission, immunization, palliative care and post-exposure prophylaxis. [Ed.]

Eating Positive

ANAC's Core Curriculum for HIV / AIDS Nursing

Evidenced-based texts are taking on a greater role in the education of healthcare

providers. With an emphasis on this modality, this volume explores several topics related to the treatment of patients with the autoimmune form of arthritis known as rheumatoid arthritis. Topics include disease outcomes, leukocyte immunoglobulin-like receptors, cardiovascular risk associated with arthritis, cytokines, and alleles in rheumatoid arthritis. The book also examines various drugs used in treatment for pain relief and reduced inflammation.

HIV Screening and Access to Care

In recent years the study of nursing history in Britain has been transformed by the application of concepts and methods from the social sciences to original sources. The myths and legends which have grown up through a century of anecdotal writing have been chipped away to reveal the complex story of an occupation shaped and reshaped by social and technological change. Most of the work has been scattered in monographs, journals and edited collections. The skills of a social historian, a sociologist and a graduate nurse have been brought together to rethink the history of modern nursing in the light of the latest scholarship. The account starts by looking at the type of nursing care available in 1800. This was usually provided by the sick person's family or household servants. It traces the interdependent growth of general nursing and the modern hospital and examines the separate origins and eventual integration of mental nursing, district nursing, health visiting and midwifery. It concludes with reflections on the prospects for

nursing in the year 2000.

And The Band Played on

The Association of Nurses in AIDS Care (ANAC) presents the essential information needed by every nurse working with HIV/AIDS patients in any setting. The text provides an educational framework for HIV/AIDS clinical content and serves those preparing for specialty certification in HIV/AIDS training. The text covers: A) Infection, transmission, and prevention B) Clinical management of a variety of patient types C) Symptomatic conditions and symptom management D) Special populations E) Psychosocial concerns for patients. ANAC's Core Curriculum for HIV/AIDS Nursing, Third Edition includes the following new topics: Updates to the evidence basis underlying the nursing care of persons with HIV/AIDS. New issues and challenges including the care for pediatric patients and adults with giardia, syphilis and bipolar disease. New text features including case studies and quizzes.

Contextual Analysis of Nursing Assistance to a Person with HIV/AIDS.

This volume focuses on the ways in which HIV/AIDS can affect older adults. The chapters in this book discuss the variety of HIV/AIDS problems that we face at the

individual, family, and community levels. Topics examined include demographics and epidemiological aspects of HIV disease with this population; prevention of HIV disease; issues impacting individuals in a medical, psychological, and social context; and service needs. Originally published as a special issue of the Journal of Mental Health and Aging, the volume contains new chapters on demographics, HIV prevention and education, and effective coalition building among systems of care. Contributors include Diane Zablotsky, Michael Kennedy, Janice Nichols, and Timothy Heckman, among others. For Further Information, Please [Click Here!](#)

Remaking a Life

"This is an excellent reference for those caring for clients with HIV/AIDS. I strongly recommend this book." --Doody's HIV/AIDS is no longer a certain death sentence. Patients fighting the chronic symptoms of HIV/AIDS are now living longer, fuller lives due to recent scientific and pharmaceutical breakthroughs. As a result, the new generation of caregivers must keep pace with cutting-edge, evidence-based practices to better serve patients who may live with HIV/AIDS for several decades. This updated edition is a vital resource for nurses and other health care professionals providing care to HIV-positive persons in the 21st century. ANAC's Core Curriculum for HIV/AIDS Nursing

This book is aimed at preventing the spread and mitigating the impact of HIV/AIDS in the world of work. It is built on and around two pillars. The first--which is at the heart of all the ILO's work--is the protection of workers against discrimination. The second is prevention: the workplace is not only an appropriate but an essential place for HIV/AIDS information, education and behavior change. The code provides invaluable guidance to policymakers, organizations and the social partners for forming effective and appropriate workplace and national policy that respects the dignity of all workers. HIV/AIDS in the workplace is a complex issue, and the book covers the key principles surrounding it, such as recognition of HIV/AIDS as a workplace issue, the role of social dialogue, the gender dimension, confidentiality, screening and testing, and adapting jobs and workplaces to the capacities of workers with HIV-related sickness. It looks at the specific responsibilities of

governments, workers' and employers' organizations--and includes measures for education, care and support, and training for all with workplace responsibilities. Aiming to promote decent work in the face of the HIV/AIDS epidemic, the code laid out in this volume applies to all working men and women and to all types of work.

A Guide to Primary Care of People with HIV/AIDS

In the face of life-threatening news, how does our view of life change—and what do we do to transform it? *Remaking a Life* uses the HIV/AIDS epidemic as a lens to understand how women generate radical improvements in their social well being in the face of social stigma and economic disadvantage. Drawing on interviews with nationally recognized AIDS activists as well as over one hundred Chicago-based women living with HIV/AIDS, Celeste Watkins-Hayes takes readers on an uplifting journey through women's transformative projects, a multidimensional process in which women shift their approach to their physical, social, economic, and political survival, thereby changing their viewpoint of "dying from" AIDS to "living with" it. With an eye towards improving the lives of women, *Remaking a Life* provides techniques to encourage private, nonprofit, and government agencies to successfully collaborate, and shares policy ideas with the hope of alleviating the injuries of inequality faced by those living with HIV/AIDS everyday.
